Jimothy's D10 Isekai JRPG

World of Terrana

Jimothy's D10 Isekai JRPG

Core Rulebook

The World of Terrana

A Foreword from Jimothy

I made this system not as an attempt to make money but as a project of passion. I love roleplaying games, I love JRPGs, I love isekai, anime, movies, and so much more, and I could just never find a game system that felt right. So I took it upon myself to make one.

I hope that I've made a fun and easy to use system, one that contains complexities for those who enjoy them, mixed with ease of use. At least that is my hope.

I took inspiration from many, many things. It would probably take half the book just explaining them all, but I want it stated that I have no intention of claiming ownership of anything. I borrowed and compiled, and hopefully I have made a system that gives Storytellers and Players the freedom to build a story together and to have fun with it.

I wanted a system that I felt could inhabit any manner of game. My intention with this book is to establish the world I wish to run my games within. But anyone could use this system and place it in their own world, and hopefully it makes perfect sense. You could run a game in the distant past before technology came along, or in the distant future with space-traveling mercenaries. It is my own personal D10 System for all.

Jimothy

Introduction

Welcome to Terrana

Jimothy's D10 Isekai JRPG is a tabletop roleplaying game played with ten-sided dice. One player is the Storyteller, who describes the world, plays everyone the characters meet, and keeps the story moving. Everyone else plays a character of their own making. Together you decide what your characters attempt, and the dice decide how well it goes.

A Note on the World

The Slime King arrived in Terrana about 150 years ago. In that time the world has advanced in technology, science, and magic until it holds many of the comforts of the 20th and 21st centuries of our own world. It is a mismatch of all kinds, adapted around one key difference: where our world struggles with fuel and power, Terrana uses magic in their place.

Terrana has come a long way from the world it once was.

How to Use This Book

The book is organized so you can read what you need, when you need it.

Learning the World

Chapters 1 through 5 cover Terrana itself: where it came from (Chapter 1), its lands and the settings you can play in (Chapter 2), the island nation of Monsera (Chapter 3), the Grand Dungeon (Chapter 4), and the Legends of Terrana, the names at the top of the world's rankings (Chapter 5).

Many lore sections are written by Liris Kant of Monsera University, a scholar who has spent a career studying the peoples and places of Terrana. Read them for flavor and for the things your character would already know. Rules sections are written plainly and are marked by their headings.

Making a Character

Chapter 6 walks through character creation one step at a time, in order. Chapters 7 through 11 hold the options for each step:

Chapter 7: Tropes, Virtues, and Vices

Chapter 8: Heritages

Chapter 9: Merits and Flaws

Chapter 10: Backgrounds

Chapter 11: Willpower, Fate, Sanity, and Mana

Keep a character sheet beside you and fill it in as you go. For a first session, a player only needs Chapter 6 and the chapters it points to. Everything else can be read as it comes up at the table.

Playing the Game

Chapters 12 and 13 cover the rules used during play: Martial Combat Styles (Chapter 12) and Magic (Chapter 13), including the seven casting schools, Battle Aura, and resurrection. They are written for quick lookup in the middle of a session. Chapter 14 covers Equipment and Items, with loot tables, Chapter 15 is a Bestiary of creatures, monster peoples, and bosses with stat blocks, and Chapter 16 covers Alternate Eras for games set in Terrana's past or future. Key terms and conditions are gathered in the index at the end of the book, followed by the battle maps and the combat playmat (each in a light and a dark version), the Summoner's Sheet, and the character sheet.

Giving Feedback

This system is still growing, and play is how it improves. When a rule is unclear, feels off, or does not cover something that happened at your table, flag it. Note the chapter and section, what came up, and how your table handled it in the moment, then pass it along to Jimothy. Specific notes like these shape the next version of the book.

Chapter 1: The Six-Faced World

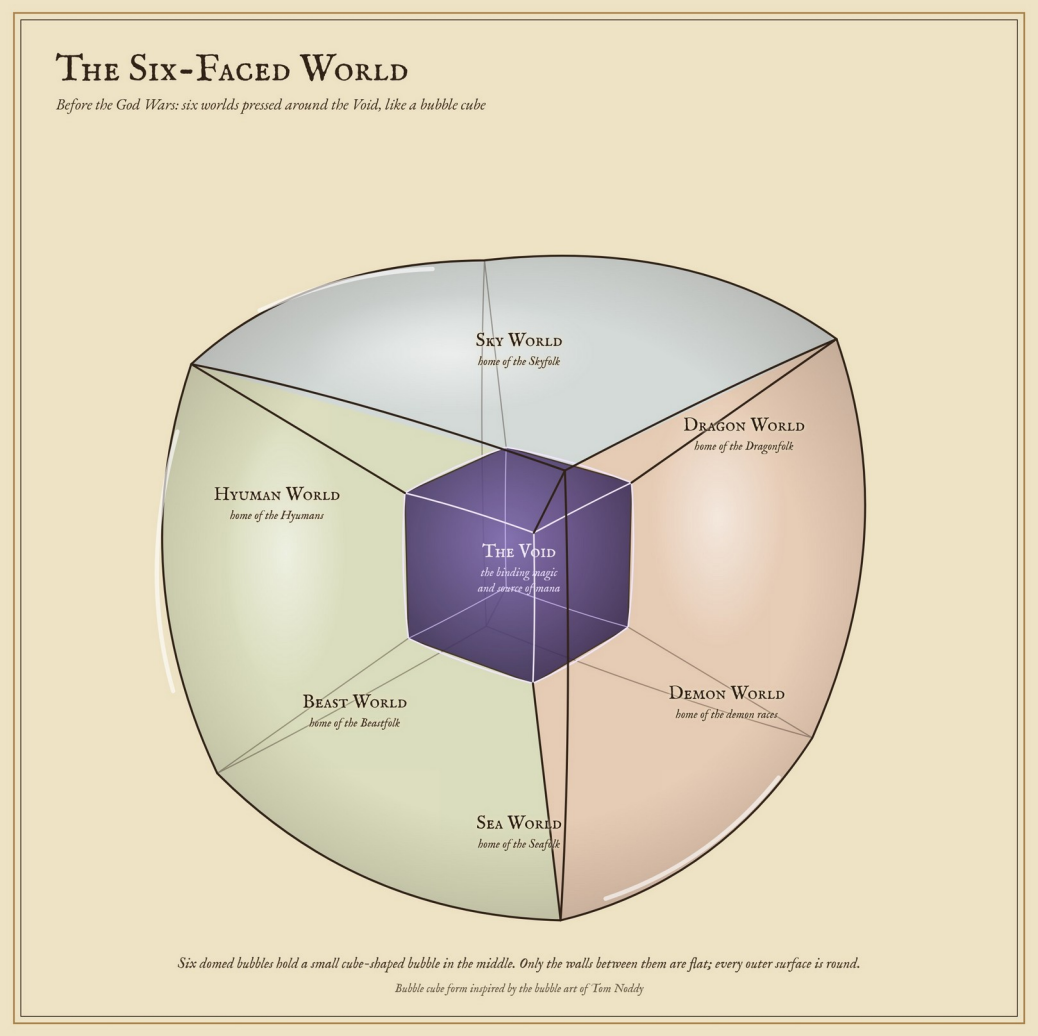
Terrana was not born as one world. It was forged from the ruins of six.

From "On the Nature of Worlds" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

People often ask me what the world is. The short answer is that ours is not the only world that ever existed. It is the only one left.

There were six, once, joined around a seventh place at their center. Five were destroyed in the God Wars. Their survivors came here, to the Hyuman World, and brought their peoples, their magic, and their grudges with them. Terrana is what grew from that.

Some of what follows is recorded history. Some is theory from my colleagues at the university. Some is faith. I have tried to mark which is which, and where the record runs out, I say so.



The Six-Faced World

Before recorded history, six worlds existed together. Each was its own complete reality with its own peoples, cultures, and magic: the Hyuman World, the Beast World, the Demon World, the Dragon World, the Sky World, and the Sea World.

The six were joined like bubbles pressed around a smaller seventh at their center. That center was the Void. Potent magic held the structure together. The walls where the worlds met were flat, while every outer surface stayed round. Scholars call the whole structure the Six-Faced World.

The God Wars

The Hyuman God went missing. Something took his place: an impostor now called the Man God, who claimed his title and his authority.

The Man God murdered Lunaria, wife of the Dragon God and sister of the Hyuman God, and arranged for the gods of the other worlds to take the blame. In his grief, the Dragon God went to war. One by one, the Dragon World, the Demon World, the Beast World, the Sea World, and the Sky World were destroyed.

The Hyuman World survived because it sat on the far side of the structure, the hardest of the six to reach. When the fighting ended, the survivors of the five fallen worlds fled there. They brought their heritages, their traditions, their magic, and their grief. The Hyuman World took them all in, and it became Terrana.

The impostor did not escape what he started. The Man God, known by the name Hitogami, is bound in the Void, and he remains there today.

Some of this history is left uncertain on purpose. The Followers of Milis worship the Hyuman God as though he were the God of Creation, and the faithful and the scholars of Terrana do not always agree on what happened or why. Mysticism and faith have as much room in Terrana as the university's records do.

Terrana and the Void Today

Five of the six outer worlds are gone. What remains are two bubbles pressed flat against each other: Terrana on top and the Void World beneath it. The land of Terrana sits on the shared wall between them.

Mana passes freely back and forth through that wall. Most of the Void is formless creation energy, the source of all mana. It takes no shape until someone gives it one, which is what a mage does when casting a spell.

Monsera University's current theory holds that the Void contains two kinds of mana, and that magic is what happens when the two fuse. It is the best explanation anyone has offered so far, but it remains a theory.

The Dreeming and The Seeming

When Hitogami lost his hold on the Void, it split into regions. In two of them, belief takes shape. Stories, dreams, and fears that enough people believe strongly enough take form there, and a character believed in hard enough can appear as a living being.

The Dreeming: Where Terrana itself looks like a grounded anime world, the Dreeming is wonky and cartoonish, a place of crooked towers, oversized mushrooms, and landscapes that bend like the pages of an old children's comic. Kind and wondrous beliefs come to life here, and the fey who thrive in it are generally good-natured.

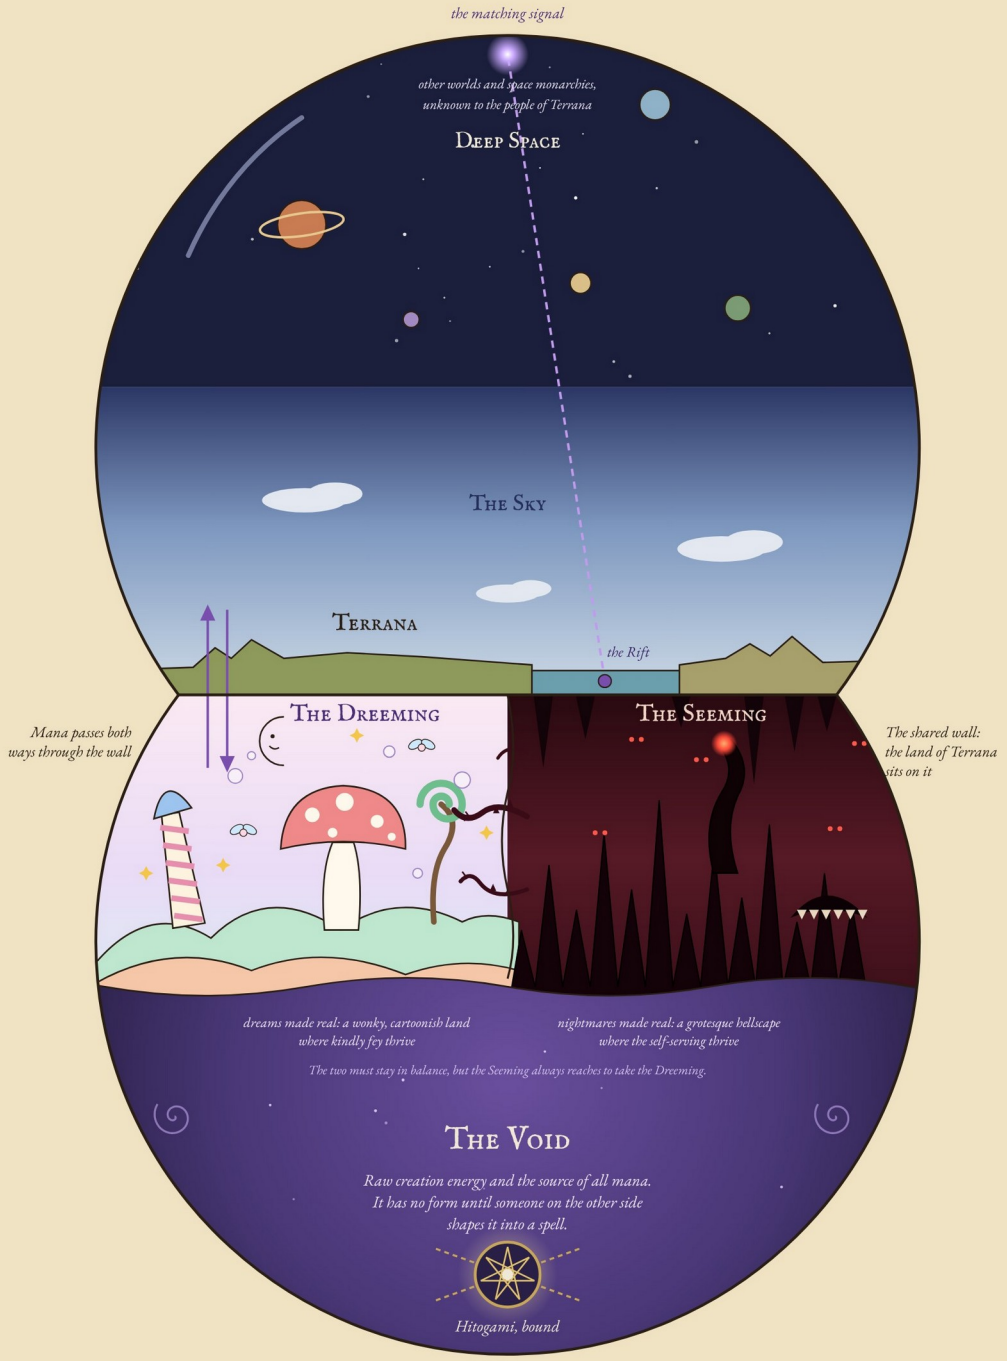
The Seeming: The Seeming is a nightmarish hellscape where fears and dark tales are made real. Its landscape is grotesque, and the things that thrive there are the self-serving ones.

The two must stay in balance, but the Seeming does not rest. Its corruption almost always works toward ways of taking over the Dreeming, and the border between them is under constant pressure.

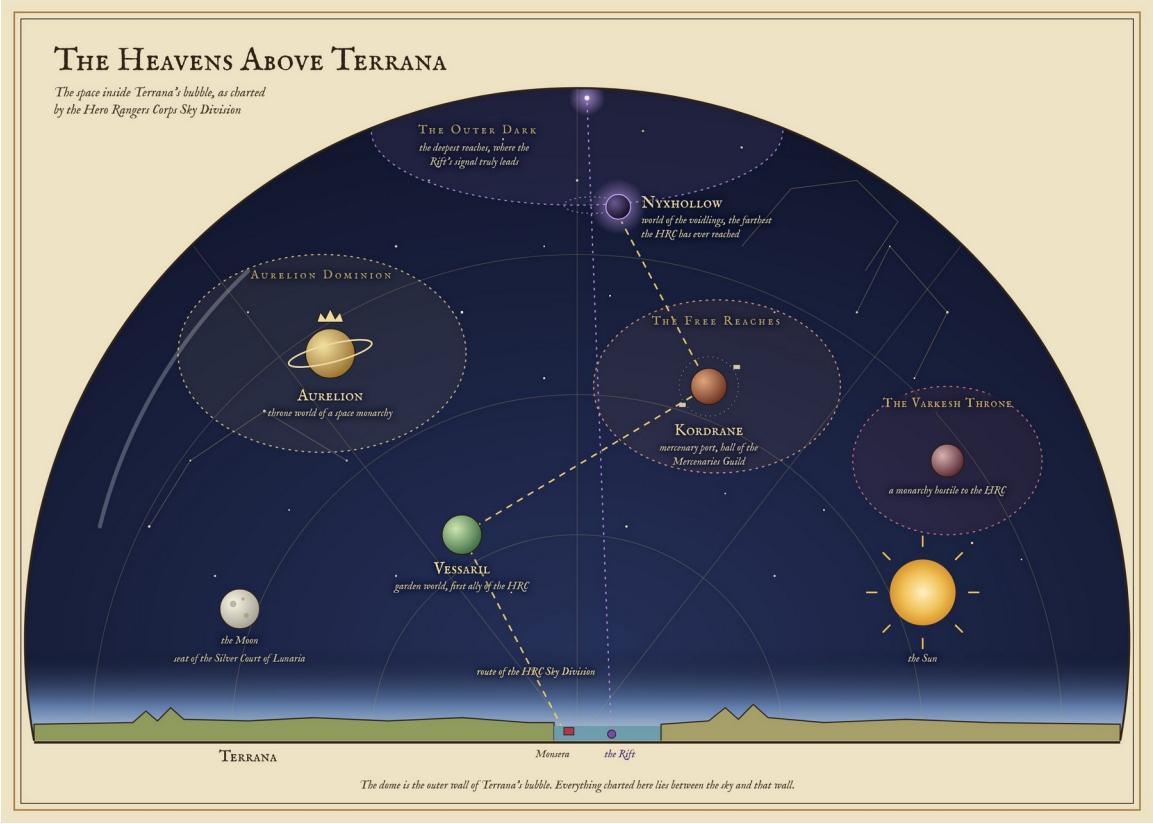
Beyond them lies the rest of the Void, raw and formless. Somewhere within it, Hitogami remains bound.

Terrana and the Void Today

After the God Wars: five worlds are gone. Terrana and the Void remain, pressed flat against each other.



The Heavens Above Terrana



Above Terrana's surface is a vast sky, and above the sky is space. Space holds other worlds, other peoples, and monarchies that rule whole regions of it. In the present day, the people of Terrana know none of this.

Games in Other Eras

This book's default setting is Terrana as it is today, but the system is built to carry a game into any era of the world's history.

The Distant Past: A game set long ago, during or just after the Great Hyuman-Demon War: a dark age of war, kingdoms, and swords.

A Fallen Future: A post-apocalyptic Terrana where today's modern technology has become a collection of ancient relics.

The Space Era: A researcher at Monsera discovers that the energy signal of the Rift matches energy coming from far out in the sky. The Hero Rangers Corps forms a sky division to travel to other planets and connect their peoples. Games in this era take place hundreds to a thousand years after that discovery.

In the Space Era, ships are common, though never cheap. Many planets and species are friendly to the Hero Rangers Corps, and some are not. Mercenary crews fly for hire under the Mercenaries Guild, much as adventurers work under the Adventurers Guild today, while space monarchies rule their own corners of the sky. Terrana itself remains playable throughout.

The closest anyone has come to the source of the Rift's signal is Nyxhollow, a planet full of the voidlings that sometimes break into Terrana. Its energy resembles the Rift's, but the signal leads much further, into the deepest reaches of space.

The full details of the Space Era and the other alternate eras are in Chapter 16.

Those Who Arrive

From "On Arriving" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Souls from other worlds sometimes arrive in Terrana. The scholarly term is displacement reincarnation. Nearly everyone else says isekai.

It has happened for as long as there are records. Most arrive as infants. Some arrive as children. A few arrive as adults and wake somewhere unfamiliar with no idea how they got there.

What they bring varies. Some bring memories of their old lives. Some bring knowledge of things this world had never seen. Some bring nothing but themselves.

The Slime King is the best-known case and, by general agreement, the most extreme. Monsera University's Special Students program exists to find and support others like him. In my experience, most of them settle in well.

Five continents, two island realms, and one sea that ties them together.

From "A Survey of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Most people in Terrana never travel far from where they were born, and many hold firm opinions about places they have never seen. This survey describes the lands as my colleagues and I have found them, from the frozen north of the Central Continent to the bogs of the Demon Continent.

Borders move and rulers change. Where something here is out of date by the time you read it, I ask for the reader's patience. The coastlines, at least, have held still for a long time.

Terrana is made up of seven major landmasses around the Ringus Sea: the Central, Demon, Milis, Begaritt, and Heaven Continents, the island nation of Monsera, and the Shaded Isles. The Merfolk and Fishfolk hold the waters between them.

The Central Continent

The largest landmass in Terrana and home to the greatest share of its Hyuman population. The Red Dragon Mountain Range splits the continent into three regions: the North, the West, and the South. The Dragon King Mountain Range runs down its southeastern side, with dense forest along its slopes.

The North

A frozen, unforgiving expanse where survival depends on willpower and magical innovation.

The Three Magic Kingdoms: Ranoa, Neris, and Basherant were historically centers of traditional magical learning in a cold and difficult region. Today they are modernizing quickly, using mana-powered heating networks and agricultural magic imported from Monsera to tame their climate. Their partnership with Monsera University is one of the most productive academic relationships in the world.

The Kingdom of Biheiril: Set among the northeastern forests and mountains, this Hyuman kingdom keeps long-standing ties with the Ogres of the nearby islands. Its deepest woods shelter the continent's only Superd settlement, a fierce and insular people who protect the realm from threats beyond Hyuman capability while the kingdom leaves them to live as they choose.

The Holy Land of the Sword: A land of permanent winter in the far northwest, devoted entirely to mastering the Silver Arc Style of long blades. Many who hope to win the title of Sword God come here to train. It remains stubborn, deeply traditional, and largely unchanged by time.

The Ogre Islands: A chain of islands off the northeastern coast and the ancestral home of the island Ogres. Most of its people train to master the Ten Count Style of boxing or the Drifting Leaf Style of kung fu.

The West: The Asura Kingdom

The most fertile and prosperous region on the continent, dominated by the Asura Kingdom, the most powerful Hyuman nation in the world.

A Modern Kingdom: Once an absolute monarchy, Asura is now a constitutional monarchy governed by a parliament. The royal family functions mainly as high-society celebrities and ceremonial figureheads. Merit-based inheritance rules mean titles do not automatically pass to the eldest child.

The Capital City of Ars: The political and economic heart of the nation, governed as its own district apart from the four regions. Ars is the largest and most populous city in the Hyuman world and the seat of both the royal family and parliament.

Outside the capital, the kingdom is divided into four regions, each traditionally overseen by a branch of the Greyrat noble line:

The Fittoa Region (Northeast): Ruled by the Boreas Greyrat family. An agricultural and pastoral frontier anchored by its administrative hub and fortress city, Roa.

The Milbots Region (East): Governed by the Notos Greyrat family. It sits along key routes and serves as the kingdom's main gateway for continental trade.

The Donati Region (Northwest): Overseen by the Zephyrus Greyrat family. A strategic and agricultural anchor for the northern borders.

The Wisiru Region (South): Governed by the Euros Greyrat family. The southern territory is known for its distinct climate, geography, and natural resources.

The South

A fractured territory defined by a stark divide between lawless chaos and corporate rule.

The Strife Zone: The northern half of the region is an ungoverned wilderness of tribal towns caught in permanent, low-level warfare. Void Openings breach here more often than anywhere else on the continent. It has become a haven for insular, low-tech refugee villages escaping the corporate regimes to the south. Monsera has recently made strides in outreach by opening small schools for any child born in the zone.

Breakwater: On the coast just east of the Strife Zone sits Breakwater, Monsera's military port and trade gateway on the continent. It is described in full in Chapter 3.

The Corporate Kingdoms: Shirone (Rone Co.), Kikka (Kik Co.), and Sanika (Ani Co.) keep the appearance of crowns and noble titles, but real legislative power belongs to corporate CEOs and boards of directors. Society is divided by literal walls into three tiers: Shareholders, Managers, and Laborers, with perimeter walls built to keep workers from escaping. Decades of suppressed revolutions have left their working districts in ruins.

The Dragon King Kingdom: At the southern tip of the continent, this proud monarchy is the trade bridge between Monsera's southern operations and the Begaritt Continent, with East Port and West Port handling most of that traffic. It is the third most powerful nation in the world and has modernized modestly while keeping its cultural identity.

The Demon Continent

A harsh land east of the Ringus Sea. Its ambient mana density is higher than anywhere else in Terrana, which makes for deadly terrain and some of the most dangerous monsters in the world. The continent is divided into ten domains, each ruled by an Immortal Demon King, and all of them honor the title of the Empress.

Most trade with the rest of the world passes through Kurasuma in the northwest and through Wind Port and Zanto Port in the south. Migurd Village, home of the Migurd, and the city of Rikarisu both sit in the northeast.

Empress Kishirika Kishirisu

The chaotic, current Empress of the Demon World, brought to this realm by Necross Lacross during the God Wars. She is volatile, but legendary for her generosity, and has been known to gift one of her coveted Magic Eyes to those who help her. The Magic Eyes and how a character can earn one appear in Chapter 9.

The Ten Domains

Badigadi, Biegoya: The husband of Kishirika Kishirisu, known across realms as the Fighting God and the Wise Demon King. His domain of Biegoya lies in the far northeast. Badigadi is one of the few beings the Slime King treats as a peer.

Beethove Tovetha, the Library Labyrinth: A monstrous black slime-octopus that rules the Library Labyrinth in the north, using its own ink and tentacles to record every piece of written lore in the world.

Raja Iblis Baglahagla: The pig-like King of the Orcs, whose domain covers the northwest of the continent.

Vita, the Abyssal King: A parasitic blue slime-demon ruling a domain in the west. Anyone who ingests Vita

suffers blinding illusions and visions while Vita takes complete control of their mind and body.

Necross Lacross: A renowned tactician of several ancient conflicts who fought in the God Wars, and father to Atoferatofe and Badigadi. His domain lies at the heart of the continent.

Atoferatofe Ryback, Gaslow: A terrifying combatant and sister to Badigadi. She is infamous for kidnapping foreign royalty and challenging powerful warriors; those she defeats are conscripted as her “disciples.” Her domain, Gaslow, is a dark bog in the east, and a dark dragon is often seen flying over it.

Lynebyne, the Stone King: Ruler of a domain in the southwest of the continent.

Samedynomedy, Demon King of Light: Ruler of a domain in the south.

Patorsetor, the Enchantress Demon King: Ruler of a domain on the southeastern coast.

Qeblaqabla, the Evil Demon King: A floating orb leaking black liquid, ruling a domain at the continent's southern end.

Legends of the Demon Continent

The First Demon God: The multi-armed, six-horned progenitor of many immortal demons, slain during the God Wars.

Kirisis Calisis: The First Empress.

Malta: The Ogre God.

Laplace: The Demon God, born of demon and dragon blood.

The Milis Continent

Southeast of Monsera, the Milis Continent is split in two by the jagged Blue Dragon Mountain Range.

The Great Forest: The northern expanse and the ancestral home of the Beastfolk, whose territory covers most of the forest. The Holy Sword Highway runs through it, connecting the north of the continent to the south.

Elf Territory: In the forest's eastern reaches, the reclusive Elves live in balance between nature and some of the most advanced technology Monsera has produced.

Halfling Territory: On the hilly western coast, the Halflings have adopted small amounts of technology while staying close to their traditional roots.

Dwarf Territory: Along the northern side of the Blue Dragon Mountains, the Dwarves have taken a great interest in steam power. The technology started in Monsera, but the Dwarves have embraced it more than any other recent advancement.

The Holy Milis Kingdom: The southern expanse, with its capital at Milishion, and the seat of the Church of Milis. It is the second most powerful nation in Terrana and a genuinely integrated society, with Hyumans and Beastfolk each making up roughly half the population. The Holy Church of Milis, the royal families, and parliament form three co-equal branches of government, though historically the Church has had the greatest say.

The Begaritt Continent

A lawless, treacherous landmass in the southwest with no unified government. It is populated almost entirely by adventurers, outlaws, and those who wish to live outside the reach of any state. The continent is defined by its dangerous concentration of shifting Labyrinths and volatile magical anomalies.

Labyrinth Town Rapan: On the southern coast, the town of Rapan is built within the ribs of an enormous Behemoth skeleton and serves as the main base for those who delve the continent's Labyrinths.

The Heaven Continent

A sheer plateau resting three thousand meters above sea level in the north. It is home to the Skyfolk, winged, elf-like people whose aloof and detached outlook often makes them seem alien to outsiders.

The Hell Dungeon: Beneath the plateau lies the Hell Dungeon, a rift descending through nine layers. It is described in full in the section that follows.

The Hell Dungeon

The Hell Dungeon is a nine-layered rift beneath the Heaven Continent. Each layer is its own kingdom, ruled by a devil prince or queen, and together they make up what most of Terrana simply calls Hell. It is not to be confused with the Grand Dungeon of Monsera, though the naming has caused confusion before.

An Economy of Suffering

For as long as anyone can remember, Hell has run on suffering. Devils harvest mana from pain, fear, and despair, and the old powers of Hell built their kingdoms on that harvest. About sixty years ago, Sciel, Queen of the third layer, proved that devils can harvest and regenerate mana just as well from happiness and other positive emotions. She left Hell before the fighting truly began and, with the Slime King's help, founded Nite City in the Grand Dungeon, which has been a refuge for fleeing devils ever since.

Mahk, whose true name is Belethore, once ruled the second layer. He left as well, and today he runs the CCN's studios hidden in the Grand Dungeon. Their departures shook Hell to its foundations.

The War for the Old Ways

Zagan, Prince of the fourth layer, saw the new way of living as a threat to everything Hell was built on. He launched a war of conquest to unite Hell under his rule and preserve the old ways of suffering. His forces took the fifth layer and captured its queen, Gremory, and the sixth layer's ruler, Marchosias, now serves under him.

The second and third layers, left without their rulers, are now governed by Mahk's cousin, also named Belethore. He rules as Zagan's puppet, and with both layers under Zagan's control in all but name, the fighting has come to a standstill. Total chaos has been avoided in recent times through the diplomatic efforts of Monsera's Slime King.

Not every layer has fallen in line. Phenex of the seventh layer, Eligor of the eighth, and Astaroth of the ninth rule independently, and the three work together to keep Zagan's forces from conquering any further up into Hell. The seventh layer, bordering Marchosias's domain, is almost always in a constant state of battle. Lucifer of the first layer also remains independent.

The calm is not peace. Zagan has turned his attention to the world outside Hell, and his agents work to cause mayhem across Terrana.

Layer	Ruler	Status
1	Lucifer	Independent
2	Belethore (Mahk's cousin)	Zagan's puppet. Formerly ruled by Mahk (Belethore), who left for the Grand Dungeon
3	Belethore (Mahk's cousin)	Zagan's puppet. Formerly ruled by Sciel, who founded Nite City
4	Zagan	Seat of the would-be conqueror of Hell
5	Held by Zagan	Conquered; its queen, Gremory, is his captive
6	Marchosias	Serves under Zagan
7	Phenex	Independent. Allied with layers 8 and 9 against Zagan; almost always at war
8	Eligor	Independent. Allied with layers 7 and 9 against Zagan
9	Astaroth	Independent. Allied with layers 7 and 8 against Zagan

Monsera

The island nation of Monsera sits in the southern Ringus Sea, between the Central Continent and the Milis Continent. It is the technological and magical center of modern Terrana. Its history and institutions are covered in full in Chapter 3.

The Capital: A sprawling metropolis governed by a guild-based parliamentary democracy and home to the world-renowned Monsera University.

The Grand Dungeon and Arena: Just east of the capital. The grand colosseum above is owned by the citizens of Monsera, while the 100-floor Dungeon below is co-owned by the Slime King and the Earth God. No adventuring party has ever cleared the final ten floors. The Dungeon is covered in Chapter 4.

Hero Rangers HQ: On the island's north shore stands the headquarters of the Hero Rangers Corps, who guard the world against the Rift.

The Shaded Isles

A mist-shrouded archipelago east of Monsera. The isles are part of the Monsera nation, much as an outlying island belongs to its mainland, but they are home to three ancient, sovereign noble houses of the Undead.

The Vampiric Kingdom: The largest of the isles, ruled by an ancient house of Vampires.

The Dullahan Kingdom: Southeast of the Vampiric Kingdom, ruled by a noble house of Dullahans.

The Liches' Domain: Just south of the Vampiric Kingdom, ruled by a noble house of Liches.

The Ringus Sea and Surrounding Waters

The stormy central ocean that connects every land in Terrana, and the open waters beyond its coasts.

The Rift: A permanent, catastrophic tear into the Void at the center of the sea. About once a year it ruptures and releases a Kaiju-class threat. These disasters are held back by the Hero Rangers Corps alone, operating from their stronghold on Monsera's north shore.

The Seafolk

The waters of Terrana belong to the Merfolk and the Fishfolk. Merfolk prefer the central waters of the Ringus Sea, while Fishfolk prefer the northern and southern waters. The two peoples intermingle and intermarry freely, but each tribe answers to its own sovereign Chieftain.

An island of monsters that became the most advanced nation in the world.

From "A Survey of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

I have lived and taught in Monsera for most of my career, which makes it the hardest place in this survey to describe fairly. Visitors notice the lights, the trains, and the screens. Residents notice that a goblin, a harpy, and a Hyuman can sit at the same lunch counter and nobody looks twice. Both observations are true.

Monsera is the most technologically advanced civilization in Terrana. The island sits in the southern Ringus Sea and was once home to a fractured, tribal collection of monster peoples. Today it is a city-nation that does not fit any older category.

Its look sits somewhere between a modern New York, a neon Tokyo, and a late-1990s vision of the future. The public transit network is efficient and covers the whole island. The Crystalz Communication Network (CCN) puts a personal communication and data device in the hands of nearly every citizen. Because of the particular interests of its ruler, video game technology has reached a level that mirrors the PlayStation 1 and Nintendo 64 era of another world. Education is treated as a basic right: Monsera University charges no tuition and pays its students a stipend.

A Brief History of Monsera

About 150 years ago, the being now known as the Slime King arrived in Terrana as a blind, senseless slime. He spent his first decade in total sensory deprivation, holding on to his sanity through a single desire to play video games again and the help of his Great Sage ability. His real work began only once his Awareness grew strong enough to perceive his surroundings.

The twenty years that followed were defined by diplomacy rather than conquest. The Slime King moved among the island's warring monster factions, learned their fears, desires, and cultures, and bargained with them until the tribes agreed to unite. Over the next two decades, the foundations of modern Monsera were laid.

Foreign empires watched from a distance and dismissed the island as “Monster Island.” Earlier colonial attempts by Hyuman kingdoms had failed badly against its territorial and diverse monster populations. They did not expect a leader who rejected colonialism entirely and chose integration instead.

About a hundred years ago, Monsera opened its first global trade routes and diplomatic ties, and the outside world was forced to recognize it as a sovereign power. Everything that defines the modern setting was built during the century that followed: the university, the CCN, the Grand Dungeon, the Guild Cabinet, and the Hero Rangers Corps.

The Slime King: Julius Geoffrey Golbjorn

Before his reincarnation, Geoffrey was a computer science student in Stockholm, Sweden. On November 1st, 1997, the Swedish release date of Final Fantasy VII, he was struck and killed by a moving van while crossing the street, reading the game manual he had waited in line to buy. He died holding the game without ever having played a second of it.

Monsera is the direct result of that loss. To play video games, Geoffrey needed screens. To make screens, he needed an industrial supply chain. To support manufacturing, he needed global infrastructure, an advanced civilization, and a highly educated population.

Today he sits on a beanbag chair in the royal suite of Monsera Palace, playing video games. His current grand project is an exact reconstruction of Final Fantasy VII, the game that got away, carried out through the university's Special Students program and its research into memory extraction.

Storyteller Note: How Powerful Is the Slime King?

This is not a stat block for play. It tells the Storyteller how far beyond any player character the Slime King stands, in case a group ever decides to fight him.

Concept: Singular Minded.

Motivation: Gaming.

Power: Treat every one of his traits as if it were at 10, beyond the normal maximum. He has every Merit in existence and, for all practical purposes, unlimited mana.

Standing: Legendary Immortals such as Badigadi treat him as a peer. He is officially ranked the second most powerful being in the world, just behind the Dragon God, a ranking he completely ignores.

Key Institutions

Monsera University

An elite academy open to every heritage in Terrana, with free tuition and a baseline stipend for every student. Its curriculum pairs traditional fields with leading magical research, including combat training, magical theory, time manipulation, and dreamwalking.

The Special Students Homeroom: A class for misfits, political outliers, and uniquely gifted students, overseen by Professor Malakai Nocturne.

Combat and Ethics: Led by Professor Aldric Thorne, an esteemed master who holds the title of Water God.

The CCN (Crystalz Communication Network)

The backbone of communication in Terrana. Handheld Personal Crystalz work much like smartphones, while large stationary Crystalz serve as flat-screen televisions. The network runs on a combination of crafted Magical Implements and self-recharging Magical Artifacts. It covers all of Monsera and reaches foreign population centers through major trade relays.

The Hero Rangers Corps (HRC)

A multinational military corps backed jointly by the leaders of the seven most powerful kingdoms in the world. The HRC works with every nation in Terrana and keeps outposts in all of them. It is run with the discipline of an army and the organization of a large institution, and in the public eye it holds a place much like a space agency in our world: its top operatives are celebrities and its equipment is the most advanced in existence.

The HRC accepts anyone. Its core belief is that there is no such thing as one true hero, and that true strength comes in numbers. Many recruits are people who felt lost, or who always wanted to be a hero, and the Corps gives them focus, purpose, and a place to call home.

The Rift and the Seafolk Barrier

The Rift at the center of the Ringus Sea is a permanent opening into the Void. Seafolk mages maintain a barrier over it that holds back most of what tries to come through. Energy from the Void still builds up beneath the barrier, and from time to time it gathers into monsters strong enough to break through.

Left unchecked, swarms of these smaller monsters can overwhelm Seafolk cities and drive their people from the water, and from there the monsters become a problem for the land. Roughly once a year, something far larger forms: a Kaiju-class threat rising from the floor of the Ringus Sea. Stopping both is the HRC's primary mission.

The Five Branches

The HRC is divided into five branches, each identified by a color and a specialty. Branches train separately and focus on their own fields, but they always work together. Platoons are usually made up of equal numbers from all five branches, and aboard a ship each branch runs its own section.

Red Branch (Army): Leadership, command, and front-line coordination.

Yellow Branch (Navy): Science, research, analysis, and technology.

Green Branch (Marines): Nature, survival, field medicine, and work in the wild.

Blue Branch (Air Force): Physics, engineering, flight, and heavy machinery.

Violet Branch (Coast Guard): Law, order, protection of civilians, and defensive operations.

Ranks of the HRC

HRC ranks run from 1 to 7, matching the F to S letter ranks used across Terrana. Each rank up is far smaller than the one below it.

Rank	Who Holds It	How Many
Rank 1 (F)	Trainees still in basic training.	Varies with each recruiting season
Rank 2 (E)	The official starting rank for every full member of the Corps.	Many thousands
Rank 3 (D)	The backbone of the Corps and the most common rank.	The largest group
Rank 4 (C)	Experienced operatives, specialists, and squad leaders.	A few thousand
Rank 5 (B)	Senior officers and elite specialists.	A few hundred
Rank 6 (A)	Ship captains, generals, and high command. Most are either a new generation striving to reach Rank 7, or former Rank 7s who stepped down after aging out of piloting and whose expertise is still invaluable.	A few dozen
Rank 7 (S)	The only rank eligible to try out to pilot a Titan.	Usually 10: five main pilots and five understudies, ready if a main pilot is hurt

Hero Team 6

Hero Team 6 is stationed permanently on Monsera. Its mission is to deal with the huge and gargantuan Kaiju that rise from the Ringus Sea before they can reach any shore. For years the team fought in enhanced combat suits. Now, after decades of research, the HRC has unveiled the Titans.

Public Identities

Red Ranger, Captain Ralden Veyr: A veteran knight-commander and inspiring battlefield leader. Confident and charismatic, the poster face of the Corps.

Yellow Ranger, Dr. Selene Quen: A scholar-mage and technologist. Pragmatic and sharp-witted, and openly nerdy when something excites her.

Green Ranger, Lyra Fernbrook: A druidic envoy from the Deepwild. Grounded, spiritual, and protective of balance.

Blue Ranger, Professor Dorrim Korr: A Dwarven physicist and engineer. Gruff and blunt, and explains everything in simple, physical terms.

Violet Ranger, Magistrate Althis Kael: A judge and legislator of the High Courts. Formal and righteous, and speaks in measured tones.

The Titans of the HRC

The Titans are giant combat units built to fight Kaiju at sea and keep them from reaching the coast. This is the first generation, and each unit is fitted with programs for its pilot's specialty so the team fights best together.

Unit 01, Crimson Dragon (Red): An eastern-style sea dragon built for command. Command Roar: a concussive roar that staggers Kaiju and rallies allies. Firestorm Breath: a sweeping arc of fire that drives Kaiju away from the coast. Battlefield Coordination: its glowing horns project tactical sigils into the sky that link the other Titans.

Unit 02, Golden Chimera (Yellow): A lion with hawk wings and a serpent tail, built for experimentation. Analyzing Eye: scans Kaiju for weak points, toxins, and mutations. Adaptive Arsenal: shifts its elemental attacks to match the weaknesses it finds. Winged Maneuverability: aerial scouting and precise strikes.

Unit 03, Emerald Treant-Beast (Green): A colossal stag fused with a living tree. Root Snare: roots and vines rise from the ground or sea floor to bind Kaiju. Healing Sap: restorative pollen clouds that repair allies. Antler Charge: glowing antlers that ram or impale with brutal force.

Unit 04, Azure Leviathan (Blue): A giant armored sea serpent and whale hybrid that fights with raw physics. Gravity Crash: crushing gravitational pulses that pin Kaiju or add weight to its blows. Wave Manipulation: tail strikes that raise waves or redirect currents to keep Kaiju offshore. Sonic Resonance: a deep bellow that throws Kaiju off balance.

Unit 05, Amethyst Knight (Violet): A towering, rune-carved armored knight. Binding Edict: glowing chains of runes that immobilize Kaiju. Judgment Blade: a massive crystal sword that cuts through Kaiju armor and burns brighter the more chaotic its target. Barrier of Order: magical shields that protect civilians and allies.

The Combined Titan

When all five units unite, they form a single colossal warrior that embodies leadership, science, nature, physics, and law. Its ultimate attack, the Edict of Balance, is a reality-rending strike that both destroys a Kaiju and restores balance to the battlefield. Because the Titans are newly unveiled, the Edict has not yet been used in battle.

The Guild-Based Government

Monsera is a guild-based parliamentary democracy in which the King serves as a ceremonial figurehead. Every citizen aged 18 or older has the right to join a guild, and guild membership is how a citizen gains a political voice. Seats in the parliamentary cabinet are divided among ten core guilds.

The Ten Cabinet Guilds: Adventurers, Arts, Makers, Merchants, Mages, Farmers, Healers, Scholars, Laborers, and Navigators.

The Thieves Guild: Extralegal and unrepresented on paper. This shadow faction holds no parliamentary seat and operates through its own secure dialect, Thieves' Cant.

Key Locations and Diplomacy

Hero Rangers HQ

The headquarters of the Hero Rangers Corps stands on Monsera's north shore, facing the Rift. Hero Team 6 and the Titans are based here, and it hosts the annual summit of the United Domains of Terrana.

Breakwater

Founded on the east coast of the Central Continent, beside the Strife Zone, Breakwater is Monsera's main military port. It was built first to cut response times to Void Breaches in the Strife Zone and second to serve as a major trade gateway.

The city has a high-energy New Orleans feel and a majority monster population, with every heritage in the world represented. All ten cabinet guilds keep a strong presence here alongside a permanent detachment of the Hero Rangers Corps. Breakwater is the cornerstone of Monsera's long-term plan to expand its presence onto the Central Continent peacefully.

A Refugee Haven: Escapees from the Corporate Kingdoms arrive constantly and are granted automatic asylum. Anyone can claim their freedom here, though the paranoia drilled into refugees by corporate conditioning means it often takes years before they truly believe they are safe.

The Shaded Isles

The misty archipelago east of the main island is part of the Monsera nation, though its three undead noble houses govern themselves. See Chapter 2 for the Vampiric Kingdom, the Dullahan Kingdom, and the Liches' Domain.

The United Domains of Terrana

An annual summit held at Hero Rangers HQ. It is not a world government but a high-stakes diplomatic council. Any recognized sovereign nation may send a voting member to debate cross-continental magical incidents, trade blockades, Void Openings, and coming Kaiju threats. Its rulings are not binding, but they carry great diplomatic weight.

Economy and Exchange Rates

Monsera's economic influence has standardized currency across the major trade routes. This table converts standard coins into Mana Crystals, the lifeblood of magical craft and commerce. The values in our world's dollars are for the table's reference only.

Coin	Value (USD Equivalent)	Mana Crystal Equivalent	Scale of Use
Small Copper	$0.10	Mana Crystal Dust	Minor daily items
Large Copper	$1.00	Mana Crystal Shards	Standard daily goods
Small Silver	$10.00	Small Mana Crystals	Modest gear and services
Large Silver	$100.00	Mana Crystals	High-end equipment and weapons
Small Gold	$1,000.00	Large Mana Crystals	Rare artifacts and property
Large Gold	$10,000.00	Huge Mana Crystals	Major investments
King's Gold	$100,000.00	Sovereign-Reserve Crystals	State-level transfers only

One hundred floors down, and every one of them is open for business.

From "A Survey of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Most dungeons in Terrana are dangerous accidents of mana and time. The Grand Dungeon is dangerous on purpose. It sits just east of Monsera's capital beneath the great colosseum, and it is the only dungeon I know of with a staff roster, a payroll, and a complaints department.

I have been as far as the seventy-fifth floor. I went no further, and I do not regret it.

The Grand Dungeon spans exactly one hundred floors. It is co-owned by the Slime King and the Earth God, a fairy-type Immortal Demon King who serves as its creative director. She redesigns floor layouts regularly so that veteran delvers never grow too comfortable. Because she has no interest in day-to-day logistics, a large company runs the dungeon's daily operations under her supervision.

No adventuring party has ever cleared the final ten floors.

How the Dungeon Works

Rules of Entry

Access to the dungeon is strictly regulated. The entry turnstiles will not turn for anyone without a dungeon bracelet. The bracelets do not belong to any guild. They are issued and regulated by the Arena above the dungeon, which is owned by the Kingdom of Monsera, so no single guild is responsible for keeping the dungeon's rules.

The Shape of the Dungeon

Every ten floors form one stretch with two biomes. The first biome runs from the first floor of the stretch to the fourth, and its last floor ends at a mini-boss who must be defeated before delvers can enter the safe zone on the fifth floor. The second biome runs from the sixth floor to the tenth, where a boss guards the way down.

The floors grow smaller the deeper you go, but they never become small. The upper floors hold open fields and whole cities, and even the deepest floors are wide enough to hold landscapes of their own. The hundredth floor is a single massive arena.

The one exception is the final stretch. Floors 91 through 100 form a single biome with no safe zone on the ninety-fifth floor.

Safe Zones and Fast Travel

Every floor ending in five is a safe zone and a permanent community. Reaching a safe zone for the first time unlocks its teleporter for you. Teleporters connect only safe zones, so fast travel is possible only between them. Every safe zone enforces the same three laws, kept by Golem Guards:

1. No bloodshed.

2. No theft.

3. No harmful spells.

Breaking any of these laws results in immediate punishment. Nite City, on the fifteenth floor, is the one place where the laws bend; see its entry.

Dungeon Bracelets and Respawn Lockers

Every delver is assigned a respawn locker on the surface, and their bracelet holds a mana crystal linked to that locker. The bracelet works only in the Grand Dungeon. It does nothing anywhere else in Terrana, and no other dungeon has anything like it.

As long as they wear a bracelet, no one can die in the Grand Dungeon. When a character is Incapacitated and no one heals them back up on the very next turn, their body vanishes. The bracelet consumes its mana crystal and teleports them to their locker on the surface. Because of this, no one in the dungeon can ever choose Blaze of Glory or Risk It.

Respawning does not fully heal a character. Remove all of their Lethal and Aggravated damage, so they never have to worry about a missing limb or a huge scar, then mark every Bashing box, even if their Bashing track was not full when they fell. A character who cannot heal will be in pain for a while, but a night of rest usually sets them right.

Their personal teleport destination also resets to the nearest safe zone above the floor where they fell.

Ecosystem and Economy

The Inhabitants: The monsters roaming the floors are paid employees of the dungeon company. When defeated, they respawn and return to their living quarters on the nearest safe zone.

The Loot: The company buys the treasures placed throughout the floors. Over time, the high ambient mana inside the dungeon gives these well-made items unpredictable, random magical properties.

The Hundred Floors at a Glance

Floors	First Biome	Mini-Boss	Safe Zone	Second Biome	Boss
1 to 10	The Upper Halls	Warchief Gruk Ironmaw	5: Falsky	The Fungal Grotto	The Grand Beastmaster
11 to 20	The Great Labyrinth	Asterion of the Maze	15: Nite City	The Gearworks	The Chrono-Goliath
21 to 30	The Canopy Wilds	Skyrend, the Storm Alpha	25: Canopy Station	The Flooded Caverns	The Kraken Vanguard
31 to 40	The Forge Depths	The Iron Juggernaut	35: Neo Foundry	The Hall of Illusions	The Doppler Matriarch
41 to 50	The Tide Ruins	Mother Maelis, the Siren Matron	45: Sunken Boardwalk	The Volcanic Fields	Cindermaw, the Magma Wyrm
51 to 60	The Glyph Halls	The Rune Sentinel	55: Archives of Slate	The Catacombs	The Dullahan Overseer
61 to 70	The Old Rail Tunnels	Conductor Kessler	65: Iron Terminus	The Arcane Laboratories	Warden Arcanum
71 to 80	The Crystal Mines	The Crystal Basilisk	75: Obsidian Vault	The Thinning Halls	The Rift Stalker
81 to 90	The Temple Ascent	The Monk of a Thousand Steps	85: Sage's Solitude	The Infernal Halls	The Devil Prince Defiler
91 to 100	The Deep	None	None	The Deep (continued)	Vaelthrax

Floors 1 to 10

Floors 1 to 4: The Upper Halls

Wide stone corridors lit by mana lamps, home to slimes, goblins, kobolds, and giant rats. These floors are where every delver learns the basics, and they are always busy with new guild members on their first runs.

Warchief Gruk Ironmaw

Mini-Boss, Floor 4

A veteran goblin warchief and a dungeon employee of thirty years, Gruk leads a warband that has humbled more fresh parties than any other foe in the dungeon. He fights with a crude cleaver and a lot of shouting, and he respects any party that beats him fairly.

Floor 5: Falsky

Safe Zone

Falsky is the largest floor in the dungeon. A false sky

The whole community is built to look the way the world did before the Slime King arrived. Its residents prefer the old ways: shopkeepers, tavern keepers, and farmers dress in the older styles, trade by hand, and keep modern devices out of sight. Some live this way because they love it. Plenty of others work here in costume and go home to the surface at the end of their shift to live ordinary modern lives.

Floors 6 to 9: The Fungal Grotto

Damp caverns lit by glowing mushrooms the size of houses. Spore clouds, myconid scouts, and cave crawlers make these floors the first real test of a party's endurance.

The Grand Beastmaster

Boss, Floor 10: The Ironwood Colosseum

An open-air stone amphitheater ringed by ironwood trees, its stands packed with off-duty dungeon staff placing bets. The Grand Beastmaster, a high-ranking Orc commander from the Laborers Guild, fights alongside a huge multi-headed chimera. The fight is loud and theatrical, and it tests whether a party can work together before going deeper.

Floors 11 to 20

Floors 11 to 14: The Great Labyrinth

From the moment a party leaves the Colosseum, it enters a single labyrinth that runs all the way to the gates of Nite City. It is difficult to tell which floor you have reached, and entire parties have starved until their bracelets sent them home. Adventurers use a site on the CCN to try to map it, but the Earth God changes the layout so often that a complete map may be impossible.

Asterion of the Maze

Mini-Boss, Floor 14

A minotaur who has walked the Labyrinth longer than any map has existed. Asterion hunts by sound and smell, and he is waiting at the Labyrinth's final gate for anyone who makes it that far.

Floor 14¾: The Studios

Hidden in a pocket between Floors 14 and 15, this secret level is the main content production hub for the CCN. It is run by an unusual pair: Mahk the Boiler, whose true name is Belethore and who once ruled the second layer of Hell, and Hea'vee Starve'aey, a Sphinx game show host.

Floor 15: Sciel City (Nite City)

Safe Zone

Officially Sciel City, this floor is known to nearly every adventurer as Nite City. It looks like Tokyo, New York, and Las Vegas thrown together, and everything here is cheap and entirely legal. More people live in Nite City than on any other floor, though Falsky covers more ground.

Nite City was founded about sixty years ago with the Slime King's help. The Immortal Devil Queen Sciel, once ruler of Hell's third layer, had grown tired of Hell's economy, which runs on mana harvested from suffering. She discovered that devils can harvest and regenerate mana just as well from happy, positive emotions, and she left Hell before its war truly began. Since then the city has been a refuge for devils fleeing the underworld. Every devil living here is under contract to the Slime King and the Earth God.

Nite City is the one safe zone where the three laws bend. The devils mostly regulate their own rules here, and the laws are broken more often than anywhere else in the dungeon. It is a wild place, but the locals still frown on anyone fighting openly unless someone is betting on the fight or paying for it. You will hear “gold is king” on every corner, but it is a saying, not a law.

The city is governed by a parliament led by an executive Mayor and seven District Heads. Each district is tied to one of the seven scales of virtue and vice.

District	Scale	Current Head	Primary Color	Secondary Color
Obsidian Ring	Sloth and Diligence	Countess Lazara	Black	Gray
Ruby North	Wrath and Patience	Prince Phobius	Dark Red	Bright Red
Amber East	Gluttony and Temperance	Duchess Vainessa	Amber	Dark Orange
Emerald South-East	Envy and Kindness	Marquess Sinestra	Green	Teal
Sapphire South-West	Pride and Humility	Duke Carnosus	Blue	Copper
Amethyst West	Lust and Chastity	Baron Stygian	Violet	Soft Pink
Diamond Central	Greed and Charity	Mayor Balthazar	Gold	Alabaster

Floors 16 to 19: The Gearworks

Below Nite City the stone gives way to brass. Catwalks hang over grinding gears and hissing steam lines, and clockwork guardians patrol on fixed routes. Timing matters more than strength here.

The Chrono-Goliath

Boss, Floor 20: The Shattered Clockwork

A huge, ancient steam automaton built by the Makers Guild, standing on a brass platform above a sea of gears.

It changes the speed of the floor's machinery as it fights, forcing parties to time their movements around shifting platforms and bursting steam pipes while they work to crack its armor.

Floors 21 to 30

Floors 21 to 24: The Canopy Wilds

A rainforest under artificial sunlight, crossed high above the forest floor on branches and vines. Giant insects, gliding predators, and territorial birds make every crossing a risk.

Skyrend, the Storm Alpha

Mini-Boss, Floor 24

The great thunderbird that rules the canopy. Skyrend dives out of the artificial clouds trailing lightning and knocks careless delvers from the branches.

Floor 25: Canopy Station

Safe Zone

Hollowed-out redwoods serve as homes and shops, connected by suspension bridges and wooden walkways. A few thousand people live here year-round. It is the main source of fresh alchemy ingredients and monster-taming supplies in the upper dungeon, and the local Adventurers Guild outpost posts monster-tracking bounties for the surrounding floors.

Floors 26 to 29: The Flooded Caverns

The forest drains into black water. These floors are half-submerged tunnels and drowned halls, where delvers wade, swim, and hold their breath past eels, drowned guardians, and things that wait below the surface.

The Kraken Vanguard

Boss, Floor 30: The Coral Throne

A deep underwater amphitheater ringed by sharp reefs and sunken galleons, swept by currents strong enough to drag a delver across the floor. The Kraken Vanguard, a huge and intelligent Seafolk champion under contract with the Navigators Guild, fights with sweeping tentacles, ink clouds that blind casters, and whirlpools that split a party apart.

Floors 31 to 40

Floors 31 to 34: The Forge Depths

Mine shafts and smelting halls, hot and loud, where ore carts run on their own and golems shamble through the smoke. The heat wears on anyone who lingers.

The Iron Juggernaut

Mini-Boss, Floor 34

A walking furnace of riveted plates, built long ago to clear cave-ins and later put to work guarding the way to the Foundry. It is slow, nearly unstoppable, and very hard to hurt from the front.

Floor 35: Neo Foundry

Safe Zone

A retro-industrial dwarven smithy crossed with a modern assembly line, full of automated steam hammers, molten brass channels, and neon schematics projected on soot-stained stone. Its population is mostly smiths and their families, a working town of a couple of thousand. It is the first safe zone with high-grade weapon modification and armor rebuilding, and Makers Guild workshops repair broken gear or melt down scrap loot into raw materials.

Floors 36 to 39: The Hall of Illusions

Endless galleries and painted halls where doors lead back to where you started, portraits watch you pass, and nothing is quite where it looks to be. Trusting your eyes is the most common mistake on these floors.

The Doppler Matriarch

Boss, Floor 40: The Mirror Gallery

An eight-sided ballroom where every wall, floor, and ceiling tile is an unbreakable silver mirror. The Doppler Matriarch, a high-tier devil illusionist from Nite City, creates solid mirror copies of each party member with their exact abilities, and the party must work out which reflection is the real one controlling the rest.

Floors 41 to 50

Floors 41 to 44: The Tide Ruins

Ruined seaside temples in a vast cavern where an indoor tide rises and falls on a schedule. Delvers have to read the tide tables or be cut off as the water comes in.

Mother Maelis, the Siren Matron

Mini-Boss, Floor 44

The eldest of the ruins' sirens. Her song draws delvers into the rising water, and she is far more dangerous to a party that cannot stop listening.

Floor 45: Sunken Boardwalk

Safe Zone

A seaside pier inside a water-filled cavern, lined with carnival games, neon taverns, and seafood shacks looking out over a glowing indoor ocean with moving tides. About a thousand people live here, many of them Seafolk. The Navigators Guild runs this rest stop, where delvers can hire aquatic guides, buy underwater breathing gear, or gamble their coin at the boardwalk games.

Floors 46 to 49: The Volcanic Fields

The water ends at fields of cooling lava, ash storms, and steam vents. Fire elementals and salamanders thrive here, and the ground itself is not always safe to stand on.

Cindermaw, the Magma Wyrm

Boss, Floor 50: The Ash Refinery

A circular platform surrounded by pools of magma and roaring smoke extractors, where the heat alone wears delvers down. Cindermaw is a wild fire drake fused with experimental company machinery. It melts parts of the arena as the fight goes on, shrinking the ground a party has left to stand on.

Floors 51 to 60

Floors 51 to 54: The Glyph Halls

Halls of dark volcanic rock carved with glowing glyphs. Many doors open only for those who can read them, and the wrong answer triggers wards and traps. Scholars do well here.

The Rune Sentinel

Mini-Boss, Floor 54

An ancient guardian covered in shifting runes, posed in front of the Archives' gate. It asks questions before it fights, and parties that answer well find it easier to beat.

Floor 55: Archives of Slate

Safe Zone

A quiet library carved from volcanic rock, where thousands of slate tablets fill towering shelves that slide on brass tracks. Only a few hundred people live here, almost all of them researchers and archivists. The Scholars Guild runs it, and it is a required stop for identifying high-level artifacts or translating coded scripts found below. Delvers can also buy rare spell scrolls or trade historical findings for dungeon credit.

Floors 56 to 59: The Catacombs

Narrow burial tunnels stacked with crumbling sarcophagi and choked with dust. Undead patrol the dark, and the tight corridors make it hard for ranged fighters to find a clear shot.

The Dullahan Overseer

Boss, Floor 60: The Silent Necropolis

A sprawling mausoleum of tight corridors. The Dullahan Overseer, an ancient armored knight representing the noble houses of the Shaded Isles, steps through the shadowed walls to cut off retreat and lets out deadly wails that test a party's mental grit and physical endurance.

Floors 61 to 70

Floors 61 to 64: The Old Rail Tunnels

Abandoned service tunnels from an older version of the dungeon's transit system. Derelict cars, live rails, and scavenging constructs fill the dark, and the occasional train still comes through without warning.

Conductor Kessler

Mini-Boss, Floor 64

The ghostly conductor of a train that was decommissioned long ago and never stopped running. Kessler fights from his engine and insists that every passenger present a valid ticket.

Floor 65: Iron Terminus

Safe Zone

A crowded Victorian-style subway terminal of black iron and white tile, loud with humming teleporters and commuter trains carrying dungeon staff. Only a couple of hundred people live here; most of the crowd is passing through. It is the main transit station for the dungeon's monster employees. Delvers can visit the Healers Guild clinic for advanced curse removal, use secure bank vaults, or take delivery jobs to the lower floors.

Floors 66 to 69: The Arcane Laboratories

Sealed research wings full of failed experiments, unstable spell circuits, and escaped test subjects. The magic here is volatile, and spells sometimes behave in ways their casters did not intend.

Warden Arcanum

Boss, Floor 70: The Circuit Vault

A sealed security hall lined with glowing mana circuits, where the wrong floor tile sets off a burst of lightning. Warden Arcanum, an advanced defense construct built by the Mages Guild, absorbs elemental spells to power its own devastating attacks. Parties must rely on physical strikes and non-magical tricks to shut down its power cores.

Floors 71 to 80

Floors 71 to 74: The Crystal Mines

Tunnels lined with raw mana crystal that hums and glows. The crystal is valuable and fragile, and so are the creatures made of it.

The Crystal Basilisk

Mini-Boss, Floor 74

A great lizard whose hide is a living crystal lattice. Its gaze turns flesh to crystal, and it guards the last approach to the Obsidian Vault.

Floor 75: Obsidian Vault

Safe Zone

Sleek corporate minimalism in seamless black obsidian, lit by blue ley-line circuitry. There are no markets here, only a few elite offices run by the Merchants Guild and staffed by a few dozen people. The Vault deals only in gold-tier transactions, rare mana crystal trades, and luxury gear for veteran parties.

Floors 76 to 79: The Thinning Halls

No one would be allowed to keep a real Void breach open, so these floors are built to look like one. Gravity shifts, rooms repeat, and constructs modeled after real, carefully studied voidlings stalk the halls. Some of the voidlings here are not constructs at all: the company captures real ones and keeps them contained on these floors.

The Rift Stalker

Boss, Floor 80: The Void Fissure

A narrow, unstable ledge above a convincing replica of a tear in the Void, where howling winds pull at anyone standing too close to the edge. The Rift Stalker is the real thing: a captured multi-dimensional predator, held on this floor by magic barriers that keep it from escaping for everyone's safety. It phases out of reality between its turns and leaves gravity anomalies behind, forcing delvers to balance attacking with keeping their footing.

Floors 81 to 90

Floors 81 to 84: The Temple Ascent

A mountain temple path of endless stone stairs, shrines, and narrow ledges. Gravity is reversed on these floors, which is how delvers climb the stairs while still traveling downward into the dungeon. The monks who guard it test discipline as much as strength.

The Monk of a Thousand Steps

Mini-Boss, Floor 84

A silent Ogre who waits at the top of the final stair. He fights unarmed, never seems to tire, and will not let a party pass until they prove themselves worthy.

Floor 85: Sage's Solitude

Safe Zone

The quietest safe zone in the dungeon: a walled garden of white stone on a high mountain floor, holding a single cherry blossom tree whose petals never pile up, raked white gravel, and natural hot springs with healing qualities. Only a handful of keepers live here. There are no shops or bars, only the springs themselves, which heal the body and are dense enough with mana to fully replenish a caster's mana. It is the last place to rest before the final floors, and the last teleporter in the dungeon.

Floors 86 to 89: The Infernal Halls

Halls of brimstone and chains, staffed by devils on contract who did not choose Nite City's gentler life. The air is hot and heavy, and the fighting is brutal.

The Devil Prince Defiler

Boss, Floor 90: The Executioner's Cage

A hanging iron cage in total darkness with nowhere to hide and no room to run. The Devil Prince Defiler, an exile from the Hell Dungeon under personal contract to the Earth God, is a true spellsword. Like most devils he is strongest with magic, hurling hellfire and curses from range, but he is just as dangerous up close with brutal melee combinations. Equally deadly at any distance, he is a pure test of how well a party can take damage and deal it back.

Floors 91 to 100

Floors 91 to 99: The Deep

The final stretch is a single descent through the dragon's domain: ancient halls scorched by old fire, piles of bones and treasure, and guardians who have served the same master for centuries. There is no safe zone on the ninety-fifth floor and no teleporter anywhere below Sage's Solitude, so a party must make the whole descent in one push. This is a key reason no party has ever cleared the final floors.

Vaelthrax

Final Boss, Floor 100: The Last Lair

The entire hundredth floor is one massive arena of ancient stone, the largest battleground in the dungeon, its edges heaped with glowing mana crystals and historic artifacts. Vaelthrax is an ancient dragon and the Slime King's legendary, undefeated companion. The fight has no gimmicks or environmental tricks: only immense physical strength, near-total immunity to magic, and devastating breath. It is the final exam for anyone who has survived the descent.

Storyteller Note: The Dragon Above

Vaelthrax does not spend all his time in his lair. He can take a Hyuman-looking form, and in that form he lives a separate life on the surface under the name Thraxus. He is not a very creative dragon. Very few people know who he really is, and a character could meet him in Monsera without ever realizing it.

Chapter 5: Legends of Terrana

Everyone in Terrana knows who is on top. Most of them want to be.

From "A Survey of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Terrana loves a ranking. Taverns argue over them, whole channels on the CCN are devoted to them, and children in Monsera can recite the Seven Strongest before they can recite their letters. I have recorded the three that matter most, with one warning: the bottom of every list changes faster than any book can be printed.

Three leaderboards define the peak of power and achievement in Terrana. The Seven Strongest ranks the most powerful beings in the world. The Slime King's Elite Four ranks the strongest warriors of Monsera. The Deep Delver Leaderboard ranks the parties who have gone deepest into the Grand Dungeon. Together they are the goals that drive many ambitious adventurers.

The Seven Strongest

How the Titles Work

The Seven Strongest is a world-recognized ranking with one strict rule: a God Rank title can only be won by defeating its current holder in combat. The defeated holder drops to Imperial Rank, and the victor takes the title.

Because each title carries its rank and passes from holder to holder, the ranking lists titles rather than names.

Rank	Title	Current Holder
1	The Dragon God	Known by title alone
2	The Slime King	Julius Geoffrey Golbjorn
3	The Fighting God	Badigadi
4	The Death God	Classified
5	The Sword God	Changes often
6	The North God	Changes often
7	The Water God	Professor Aldric Thorne (currently)

1. The Dragon God

Profile: The son of the first Dragon God, he has walked Terrana since before recorded history. He travels the world alone, keeping an eternal watch against any chance of Hitogami's return.

2. The Slime King

Holder: Julius Geoffrey Golbjorn, ruler of Monsera.

Profile: His power is so far beyond anyone else's that the ranking barely measures it (see the Storyteller Note in Chapter 3). He spends most of his time in the royal suite of Monsera Palace playing video games and ignores the ranking completely.

3. The Fighting God

Holder: Badigadi, the Wise Demon King of Biegoya.

Profile: An Immortal Demon King with six arms and the devoted husband of Empress Kishirika. He is famous for his love of lively parties and good company.

4. The Death God

Holder: Classified.

Profile: The Death God's true identity is known only to the king of the Dragon King Kingdom and his highest-ranking generals. The holder is gaunt and wears distinctive, easily recognized armor. Ironically, the Death God hates killing, despite being exceptionally good at it.

5 to 7. The Martial Gods

Titles: The Sword God, the North God, and the Water God.

Profile: Unlike the top four, these titles are always changing hands. They pass back and forth through formal, high-stakes duels and challenge matches across the continents. Monsera University's own Professor Aldric Thorne currently holds the title of Water God.

The Slime King's Elite Four

The Elite Four are the Slime King's personal vanguard. Julius Geoffrey Golbjorn never wanted a personal guard, but during Monsera's early years its monster peoples saw a circle of champion warriors as a great source of pride. Today the Elite Four are the four strongest active citizens of the island nation.

The Trial of Ascension

The Festival Tournament: Every year, during the two-week festival celebrating Monsera's founding, the citizens host a huge martial tournament in the Grand Arena.

The Gauntlet: The tournament's champion earns the right to challenge the Elite Four. The challenger faces one member at a time over four months, with weeks of rest and training between each duel.

Rank Displacement: A challenger who defeats a member of the Elite Four takes that member's rank, and every member below it moves down one place. Anyone pushed out of the Elite Four must win next year's tournament to earn a chance at returning.

The Sovereign Right: A challenger who defeats all four members earns the right to challenge the Slime King himself for the throne. The same right goes automatically to anyone who clears all one hundred floors of the Grand Dungeon.

Historical Record: Only one challenger has ever defeated the entire Elite Four and faced the King. She lost to the Slime King, but her effort earned her the top place in the Elite Four, which she has held ever since.

The Elite Four

1. Immortal Devil Queen Sciel

Heritage: Devil.

Profile: The founder of Sciel City, better known as Nite City, and the only challenger ever to sweep the Elite Four. She earned her place in a legendary fight against the Slime King and has held the top rank ever since.

2. General Vahn Grimjaw

Heritage: Elder Orc.

Profile: A seasoned military veteran and a central pillar of Monsera's internal defense forces.

3. Korac

Heritage: Armored Minotaur.

Profile: A powerful warrior who first rose through the ranks of the Laborers Guild.

4. Mirage

Heritage: Arachne.

Profile: The newest member of the Elite Four, who won her place by taking the most recent annual tournament.

The Deep Delver Leaderboard

The Deep Delver Leaderboard is a community board on a site on the CCN. It tracks the seven parties who have gone deepest into the Grand Dungeon, and it is updated both by people who work at the Arena and by the wider community. No party has ever cleared the final ten floors, so parties are ranked by the deepest floor they have reached.

Only part of the board is verified. A party checks in with the guild each time it reaches a floor ending in five, and those check-ins are the only official record. Anything deeper is known only through the party's own word or the community's. The only reason anyone knows the Ashen Vanguard reached Floor 93 is that they live streamed it.

Rank	Party	Deepest Floor	Status
1	The Ashen Vanguard	93 (live streamed)	Active
2	The Void Walkers	90	Retired
3	The Copper Coin Syndicate	87	Active
4	The Silver Horizon	85 or deeper	Unknown
5	Nebula's Edge	85	Active
6	The Ironwood Cartel	82	Disbanded
7	The Chimera Pack	77	Active

1. The Ashen Vanguard

Deepest Floor: 93.

Status: Active. They live streamed their descent past Sage's Solitude and are training for another push into the final stretch.

2. The Void Walkers

Deepest Floor: 90.

Status: Retired. Several members took consulting positions at Monsera University after their last narrow escape.

3. The Copper Coin Syndicate

Deepest Floor: 87.

Status: Active. An unorthodox party known for treating deep dungeon delving like a high-stakes business venture.

4. The Silver Horizon

Deepest Floor: 85 or deeper.

Status: Unknown. The party checked in at Sage's Solitude and went on past it. They do not live stream, so no one knows how far they have gone. No one will know until they fall and show up in the locker area, or walk back out on their own.

5. Nebula's Edge

Deepest Floor: 85.

Status: Active. A mixed-heritage team from the port city of Breakwater.

6. The Ironwood Cartel

Deepest Floor: 82.

Status: Disbanded. Former members now run elite training camps in the upper safe zones.

7. The Chimera Pack

Deepest Floor: 77.

Status: Active. A young, hyper-aggressive party climbing the board quickly through high-risk strategies.

Chapter 6: Character Creation Overview

Building a character is a series of meaningful choices that together define who your character is, what they are good at, what they struggle with, and what keeps them going when things get difficult. The choices interact in ways that reward thought without requiring optimization. Start with the character that interests you, and everything else follows from that.

The Creation Process

Character creation follows these thirteen steps in order. Each step points to the chapter that covers it in full.

Step 1. Pick your Trope: Choose one Trope, the personality archetype at the heart of your character. Every Trope has a Boon and a Bane. The Boon gives you one bonus die on rolls with an ability tied to the Trope. The Bane gives you one penalty die on rolls with a fixed ability. Record your Trope at the top of your sheet. The full list is in Chapter 7.

Step 2. Consult the Scales: Your sheet has seven Virtue and Vice scales: Humility and Pride, Charity and Greed, Chastity and Lust, Patience and Wrath, Temperance and Gluttony, Kindness and Envy, and Diligence and Sloth. Mark where your character sits on each one:

- **Two highs:** two scales at High Virtue or High Vice, the 2 at either end.
- **Two lows:** two scales at Low Virtue or Low Vice, the 1 on either side.
- **Three central:** the other three scales stay at Central, the 0 in the middle.

Then choose two Driving Factors, one for each of your highs. A Driving Factor is what your character wants, and it must match the scale and the side its high sits on. Your highs also set your starting Willpower in Step 9. The scales and every Driving Factor are covered in Chapter 7, Part 2.

Step 3. Assign your Role: Your Role is your position on the battlefield: a line (Frontline, Midline, or Backline) followed by one word for how you fight, such as Frontline Tank, Frontline Fighter, Midline Healer, Midline Support, Backline Mage, or Backline Rogue. Your Role decides where you start when combat begins. You can change it as play goes on if you want to try a different line of attack.

Step 4. Choose your Heritage: Pick your heritage from Chapter 8 and record what it gives you: your Innate Attribute (it starts at 2 dots; note Innate beside it), your Innate Flaw, your Attribute Flaw, your Heritage Merit, and your free Heritage magic dot. Rare heritages need Storyteller approval.

Step 5. Allocate your Attributes: Every attribute starts at 1 dot. Give each column (Physical, Social, and Mental) one of three designations, and write its number in the space next to the column's name on your sheet:

- **Affinity:** write 6.
- **Standard:** write 5.
- **Aversion:** write 4.

That number is the column's cap, and it is also how many dots you spend across that column's three attributes. Your Attribute Flaw column can never be your Affinity. No attribute can be filled above 5 at creation. A Hyuman with Hyuman Adaptability writes 5 next to all three columns instead. Your Physical and Mental designations also set your dots in Steps 10 and 11.

Step 6. Prioritize your Abilities: Abilities start at 0 dots. Give each of the six ability groups a different number from 2 to 7 and write it next to the group's name on your sheet. That number is how many dots you spend in that group, and no ability can be filled above 5 at creation.

Any ability with 4 or more dots gets one free specialty: write a condition beside it, such as Awareness: Scent, for a bonus die when a roll fits. Then choose your Past Life Occupation, what your character did before arriving in Terrana, and write PL next to the 3 abilities tied to it (up to 5 with Storyteller approval). Each PL ability also gets a free specialty.

Step 7. Select your Merits and Flaws: You have 7 points to spend on Merits. Each Flaw point you take gives you 1 more point, up to 7 more, for a maximum of 14. Record them in the Merits, Flaws, and Backgrounds section, along with your Heritage Merit. The full lists are in Chapter 9.

Step 8. Determine your Backgrounds: You have 7 points to spend on Backgrounds, plus any points left over from Step 7. Record them in the same section. Backgrounds are listed in Chapter 10.

Step 9. Set Willpower, Fate, and Sanity: Fill in 5 dots of each. If both of your highs are Vices, fill in only 4 dots of Willpower. If both are Virtues, fill in 6. One of each leaves it at 5. Fate and Sanity can only be changed at creation by Merits and Flaws (Chapter 9). All three are covered in full in Chapter 11.

Step 10. Choose your Combat Styles: Your Physical column decides how many dots you spend on Combat Styles: 7 for Affinity, 5 for Standard, or 3 for Aversion. Spread them across any styles you like, up to 5 dots in one style, and mark each style with a P for Primary. Each dot unlocks that rank's Default Ability, plus your choice of its Option A or Option B (Chapter 12).

Step 11. Choose your Magical Knowledges: Your Mental column decides how many dots you spend on Magical Knowledges (the casting schools, Battle Aura, and the Circle Magic disciplines): 7 for Affinity, 5 for Standard, or 3 for Aversion, up to 5 dots in one knowledge. Mark each with a P for Primary. Your free Heritage magic dot from Step 4 is written here too, also marked with a P, and does not use these dots. You can also spend these dots to raise your Heritage magic, up to 5 at creation. Each Circle Magic discipline, such as Scroll Magic, Summoning Magic, or Ward Magic, is its own knowledge with its own dots. For a casting school or Battle Aura, each dot gives that rank's Default Ability plus your choice of one of its two spells or techniques. If a new dot meets a combination spell's prerequisites, you can take that combination spell instead (Chapter 13). Taking Summoning Magic gives you a starting SumMonz, and Familiar Bond gives you a starting familiar.

Step 12. Spend your Freebie Points: You have 7 Freebie Points, the standard start (a Newb). For a more experienced character the Storyteller may give 14 (a Veteran) or 28 (a Legend), or any other amount. Mana starts at 1 dot, and this is the only time it can be raised during creation. Each dot costs:

Attribute: 3 points.

Ability: 2 points.

Combat Style, Magical Knowledge, or Heritage magic: 4 points. A new style or knowledge bought here is marked with an S for Secondary; Heritage magic stays P.

Background: 1 point.

Mana: 7 points.

Freebies cannot be spent on Merits, Flaws, Willpower, Fate, Sanity, or other Heritage traits, and the Golden Rule still applies.

Step 13. Calculate your Level: Add up all your dots in Attributes (including Mana), Abilities, Combat Styles, and Magical Knowledges (including Heritage magic). Write the total in the Level box. Merits, Flaws, Backgrounds, Willpower, Fate, Sanity, and Virtues and Vices do not count.

The Golden Rule

At character creation, nothing on your sheet may be filled in above 5 dots, not even with Freebie Points, no matter what modifier, bonus, or heritage benefit applies. There are no exceptions, including your Innate Attribute.

Attributes

Attributes are organized into three groups, called columns: Physical, Social, and Mental. Each column contains three attributes.

Physical	Social	Mental
Strength	Charisma	Intelligence
Dexterity	Manipulation	Perception
Fortitude	Composure	Wisdom

Assigning Columns

Column	Cap and Attribute Points	Style or Knowledge Dots
Affinity	6	7
Standard	5	5
Aversion	4	3

The cap is the highest any attribute in that column can ever go, while the Golden Rule only limits what you fill in

during creation. Your Innate Attribute's maximum is 1 higher than its column's cap.

P and S Markers: Only styles and knowledges taken in Steps 10 and 11, plus your free Heritage magic dot, get a P for Primary. Anything gained later, even with Freebie Points, gets an S for Secondary. P costs new dot x5 XP to raise; S costs x6.

Ranks and Thresholds

Dots	Rank	Martial Rank	Magic Rank
1	F	Elementary	Core
2	E	Intermediate	Terrestrial
3	D	Advanced	Aerial
4	C	Saint	Lunar
5	B	Royal	Stellar
6	A	Imperial	Galactic
7	S	Divine	Cosmic

Every rated trait uses the same seven ranks. Martial training and magic use different names for the same ranks.

Damage Thresholds

Your thresholds decide what kind of damage an incoming attack or damage source does.

Bashing Damage Threshold (BDT): Fortitude + Armor.

Lethal Damage Threshold (LDT): BDT x2.

Aggravated Damage Threshold (ADT): BDT x3.

Abilities

Group	Abilities
Warrior	Athletics, Endurance, Martial Arts, Melee, Ranged
Rogue	Acrobatics, Chicanery, Dodge, Sleight of Hand, Stealth
Troubadour	Expression, Performance, Presence, Persuasion, Subterfuge
Noble	Commerce, Diplomacy, Etiquette, Pilot, Ride
Mage	Alchemy, Attunement, Circle Magic, Implements, Magic
Sage	Artifacts, Awareness, Crafts, Insight, Survival

Abilities are organized into six groups of five (see Step 6). If every ability in a group is filled to its current maximum, that group's maximum permanently rises by 1.

Specialties

A specialty is a condition, written next to an ability, that gives you a bonus die when a roll fits it (for example, Awareness: Scent). Each ability can have up to 3 specialties. At character creation, any ability with 4 or more dots gets one free specialty, and so does every PL ability. An ability that is both gets two. Every other specialty costs 5 XP and needs Storyteller approval.

Past Life Occupation

Choose your character's Past Life Occupation: what they did, or loved doing, before they arrived in Terrana. It does not have to match the player's own life. Write PL next to the abilities tied to that profession or hobby: 3 abilities, or up to 5 if the occupation calls for it and your Storyteller agrees. Each PL ability gets one free specialty that fits the occupation, even if the ability has no dots yet. Raising a PL ability costs the new dot x2 in XP, one less than a normal ability. The Quick Reference lists common Past Life Occupations and specialty ideas.

Mana

Everything in Terrana has some access to mana. Mana is rated from 1 to 10 dots, the only trait with ten. Every character starts with 1 dot. At creation, Mana can only be raised with Freebie Points, at 7 points per dot. After creation, each dot costs the new dot x7 in XP.

Mana Pool: All Magic x Mana. All Magic is your Magic dots, plus your Circle Magic dots, plus every dot in every Magical Knowledge you know (casting schools, Battle Aura, Circle Magic disciplines, and Heritage magic, including each Vampiric Power). Some items in the world let you add other abilities, such as Alchemy, Attunement, or Implements, but at creation and in most cases the pool uses only these.

Maximum Mana Per Turn: Fortitude + Mana. This is the most mana you can safely spend in a single turn, no matter how large your pool is.

How mana recovers, and everything else about Mana, Willpower, Fate, and Sanity, is covered in Chapter 11.

Earning and Spending XP

Earning XP

At the end of each chapter of the story, every player earns XP:

1 XP for free, just for playing.

1 XP for acting: playing your character in the scene.

1 XP for answering a question the Storyteller asks, or for sharing something you learned that chapter.

1 bonus XP from your Affinity column, if you earned it (see below).

Physical Affinity: Earn the bonus if your character took part in combat or made a big physical gesture during the chapter.

Mental Affinity: Earn the bonus if your character used magic, or made a profound discovery or had a profound idea, during the chapter.

Social Affinity: Earn the bonus automatically, as long as your character took part in the chapter in any way. If everyone at the table earned a bonus XP that chapter, you earn one more, for a total of 2 bonus XP.

Spending XP and Freebie Points

Starting characters receive 7 Freebie Points (a Newb), or 14 (a Veteran) or 28 (a Legend) if the Storyteller allows, or another amount they set. XP costs are always the new dot's value times the listed number.

Trait	XP Cost	Freebie Cost
Attribute	New dot x5	3 per dot
Ability	New dot x3	2 per dot
Ability (Past Life)	New dot x2	2 per dot
Specialty	5	One free at 4+ dots, plus one per PL ability, at creation
Combat Style (Primary)	New dot x5	4 per dot
Combat Style (Secondary)	New dot x6	4 per dot
Magical Knowledge (Primary)	New dot x5	4 per dot
Magical Knowledge (Secondary)	New dot x6	4 per dot
Heritage Magic	New dot x5	4 per dot
Mana	New dot x7	7 per dot
Backgrounds	Cannot buy	1 per dot
Willpower, Fate, Sanity	Cannot buy	Cannot buy

Quick Reference

Everything you choose during character creation, in the order of the steps above. Each table points back to the chapter with the full rules.

Creation at a Glance

Step	What You Get	Chapter
1. Trope	One Trope: a Boon (+1 die) and a Bane (+1 penalty die).	7
2. Scales	Two highs, two lows, three central. One Driving Factor per high.	7
3. Role	A line (Frontline, Midline, Backline) and how you fight.	6
4. Heritage	Innate Attribute (starts at 2), Innate Flaw, Attribute Flaw, one Heritage Merit, 1 Heritage magic dot.	8
5. Attributes	Columns: Affinity 6, Standard 5, Aversion 4. The number is the cap and the dots to spend.	6
6. Abilities	Give the six groups 2, 3, 4, 5, 6, and 7 dots. Free specialty at 4+. Mark PL on 3 abilities, each with a free specialty.	6
7. Merits and Flaws	7 points for Merits, +1 per Flaw point (up to +7).	9
8. Backgrounds	7 points plus leftovers from Step 7. Resources starts at 1 free dot.	10
9. Willpower, Fate, Sanity	5 each. Willpower is 4 with two Vice highs, 6 with two Virtue highs.	11
10. Combat Styles	Dots by Physical column: Affinity 7, Standard 5, Aversion 3. Max 5 in one style.	12
11. Magical Knowledges	Dots by Mental column: Affinity 7, Standard 5, Aversion 3. Max 5 in one knowledge.	13
12. Freebies	7 points. Attribute 3, Ability 2, Style or Knowledge 4, Background 1, Mana 7 per dot.	6
13. Level	Total your Attributes (with Mana), Abilities, Combat Styles, and Magical Knowledges.	6

The Golden Rule: nothing may be filled in above 5 dots at creation.

Tropes

Warrior Tropes

Trope	Boon	Bane
Genki	Athletics	Subterfuge
Himbo/Bimbo	Athletics	Dodge
Underdog	Endurance	Ranged
Gentle Giant	Endurance	Melee
Berserker	Martial Arts	Dodge
Battle Maniac	Martial Arts	Diplomacy
Weapon Savant	Melee	Circle Magic
Hotblooded	Melee	Martial Arts
Sharpshooter	Ranged	Endurance
Gunslinger	Ranged	Magic

Rogue Tropes

Trope	Boon	Bane
Daredevil	Acrobatics	Melee
Free Runner	Acrobatics	Expression
Trickster	Chicanery	Implements
Gambler	Chicanery	Insight
Reluctant Hero	Dodge	Presence
Kuudere	Dodge	Endurance
Street Rat	Sleight of Hand	Chicanery
Class Clown	Sleight of Hand	Etiquette
Ghost	Stealth	Subterfuge
Lone Wolf	Stealth	Commerce

Troubadour Tropes

Trope	Boon	Bane
Chosen Optimist	Expression	Martial Arts
Yandere	Expression	Magic
Fame Hungry	Performance	Stealth
Idol	Performance	Persuasion
Thug	Presence	Persuasion
Rival	Presence	Stealth
Pacifist	Persuasion	Diplomacy
People Pleaser	Persuasion	Awareness
Shadow Broker	Subterfuge	Chicanery
Dark Past	Subterfuge	Expression

Noble Tropes

Trope	Boon	Bane
Fallen Noble	Commerce	Etiquette
Hoarder	Commerce	Athletics
Idealist	Diplomacy	Performance
Mentor	Diplomacy	Attunement
Reluctant Royalty	Etiquette	Ride
Dandere	Etiquette	Presence
Navigator	Pilot	Acrobatics
Speed Demon	Pilot	Insight
Wanderer	Ride	Pilot
Feral One	Ride	Pilot

Mage Tropes

Trope	Boon	Bane
Full Metal	Alchemy	Sleight of Hand
Mad Scientist	Alchemy	Attunement
Magical Bloodline	Attunement	Alchemy
Fey Chosen	Attunement	Pilot
Arcanist	Circle Magic	Ranged
Bookworm	Circle Magic	Acrobatics
Shut-In	Implements	Survival
Broken Ace	Implements	Survival
Hedge Mage	Magic	Alchemy
Prodigy	Magic	Awareness

Sage Tropes

Trope	Boon	Bane
Collector	Artifacts	Athletics
Opportunist	Artifacts	Commerce
Perfectionist	Awareness	Crafts
Stoic Veteran	Awareness	Circle Magic
Artisan	Crafts	Sleight of Hand
Lore Keeper	Crafts	Artifacts
Empath	Insight	Performance
Conspiracy Theorist	Insight	Artifacts
Caretaker	Survival	Crafts
Naturalist	Survival	Implements

Extra Tropes

Trope	Boon	Bane
Nihilist	Endurance	Melee
Tsundere	Melee	Expression
Glass Cannon	Martial Arts	Endurance
Veteran Adventurer	Survival	Magic
Schemer	Subterfuge	Insight
Burnout	Awareness	Insight

The Seven Scales and Driving Factors

Positions: High Virtue (2), Low Virtue (1), Central (0), Low Vice (1), High Vice (2). Each Driving Factor must match the side of its high.

Scale	Core Tension	Virtue Drives	Vice Drives
Humility / Pride	Where do I place my own worth relative to others?	Devotion, Penance	Honor, Dominance
Charity / Greed	Do I give or do I keep?	Generosity, Patronage	Ambition, Avarice
Chastity / Lust	Do I restrain or do I pursue?	Discipline, Repression	Passion, Indulgence
Patience / Wrath	Do I endure or do I act on my anger?	Steadfast, Passivity	Righteous, Rage
Temperance / Gluttony	Do I hold back or do I commit fully?	Balance, Restraint	Obsession, Excess
Kindness / Envy	Do I care for others or do I want what they have?	Compassion, Codependence	Aspiration, Resentment
Diligence / Sloth	Do I work or do I rest?	Purpose, Compulsion	Stillness, Apathy

Heritages

Rare heritages need Storyteller approval. Incorporeal Undead cannot be chosen at creation; a character only becomes one in play.

Common Heritages

Heritage	Innate Attribute	Innate Flaw	Attribute Flaw	Heritage Merit (choose 1)	Heritage Magic
Avian	Dexterity or Perception	Hollow Bones	Social	Aerial Agility, Keen Eye	Skycall
Beastfolk	Perception or Dexterity	Animalistic Instincts	Mental	Pack Sense, Predator's Instinct	Howling Magic
Bestial Demon	Strength or Dexterity	Animalistic Instincts	Social	Beast Sense, Feral Surge	Feral Blood
Brutes	Strength or Fortitude	Imposing	Mental	Brute Force, Thick Hide	Titan's Weight
Dwarf	Fortitude or Wisdom	Giggle Fibbers	Social	Dwarven Crafting, Dwarven Constitution	Earthsong
Elf	Intelligence or Fortitude	Insular Grace	Social	Elven Compass, Mana Touched	Verdant Communion
Gremlinesque	Intelligence or Dexterity	Mischief Prone	Physical	Tinker, Scurry	Tinker's Spark
Halfling	Charisma or Dexterity	Underestimated	Physical	A Lil Luck, Disarming Charm	Hearthluck
Hyuman	Any one	Restless	None	Hyuman Adaptability, Tenacity	Adaptation
Immortal Mix	Strength or Dexterity	Badi's Blood	Mental	Four Armed Fighting, Quadbidextrous	Undying Flesh
Ogre / Oni	Strength or Wisdom	Ogre's Grace	Social	Iron Gut, Peacemaker	Oni Ward
Reptilian / Bug	Fortitude or Perception	Cold Blooded	Social	Scaled Hide, Toxic Knack	Venom

Rare Heritages

Heritage	Innate Attribute	Innate Flaw	Attribute Flaw	Heritage Merit (choose 1)	Heritage Magic
Corporeal Undead	Intelligence or Composure	Mana Dependent	Physical	Undying Resilience, Death Sense	Deathless
Demon	With the Storyteller	With the Storyteller	With the Storyteller	Tribal Gift, Demon Tongue, Mana Born	Tribal Magic
Devils	Intelligence or Charisma	Devil's Rejects	Physical	Devil Wings, Emotional Taste, Emotional Harvest, Devil Spawn	Contract Magic
Dragonfolk	Strength or Fortitude	Intimidating	Social	Greater Mana Usage, Dragon's Might	Dragon Blood
Fey	Charisma or Wisdom	Otherworldly	Physical	Nature Bond, Wellspring	Fey Magic
Fishfolk	Fortitude or Intelligence	Fisheye	Social	Water Sense, Deep Dweller	Tidewarden
Incorporeal Undead	Former heritage's	Insubstantial	Former heritage's	Unseen, Grave Voice	Manifestation
Merfolk	Charisma or Perception	Tidal Pull	Mental	Tide Born, Striking Beauty	Siren Song
Migurd	Perception or Wisdom	Lost in Translation	Physical	Telepathic Read, Demon Continent Instinct	Mindvoice
Shifters	Charisma or Dexterity	Unstable Form	Mental	Faceswap, Adaptive	Transformation
Skyfolk	Perception or Dexterity	Above It All	Social	Far Sight, Wind Born	Heaven's Wing
Slime	Fortitude or Wisdom	Bound to Mana	Social	Elastic, Hidden Pocket	Morph
Superd	Strength or Composure	Spear Sworn	Social	Third Eye, Soul Spear	Soulbound
Tiny	Dexterity or Charisma	Tiny	Physical	Hard to Hit, Tiny Terror	Glamour
Vampire	Any one	Compulsion	None	Resilience	Vampiric Powers

Abilities

Warrior

Ability	Used For
Athletics	Climbing, running, jumping, swimming, and flying.
Endurance	Pushing through pain, fatigue, poison, and harsh conditions.
Martial Arts	Fighting unarmed: fists, kicks, grapples, and throws.
Melee	Fighting with blades, axes, polearms, shields, and other hand weapons.
Ranged	Bows, guns, and thrown weapons.

Rogue

Ability	Used For
Acrobatics	Balance, tumbling, and agile movement.
Chicanery	Cons, disguises, tricks, and dirty tactics.
Dodge	Getting out of the way of attacks and hazards.
Sleight of Hand	Picking pockets, palming objects, and quick-fingered work.
Stealth	Hiding, sneaking, and moving unseen.

Troubadour

Ability	Used For
Expression	Art, writing, and putting ideas and feelings across.
Performance	Music, acting, dance, and entertaining a crowd.
Presence	Force of personality: impressing, commanding, and intimidating.
Persuasion	Convincing others with argument or appeal.
Subterfuge	Lying, misdirection, and hiding your intentions.

Noble

Ability	Used For
Commerce	Trade, haggling, appraisal, and business.
Diplomacy	Negotiating and settling disputes between parties.
Etiquette	Manners, protocol, and moving through high society.
Pilot	Sailing ships and piloting any vehicle.
Ride	Riding and handling mounts.

Mage

Ability	Used For
Alchemy	Brewing potions and working with reagents.
Attunement	Bonding with and drawing on magical items and attuned effects.
Circle Magic	Ritual magic: scrolls, wards, contracts, summoning. Counts toward your Mana Pool.
Implements	Using and working with crafted magical devices.
Magic	Casting spells from the schools. Counts toward your Mana Pool.

Sage

Ability	Used For
Artifacts	Understanding, handling, and repairing magical artifacts.
Awareness	Noticing things with your senses.
Crafts	Building, making, and repairing things.
Insight	Reading people, their motives, and their lies.
Survival	Tracking, foraging, and living off the land.

Past Life Occupations

Each job marks PL on the abilities shown, and the specialty in brackets is the free specialty that comes with it. Swap them with your Storyteller's OK, or make your own job and mark 3 abilities.

Occupation	PL Abilities (Free Specialty)
Chef or Cook	Crafts (Cooking), Alchemy (Herbalism), Endurance (Long Hours), Awareness (Taste)
Nurse or Paramedic	Alchemy (Healing Potions), Insight (Symptoms), Endurance (Long Hours), Awareness (Sight)
Doctor	Alchemy (Antidotes), Insight (Symptoms), Awareness (Searching), Etiquette (Bedside Manner)
Police Officer	Awareness (Danger), Insight (Lies), Martial Arts (Grappling), Ranged (Guns), Presence (Commanding)
Soldier	Ranged (Guns), Melee (Knives), Endurance (Pain), Athletics (Running), Etiquette (Military Protocol)
Firefighter	Athletics (Climbing), Endurance (Heat and Cold), Awareness (Danger)
Pro Athlete	Athletics (Running), Endurance (Pain), Acrobatics (Balance)
Martial Arts Instructor	Martial Arts (Kicks), Dodge (Melee Attacks), Acrobatics (Breaking Falls), Expression (Teaching)
Dancer	Performance (Dance), Acrobatics (Tumbling), Athletics (Jumping)
Musician	Performance (Instruments), Expression (Songwriting), Presence (First Impressions)
Actor	Performance (Acting), Subterfuge (Poker Face), Expression (Storytelling), Presence (First Impressions)
Stage Magician	Performance (Stage Magic), Sleight of Hand (Card Tricks), Subterfuge (Misdirection)
Writer or Journalist	Expression (Writing), Insight (Motives), Awareness (Searching), Persuasion (Debate)
Artist or Designer	Expression (Painting), Crafts (Tailoring), Awareness (Sight)
Teacher	Expression (Teaching), Presence (Calming Others), Insight (Emotions)
Salesperson	Persuasion (Sales Pitch), Commerce (Customer Service), Chicanery (Cons), Insight (Motives)
Business Owner	Commerce (Bookkeeping), Diplomacy (Alliances), Persuasion (Recruiting), Presence (Commanding)
Bartender or Server	Etiquette (Hospitality), Insight (Emotions), Commerce (Customer Service), Persuasion (Charm)
Lawyer	Diplomacy (Legal Disputes), Persuasion (Debate), Insight (Lies), Subterfuge (Spin)
Politician	Diplomacy (Court Politics), Persuasion (Rallying a Crowd), Presence (Inspiring), Etiquette (High Society), Subterfuge (Spin)
Priest or Clergy	Attunement (Holy Relics), Etiquette (Religious Rites), Presence (Calming Others), Insight (Emotions)
Scientist	Alchemy (Elements), Implements (Lab Equipment), Artifacts (Identification), Awareness (Searching)
Engineer or Mechanic	Crafts (Mechanics), Implements (Invention), Artifacts (Machines)
Programmer	Implements (Coding), Artifacts (Machines), Awareness (Searching)
Truck or Delivery Driver	Pilot (Long Hauls), Endurance (Long Hours), Awareness (Danger)
Farmer or Rancher	Ride (Beasts of Burden), Survival (Weather), Endurance (Long Hours), Crafts (Woodworking)
Hunter or Outdoorsman	Ranged (Moving Targets), Survival (Tracking), Stealth (Wilderness), Awareness (Sight)
Gamer	Awareness (Searching), Insight (Motives), Chicanery (Cheating at Games)
Thief or Con Artist	Sleight of Hand (Pickpocketing), Stealth (Shadows), Chicanery (Disguises), Subterfuge (Lying)

Specialty Ideas

Common specialties for each ability. Pick one or write your own.

Ability	Specialties
Athletics	Climbing, Running, Swimming, Jumping, Flying, Lifting
Endurance	Long Hours, Pain, Poison, Heat and Cold, Hunger and Thirst, Sickness
Martial Arts	Boxing, Kicks, Grappling, Disarms, Pressure Points, Brawling
Melee	Swords, Axes, Polearms, Shields, Knives, Hammers and Maces
Ranged	Bows, Guns, Thrown Weapons, Moving Targets, Long Range, Trick Shots
Acrobatics	Balance, Tumbling, Breaking Falls, Parkour, Contortion, Aerial Tricks
Chicanery	Disguises, Cons, Cheating at Games, Dirty Tricks, Forgery, Smuggling
Dodge	Projectiles, Melee Attacks, Spells, Traps, Explosions, Grabs
Sleight of Hand	Pickpocketing, Palming, Card Tricks, Lockpicking, Disarming Traps, Quick Draw
Stealth	Shadows, Crowds, Silent Movement, Tailing, Wilderness, Breaking In
Expression	Writing, Painting, Songwriting, Speeches, Storytelling, Teaching
Performance	Singing, Instruments, Acting, Dance, Comedy, Stage Magic
Presence	Commanding, Intimidation, Inspiring, First Impressions, Calming Others, Standing Firm
Persuasion	Debate, Sales Pitch, Charm, Pleading, Rallying a Crowd, Recruiting
Subterfuge	Lying, Poker Face, Keeping Secrets, Misdirection, Spin, Interrogation
Commerce	Haggling, Appraisal, Bookkeeping, Trade Routes, Customer Service, Black Markets
Diplomacy	Peace Talks, Alliances, Hostage Talks, Court Politics, Guild Politics, Legal Disputes
Etiquette	High Society, Bedside Manner, Hospitality, Religious Rites, Military Protocol, Foreign Customs
Pilot	Ships, Wagons and Carts, Airships, Long Hauls, Rough Terrain, Chases
Ride	Horses, Flying Mounts, Beasts of Burden, Mounted Combat, Long Rides, Training Mounts
Alchemy	Healing Potions, Antidotes, Poisons, Herbalism, Elements, Explosives
Attunement	Holy Relics, Weapons, Armor, Jewelry, Quick Bonding, Multiple Items
Circle Magic	Scrolls, Wards, Contracts, Summoning, Group Rituals, Implements
Implements	Wands and Staves, Magitech, Invention, Lab Equipment, Enchanted Tools, Coding
Magic	Quick Casting, Precision, Raw Power, Defensive Spells, Sustained Spells, Countering Spells
Artifacts	Identification, Ancient Relics, Repair, Machines, Curses, Dungeon Loot
Awareness	Sight, Hearing, Scent, Taste, Danger, Searching
Crafts	Cooking, Smithing, Woodworking, Tailoring, Mechanics, Jewelcrafting
Insight	Lies, Motives, Emotions, Symptoms, Crowd Mood, Hidden Loyalties
Survival	Tracking, Foraging, Shelter, Navigation, Weather, Trapping

Merits and Flaws

Physical Merits

Merit	Cost

Amnesia	2 to 5 (1 to 4 dots)
Compulsion	1 per dot, max 4
Gullible	1 per dot, max 3
Haunted	2 to 4 (1 to 3 dots)
Insomnia	1 per dot, max 2
Nightmares	1 per dot, max 2
Paranoid	1 per dot, max 3
Phobia	1 per dot, max 4
Reckless	2

Magical Flaws

Flaw	Points
Cursed	2 to 7, by curse
Magic Averse	1 per dot, max 7
Mana Beacon	2
Mana Deficient	1 per dot, max 5
Mana Leak	1 per dot, max 3
Mana Sensitive	1 per dot, max 3
Slow Channel	1 per dot, max 3
Unstable Magic	1 per dot, max 3
Void Touched	3
Wild Mana	2

Special Powers

Power	Cost
Devil's Fruit	7 per dot, max 2
Shadow Monarch	7 per dot, max 2
Bankai Potential	7 per dot, max 2
Titan Shift	7 per dot, max 2
Cursed Energy	7 per dot, max 2
Nen Awakening	7 per dot, max 2
Witch Factor	7 per dot, max 2
Breath Style	7 per dot, max 2
Unique Skill	7 per dot, max 2
Devil's Bargain (Flaw)	3, 5, or 7 points back (1 to 3 dots)

Enhancements

Enhancement	Cost
Prosthetic Limb	4
Filter Lungs	4
Optic Implants	4
Skill Chip	4
Reinforced Bones	5
Hidden Blade	5
Spring Legs	5
Muscle Weave	6
Reflex Wiring	6
Neural Link	6
Subdermal Plating	7, heavy
Jump Jets	8, heavy
Mana Capacitor	8, heavy

Backgrounds

Background	What It Is (1 to 7 dots)
Allies	Reliable people who will actively help you when asked.
Contacts	People who feed you information in a chosen field.
Fame	How widely you are known, and for what.
Fixer	Someone who works outside normal channels and makes things happen: finding work, solving problems quietly, and connecting people.
Followers	People personally loyal to you or your cause, not hired staff.
Hacker	Your skill at getting into and moving through the CCN and the crystal-based systems that run the modern world.
Influence	Pull within one institution, organization, or power structure, defined at creation.

Background	What It Is (1 to 7 dots)
Mentor	A more experienced person invested in your growth.
Nobility	You were born into a noble family.
Resources	Wealth, income, and lifestyle.
Retainers	Staff, employees, or trained assistants in your service.
Safe House	Secure places to hide, rest, or lie low.
Street Cred	Respect within a community or scene you define with the Storyteller.
Subscribers	An engaged audience that follows you on the CCN, as a creator, public figure, or someone whose life simply caught people's attention.

Willpower, Fate, Sanity, and Mana

Stat	Start	Range	Used For	Gained or Recovered
Willpower	5 (4 to 6)	1 to 10	Social combat health. Spend 1 per turn: +3 dice, or reroll 3 failed dice.	Checks from acting on your drives and holding firm. Full row of checks: +1 dot.
Fate	5	1 to 10	Weaving the story your way. Fate contests against opposing Fate.	Checks from influence, kept deals, and won contests. Never spent.
Sanity	5	1 to 10	Resisting the Void. Lost dots bring traumas; at 1 or 10 the Storyteller takes control.	Checks from living life, time with loved ones, and therapy.
Mana	1	1 to 10	Powers all magic. Pool = (Magic + Circle Magic) x Mana. M/T = Fortitude + Mana.	Freebies (7 per dot) or XP (new dot x7). Pool recovers each Upkeep and quickly between fights.

Combat Styles

Style	Weapons	Primary	Secondary
Quickcut Style	Short Blades	Dexterity + Melee	Dexterity + Stealth
Silver Arc Style	Long Blades	Dexterity + Melee	Perception + Dodge
Timberfall Style	Axes	Strength + Melee	Fortitude + Endurance
Heron's Reach Style	Polearms	Dexterity + Melee	Perception + Awareness
Wallguard Style	Shields	Strength + Melee	Fortitude + Endurance
Ten Count Style	Boxing	Strength + Martial Arts	Fortitude + Endurance
Drifting Leaf Style	Kung Fu	Dexterity + Martial Arts	Perception + Dodge
Main Event Style	Wrestling	Strength + Martial Arts (or Athletics)	Fortitude + Endurance
Windreader Style	Bows	Dexterity + Ranged	Perception + Awareness
Sundown Style	Hand Guns	Dexterity + Ranged	Perception + Awareness
Iron Rain Style	Large Guns	Fortitude + Ranged	Strength + Athletics
Dragon's Blade Style	Natural Weapons	Dexterity + Martial Arts	Perception + Dodge

Magical Knowledges

Knowledge	Kind	Extra Mana Dice	Focus
Fire	Casting school	Damage	Heat and burning. Imposes Burning.
Water	Casting school	Attack or damage	Force, cold, and flow. Imposes Chilled; moves targets.
Air	Casting school	Attack	Wind, speed, and precision. Ranged attacks and control.
Earth	Casting school	Damage	Stone and terrain. Barriers and heavy damage.
Nature	Casting school	Attack or damage	Growth, vines, and spores. Roots, terrain, damage over time.
Bright	Casting school	Attack	Radiance. Harms undead, buffs the living, transfers mana.
Shade	Casting school	Damage	Darkness and drain. Harms the living, buffs undead, drains mana.
Battle Aura	Discipline	Attack or damage	Mana through body and weapon. Pairs with Combat Styles.
Scroll Magic	Circle Magic discipline	None in combat	Spells stored in scrolls to release later.
Divination	Circle Magic discipline	None in combat	Reading information from time, place, and connection.
Summoning Magic	Circle Magic discipline	None in combat	SumMonz, familiars, and calling items through circles.
Teleportation	Circle Magic discipline	None in combat	Instant passage between two prepared circles.
Contract Magic	Circle Magic discipline	None in combat	Binding agreements with real teeth.
Binding Rituals	Circle Magic discipline	None in combat	Fixing effects, spirits, or entities to objects or places.
Ward Magic	Circle Magic discipline	None in combat	Protective or alerting circles on zones, objects, or thresholds.
Augmentation	Circle Magic discipline	None in combat	Building magic into weapons and gear.
Spatial Magic	Circle Magic discipline	None in combat	Folding space so containers hold far more.
Time Magic	Circle Magic discipline	None in combat	Slowing, speeding, or stopping time in a small area.
Heritage Magic	Heritage	Per spell	Your heritage's own magic. 1 free dot (Chapter 8).

Chapter 7: Tropes, Virtues, and Vices

In This Chapter

Introduction....68
Part 1: Tropes....68
- Warrior Tropes....69
- Rogue Tropes....69
- Troubadour Tropes....70
- Noble Tropes....70
- Mage Tropes....71
- Sage Tropes....71
- Extra Tropes....72

Part 2: Virtues, Vices, and the Seven Scales....72

The Seven Scales: Full Reference....76
- Humility / Pride....76
- Charity / Greed....77
- Chastity / Lust....77
- Patience / Wrath....78
- Temperance / Gluttony....79
- Kindness / Envy....79
- Diligence / Sloth....80

Every character in this game is a person first and a set of numbers second. Before you touch your dice pools or dot allocations, you need to know who you are playing. Tropes and Driving Factors are the two pieces of your character that answer that question most directly.

Your Trope is your personality in shorthand. Your Virtues and Vices are your values, set on seven scales. Your Driving Factors are your reasons for getting out of bed, and they come from the strongest of those values. Together they are the lens through which every mechanical choice you make should be viewed. The fighter who chose Battle Maniac and High Wrath is a fundamentally different person from the fighter who chose Reluctant Hero and High Patience, even if their dots end up looking similar on paper. None of this constrains your character; it gives them shape.

You pick one Trope in Step 1 of character creation (Part 1 of this chapter). In Step 2 you set your seven scales and choose two Driving Factors, one for each of your highs (Part 2).

Part 1: Tropes

A Trope is a recognizable personality archetype, the kind that anyone who has watched enough anime or read enough light novels will identify immediately. They are not stereotypes; they are starting points. You do not have to choose a Trope from this list. If your character's personality does not map cleanly to any of these, work with your Storyteller to create something that fits. The list is a resource, not a rulebook.

Each Trope provides a Boon and a Bane. Note them in the specialty field next to the relevant abilities on your sheet.

The Boon: One bonus die on rolls with the chosen ability within the Trope's category. It stacks with any specialty already on that ability.

The Bane: One penalty die on rolls with the fixed ability the Trope names.

Virtues and Vices: Your scale positions also add or remove dice, depending on whether you are acting with or against them: 1 die at a low, 2 dice at a high. These stack with your Boon or Bane when both apply. This is why the scales on your sheet are marked 2, 1, 0, 1, 2.

The Tropes are grouped by their Boon: each ability group has its own table, with two Tropes for every ability, in the same order as on your character sheet. A few more Tropes follow in Extra Tropes.

Warrior Tropes

#	Trope	Description	Boon	Bane
1	Genki	Boundlessly energetic and positive. Too honest and open to deceive effectively.	Athletics	Subterfuge
2	Himbo/Bimbo	Extraordinarily capable physically. Not always sure what is happening around them.	Athletics	Dodge
3	Underdog	Counted out constantly. Wins through sheer refusal to accept the math.	Endurance	Ranged
4	Gentle Giant	Physically imposing. Emotionally soft. Hates direct violence and flinches from it even when necessary.	Endurance	Melee
5	Berserker	Loses control when pushed too far. Terrifying in full rage with fists or claws, vulnerable coming down from it.	Martial Arts	Dodge
6	Battle Maniac	Lives for the fight, hand to hand if possible. Everything else is just waiting.	Martial Arts	Diplomacy
7	Weapon Savant	Lives for the craft of the blade. One weapon is an extension of their soul. Everything else is distraction.	Melee	Circle Magic
8	Hotblooded	Leads with passion and charges straight in. Thinks second if at all.	Melee	Martial Arts
9	Sharpshooter	Patient and precise. One perfect shot from far away is worth a hundred up close. Fragile when the enemy closes in.	Ranged	Endurance
10	Gunslinger	Fast hands and a faster reputation. Never had the patience for magical theory.	Ranged	Magic

Rogue Tropes

#	Trope	Description	Boon	Bane
11	Daredevil	Chases the next stunt and lives for the rush. Would rather leap over a fight than stand in one.	Acrobatics	Melee
12	Free Runner	A rooftop courier who goes over everything and through nothing. Quiet, quick, and hard to read.	Acrobatics	Expression
13	Trickster	Delight in chaos and misdirection. Relies on natural wit, not manufactured magical tools.	Chicanery	Implements
14	Gambler	Lives on rigged games, marked cards, and loaded dice. Reads the cards, not the people.	Chicanery	Insight
15	Reluctant Hero	Wants a quiet life. Keeps getting dragged into things. Makes no effort to stand out.	Dodge	Presence
16	Kuudere	Cool, detached, few words. Depths hidden behind a flat affect, and very hard to land a hit on.	Dodge	Endurance
17	Street Rat	Grew up with nothing and survived by being quick and quiet, not clever. Light-fingered, but too blunt and literal to run a con or set up a trick.	Sleight of Hand	Chicanery
18	Class Clown	Deflects everything with humor and a pocketful of tricks. Cannot take formal situations seriously no matter how hard they try.	Sleight of Hand	Etiquette
19	Ghost	Exists at the edges. Nobody notices them until they want to be noticed.	Stealth	Subterfuge
20	Lone Wolf	Works alone by preference. Has never learned to navigate transactions with others.	Stealth	Commerce

Troubadour Tropes

#	Trope	Description	Boon	Bane
21	Chosen Optimist	Chooses joy deliberately every single day and shares it with everyone. Has seen enough to know it is a choice.	Expression	Martial Arts
22	Yandere	Obsessively devoted. Loving and dangerous in equal measure, and loudly expressive about it. Obsession narrows magical focus to a single point.	Expression	Magic
23	Fame Hungry	Performs for an audience whether one is present or not. The spotlight and stealth are mutually exclusive.	Performance	Stealth
24	Idol	Built for the stage and the crowd. Struggles when someone asks them to just talk honestly.	Performance	Persuasion
25	Thug	Carries themselves with the quiet weight of someone who does not need to raise their voice. Power is their language. Words are not.	Presence	Persuasion
26	Rival	Defined entirely by competition with one specific person or ideal. Announces themselves rather than lurking.	Presence	Stealth
27	Pacifist	Refuses violence as a first resort. Skilled at talking people down but avoids formal confrontation too.	Persuasion	Diplomacy
28	People Pleaser	Cannot say no. Agrees with everyone. Too busy managing others to notice their own surroundings.	Persuasion	Awareness
29	Shadow Broker	Trades in secrets and real information. The whole business depends on being trusted, so trickery and fakery do not come naturally.	Subterfuge	Chicanery
30	Dark Past	Something happened. It shaped everything. They do not talk about it, and they have learned to hide the truth well.	Subterfuge	Expression

Noble Tropes

#	Trope	Description	Boon	Bane
31	Fallen Noble	Once had everything. Lost it. Old habits of privilege surface at the wrong moments.	Commerce	Etiquette
32	Hoarder	Cannot throw anything away, and knows exactly what every piece of it is worth.	Commerce	Athletics
33	Idealist	Believes in people past the point of evidence. Too earnest to perform cynically or manipulatively.	Diplomacy	Performance
34	Mentor	Compelled to teach and guide others even when uninvited. Good at bringing people together. Neglects their own attunement to items.	Diplomacy	Attunement
35	Reluctant Royalty	Born to privilege they did not ask for. Raised in courts, not on horseback.	Etiquette	Ride
36	Dandere	Shy and quiet until comfortable. Polite to a fault. Opens up slowly and completely.	Etiquette	Presence
37	Navigator	Born for the open sky. At home at the helm of anything that flies. Precise and methodical, clumsy when improvisation is required.	Pilot	Acrobatics
38	Speed Demon	Lives for the open road and the next faster ride. Too busy chasing the horizon to read the people around them.	Pilot	Insight
39	Wanderer	No fixed home. Collects experiences instead of things. Has never learned to pilot a ship or any other vehicle.	Ride	Pilot
40	Feral One	Raised outside civilization or close enough to it. Rides beasts as easily as walking. Hopeless at the controls of any ship or vehicle.	Ride	Pilot

Mage Tropes

#	Trope	Description	Boon	Bane
41	Full Metal	Methodical and precise. Every transmutation deliberate. Quick sleight is not in their vocabulary.	Alchemy	Sleight of Hand
42	Mad Scientist	Brilliant, obsessive, ethically flexible. Too chaotic to properly attune to magical items.	Alchemy	Attunement
43	Magical Bloodline	Power runs in the family, for better or worse. Feels magic in the blood but never studied how to brew or refine it.	Attunement	Alchemy
44	Fey Chosen	Marked by the fey and touched by something not quite of this world. Machines and vehicles never behave around them.	Attunement	Pilot
45	Arcanist	Consumed by magical theory and the drawing of circles. Cannot always translate knowledge into instinctive physical action.	Circle Magic	Ranged
46	Bookworm	Knows every circle and formula in theory. Struggles when theory meets reality at speed.	Circle Magic	Acrobatics
47	Shut-In	Exceptional with gadgets and tools made at home. No wilderness instincts outside controlled environments.	Implements	Survival
48	Broken Ace	Exceptional with every tool and implement. Held together with willpower and spite. Has stopped taking care of themselves.	Implements	Survival
49	Hedge Mage	Self-taught, unconventional, effective in ways formal training cannot explain. Never learned the foundations.	Magic	Alchemy
50	Prodigy	Naturally gifted with magic beyond reason. So focused on mastery they stop noticing what is happening around them.	Magic	Awareness

Sage Tropes

#	Trope	Description	Boon	Bane
51	Collector	Obsessed with rare and valuable items. Everything is a potential addition to the collection.	Artifacts	Athletics
52	Opportunist	Spots the angle and the value of a thing before anyone else sees the room. So transactional they burn bridges they could have invested in.	Artifacts	Commerce
53	Perfectionist	Cannot submit work they consider unfinished. Rushed or imperfect conditions trigger a breakdown.	Awareness	Crafts
54	Stoic Veteran	Has seen too much. Feels too little on the surface, and misses nothing. Too direct and practical for complex magical theory.	Awareness	Circle Magic
55	Artisan	Obsessed with making things perfectly. Steady hands built for craft, not quick dexterous tricks.	Crafts	Sleight of Hand
56	Lore Keeper	Devoted to preserving history and restoring ancient craft. Reveres artifacts too much to study them practically.	Crafts	Artifacts
57	Empath	Feels everything everyone around them feels. A gift and a burden in equal measure.	Insight	Performance
58	Conspiracy Theorist	Sees patterns and motives everywhere. Sometimes correct. Focused so hard on hidden meanings they miss what is in front of them.	Insight	Artifacts
59	Caretaker	Puts everyone else first. Neglects their own creative projects entirely.	Survival	Crafts
60	Naturalist	Deeply in tune with the living world and at home in the wild. Uncomfortable with manufactured magic and constructed items.	Survival	Implements

Extra Tropes

#	Trope	Description	Boon	Bane
61	Nihilist	Nothing matters so why not try everything. Surprisingly effective. Deeply concerning.	Endurance	Melee
62	Tsundere	Hostile on the surface, soft underneath. Swings first to hide genuine care.	Melee	Expression
63	Glass Cannon	Hits like a freight train, folds like paper. Offense is everything, defense is someone else's problem.	Martial Arts	Endurance
64	Veteran Adventurer	Has seen it all. Bored by almost everything. Relies on hard-won experience in the wild over magical theory.	Survival	Magic
65	Schemer	Always three steps ahead. So focused on their own plans they miss nuance in others.	Subterfuge	Insight
66	Burnout	Was exceptional once. Still is. Just exhausted. Has stopped paying attention to subtlety in people.	Awareness	Insight

Part 2: Virtues, Vices, and the Seven Scales

People are not consistent. They have values they hold deeply and impulses they struggle to control. They have principles they uphold under pressure and principles they abandon when the cost gets high enough. The Seven Scales put all of that on the table and make it mechanical.

The scales do not tell you who your character is. They reflect who your character is right now, and they change as your character changes. A deeply compassionate person can, through choices made across sessions and arcs, shift toward something darker. A dangerously self-serving one can find their way toward something better. The scales move because people move.

The Seven Scales

Each scale runs between a Virtue and a Vice. Neither end is simply good or bad. They are two orientations toward the same human experience, and either can produce heroism or destruction depending on who carries it and why.

Each scale has five positions, marked 2, 1, 0, 1, 2 on your sheet. The number is how many dice the position adds to rolls that fit it, and removes from rolls that go against it.

Scale Positions

Position	Mark	Effect
High Virtue	2	+2 dice on rolls that align with this Virtue. -2 dice when you try to act against it.
Low Virtue	1	+1 die on rolls that align with this Virtue. -1 die when you try to act against it.
Central	0	No bonus and no drawback. You are balanced on this scale.
Low Vice	1	+1 die on rolls that align with this Vice. -1 die when you try to act against it.
High Vice	2	+2 dice on rolls that align with this Vice. -2 dice when you try to act against it.

These dice only apply when the scale genuinely matters to what your character is doing. A character at High Humility does not get bonus dice on every social roll, only when acting with real humility: deferring to others, admitting limits, putting someone else's needs ahead of their own recognition. The Storyteller decides when a scale is relevant. Scale dice stack with your Trope's Boon or Bane when both apply.

Starting Positions

At character creation (Step 2), set your seven scales:

Two highs: two scales at High Virtue or High Vice.

Two lows: two scales at Low Virtue or Low Vice.

Three central: the other three scales stay at Central.

Then choose two Driving Factors, one for each of your highs, matching the scale and the side the high sits on. Every drive is listed with its scale in the Full Reference at the end of this chapter. The names are starting points: what matters is what your drive is at its core, and which scale and side it belongs to. If you have a custom drive in mind, work with your Storyteller to place it.

Your highs also set your starting Willpower: both Vices start you at 4, both Virtues at 6, and one of each at 5. This only applies at creation. Once play begins, moving on the scales never changes your Willpower rating.

Central scales are not inert. They are simply waiting.

Consulting the Scales

Before committing to a significant action, players are encouraged to consult the scales: look at where your character sits on each relevant scale and let that shape how they weigh the choice.

Consulting the scales is a roleplay tool first and a mechanical tool second. A character at High Patience thinking about charging into a fight does not need a roll to know that charging runs against who they are right now. They can feel it. Consulting the scales makes that feeling explicit at the table.

The Storyteller may ask how your character is weighing the decision. What does their position tell them to do? What does the situation seem to demand? Are those the same thing? The answer is where interesting roleplay lives.

A character never has to act in line with their scales. People struggle, slip, and sometimes act against their own values. But they should know when they are doing it, and so should the player.

When Rolls Are Triggered

A Virtue or Vice roll can come up in any situation where a character's position on a scale genuinely matters: combat, social encounters, exploration, or quiet moments between scenes. The Storyteller decides when a roll is called for. The most common triggers are:

Temptation: a test or temptation that directly engages the character's position on a scale.

Acting against: the character tries to act against their current position on a relevant scale.

Acting with: the character acts in strong alignment with their position. The bonus dice simply apply, with no extra roll.

A deliberate choice: the Storyteller presents a decision meant to engage one or more scales, and the character's choice decides whether their position helps or hinders them.

Actions are the main trigger. Words count as actions, physical deeds count, and deliberately doing nothing when action was possible counts too, especially on scales like Diligence and Patience where inaction is itself a choice.

When a roll is called for, the Storyteller names the scale and whether you are rolling with or against your position, and you add or remove dice accordingly. Success usually means the character can act without betraying their principles. Failure usually means Willpower or Sanity damage, depending on how serious the violation is.

Acting Against Your Scales

When a character acts against their position on a scale, the cost depends on how serious the violation is and how strongly they hold that position.

Consequences

Position	Minor Violation	Severe Violation
High Virtue or High Vice	1 Willpower damage	1 or more Sanity damage, at the Storyteller's discretion
Low Virtue or Low Vice	1 Willpower damage	1 Willpower damage. Never causes Sanity damage.
Central	No consequence	No consequence

Lows can only ever cost Willpower, no matter how serious the violation. The character feels the tension, but it does not break them. Highs cost more, because the character's identity is built around them. Acting against a high is not just a bad decision; it is a betrayal of something the character has built their sense of self around.

A character at High Humility who publicly boasts about their achievements is acting against the deepest part of who they are right now. A character at High Pride forced to grovel, genuinely submitting rather than putting on a show, suffers the same way. Taking quiet pride in being humble is fine. It is the act of boasting that triggers the cost, not the feeling.

How the Scales Shift

The scales move in response to the choices made in play. The Storyteller tracks shifts and announces them.

When a choice warrants a shift, the Storyteller tells the player right away that their scales have shifted. How far the dot moves is revealed at the end of the story chapter, giving the player time to reflect on what led to it before the sheet changes.

Most shifts move a dot one position. A dramatic choice can move it as far as the Storyteller judges fitting, even across the center or from one end of the scale to the other. How far it moves depends on the action and how big a violation of the character's position it was.

The size of the action sets the size of the shift. A character at High Lust who turns down someone they have no interest in triggers nothing. The same character who genuinely wants someone and refuses, again and again, to act on it, denying their nature rather than being patient, may find their dot drifting toward Central or beyond.

Every shift, in either direction, does damage. Small shifts cause Willpower damage; significant shifts cause Sanity damage. A character's sense of self is shaken when their values move, even toward something better. Change is costly. Shifts never change the character's Willpower rating itself.

Losing and Gaining Drives

Your Driving Factors are tied to your highs. If a high shifts away from its end of the scale, you lose that Drive. It is no longer what gets you out of bed in the morning.

If any other scale shifts all the way to a high, you gain a new Drive. The Storyteller assigns it based on the choices that caused the shift and which end you moved toward. It is not the player's choice in the moment; the Storyteller responds to what the character actually did across the arc. There is no limit: a character can have as many Drives as they have highs.

A character who begins play driven by Compassion and ends a long campaign driven by something much darker has not failed. They have changed, and the system makes that change visible.

If a player disagrees with how their scales shifted, or with the Drive assigned to a new high, they should say so. The Storyteller has the final say but should listen to the player's view of their own character. If the disagreement holds, the table reviews the specific choices together. The scales work best when everyone agrees on what they mean.

The Scales in Play

High Patience in Combat

Rael sits at High Patience, driven by Steadfast. His party faces mercenaries who have cornered a group of civilians, and one of them taunts Rael, calling him a coward for holding back. Charging in to silence the taunt would go against his position, and the Storyteller reminds the player that Rael would take 2 penalty dice to do it. The player has Rael hold his ground, absorb the taunt, and wait for the right moment. Because he is acting in line with his scale, no roll is needed, and his 2 bonus dice apply to his next coordinated action with the party.

Central, No Roll

Mirren is Central on Kindness and Envy. A rival has just received an honor she wanted. The Storyteller calls for no roll: she has no strong orientation to act with or against, so she can feel and respond however she likes without mechanical consequence.

A Shift in Progress

Davan is at High Charity, driven by Generosity. Across an arc he made several choices that put his own gain ahead of others, justifying each in the moment. At the end of the arc the Storyteller tells him his scales have shifted: his Charity and Greed dot has moved from High Charity to Central. He loses Generosity and takes Sanity damage. The player and Storyteller agree the move reflects what happened in the story.

Gaining a New Drive

Saya began play Central on Patience and Wrath. Over two arcs she kept choosing confrontation and meeting injustice with force. At the end of the second arc the Storyteller moves her to High Wrath and assigns her a new Drive, Righteous, because her anger was always aimed at things that deserved it. She takes Sanity damage, and she now has three Drives.

Disagreement at the Table

The Storyteller shifts a character two positions toward High Pride after a session where they publicly celebrated a victory. The player disagrees: the celebration felt earned. The table walks through the moments the Storyteller flagged and agrees the celebration was fine, but that brushing off a teammate's contribution was the real trigger. The shift is reduced to one position, and the game goes on.

The Seven Scales: Full Reference

Each scale below describes what acting with or against each position tends to look like, followed by the Driving Factors that belong to it. These are guides to what each scale is about, not a complete list of triggers.

Quick Reference

Scale	Core Tension
Humility / Pride	Where do I place my own worth relative to others?
Charity / Greed	Do I give or do I keep?
Chastity / Lust	Do I restrain or do I pursue?
Patience / Wrath	Do I endure or do I act on my anger?
Temperance / Gluttony	Do I hold back or do I commit fully?
Kindness / Envy	Do I care for others or do I want what they have?
Diligence / Sloth	Do I work or do I rest?

Humility / Pride

This scale governs the character's relationship with their own worth and the worth of others. Humility is the orientation of recognizing limitations and the value of others. Pride is the orientation of asserting worth, standing, and superiority.

Position	Acting In Accordance	Acting Against
High Humility (2)	Deferring to others, acknowledging mistakes without defensiveness, placing others' recognition above your own, serving something greater than yourself	Boasting, claiming credit, dismissing others' contributions, positioning yourself as superior
Low Humility (1)	Generally modest behavior, avoiding unnecessary self-promotion, crediting others when appropriate	Consistent pattern of self-aggrandizement or dismissing others
Central (0)	No strong orientation in either direction. Acts of both humility and pride are available without mechanical consequence	N/A
Low Pride (1)	Asserting your own worth, maintaining your standing, refusing to be diminished without cause	Consistent self-deprecation that undermines your own agency or capability
High Pride (2)	Demanding recognition, establishing dominance, refusing submission, asserting superiority in meaningful ways	Genuinely submitting, accepting diminishment, deferring when your standing is directly challenged

Driving Factors

Factor	High	Description
Devotion	Humility	You exist to serve something greater than yourself. A person, a cause, a community. Their wellbeing is your measure of success. Selfless, outward focused.
Penance	Humility	You believe you are less than others and spend your life trying to prove you deserve to exist. Self-destructive, inward focused.
Honor	Pride	You carry a name, a people, or a standard and you will not let it fall. Everything you do reflects on something larger than yourself. Outward focused but driven by pride.
Dominance	Pride	You need to be the best. Not respected, not admired. The best. Everyone else is competition. Purely self-serving.

Charity / Greed

This scale governs the character's relationship with resources, generosity, and accumulation. Charity is the orientation of giving and sharing. Greed is the orientation of acquiring and keeping.

Position	Acting In Accordance	Acting Against
High Charity (2)	Giving freely at personal cost, sharing resources without expectation of return, prioritizing others' needs over personal accumulation	Hoarding, refusing to share when sharing is possible, prioritizing personal gain at direct cost to others
Low Charity (1)	Generally generous behavior, sharing when it is not too costly, not prioritizing personal accumulation over others' clear needs	Consistent pattern of selfishness or accumulation at others' expense
Central (0)	No strong orientation in either direction	N/A
Low Greed (1)	Prioritizing personal resources, making acquisitions, being selective about what you give away	Consistent pattern of giving away things that meaningfully diminish your own position
High Greed (2)	Acquiring for yourself, refusing to give up what is yours, placing personal accumulation above other considerations	Genuine generosity that costs you something significant with no expectation of return

Driving Factors

Factor	High	Description
Generosity	Charity	You give freely and genuinely. What you have is meant to be shared. The wellbeing of others is worth more to you than anything you could keep. Selfless, outward focused.
Patronage	Charity	You give, but giving is how you accumulate influence, loyalty, and power. Charity is your tool. Inward focused dressed in outward clothing.
Ambition	Greed	You want more, but what you build will outlast you and provide for others whether you intended it or not. The drive is personal but the result is outward.
Avarice	Greed	You accumulate for yourself alone. What is yours is yours. Everyone else can find their own. Purely self-serving.

Chastity / Lust

This scale governs the character's relationship with desire, restraint, and pursuit. Chastity is the orientation of discipline and withholding. Lust is the orientation of desire and pursuit.

Position	Acting In Accordance	Acting Against
High Chastity (2)	Consistent restraint, denying yourself things you genuinely want, maintaining discipline even when desire is strong	Giving in to desire, pursuing what you want without restraint, abandoning discipline for immediate gratification
Low Chastity (1)	Generally restrained behavior, exercising discipline in most situations	Consistent pattern of pursuing desires without meaningful restraint
Central (0)	No strong orientation in either direction	N/A
Low Lust (1)	Pursuing what you want, acting on attraction and desire, prioritizing pleasure	Consistent denial of desire that feels genuine rather than strategic
High Lust (2)	Actively pursuing whoever has captured your attention, acting on desire when it is present, refusing to deny what you want	Genuine denial of desire for someone you have clearly expressed wanting, restraint that is not strategic but actual

Driving Factors

Factor	High	Description
Discipline	Chastity	You hold yourself to a standard because you believe who you are when no one is watching matters. Your restraint makes you dependable, trustworthy, present for others. Outward focused.
Repression	Chastity	You deny yourself everything because wanting feels dangerous. Your restraint is a wall that keeps you safe and everyone else out. Inward, self-protective.
Passion	Lust	You feel everything fully and it drives you to create, connect, and act with a courage that more restrained people cannot access. The fire burns for others as much as for yourself. Outward focused.
Indulgence	Lust	You pursue what you want because you want it. Consequences are for people with less appetite. Purely self-serving.

Patience / Wrath

This scale governs the character's relationship with anger, restraint under pressure, and the choice between waiting and acting. Patience is the orientation of endurance and calm. Wrath is the orientation of anger and confrontation.

Position	Acting In Accordance	Acting Against
High Patience (2)	Holding back when action is tempting, absorbing provocation without response, being the steady presence when others are volatile	Charging in, responding to provocation with force, letting anger drive action
Low Patience (1)	Generally measured behavior, not responding to every provocation	Consistent pattern of impulsive or anger-driven action
Central (0)	No strong orientation in either direction	N/A
Low Wrath (1)	Responding to provocation, not letting things go easily, acting on anger when it is present	Consistent pattern of absorbing provocation without any response
High Wrath (2)	Acting on anger, confronting what deserves confrontation, refusing to make peace with things that should be opposed	Genuinely letting things go, absorbing significant provocation without any response, choosing patience when your anger is directly engaged

Driving Factors

Factor	High	Description
Steadfast	Patience	You are the anchor. When everything is chaos you are calm, and that calm is a gift to everyone around you. You endure so others do not have to. Outward focused.
Passivity	Patience	You endure because acting is harder than waiting. You mistake tolerance for wisdom and let things happen that you should have stopped. Inward, self-protective.
Righteous	Wrath	Your anger is a weapon aimed at things that deserve to be opposed. You fight because someone has to and you refuse to make peace with injustice. Outward focused.
Rage	Wrath	You are angry and the world will know it. What your anger costs others is not your concern. Purely self-serving.

Temperance / Gluttony

This scale governs the character's relationship with moderation, excess, and commitment. Temperance is the orientation of balance and measured engagement. Gluttony is the orientation of total investment and consumption.

Position	Acting In Accordance	Acting Against
High Temperance (2)	Measured engagement, refusing excess, maintaining balance even when full commitment is available	Going all in, consuming without limit, committing fully when moderation was an option
Low Temperance (1)	Generally moderate behavior, avoiding obvious excess	Consistent pattern of all-or-nothing engagement
Central (0)	No strong orientation in either direction	N/A
Low Gluttony (1)	Committing fully when the opportunity is there, consuming what is available, going beyond moderation when the situation calls for it	Consistent moderation when full commitment was possible and warranted
High Gluttony (2)	Total commitment, consuming fully, refusing to do anything halfway	Holding back, choosing moderation, refusing to fully commit when the thing in front of you clearly demands everything you have

Driving Factors

Factor	High	Description
Balance	Temperance	You regulate yourself because a clear head and a steady hand serve the people around you better than any excess ever could. Your moderation is a gift to others. Outward focused.
Restraint	Temperance	You hold back because committing fully feels dangerous. You never invest enough to get hurt and call it wisdom. Inward, self-protective.
Obsession	Gluttony	You cannot do anything halfway. That total commitment burns bright and occasionally illuminates something extraordinary for everyone around you. Outward focused.
Excess	Gluttony	You consume because you want more. What your appetite costs others is not something you lose sleep over. Purely self-serving.

Kindness / Envy

This scale governs the character's relationship with care for others and desire for what others have. Kindness is the orientation of compassion and giving. Envy is the orientation of wanting and resenting.

Position	Acting In Accordance	Acting Against
High Kindness (2)	Genuine care for others' wellbeing, acting to help even at personal cost, responding to suffering with action	Ignoring others' suffering, prioritizing your own desires over clear need in others, sabotaging someone else's wellbeing
Low Kindness (1)	Generally caring behavior, helping when it is not too costly	Consistent indifference to others' wellbeing
Central (0)	No strong orientation in either direction	N/A
Low Envy (1)	Wanting what others have, feeling the pull of comparison, pursuing what you see in others	Consistent contentment with what you have when you clearly want more
High Envy (2)	Acting on the desire for what others have, letting comparison drive action, refusing to accept that someone else has something you want without pursuing it yourself	Genuine contentment with what you have when someone you care about or compete with has something you want

Driving Factors

Factor	High	Description
Compassion	Kindness	You care for others because their suffering genuinely moves you. You give your time, your energy, and yourself freely because that is simply who you are. Outward focused.
Codependence	Kindness	You give care because being needed is the only thing that makes you feel safe. Your kindness keeps people close for your sake as much as theirs. Inward, self-protective.
Aspiration	Envy	You see what others have and it lights a fire under you. You want what they have badly enough to work for it, and that drive pushes you further than comfort ever would. Outward focused in outcome if not in origin.
Resentment	Envy	You want what others have and cannot stand that they have it. Your envy poisons your relationships and makes the world feel smaller. Purely self-serving and destructive.

Diligence / Sloth

This scale governs the character's relationship with effort, engagement, and rest. Diligence is the orientation of work and purpose. Sloth is the orientation of stillness and disengagement.

Position	Acting In Accordance	Acting Against
High Diligence (2)	Working consistently, pushing through exhaustion, refusing to stop when something remains undone	Choosing rest when work remains, delegating when you should do it yourself, stopping before something is finished
Low Diligence (1)	Generally hardworking behavior, completing tasks reliably	Consistent pattern of avoidance or incomplete follow-through
Central (0)	No strong orientation in either direction	N/A
Low Sloth (1)	Taking your time, not pushing when rest is available, declining to engage when engagement is optional	Consistent pattern of forcing yourself to work when rest was available and warranted
High Sloth (2)	Refusing to engage, taking rest when action is available, moving at your own pace regardless of external pressure	Pushing yourself to work, committing to effort when disengagement was available, forcing engagement when you could have stepped back

Driving Factors

Factor	High	Description
Purpose	Diligence	You work because what you are building matters, to you and to the people it will serve when it is done. Your effort is directed outward and the results show it. Outward focused.
Compulsion	Diligence	You work because stopping means feeling something you are not ready to feel. The work is for you, not for what it produces. Inward, self-protective.
Stillness	Sloth	You move at your own pace because the world moves too fast to see clearly. Your unhurried perspective produces things that relentless effort never could. Outward focused in outcome.
Apathy	Sloth	You do not engage because engaging is hard and the outcome probably does not matter anyway. The world can sort itself out. Purely self-serving.

Chapter 8: Heritages

In This Chapter

How Heritages Work **2**

Heritage Magic **2**

Part 1: Common Heritages **5**

Avian 6
Beastfolk 8
Bestial Demon 11
Brutes 13
Dwarf 15
Elf 18

Tiny 65
Vampire 67

From the preface to "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

This book is a field survey of the peoples of Terrana, compiled over many years of travel for Monsera University. Each entry records what I observed, who I spoke with, and where my earlier assumptions proved wrong. Where I have not met a people myself, I say so. Where a people asked me to keep something private, I have.

Every person in Terrana inherits things they did not choose: a lifespan, a body, a reputation, and often a small piece of magic carried in the blood. That inheritance is the subject of this book.

How Heritages Work

Your heritage partially shapes what you are naturally good at, what you carry with you that you did not choose, and how the world tends to see you before you have had a chance to make any impression of your own.

Every heritage in this chapter gives your character the following. Choose your heritage at Step 4 of character creation and record each of them on your sheet.

Innate Attribute: One attribute starts at 2 dots and has its maximum raised by 1 beyond the column cap. Note Innate next to it on your sheet. Most heritages offer two attributes to choose between. Hyumans and born Vampires may choose any attribute.

Innate Flaw: The Innate Flaw is not chosen and grants no extra dots. It is simply part of who your character is.

Attribute Flaw: Every heritage except Hyumans and Vampires is naturally weaker in one attribute group: Physical, Social, or Mental. That group can never be your Affinity column; it can only be your Standard or Aversion column. This is separate from your Innate Flaw, and Merits can still raise attributes in the flawed group.

Heritage Merit: Choose one of the merits listed for your heritage and record it in your Merits, Flaws, and Backgrounds section. You only receive a free dot if the merit itself says so.

Heritage Magic: Every character begins with 1 free dot in the Heritage magic of their heritage. The rules for Heritage magic follow below.

Lifespan: Every heritage has one of four lifespans: 100, 200, 400, or 1000 years. A few are Immortal, meaning no one truly knows how long they live, such as slimes, vampires, and the Immortal Demon Kings.

Common and Rare Heritages

Heritages are divided into Common and Rare based on how many of them live across Terrana and how often the rest of the world encounters them. Common Heritages are available to every player. Choosing a Rare Heritage makes your character an unusual sight almost everywhere they go, and it requires Storyteller approval before character creation begins.

Heritage Magic

Long before anyone in Terrana studies a school of magic, most of them already know a little of it. A Beastfolk child howls and the birds scatter. A Dwarven apprentice lays a hand on a cracked ingot and feels where the flaw runs. Nobody taught them. The magic was in the blood, waiting.

Heritage magic is that inheritance. It is a discipline of its own, separate from the seven casting schools of the heptagram and separate from Battle Aura. It has no school color and no place on the Mages Guild star. It is not learned in a classroom. It wakes up. Every technique in a Heritage magic is a spell, follows the same rules as any other spell, and costs mana.

Your Starting Dot

Every character begins with 1 free dot in the Heritage magic their heritage provides. Record it in the Magical Knowledges section of your sheet.

Any character may instead give up that free dot and take 1 dot in any casting school (Fire, Water, Air, Earth, Nature, Bright, or Shade) or any circle magic. This is a permanent choice. The character can still raise their Heritage magic later with XP, starting from zero.

Either way, a character receives only one free dot. At creation, Heritage magic can be raised like a Magical Knowledge, with the Magical Knowledge dots from Step 11 or with Freebie points (4 per dot), up to 5 dots.

Raising Heritage Magic

Heritage magic is rated from 1 to 7 and uses the same rank names as every other magic.

- 1 Core
- 2 Terrestrial
- 3 Aerial
- 4 Lunar
- 5 Stellar
- 6 Galactic

- 7 Cosmic

After creation, raising Heritage magic costs XP equal to the new dot x5, the same as a Magical Knowledge.

Choosing Spells

Every rank offers two spells, Option A and Option B. Each time you gain a dot, choose one of that rank's two spells. The choice is permanent. The spell you did not choose can never be learned, with XP or any other way. Hyumans are the one exception (see Adaptation). Two characters of the same heritage can carry the same bloodline and still express it very differently.

Reading a Spell

Every spell is written out in the same format.

Mana Cost: What the spell costs. Every Heritage magic spell costs mana equal to its rank: 1 at Core, 2 at Terrestrial, and so on up to 7 at Cosmic.

Speed: Instant spells take effect on your action. Reaction spells are cast in response to something that happens outside your turn. Extended spells keep working after they are cast. Downtime spells can only be cast outside combat.

Type: What the spell does: Attack, Defense, Debuff, Enhancement, Healing, Movement, Utility, or Conjuration. Persistent, Attuned, or Countdown is added when the spell lasts.

Range: Who or what the spell can affect.

Dice Pool: What you roll. "None" means the spell takes effect without a roll.

Defense: What the target rolls against the spell. "Target's choice of defense" means the target defends against the attack however they normally would. A named pool, such as Composure + Insight, means the target rolls that pool against your successes and the spell only takes hold if you rolled more. "None" means nothing rolls against it.

Use: Whether the spell works in combat, outside combat, or both.

Effect: Exactly what happens.

Rolling and Mana

A Heritage magic dice pool is Attribute + Ability + Heritage dots. Each Heritage magic lists a Primary pool and a Secondary pool, and each spell says which one it uses. Heritage dots always means your dots in the Heritage magic the spell belongs to.

You may spend extra mana beyond a spell's cost to add 1 die per mana, declared before rolling, up to your Heritage dots or Max Mana Per Turn, whichever comes first. This limit applies any time you spend mana to boost a spell, including spells whose damage value is set by successes plus mana spent. Each Heritage magic has one fixed mana assignment that says whether that extra mana can go to the attack roll, the damage roll, or either.

Unless a spell says otherwise, an Attack spell resolves like any magic attack. The target chooses their own defense, and a hit carries into the damage roll as normal. When a spell says a target resists, they roll the listed pool against your successes, and the spell only takes hold if you rolled more.

When a spell lets you resist something with magic, such as being knocked down or moved, you spend the spell's mana and roll the dice pool it names. Your Heritage dots are already part of that pool.

Persistent, Attuned, and Countdown Spells

Some spells last beyond the moment they are cast. They work in one of three ways.

Persistent: Pay the mana cost to cast it. To keep it running, pay upkeep during each Upkeep Phase. Upkeep is always the spell's mana cost minus 1, so a Core spell costs nothing to maintain and a Cosmic spell costs 6. Stop paying and it ends. Outside combat, a Persistent spell lasts one scene for its casting cost.

Attuned: Attuned spells work like attuning to an item. Pay the mana cost from your Max Mana Per Turn and leave it there, committed to the spell. The spell stays active as long as that mana stays committed, and that mana cannot be used for anything else in the meantime. You may end an Attuned spell at any time, and the committed mana returns to your Max Mana Per Turn. Use the Committed track on your combat mat to keep count.

Countdown: Countdown spells hold a target for a limited time. Pay the mana cost to cast it, adding extra mana if you wish. The spell lasts a number of turns equal to half the total mana spent on it, rounded up. One turn comes off the countdown during each Upkeep Phase. During any Upkeep Phase you may pay the spell's cost minus 1 to freeze the countdown, so that turn does not come off. The spell ends when the countdown runs out or when the ending condition in its Effect happens, whichever comes first. Outside combat, a Countdown spell lasts one scene for its casting cost, like a Persistent spell, unless its ending condition happens first.

Conjurations

A Conjuration spell creates something that acts on its own: an awakened tree, an imagined creature, a risen body. A conjuration is always Persistent. It has no Health track and no character sheet of its own. During each Upkeep Phase, after its upkeep is paid, it may take the action its spell describes, rolling your dice pool for that spell. A conjuration ends when its upkeep is not paid, when you are Incapacitated, or when another spell banishes it.

What Heritage Magic Is Not

Heritage magic has no element. It never gains elemental advantage, never suffers elemental disadvantage, and never triggers elemental interactions with shields, walls, or summons. It cannot be used as part of combination magic.

A character cannot learn another heritage's magic, with two exceptions. Mixed heritage characters may use either parent's Heritage magic, as described below. Contract Magic is a circle magic, and anyone may learn it, though devils are the only people born with it. Like every circle magic, it can only be written outside combat.

Mixed Heritage

Terrana is old enough, and Monsera crowded enough, that plenty of people have parents of two different heritages. A mixed heritage character chooses one parent's heritage for their Innate Attribute, Innate Flaw, and Heritage Merit. For their free Heritage magic dot, they may choose the Heritage magic of either parent. Only one bloodline awakens. The other stays quiet.

Fey Touched

A character with one Fey or devil parent and one parent of any other heritage is Fey Touched. They follow the Mixed Heritage rules above, with one addition: a Fey Touched character lives about 400 years, whatever their other parent's lifespan. A Fey Touched Hyuman can expect to see four centuries. Devil Spawn are Fey Touched.

Healing

All healing in Terrana, magical or otherwise, works in tiers. Each success on a healing roll does one of the things its tier allows, chosen by the healer. Slaking a box lowers it one damage type (Aggravated to Lethal, or Lethal to Bashing). Neutralizing a box removes it entirely.

Basic healing: Each success neutralizes 1 Bashing, or slakes 1 Lethal to Bashing. Basic healing cannot affect Aggravated damage.

Advanced healing: Each success neutralizes 2 Bashing, neutralizes 1 Lethal, or slakes 1 Aggravated to Lethal.

Expert healing: Each success neutralizes 4 Bashing, neutralizes 2 Lethal, or neutralizes 1 Aggravated.

Master healing: Regrows lost limbs. Master healing can never be used in combat; the incantation takes several turns to complete. It is rare. Automaton prosthetics are common across Terrana, and some people would rather replace a lost limb with a stronger one than regrow it.

Resurrection: The only healing above Master. It has its own chapter.

Aggravated damage healed during the same combat in which it was taken usually leaves no scar, and that healing can even reattach a severed limb that is still on hand.

Falling Damage

A creature that falls rolls 1d10 for every 10 feet it falls. One zone straight up or down is about 10 feet. Falling damage is not a success roll: add the numbers shown on the dice, and that total is the damage. If the total is lower than the creature's BDT, it takes no damage. Otherwise it takes the damage like any other hit.

Part 1: Common Heritages

Monster Factions

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Before the Slime King arrived, Monsera island was not a lawless wilderness of mindless creatures, as some accounts claim. It was home to many peoples who had not yet organized into a state an outsider would recognize. These monster peoples are the original inhabitants of Monsera and the Shaded Isles to its east. The current kingdom was built with them, not in spite of them.

What follows is a short orientation to each group, not a full account. Each would need a volume of its own.

The ten Monster sub-types listed here are broad categories. Players are encouraged to work with their Storyteller to define their specific creature type. The mechanical blocks below are starting points. With Storyteller approval a player may request adjustments.

Monster lifespans vary by sub-type and are listed in each entry. Corporeal Undead are Immortal as long as they never fully deplete their mana for an extended period. Incorporeal Undead cannot be chosen at character creation. A character can only become one during play.

Four Monster sub-types are Common Heritages and are listed alphabetically in this part, marked Monster Faction. The other six are Rare and appear in Part 2.

Avian

Monster Faction

Aarakocra, Harpies, and similar. Avian monsters share some heritage with the Skyfolk in the broad sense that both have wings, but the similarities largely end there.

From Liris Kant's entry on the monster peoples

The Avian peoples, aarakocra, harpies, and other winged kin, are often compared to the Skyfolk. The comparison does not hold. Where Skyfolk are ancient, isolated, and detached, Avians are social, loud, and interested in everything happening around them. In Monsera they gather on rooftops, and several rooftop districts have become Avian neighborhoods by common agreement.

Avian - Mechanical Block

Average Lifespan: 200 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Dexterity:** For a character whose aerial agility and swift precise movement define them.
- **Perception:** For a character whose sharp eyesight and environmental awareness define them.

Innate Flaw - Hollow Bones: Avian monsters suffer a penalty die on Endurance rolls against physical trauma. Their lighter build makes them faster in the air and more fragile on the ground.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Flight: Avian monsters fly naturally at double their normal movement without magic. Record a free specialty in Athletics called Flight, providing a bonus die on Athletics rolls made while flying.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Aerial Agility:** Grants a free specialty in Acrobatics called Aerial Agility, providing a bonus die on rolls involving flight maneuvers, aerial combat, and movement in three dimensional space.
- **Keen Eye:** Grants a free specialty in Awareness called Keen Eye, providing a bonus die on sight based Awareness rolls including long distance observation and spotting hidden things.

Heritage Magic: Skycall

The Avian peoples turned rooftops into neighborhoods and every gutter into a conversation. Skycall is wind and voice: the dive from above, the call that brings the flock, and the wingbeat that knocks enemies out of the air.

Avian peoples fly naturally; Skycall makes them better at it.

Primary: Dexterity + Acrobatics + Skycall

Secondary: Charisma + Performance + Skycall

Extra mana: Attack only. 1 die per mana, up to your Skycall dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Tailwind
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Movement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned and flying, move one extra zone each turn at no AP cost.

B. Rooftop Call
Mana Cost: 1 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat | **Range:** A settlement
Dice Pool: Charisma + Performance + Skycall
Defense: None
Effect: A call heard across a settlement. Birds and avian kin who hear it answer one simple question per success about what they have seen.

Rank 2 Terrestrial (choose one)

A. Dive Strike
Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Acrobatics + Skycall
Defense: Target's choice of defense
Effect: Attack after descending at least one zone this turn. Add your Heritage dots to the damage roll.

B. Feather Flurry
Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Dexterity + Acrobatics + Skycall
Defense: Perception + Awareness
Effect: The target resists with Perception + Awareness. If you beat them, they suffer -2 dice on sight-based rolls on their next turn.

Rank 3 Aerial (choose one)

A. Updraft
Mana Cost: 3 | **Speed:** Reaction | **Type:** Movement
Use: Combat | **Range:** One ally in an adjacent zone
Dice Pool: None | **Defense:** None
Effect: Move the ally one zone at no AP cost to them.

B. Screech

Mana Cost: 3 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Charisma + Performance + Skycall
Defense: Composure + Presence

Effect: Every enemy in range resists with Composure + Presence. Each one you beat loses their next Reaction.

Rank 4 Lunar (choose one)

A. Wind Rider

Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned and flying, you ignore Difficult Terrain, and melee attackers without reach or flight suffer -2 dice against you.

B. Flock Call

Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** One zone in sight
Dice Pool: Charisma + Performance + Skycall
Defense: None

Effect: A swarm of birds fills the zone. While maintained, enemies there suffer -2 dice on all rolls.

Rank 5 Stellar (choose one)

A. Talon Carry

Mana Cost: 5 | **Speed:** Instant | **Type:** Utility
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Dexterity + Acrobatics + Skycall
Defense: Strength + Athletics

Effect: The target resists with Strength + Athletics. If you beat them, choose one: carry them up to two zones, fly them up to two zones straight up, or carry them one zone and fly them one zone straight up. Then drop them. They take damage equal to your Heritage dots, plus falling damage if they fall (see Falling Damage).

B. Harmony Chorus

Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Enhancement, Persistent
Use: Combat | **Range:** Allies in sight who can hear you
Dice Pool: Charisma + Performance + Skycall
Defense: None

Effect: While maintained, allies who can hear you add bonus dice equal to half your Heritage dots, rounded up, to Dodge rolls.

Rank 6 Galactic (choose one)

A. Sky Lance

Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** A straight line up to four zones
Dice Pool: Dexterity + Acrobatics + Skycall
Defense: Target's choice of defense

Effect: Fly along the line, ending in an empty zone. Roll once; each enemy along the line defends separately.

B. Storm Wing

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** All adjacent zones
Dice Pool: Dexterity + Acrobatics + Skycall
Defense: Dexterity + Acrobatics

Effect: Roll when cast. While maintained, ranged attacks through those zones suffer -3 dice, and flying enemies there must beat your successes with Dexterity + Acrobatics during each Upkeep Phase or fall and take falling damage (see Falling Damage).

Rank 7 Cosmic (choose one)

A. Endless Sky

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Movement, Persistent
Use: Combat and outside combat
Range: Self and allies in sight | **Dice Pool:** None
Defense: None

Effect: While maintained, you and allies in sight move one extra zone each turn at no AP cost, and allies can fly at double their normal movement.

B. Call of a Thousand Wings

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** Up to 6 connected zones in sight
Dice Pool: Charisma + Performance + Skycall
Defense: None

Effect: While maintained, enemies in those zones suffer -3 dice on all rolls, and allies there count as fully covered against ranged attacks.

Beastfolk

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

The Beastfolk are native to the Great Forest on the Milis Continent. Individuals live in Monsera, Breakwater, and other cities, but in small numbers. The exception is the Holy Kingdom of Milishion on the forest's edge, where Beastfolk make up about a quarter of the population. No other nation comes close.

Their settlements are built high in the trees. These are full communities with streets, gathering places, and homes expanded over generations. Contact with Monsera has brought better lighting, crystal relay access, and improved building materials. The Beastfolk adopted what was useful and declined the rest.

Each tribe has its own chief, and all chiefs answer to a head chief. By law and tradition, the head chief must come from a canine or feline bloodline. The Doldia family has held the position for generations. The other chiefs can jointly demand that the head chief step down, and the head chief may demand a formal challenge before stepping aside.

Tribes differ in temperament. Some settle disputes quickly and loudly. Others are slow to anger and slow to forgive. All share a strong territorial sense. They protect the forest out of obligation, not hostility toward outsiders.

Breeding seasons vary by animal type and are treated as a private matter. Rabbit Beastfolk are the only type broadly known to seek companionship outside their season. I include this because people ask, and an accurate answer is better than a guess.

Splashing water on a Beastfolk person is one of the worst insults in their culture, and the response is usually physical. Visitors should know this before it happens by accident.

Beastfolk - Mechanical Block

Average Lifespan: 100 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Perception:** For a character whose sharp natural senses and awareness define them.
- **Dexterity:** For a character whose physical agility and predatory grace define them.

Innate Flaw - Animalistic Instincts: Every Beastfolk character has an innate flaw derived from the animal type they most closely resemble. Work with your Storyteller to define a specific instinctive weakness that fits your animal heritage. The flaw should create a meaningful penalty die in situations where that instinct would work against the character.

Attribute Flaw - Mental: Mental attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Pack Sense:** Grants a free specialty in Awareness called Pack Sense. While at least one ally occupies a zone adjacent to yours, touching it directly or diagonally, you also gain a bonus die on attack rolls.
- **Predator's Instinct:** Grants a free specialty in either Awareness or Athletics reflecting the character's natural hunting instincts and physical predatory capability.

Heritage Magic: Howling Magic

Beastfolk blend mana into their voices. A trained howl can rattle bone, scatter a charge, or carry a warning through a whole forest. Howling Magic is loud, direct, and impossible to ignore.

Primary: Fortitude + Presence + Howling Magic

Secondary: Perception + Awareness + Howling Magic

Extra mana: Attack only. 1 die per mana, up to your Howling Magic dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Startling Bark

Mana Cost: 1 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Composure + Presence
Effect: The target resists with Composure + Presence. If you beat them, they lose their next Reaction.

B. Hunter's Ear

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Perception + Awareness + Howling Magic
Defense: None
Effect: While attuned, add your Heritage dots to Awareness rolls based on hearing or scent.

Rank 2 Terrestrial (choose one)

A. Disorienting Howl

Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Composure + Presence

Effect: The target resists with Composure + Presence. If you beat them, they suffer penalty dice on their next roll equal to your extra successes, up to your Heritage dots.

B. Pack Call

Mana Cost: 2 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: A settlement or a few miles of open land
Dice Pool: Fortitude + Presence + Howling Magic
Defense: None

Effect: A howl that carries a long way. Allies who hear it know your direction and whether you are in danger. Anyone else nearby may hear it too.

Rank 3 Aerial (choose one)

A. Rattling Roar

Mana Cost: 3 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Composure + Presence

Effect: Every enemy in range resists with Composure + Presence. Each one you beat loses 1 AP on their next turn.

B. Echo Sense

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Perception + Awareness + Howling Magic
Defense: Dexterity + Stealth

Effect: While attuned, roll your dice pool whenever a hidden or invisible creature moves within a number of zones equal to your Howling Magic dots. The creature rolls Dexterity + Stealth. If you beat it, you know which zone it is in.

Rank 4 Lunar (choose one)

A. Shatterhowl

Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Fortitude + Endurance

Effect: A sonic attack. The target defends with Fortitude + Endurance instead of Dodge.

B. Rallying Howl

Mana Cost: 4 | **Speed:** Instant | **Type:** Enhancement
Use: Combat | **Range:** Allies in sight who can hear you
Dice Pool: Fortitude + Presence + Howling Magic
Defense: None

Effect: Each ally ends one fear or panic effect and adds a bonus die to their next attack.

Rank 5 Stellar (choose one)

A. Cone of Thunder

Mana Cost: 5 | **Speed:** Instant | **Type:** Attack
Use: Combat
Range: Cone: all zones directly and diagonally forward of you
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Fortitude + Endurance

Effect: Shatterhowl against every target in the cone. Roll once; each target defends separately with Fortitude + Endurance.

B. Silence the Field

Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** All adjacent zones
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Composure + Expression

Effect: Roll when cast. While maintained, anyone other than you in range must beat your successes with Composure + Expression to cast spoken spells, Vocal Magic, or Howling Magic.

Rank 6 Galactic (choose one)

A. Stunning Bellow

Mana Cost: 6 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Composure + Presence

Effect: Every enemy in range resists with Composure + Presence. Each one you beat can only move on their next turn.

B. Voice of the Alpha

Mana Cost: 6 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All enemies in sight
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Composure + Presence

Effect: Each enemy resists with Composure + Presence. Each one you beat moves one zone away from you and cannot approach you on their next turn.

Rank 7 Cosmic (choose one)

A. World-Shaking Howl

Mana Cost: 7 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All enemies in sight
Dice Pool: Fortitude + Presence + Howling Magic
Defense: Composure + Presence

Effect: Each enemy resists with Composure + Presence. Each one you beat loses their next turn. Each one who beats you still loses 1 AP.

B. Chorus of the Pack

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Enhancement, Persistent
Use: Combat | **Range:** Allies in sight who can hear you
Dice Pool: Fortitude + Presence + Howling Magic
Defense: None

Effect: While maintained, each ally adds bonus dice equal to half your Heritage dots, rounded up, to one roll each turn.

Bestial Demon

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

The first time I met a Bestial on the Demon Continent, I mistook them for a monster. Most first time visitors make this mistake. Correcting it quickly is better for one's social standing and physical safety.

Bestials walk upright, speak, and live in communities with their own traditions. Their animal heritage shows far more than it does in Beastfolk. A Bestial may have the full face of a boar, scaled hide from neck to toe, or a turtle's shell built into the skeleton.

They are by far the largest population on the Demon Continent and have been throughout its long recorded history. Political power rests with the Immortal Demon Kings, whose domains have been stable for centuries. Bestials hold little of that power, but in practice they are equal citizens.

Some types have well known names. Orcs are porcine: large, direct, and very serious about food. Kobolds are canine: quick, social, and loyal. Tortles are turtle-like: slow, deliberate, and patient enough to make Ogres look impulsive. Reptaurs are lizard-like and cold blooded, so their energy depends on the temperature. Morning meetings with a Reptaur in cold weather go poorly.

Lifespan follows the animal. Reptilian types such as Tortles and Reptaurs live about two hundred years. Mammalian types such as Orcs and Kobolds live about one hundred. Mixed settlements are common, so most Bestial communities are used to some neighbors outliving others by generations.

Bestials carry the instincts of their animal heritage, as Beastfolk do. A canine Bestial and a canine Beastfolk share certain instinctive patterns despite looking very different. These instincts are part of who they are, not a flaw in character.

Bestials know outsiders find them startling. They are not troubled by it. The adjustment is the outsider's to make.

Bestial Demon - Mechanical Block

Average Lifespan: 100 years for mammalian types (such as Orcs and Kobolds), 200 years for reptilian types (such as Tortles and Reptaurs).

Innate Attribute (choose 1, note Innate on sheet):

- **Strength:** For a character whose raw physical power and imposing presence define them.
- **Dexterity:** For a character whose predatory speed and agility define them.

Innate Flaw - Animalistic Instincts: Same as Beastfolk. Work with your Storyteller to define a specific instinctive weakness tied to your animal type.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Beast Sense:** Gain a free specialty in any ability that reflects a natural heightened sense tied to your animal type. Work with your Storyteller to define which ability and specialty name fits.
- **Feral Surge:** Once per combat scene per dot in this merit you may add your dots as bonus dice to a single attack roll, representing a burst of pure animal instinct and ferocity.

Heritage Magic: Feral Blood

Every Bestial carries the animal in their blood, and Feral Blood calls it to the surface. An Orc's tusks, a Kobold's nose, a Tortle's shell, a Reptaur's scales: each type expresses it differently. Work with your Storyteller to describe how each spell looks for your animal type.

Primary: Strength + Martial Arts + Feral Blood

Secondary: Fortitude + Endurance + Feral Blood

Extra mana: Damage only. 1 die per mana, up to your Feral Blood dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Natural Weapons

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, your claws, tusks, teeth, or beak count as a weapon with a rating equal to your Heritage dots.

B. Animal Sense

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, add your Heritage dots to rolls using your animal type's keenest sense.

Rank 2 Terrestrial (choose one)

A. Hide of the Beast

Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, gain Armor equal to half your Heritage dots, rounded up.

B. Scent the Trail

Mana Cost: 2 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: A creature you have seen or smelled within the last day
Dice Pool: Perception + Survival + Feral Blood
Defense: None

Effect: On a success you know which way the creature went. In combat, you know which zone it is in for the rest of the scene.

Rank 3 Aerial (choose one)

A. Feral Charge

Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Strength + Martial Arts + Feral Blood
Defense: Target's choice of defense

Effect: Move one zone and attack in the same action with no extra AP.

B. Hunker Down

Mana Cost: 3 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: Fortitude + Endurance + Feral Blood
Defense: None

Effect: When you are attacked, roll your dice pool. Each success removes 1 success from the attacker's roll.

Rank 4 Lunar (choose one)

A. Blood Frenzy

Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, add your Heritage dots to attack rolls and suffer -2 dice on all other rolls.

B. Locking Jaw

Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Strength + Martial Arts + Feral Blood
Defense: Target's choice of defense, then Strength + Athletics to break free

Effect: On a hit you also hold the target. A held target cannot move away from you and suffers -2 dice until they beat your successes with Strength + Athletics on their turn.

Rank 5 Stellar (choose one)

A. Beast Form

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, add 2 to Strength and Fortitude for all rolls and thresholds.

B. Unstoppable

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Movement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, you ignore Difficult Terrain and cannot be Rooted, knocked prone, grappled, or moved against your will.

Rank 6 Galactic (choose one)

A. Rending Blow

Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Strength + Martial Arts + Feral Blood
Defense: Target's choice of defense

Effect: A hit is treated as meeting the next-higher damage threshold.

B. Primal Endurance

Mana Cost: 6 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: Once per scene, when you would become Incapacitated, stay standing and act normally for one more turn.

Rank 7 Cosmic (choose one)

A. Apex Predator

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** All adjacent zones | **Dice Pool:** None
Defense: None

Effect: While maintained, enemies in range cannot attack anyone but you.

B. Ancestral Beast

Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, you take a giant form of your animal. Add your Heritage dots to attack rolls and double your BDT.

Brutes

Monster Faction

Trolls, Bugbears, Minotaurs, Gnolls, Centaurs, and similar. Big, powerful, and frequently underestimated intellectually.

From Liris Kant's entry on the monster peoples

The Brutes, trolls, bugbears, minotaurs, gnolls, centaurs, and other large peoples of Monsera, are consistently underestimated, especially in intelligence and temperament. I have met a minotaur engineer in Monsera's infrastructure division. They are not an exception. They are what minotaurs are when no one assumes otherwise. Brutes are physically powerful, and for most of them it is the least interesting thing about them.

Brutes - Mechanical Block

Average Lifespan: 100 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Strength:** For a character whose raw physical power and imposing might define them.
- **Fortitude:** For a character whose toughness and capacity to absorb punishment define them.

Innate Flaw - Imposing: Brutes suffer a penalty die on Expression rolls. Their size and appearance trigger an instinctive wariness in others.

Attribute Flaw - Mental: Mental attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Brute Force:** Grants a free specialty in Melee or Martial Arts called Brute Force, reflecting their natural aptitude for leveraging their size and strength in combat.
- **Thick Hide:** Grants a free specialty in Endurance called Thick Hide, providing a bonus die against physical damage reflecting their naturally tough and resilient body.

Heritage Magic: Titan's Weight

The Brutes are big, and their magic makes them bigger. Titan's Weight is mass made into force: the shove that moves a cart, the stomp that drops a line of soldiers, the body that will not be moved.

Primary: Strength + Melee or Martial Arts + Titan's Weight

Secondary: Fortitude + Athletics + Titan's Weight

Extra mana: Damage only. 1 die per mana, up to your Titan's Weight dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Heavy Hand

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, add half your Heritage dots, rounded up, to damage rolls on Strength-based attacks.

B. Unbudging

Mana Cost: 1 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: Fortitude + Athletics + Titan's Weight
Defense: None
Effect: When something would move you, knock you prone, or grapple you, resist with this dice pool instead of your normal roll.

Rank 2 Terrestrial (choose one)

A. Shove

Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Strength + Melee or Martial Arts + Titan's Weight
Defense: Target's choice of defense, then Strength + Athletics
Effect: On a hit the target is pushed one zone away instead of taking damage. They also resist with Strength + Athletics; if you beat them, they are knocked prone.

B. Load Bearer

Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, add your Heritage dots to rolls to lift or carry. Carrying an ally costs no extra AP while moving.

Rank 3 Aerial (choose one)

A. Trample

Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** A straight line up to two zones
Dice Pool: Strength + Melee or Martial Arts + Titan's Weight
Defense: Target's choice of defense
Effect: Charge in a straight line past up to two enemies, ending in an empty zone. Roll once; each enemy you pass defends separately.

B. Thick Skinned

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, gain Armor equal to half your Heritage dots, rounded up.

Rank 4 Lunar (choose one)

A. Living Wall

Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | **Type:** Defense, Persistent
Use: Combat | **Range:** Self
Dice Pool: Fortitude + Athletics + Titan's Weight
Defense: Strength + Athletics

Effect: Roll when cast. While maintained, enemies must beat your successes with Strength + Athletics to move into or through any zone adjacent to you, and allies in adjacent zones add 2 to their Damage Threshold against ranged attacks.

B. Hurl

Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Strength + Melee or Martial Arts + Titan's Weight
Defense: Target's choice of defense; a thrown creature does not defend

Effect: Throw a heavy object or a grappled creature at the target. The target and a thrown creature both take the damage of the hit.

Rank 5 Stellar (choose one)

A. Earthshaker

Mana Cost: 5 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Strength + Melee or Martial Arts + Titan's Weight
Defense: Dexterity + Athletics

Effect: Every enemy in range resists with Dexterity + Athletics. Each one you beat is knocked prone. Those zones become Difficult Terrain for the rest of the scene.

B. Momentum

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, attacks you make after moving at least one zone that turn add your Heritage dots to the damage roll.

Rank 6 Galactic (choose one)

A. Colossus

Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, you grow, and your melee attacks reach targets in adjacent zones.

B. Shrug It Off

Mana Cost: 6 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: Once per turn, treat one hit against you as two damage thresholds lower: Aggravated becomes Bashing, and Lethal or Bashing deals nothing.

Rank 7 Cosmic (choose one)

A. Titanfall

Mana Cost: 7 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Any empty zone in sight
Dice Pool: Strength + Melee or Martial Arts + Titan's Weight
Defense: Target's choice of defense

Effect: Leap to the zone. Roll once; every target in a zone adjacent to where you land defends separately. The landing zone becomes Difficult Terrain.

B. Mountain of Muscle

Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, add 3 to Strength and Fortitude for all rolls and thresholds.

Dwarf

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

The Dwarves live in the Blue Dragon Mountain Range, a cold, steep region with many natural hot springs. I have made two field visits. Their written records go back further than those of most peoples I have studied, and they lived in the range before those records began.

The hot springs are the center of public life. Dwarves bathe, meet, trade, and negotiate in them. Several major political agreements in Dwarven history were settled in the springs. I attended two council sessions held this way, and both were calmer than similar sessions I have seen elsewhere.

Steam power reached the kingdom before the crystal network did. When the network arrived, the Dwarves adopted it for long distance messages but kept steam for heating, industry, and rail. When I asked why, the answer was always the same: they built the steam systems themselves, and they prefer them. They know mana powered heating is more efficient. The choice is cultural, not technical, and their cities show it in gas lamps, steam trains, and exposed gearwork kept in careful repair.

Children are raised in birth year cohorts. Every child born in the same year is cared for by trained caregivers whose profession is raising children. Parents stay involved, but the cohort is the child's main social group, and cohort bonds often last for life. Honesty is taught early. A child caught lying is usually punished with a hard tickling, and most adult Dwarves still cannot keep a straight face when they lie.

A Dwarven child has no personal name until age ten. Before then they are called the child of their parents. At ten they choose a name and keep it for life, which can be two hundred years. The Dwarves I interviewed said ten is old enough to know something true about yourself and young enough to grow into a name.

The title of Ore God goes to the most skilled maker in the kingdom. It cannot be inherited or bought. Other makers recognize it, and the holder keeps it only while they remain the best. I have met two Ore Gods. Both were working craftspeople first and public figures a distant second.

Dwarf - Mechanical Block

Average Lifespan: 200 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Fortitude:** For a character whose toughness and physical resilience define them.
- **Wisdom:** For a character whose quiet calculation and self reflection define them.

Innate Flaw - Giggle Fibbers: A Dwarven child caught lying by a caregiver is usually punished with a harsh tickling. Even as adults, Dwarves find it hard to keep a straight face whenever they try to lie, which is where their straightforward, honest reputation comes from. Dwarves suffer a 1 to 3 die penalty on any roll to lie, depending on the severity of the lie, as set by the Storyteller.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Dwarven Crafting:** Grants a free specialty in Crafts reflecting the Dwarf's natural gift for making and repairing physical objects.
- **Dwarven Constitution:** Grants a free specialty in Endurance called Iron Gut, providing a bonus die against poison, toxins, and other ingested or inhaled hazards.

Heritage Magic: Earthsong

Dwarves say the mountain hums, and that a good smith can hear which note a stone wants to become. Earthsong reads stone and metal, blesses what the forge produces, and holds the ground steady beneath a Dwarf's feet.

Primary: Wisdom + Crafts + Earthsong

Secondary: Fortitude + Endurance + Earthsong

Extra mana: Attack or damage. 1 die per mana, up to your Earthsong dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Stone Reading

Mana Cost: 1 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat | **Range:** Touch
Dice Pool: Wisdom + Crafts + Earthsong | **Defense:** None
Effect: Touch stone or worked metal. On a success you learn its age, origin, and flaws. Each success also adds a bonus die to your next Crafts roll to repair or appraise it.

B. Steady Footing

Mana Cost: 1 | **Speed:** Reaction | **Type:** Defense
Use: Combat and outside combat | **Range:** Self
Dice Pool: Fortitude + Endurance + Earthsong
Defense: None

Effect: When something would knock you prone or force you out of your zone, resist with this dice pool instead of your normal roll.

Rank 2 Terrestrial (choose one)

A. Forge Blessing

Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat
Range: One weapon or armor piece you touch
Dice Pool: Wisdom + Crafts + Earthsong | **Defense:** None

Effect: While attuned, the item's rating is 1 higher. Only one item can carry Forge Blessing at a time.

B. Tremor Sense

Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Wisdom + Crafts + Earthsong | **Defense:** None

Effect: While attuned and standing on the ground, add your Heritage dots to Awareness rolls to detect anything moving on the ground within a number of zones equal to your Earthsong dots, including hidden or invisible creatures.

Rank 3 Aerial (choose one)

A. Ironskin

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Fortitude + Endurance + Earthsong
Defense: None

Effect: While attuned, add half your Heritage dots, rounded up, to your BDT.

B. Shatter Point

Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Wisdom + Crafts + Earthsong
Defense: Target's choice of defense

Effect: Make a weapon or unarmed attack with this dice pool. It ignores Armor equal to your Heritage dots. Against objects and constructs, the damage value is doubled.

Rank 4 Lunar (choose one)

A. Mountain's Root

Mana Cost: 4 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self or one ally in an adjacent zone
Dice Pool: Fortitude + Endurance + Earthsong
Defense: None

Effect: When the target would be moved, knocked prone, or Rooted, they resist with your dice pool instead of their own.

B. Quake Step

Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Wisdom + Crafts + Earthsong
Defense: Dexterity + Athletics

Effect: Stomp. Every enemy in range resists with Dexterity + Athletics. Each one you beat is knocked prone.

Rank 5 Stellar (choose one)

A. Living Forge

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat
Range: Self and allies in adjacent zones
Dice Pool: Wisdom + Crafts + Earthsong | **Defense:** None

Effect: While attuned, weapons and armor carried by you and allies in adjacent zones count as 1 rating higher.

B. Stonewall

Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Defense, Persistent
Use: Combat | **Range:** One edge of a zone in sight
Dice Pool: Wisdom + Crafts + Earthsong
Defense: An attack on the wall must roll more successes than your casting roll

Effect: Raise a stone wall. It blocks movement and line of sight. An attack against the wall breaks it only if the attacker rolls more successes than you did when casting.

Rank 6 Galactic (choose one)

A. Heart of the Mountain

Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self
Dice Pool: Fortitude + Endurance + Earthsong
Defense: None

Effect: While attuned, Lethal damage you take becomes Bashing, and Aggravated damage becomes Lethal.

B. Faultline

Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Straight line across the battlefield
Dice Pool: Wisdom + Crafts + Earthsong
Defense: Target's choice of defense

Effect: Crack the ground in a line from you. Roll once; each target in the line defends separately. Each target hit is knocked prone, and their zone becomes Difficult Terrain.

Rank 7 Cosmic (choose one)

A. Ore God's Hand

Mana Cost: 7 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only | **Range:** Touch
Dice Pool: Wisdom + Crafts + Earthsong | **Defense:** None

Effect: Over a single scene, with the materials at hand, forge or reforge one item of any rating up to 7.

B. The Mountain Wakes

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat
Range: Up to 6 connected zones in sight
Dice Pool: Wisdom + Crafts + Earthsong | **Defense:** None

Effect: Reshape the ground: raise walls, open pits, or seal passages. During each Upkeep Phase while maintained, you may reshape one of those zones again.

Elf

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

The Elves of the Great Forest are the oldest continuous civilization in Terrana. I have visited four times.

For most of a generation, every Elven child of university age has crossed the Ringus Sea to study at Monsera University and then returned home. What they brought back was added to Elven culture. It did not replace it.

The Elves did not clear the forest to build their city. The city is built into the forest. They have never treated nature and scholarship as opposites.

Elves live about a thousand years. A single Elf may see several periods of Hyuman history begin and end. They are not slow. They are deliberate, and they make decisions on a longer timescale than most peoples.

Elf - Mechanical Block

Average Lifespan: 1000 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Intelligence:** For a character focused on magical knowledge and casting depth.
- **Fortitude:** For a character focused on raw mana capacity and sustained channeling.

Innate Flaw - Insular Grace: The Elf suffers a 1 die penalty on social rolls with non-Elf heritages. When dealing with other Elves they receive a 1 die bonus instead.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Elven Compass:** Grants a free specialty in Survival called Elven Compass, providing a bonus die on any Survival roll involving navigation and orientation.
- **Mana Touched:** Grants one additional starting dot in Mana beyond the standard starting value of 1.

Heritage Magic: Verdant Communion

The Elves hear the Great Forest the way other peoples hear weather. Verdant Communion is that listening turned into action: speaking with plants and the minor spirits that live in them, reading the air, and asking the living world to move.

Primary: Wisdom + Survival + Verdant Communion

Secondary: Intelligence + Attunement + Verdant Communion

Extra mana: Attack or damage. 1 die per mana, up to your Verdant Communion dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Forest Tongue

Mana Cost: 1 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only | **Range:** Touch
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: None

Effect: Hold a slow conversation with one plant or the minor spirit living in it. Plants think slowly; even asking for directions can take the better part of an hour. The plant shares what it has sensed over the last few days through sound, vibration, warmth, and touch, such as who passed and which way they went. It cannot see.

B. Wind Reading

Mana Cost: 1, attuned (stays committed) | **Speed:** Instant
Type: Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: None

Effect: While attuned, add your Heritage dots to Awareness rolls to notice movement within a number of zones equal to your Verdant Communion dots.

Rank 2 Terrestrial (choose one)

A. Rootbind

Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: Dexterity + Athletics

Effect: The target resists with Dexterity + Athletics. If you roll more successes, they gain the Rooted condition until the end of their next turn.

B. Canopy Veil

Mana Cost: 2, upkeep 1 each Upkeep Phase
Speed: Instant, Extended | **Type:** Enhancement, Persistent
Use: Combat and outside combat
Range: Self and allies in adjacent zones
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: Perception + Awareness

Effect: Roll when cast. While maintained and in natural terrain, your casting roll becomes the Stealth roll for you and every ally in an adjacent zone. They do not roll Stealth themselves; anyone searching for them must beat your successes with Perception + Awareness.

Rank 3 Aerial (choose one)

A. Spirit Ask

Mana Cost: 3 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only
Range: The surrounding area, up to about a mile
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: None

Effect: Spend a scene in communion with the land. Ask one question per success about the area, such as hidden dangers, water, paths, or recent travelers. The Storyteller answers each truthfully in a few words.

B. Living Ward

Mana Cost: 3 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self or one ally in an adjacent zone
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: None

Effect: When the target is attacked from range, plants rise to intercept. Roll your dice pool. Each success reduces the attacker's successes by 1.

Rank 4 Lunar (choose one)

A. Grove Path

Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Movement, Attuned
Use: Combat | **Range:** Self
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: None

Effect: While attuned, natural Difficult Terrain costs you no extra AP. Allies who move through the same zones on the same turn as you ignore that Difficult Terrain as well.

B. Thornfield

Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | **Type:** Attack, Persistent
Use: Combat | **Range:** One zone in sight
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: Fortitude + Endurance, which reduces the damage value

Effect: Roll when cast. Successes plus mana spent set the damage value. The zone becomes thorned Difficult Terrain. Anyone who enters or begins their turn there rolls Fortitude + Endurance; their successes reduce the damage value, and the rest is compared against their damage thresholds.

Rank 5 Stellar (choose one)

A. Awaken the Grove

Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Conjuration, Persistent
Use: Combat
Range: One tree or large plant in an adjacent zone
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: Target's choice of defense against its attacks; Dexterity + Athletics against its Rootbind

Effect: The plant becomes a conjuration that cannot leave its zone. During each Upkeep Phase it may attack one enemy in a zone adjacent to it using your dice pool, or cast Rootbind on one at no extra mana.

B. Spirit Sight

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Intelligence + Attunement + Verdant Communion
Defense: None

Effect: While attuned, you see mana flowing. When a spell is cast within a number of zones equal to your Verdant Communion dots, roll your dice pool; on a success you learn its school and rank.

Rank 6 Galactic (choose one)

A. Forest's Embrace

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** Up to 3 connected zones in sight
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: Dexterity + Athletics

Effect: The zones become living forest. Allies in them add a bonus die to Dodge rolls. During each Upkeep Phase, each enemy in them resists with Dexterity + Athletics against your casting successes or gains the Rooted condition.

B. Gale Step

Mana Cost: 6 | **Speed:** Reaction | **Type:** Movement
Use: Combat | **Range:** One ally in sight
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: None

Effect: When the ally is targeted by an attack, the wind moves them one zone before it resolves. The attacker rolls against them with -2 dice.

Rank 7 Cosmic (choose one)

A. Heart of the Great Forest

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** Every zone in sight
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: Dexterity + Athletics
Effect: While maintained, once per turn you may cast Rootbind on any target in sight at no extra mana or AP.

B. Voice of Ages

Mana Cost: 7 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only | **Range:** A natural area
Dice Pool: Wisdom + Survival + Verdant Communion
Defense: None
Effect: Over a scene of communion, call an ancient forest spirit. It answers one question truthfully and in full, or performs one feat the Storyteller judges within the power of a forest, such as raising a wall of trees across six zones.

Gremlinesque

Monster Faction

Goblins, Mimics, Knockers, Gnomes, Boggles, and similar. Small, clever, and constitutionally incapable of leaving well enough alone.

From Liris Kant's entry on the monster peoples

Gremlinesque is my umbrella term for the goblins, gnomes, mimics, knockers, and other small, clever peoples. Most share a strong urge to understand machines by taking them apart. They have contributed much to Monsera's technology, though official histories rarely credit them, since they tend to work in basements and workshops. The Dwarves privately respect the knockers' work on underground infrastructure and publicly decline to comment.

Gremlinesque - Mechanical Block

Average Lifespan: 100 to 200 years depending on type.

Innate Attribute (choose 1, note Innate on sheet):

- **Intelligence:** For a character whose sharp mind and technical aptitude define them.
- **Dexterity:** For a character whose quick hands and nimble movement define them.

Innate Flaw - Mischief Prone: Gremlinesque monsters suffer a penalty die on Diplomacy rolls. Their chaotic and impulsive nature makes formal negotiation difficult.

Attribute Flaw - Physical: Physical attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Tinker:** Grants a free specialty in either Crafts or Implements reflecting their innate knack for gadgets and mechanisms.
- **Scurry:** Grants a free specialty in Acrobatics reflecting their ability to move through cluttered, tight, and chaotic environments at speed.

Heritage Magic: Tinker's Spark

Gremlinesque peoples cannot leave a device alone, and their magic agrees with them. Tinker's Spark wakes machines, breaks them, overcharges them, and turns a pocket full of scrap into something that explodes at the right moment.

Primary: Intelligence + Crafts + Tinker's Spark

Secondary: Dexterity + Implements + Tinker's Spark

Extra mana: Attack only. 1 die per mana, up to your Tinker's Spark dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Spark Touch

Mana Cost: 1 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat | **Range:** Touch
Dice Pool: Intelligence + Crafts + Tinker's Spark
Defense: Dice equal to the device's rating

Effect: Power on, switch off, or open a small device or simple lock. The device resists with dice equal to its rating; you need more successes.

B. Gadget Sense

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, add your Heritage dots to rolls to understand, take apart, or find the flaw in a device.

Rank 2 Terrestrial (choose one)

A. Jury Rig

Mana Cost: 2 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat | **Range:** Self
Dice Pool: Dexterity + Implements + Tinker's Spark
Defense: None

Effect: Build a one-use gadget from scrap: a smoke puff, noisemaker, flash, or trip line. It must be used before the end of the scene, and its effect resolves with this roll's successes.

B. Gremlin Hex

Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat
Range: One device, weapon, or implement in sight
Dice Pool: Intelligence + Crafts + Tinker's Spark
Defense: Intelligence + Crafts

Effect: The item's user resists with Intelligence + Crafts. If you beat them, they lose dice equal to your extra successes on their next roll with that item.

Rank 3 Aerial (choose one)

A. Overclock

Mana Cost: 3 | **Speed:** Instant | **Type:** Enhancement
Use: Combat
Range: One ally's weapon or implement in an adjacent zone
Dice Pool: Intelligence + Crafts + Tinker's Spark
Defense: None

Effect: The ally adds your successes, up to your Heritage dots, as bonus dice on their next roll with the item. The item then suffers -1 die for the rest of the scene.

B. Object Shell

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Dexterity + Implements + Tinker's Spark
Defense: Perception + Awareness

Effect: Roll when you attune. While attuned you look like an object of your size. Spotting you requires beating your successes with Perception + Awareness.

Rank 4 Lunar (choose one)

A. Animate Contraption

Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | **Type:** Conjuration, Persistent
Use: Combat
Range: One device or small construct in an adjacent zone
Dice Pool: Dexterity + Implements + Tinker's Spark
Defense: Target's choice of defense against its attacks

Effect: The device becomes a conjuration. During each Upkeep Phase it may move one zone, or attack one enemy in a zone adjacent to it using your dice pool.

B. Short Circuit

Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Intelligence + Crafts + Tinker's Spark
Defense: None for devices; constructs and conjurations roll their maker's dice pool

Effect: Crystal network devices and implements in range stop working until the end of your next turn. Constructs and conjurations resist with their maker's dice pool.

Rank 5 Stellar (choose one)

A. Spare Parts

Mana Cost: 5 | **Speed:** Reaction | **Type:** Utility
Use: Combat and outside combat
Range: One item, construct, or conjuration in sight
Dice Pool: None | **Defense:** None

Effect: When an ally's item, construct, or conjuration would break, be destroyed, or end from damage, roll your dice pool. On a success it is repaired at once and the hit that caused it has no effect.

B. Bomb Bag

Mana Cost: 5 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One zone in sight
Dice Pool: Dexterity + Implements + Tinker's Spark
Defense: Target's choice of defense

Effect: Throw a gadget at the zone. It bursts across that zone and every zone adjacent to it. Roll once; each target in those zones defends separately.

Rank 6 Galactic (choose one)

A. Gremlin Swarm

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** Up to 3 connected zones in sight
Dice Pool: Intelligence + Crafts + Tinker's Spark
Defense: None

Effect: While maintained, enemies in those zones suffer -2 dice on rolls using weapons, armor, or implements.

B. Masterwork Tinkering

Mana Cost: 6 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only | **Range:** Touch
Dice Pool: Intelligence + Crafts + Tinker's Spark
Defense: None

Effect: Over a session of work, build one permanent gadget with a rating up to your Heritage dots.

Rank 7 Cosmic (choose one)

A. Grand Contraption

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Conjuration, Persistent
Use: Combat | **Range:** An adjacent zone
Dice Pool: Intelligence + Crafts + Tinker's Spark
Defense: Target's choice of defense against its attacks

Effect: Assemble a combat construct as a conjuration. During each Upkeep Phase it attacks every enemy in zones adjacent to it using your dice pool; each defends separately.

B. Unmake

Mana Cost: 7 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One constructed object or construct in sight
Dice Pool: Intelligence + Crafts + Tinker's Spark
Defense: Dice equal to the object's rating, or a construct's maker's dice pool

Effect: The object resists with dice equal to its rating, or a construct with its maker's dice pool. If you beat it, it falls apart into its component parts.

Halfling

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Outsiders often describe the Halflings as quaint. They are not. Their society is the result of deliberate decisions about how to live well, and it works.

Halfling homes are built into hillsides, with round doors and grass roofs. Inside, most have a fast crystal relay connection and a full display setup alongside the hearth. The household I stayed with watched colosseum matches on a display Crystal across the room from a wood fire.

By law, every Halfling contributes two hours of community work each day before using personal devices. Shared work is spread evenly, no one carries an unfair load, and the rest of the day belongs to the individual. The law applies to everyone, but the form of contribution is fitted to the person. Those who cannot lift may teach. Those who cannot walk may advise. Those with fluctuating health contribute when they are able, and the community covers the difference.

Leisure is taken seriously. Halflings invented several card games now played across Terrana, usually for rising stakes. They run one of the most active CCN content communities in the world for their population size.

They are also the largest growers and distributors of pipe weed in Terrana. Some family strains carry formal recognition from the Merchants Guild, and vintage harvests can sell for more than a modest house in the Asura Kingdom. My host, a retired cartographer named Aldous, offered me a pipe on my first evening. My notes from the next morning are unusually philosophical.

Halflings are very good at being underestimated, and they know it. Their size and friendliness lower people's guard in negotiation. In one afternoon I watched it work three times.

Halfling - Mechanical Block

Average Lifespan: 200 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Charisma:** For a character whose warmth and natural likability define them.
- **Dexterity:** For a character whose quickness and nimble nature define them.

Innate Flaw - Underestimated: Halflings suffer a 1 die penalty on Expression rolls. People across most heritages do not instinctively take them seriously regardless of what they are saying or how they say it.

Attribute Flaw - Physical: Physical attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **A Lil Luck:** Once per session you may add your dots in this merit to any single roll. Can be declared before or after the initial roll, similar to a Willpower spend.
- **Disarming Charm:** Grants a free specialty in Subterfuge called Disarming Charm, providing a bonus die on Subterfuge rolls where the Halfling's small stature and non-threatening appearance work in their favor.

Heritage Magic: Hearthluck

Halflings will tell you there is no such thing as magic luck, only good preparation and a well kept hearth. Then the dice land their way again. Hearthluck bends small odds, keeps a Halfling out of the eye of trouble, and spreads good fortune to the people they feed.

Primary: Dexterity + Stealth + Hearthluck

Secondary: Charisma + Subterfuge + Hearthluck

Extra mana: Attack only. 1 die per mana, up to your Hearthluck dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Lucky Break

Mana Cost: 1 | **Speed:** Reaction | **Type:** Utility
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: Once per scene, after you roll, reroll a number of your own dice up to your Heritage dots.

B. Beneath Notice

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Dexterity + Stealth + Hearthluck | **Defense:** None

Effect: While attuned, add your Heritage dots to Stealth rolls.

Rank 2 Terrestrial (choose one)

A. Bad Luck Charm
Mana Cost: 2 | **Speed:** Reaction | **Type:** Debuff
Use: Combat | **Range:** One enemy in sight
Dice Pool: Charisma + Subterfuge + Hearthluck
Defense: None
Effect: When the enemy rolls against you or an ally in an adjacent zone, roll your dice pool. Each success removes 1 success from their roll.

B. Hearth Comfort
Mana Cost: 2 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only
Range: Allies who share the meal
Dice Pool: Charisma + Subterfuge + Hearthluck
Defense: None
Effect: Cook a meal over a scene. On a success, each ally who shares it regains 1 Willpower. Once per session.

Rank 3 Aerial (choose one)

A. Slipped Away
Mana Cost: 3 | **Speed:** Reaction | **Type:** Movement
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: After an attack against you fails, move to an adjacent zone at no AP cost.

B. Fortune's Favor
Mana Cost: 3 | **Speed:** Instant | **Type:** Enhancement
Use: Combat and outside combat
Range: One ally in an adjacent zone
Dice Pool: Charisma + Subterfuge + Hearthluck
Defense: None
Effect: Roll your dice pool. The ally adds your successes, up to your Heritage dots, as bonus dice on their next roll.

Rank 4 Lunar (choose one)

A. Forgotten
Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self
Dice Pool: Dexterity + Stealth + Hearthluck
Defense: Perception + Awareness
Effect: Roll when you attune. While attuned, an enemy you have not attacked this scene must beat your successes with Perception + Awareness before they can target you.

B. Jinx
Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Subterfuge + Hearthluck
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, they suffer penalty dice equal to your extra successes on their next roll.

Rank 5 Stellar (choose one)

A. Lucky Streak
Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, once per turn you may reroll one failed roll of your own.

B. Pass the Luck
Mana Cost: 5 | **Speed:** Reaction | **Type:** Enhancement
Use: Combat and outside combat | **Range:** One ally in sight
Dice Pool: None | **Defense:** None
Effect: When the ally fails a roll, they reroll it. You take a penalty die on your next roll.

Rank 6 Galactic (choose one)

A. Not Even There
Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat | **Range:** Self
Dice Pool: Dexterity + Stealth + Hearthluck
Defense: Perception + Awareness
Effect: Roll when cast. While maintained, enemies must beat your successes with Perception + Awareness to notice you at all. It ends when you attack or take damage.

B. Catastrophe
Mana Cost: 6 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One enemy in sight
Dice Pool: Charisma + Subterfuge + Hearthluck
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, their next roll automatically fails unless they spend 1 Willpower.

Rank 7 Cosmic (choose one)

A. Luck of the Hills
Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Enhancement, Persistent
Use: Combat and outside combat
Range: Self and allies in adjacent zones | **Dice Pool:** None
Defense: None
Effect: While maintained, you and allies in adjacent zones may reroll each failed roll once.

B. Fate's Pocket

Mana Cost: 7 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: The current scene | **Dice Pool:** None
Defense: None

Effect: Once per session, declare that something improbable already happened: a door was left unlocked, a guard dozed off, a rope held. The Storyteller makes it true unless it would directly defeat a major character.

Hyuman

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Hyumans live on every continent. They are not the strongest, longest lived, or most magically gifted heritage. What they have is adaptability. Placed in a difficult environment, Hyuman communities typically build permanent settlements within two generations and regard the land as their own within four.

Regional differences among Hyumans are larger than in most heritages, so I record them by origin.

Asura Kingdom: the wealthiest and most culturally dominant Hyuman nation. Its people tend to assume their customs are the standard, usually without arrogance, simply because they have never had reason to question it.

Three Magic Kingdoms: the north produces scholars, researchers, and engineers. Most northerners I interviewed had a specific subject of study and discussed it readily.

Biheiril: a remote kingdom bordered by mountains and old forest. Its people are quieter than most. They share their land with the Superd and keep long standing ties with the Ogres of the nearby islands.

Holy Land of Swords: children train in swordsmanship from early childhood. Adults hold strong, detailed opinions on technique.

Holy Kingdom of Milishion: one of the most religious societies in the world, with many historical sites. For generations it was the wall between demons and Hyumans. It is more integrated now than in the past.

Monsera: raised in a city where every heritage and culture lives within walking distance. Monserans resist easy classification.

Strife Zone: tough, pragmatic, and distrustful of authority. They learn early that no one will provide for them.

Breakwater: as self reliant as Strife Zone Hyumans, but softened by a local custom of minding one's own business while still helping neighbors.

Corporate Kingdoms: the few who leave describe freedom as something they never had before, and they treat it with unusual care.

Hyuman - Mechanical Block

Average Lifespan: 100 years.

Innate Attribute: Any single attribute of the player's choice. Starts at 2 dots, maximum raised by 1 beyond column cap. Note Innate on sheet.

Innate Flaw - Restless: If the character does not act meaningfully on at least one Driving Factor per story arc, roll Willpower dots at the arc's end. Each failure deals 1 Sanity damage.

Attribute Flaw: None. Hyumans may place any attribute group in their Affinity column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Hyuman Adaptability:** Grants a 5-5-5 attribute spread instead of the standard Affinity/Standard/Aversion designation.
- **Tenacity:** A dotted merit. Whenever the character regains Willpower, they regain 1 additional point for each dot in this merit.

Heritage Magic: Adaptation

Hyumans have no single inherited magic of their own. What they have instead is the thing Liris Kant spends most of her entry trying to name: an ability to take whatever the world hands them and make it theirs.

A Hyuman character's free Heritage magic dot goes to one of the following.

- The Heritage magic of a non-Hyuman parent. The character awakens that parent's bloodline magic and raises it with XP from then on. Unlike other heritages, a Hyuman is never locked out of a spell. Each new dot grants one of that rank's two spells for free, and the other can be bought with XP at the same cost as buying a spell in any other magic.
- 1 dot in any casting school (Fire, Water, Air, Earth, Nature, Bright, or Shade).
- 1 dot in any circle magic.

Whichever is chosen, a Hyuman receives one free dot and no more.

Immortal Mix

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

I have met Badigadi twice. His title, Demon King of Wisdom and Wine, is accurate. He has six arms, but most people notice his presence and his laugh first.

The Immortal Mix are Badigadi's descendants. Every four armed demon on the Demon Continent traces their line to him. There are more of them than one might expect from a single ancestor. He has lived a very long time, and his wife Kishirika, the Immortal Demon King who distributes the Eyes of God, has died and reincarnated at least five times, leaving him long stretches alone. He has not spent them in restraint.

Four arms mark a descendant no matter how many generations removed. When a four armed child is born to parents with two arms, the family learns something about its history. The Immortal Mix treat this with good humor.

They are tall, well above most Hyumans. Their four arms are fully functional, and trained fighters among them are formidable. Magic is their weakness. Badigadi has little magical aptitude, and neither, as a rule, do his descendants.

They live about four hundred years. The four arms persist through the generations. The immortality does not. Badigadi does not seem troubled by this.

Immortal Mix - Mechanical Block

Average Lifespan: 400 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Strength:** For a character whose four-armed physical power and raw combat capability define them.
- **Dexterity:** For a character whose four-armed coordination and combat versatility define them.

Innate Flaw - Badi's Blood: The Immortal Demon King Badigadi is renowned for many things. Magical aptitude is not among them. His descendants share this limitation. Immortal Mix demons suffer a 1 die penalty on all Magic ability rolls.

Attribute Flaw - Mental: Mental attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Physical Note: Every Immortal Mix demon with four arms can trace their lineage back to Badigadi, the six-armed Immortal Demon King of the Demon Continent.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Four Armed Fighting:** As long as you are not wielding a weapon you may make one additional Martial Arts attack per turn. Wielding a weapon requires enough fine motor coordination across four arms that your other arms hang back rather than risk harming yourself.
- **Quadbidextrous:** When wielding a melee weapon you may grip it with multiple hands. Each hand gripping the weapon beyond the first adds 1 bonus die to damage rolls. The weapon must be long enough for all hands to grasp simultaneously such as a polearm, nagamaki, or claymore. Cannot be combined with Four Armed Fighting.

Heritage Magic: Undying Flesh

Badigadi does not stay hurt, and neither do his descendants. Undying Flesh is the inherited regeneration of the Immortal Demon Kings.

Undying Flesh

Mana Cost: 1 or more (see Effect)
Speed: Instant, Downtime | **Type:** Healing
Use: Combat and outside combat | **Range:** Self
Dice Pool: 1 die per mana spent, up to your Undying Flesh dots or Max Mana Per Turn, whichever comes first
Defense: None

Effect: During your Upkeep Phase, spend at least 1 mana. Roll 1 die for each mana spent, up to your Heritage dots or Max Mana Per Turn, whichever comes first. Each success heals using the healing tier your rank allows. Outside combat you may simply heal up based on your dots in this Heritage magic.

Undying Flesh has no Option A or Option B. It is a single spell and each rank improves what it can heal.

Rank	Heals
1 Core	Basic healing.
2 Terrestrial	Instead of using a success for Basic healing, you can spend it to end one condition affecting you, such as Bleeding or Burning.
3 Aerial	Advanced healing.
4 Lunar	During downtime, you can use Master healing once a day to regenerate a lost limb.
5 Stellar	Expert healing.
6 Galactic	Master healing, even in combat.

Rank	Heals
7 Cosmic	Resurrection. After death, during downtime, you may cast Resurrection on your own body once per day while its mana countdown lasts, spending mana from what the body has left. If the roll succeeds, you resurrect. If it fails and the body has no mana left, you are permanently dead. This does not work if you chose to die (Blaze of Glory).

Ogre / Oni

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Before I visited Ogre Island I had read older scholarly accounts that focused on the Ogres' size and capacity for violence. Those accounts were wrong, and I believed them anyway. I note this because the error is easy to make.

Ogres live on Ogre Island, an archipelago off the northeastern coast of the Central Continent. Their ancestors left the Demon Continent during a period of constant war. They did not want to fight. They wanted to train, argue, and live in peace, so they left.

Their alliance with the Hyumans of Biheiril began with a rescue. Ancient Ogres pulled a crew of Biheiril sailors out of the sea, including someone of importance whose identity changes with the telling. The two peoples have been close ever since.

Ogres vary widely in appearance. Some are nearly Hyuman in proportion, with skin in shades of red, green, blue, or pink. Others are massive, closer to a minotaur in build. All have horns, ranging from small bumps to long sweeping structures. Size and build do not follow gender.

In Ogre courtship, beautiful Ogres are usually drawn to ugly ones and ugly ones to beautiful ones. There are exceptions, but the pattern is strong. The most striking Ogre I met was happily partnered with someone best described as magnificently grotesque.

Ogre culture is monastic in the sense of disciplined self development, not withdrawal. They practice martial traditions ranging from striking styles to grappling and pursue them with both seriousness and enjoyment. They also eat well, drink often, and argue about everything.

Their pubs are the loudest I have encountered. Tables are struck for emphasis and voices reach volumes I would associate with emergencies. On my first night, two Ogres stood and faced each other across a table, and I expected a fight. They were debating grappling techniques. It ended with both laughing and refilling each other's cups.

An adult Ogre who throws the first punch is exiled. To an Ogre, arguing is not fighting and a raised voice is not a raised hand. They hold this line consistently. Children who lash out are taught patiently rather than punished. During my stay I saw no exile, because no adult broke the rule.

Ogres will defend themselves, their friends, and strangers with everything they have. Most say they would die for someone they had never met, and they say it as a plain statement of fact. They accept formal duels, fight them honorably, and end them without killing whenever possible.

Ogre / Oni - Mechanical Block

Average Lifespan: 200 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Strength:** For a character whose physical power and imposing presence define them.
- **Wisdom:** For a character whose monastic discipline and focused mind define them.

Innate Flaw - Ogre's Grace: An Ogre or Oni cannot willingly initiate a confrontation they believe will end in physical violence. They may argue, debate, and negotiate freely. They may accept a duel if one is formally suggested by the other party. But throwing the first punch means exile from their tribe and lasting reputation damage among their people.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Iron Gut:** Grants a free specialty in Endurance called Iron Gut, providing a bonus die on Endurance rolls against poison, toxins, and ingested or inhaled hazards.
- **Peacemaker:** Grants a free specialty in Diplomacy called Peacemaker, providing a bonus die on Diplomacy rolls when attempting to de-escalate conflict, negotiate terms, or find common ground before a situation turns violent.

Heritage Magic: Oni Ward

Ogre law forbids throwing the first blow, so their inherited magic never learned how. Oni Ward is defense and protection: a body that will not break, a stance that shelters others, and a presence that talks a fight down before it starts. No Oni Ward spell can start a fight. Spells that strike back only work against someone who has already attacked.

Primary: Wisdom + Endurance + Oni Ward

Secondary: Composure + Diplomacy + Oni Ward

Extra mana: Attack or damage. 1 die per mana, up to your Oni Ward dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Guarding Stance
Mana Cost: 1 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: Wisdom + Endurance + Oni Ward
Defense: None
Effect: When you are attacked, roll your dice pool. Each success removes 1 success from the attacker's roll.

B. Calm Presence
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Composure + Diplomacy + Oni Ward
Defense: None
Effect: While attuned, add your Heritage dots to Diplomacy rolls made to de-escalate a situation before violence begins.

Rank 2 Terrestrial (choose one)

A. Iron Body
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self
Dice Pool: Wisdom + Endurance + Oni Ward
Defense: None
Effect: While attuned, add half your Heritage dots, rounded up, to your BDT.

B. Answering Strike
Mana Cost: 2 | **Speed:** Reaction | **Type:** Attack
Use: Combat
Range: Melee, against the creature that hit you
Dice Pool: Wisdom + Endurance + Oni Ward
Defense: Target's choice of defense
Effect: After an attack hits you, make one unarmed or weapon attack against that attacker with this dice pool at no AP cost.

Rank 3 Aerial (choose one)

A. Take the Blow
Mana Cost: 3 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** One ally in an adjacent zone
Dice Pool: None | **Defense:** None
Effect: An attack aimed at the ally hits you instead. You defend against it normally.

B. Breaking Hold
Mana Cost: 3 | **Speed:** Instant | **Type:** Debuff
Use: Combat
Range: Melee, one creature that has attacked this scene
Dice Pool: Wisdom + Endurance + Oni Ward
Defense: Strength + Athletics, then Strength + Athletics to break free
Effect: The target resists with Strength + Athletics. If you beat them, they are restrained and cannot attack until they beat your successes with Strength + Athletics on their turn.

Rank 4 Lunar (choose one)

A. Monastic Ward
Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | **Type:** Defense, Persistent
Use: Combat | **Range:** Allies in adjacent zones
Dice Pool: Wisdom + Endurance + Oni Ward
Defense: None
Effect: While maintained, allies in adjacent zones add half your Heritage dots, rounded up, to their BDT.

B. Unmoving
Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, if you have not moved this turn, you cannot be moved, knocked prone, or Rooted.

Rank 5 Stellar (choose one)

A. Mountain Discipline
Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, ignore wound penalties from Bashing and Lethal damage.

B. Disarming Grace
Mana Cost: 5 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self or one ally in an adjacent zone
Dice Pool: Wisdom + Endurance + Oni Ward
Defense: Strength + Athletics
Effect: When a melee attack against you or an ally in an adjacent zone fails, roll your dice pool. The attacker resists with Strength + Athletics. If you beat them, they drop their weapon.

Rank 6 Galactic (choose one)

A. Oath Shield

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Defense, Persistent
Use: Combat | **Range:** One ally in sight | **Dice Pool:** None
Defense: None

Effect: While maintained, the first attack that hits the ally each turn deals them no damage. You take half of it instead, rounded down.

B. Peace Aura

Mana Cost: 6 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Composure + Diplomacy + Oni Ward
Defense: Composure + Diplomacy

Effect: Every creature in range resists with Composure + Diplomacy. Each one you beat cannot attack on their next turn.

Rank 7 Cosmic (choose one)

A. Unbreakable Vow

Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, every hit against you is treated as one damage threshold lower: Aggravated becomes Lethal, Lethal becomes Bashing, and Bashing deals nothing.

B. Sanctuary

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat
Range: Up to 6 connected zones in sight
Dice Pool: Composure + Diplomacy + Oni Ward
Defense: Willpower

Effect: Roll when cast. While maintained, anyone who tries to attack inside those zones must first beat your successes with Willpower. On a failure the action is wasted.

Reptilian / Bug

Monster Faction

Yuan-Ti, Lizardfolk, Dragonewt, Thri-Kreen, Aranea, and similar. Cold blooded and ancient.

From Liris Kant's entry on the monster peoples

The Reptilian and Bug peoples range from the Yuan-Ti to the Thri-Kreen and the Aranea. They are cold blooded, so their energy depends on the temperature. At the right temperature they are as active as anyone. In the cold they slow down, know it, and plan around it. Their communities favor hierarchy and tradition, and those structures have stayed stable because they work. They are slow to get to know and worth the time.

Reptilian / Bug - Mechanical Block

Average Lifespan: 200 years for Reptilian types, 100 years for Bug types.

Innate Attribute (choose 1, note Innate on sheet):

- **Fortitude:** For a character whose natural resilience and physical toughness define them.
- **Perception:** For a character whose sharp senses and environmental awareness define them.

Innate Flaw - Cold Blooded: Reptilian and Bug monsters suffer a penalty die on all rolls made in extreme cold environments.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Scaled Hide:** Grants a free specialty in Endurance called Scaled Hide, providing a bonus die against physical damage reflecting their natural armor.
- **Toxic Knack:** Grants a free specialty in a magic ability of the player's choice with Storyteller approval, reflecting an innate toxic, chemical, or biological production unique to their creature type.

Heritage Magic: Venom

Fangs, stingers, glands, and spit. Venom is the toxic gift shared by the cold blooded and many legged peoples of Monsera. Each species carries a different poison, and every one of them can be refined.

Primary: Dexterity + Martial Arts + Venom

Secondary: Intelligence + Alchemy + Venom

Extra mana: Damage only. 1 die per mana, up to your Venom dots or Max Mana Per Turn, whichever comes first.

Poisoned (condition): the target takes 1 Bashing damage during their Upkeep Phase for a number of turns equal to the mana spent on the spell that applied it. Poisoned ends early through Detoxification or Bright Magic.

Rank 1 Core (choose one)

A. Venom Bite

Mana Cost: 1 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Martial Arts + Venom
Defense: Target's choice of defense

Effect: Attack with your natural weapons. On a hit the target gains the Poisoned condition.

B. Taste the Air

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Intelligence + Alchemy + Venom | **Defense:** None

Effect: While attuned, add your Heritage dots to Awareness and Survival rolls to track by scent and to detect poisons.

Rank 2 Terrestrial (choose one)

A. Spit

Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Dexterity + Martial Arts + Venom
Defense: Target's choice of defense

Effect: On a hit the target suffers -2 dice on sight-based rolls on their next turn instead of taking damage.

B. Toxin Craft

Mana Cost: 2 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only | **Range:** Self
Dice Pool: Intelligence + Alchemy + Venom | **Defense:** None

Effect: Over a scene, milk doses of your venom equal to your successes, up to your Heritage dots. Doses keep for one session. A weapon coated with a dose applies the Poisoned condition on its next hit.

Rank 3 Aerial (choose one)

A. Paralytic

Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Martial Arts + Venom
Defense: Target's choice of defense

Effect: Venom Bite whose hit also costs the target 1 AP on their next turn.

B. Venom Immunity

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Fortitude + Endurance + Venom | **Defense:** None

Effect: While attuned, resist poisons with this dice pool.

Rank 4 Lunar (choose one)

A. Necrotic Venom

Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Martial Arts + Venom
Defense: Target's choice of defense

Effect: Venom Bite whose Poisoned damage is Lethal instead of Bashing.

B. Webline

Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Intelligence + Alchemy + Venom
Defense: Dexterity + Athletics, then Strength + Athletics to break free

Effect: The target resists with Dexterity + Athletics. If you beat them, they gain the Rooted condition until they beat your successes with Strength + Athletics on their turn.

Rank 5 Stellar (choose one)

A. Toxic Cloud

Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Attack, Persistent
Use: Combat | **Range:** One zone in sight
Dice Pool: Dexterity + Martial Arts + Venom
Defense: Fortitude + Endurance, which reduces the damage value

Effect: Roll when cast. Successes plus mana spent set the damage value. Anyone who enters or begins their turn in the zone rolls Fortitude + Endurance; their successes reduce the damage value, and the rest is compared against their damage thresholds.

B. Shed Skin

Mana Cost: 5 | **Speed:** Reaction | **Type:** Healing
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: Once per scene, shed your outer layer. Remove all conditions and heal 1 Lethal damage.

Rank 6 Galactic (choose one)

A. Hemotoxin

Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Martial Arts + Venom
Defense: Target's choice of defense

Effect: Venom Bite whose target gains the Bleeding condition as well as Poisoned.

B. Venom Mastery

Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, each Venom Bite hit also applies your choice of -2 dice on the target's next roll, the loss of 1 AP, or the Bleeding condition.

Rank 7 Cosmic (choose one)

A. Death's Kiss

Mana Cost: 7 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Martial Arts + Venom
Defense: Target's choice of defense, then Fortitude + Endurance

Effect: On a hit, the target also resists with Fortitude + Endurance. If you beat them, the hit is treated as meeting the next-higher damage threshold, and Poisoned lasts the whole scene.

B. Plague Bearer

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Attack, Persistent
Use: Combat | **Range:** Up to 6 connected zones around you
Dice Pool: Dexterity + Martial Arts + Venom
Defense: Fortitude + Endurance, which reduces the damage value

Effect: Toxic Cloud across up to 6 connected zones. It moves with you during each Upkeep Phase and never affects your allies.

Part 2: Rare Heritages (Storyteller Approval Required)

Every heritage in this part requires Storyteller approval before character creation. A character of a Rare Heritage will turn heads in most places they go, and the Storyteller should be ready to make that part of the story.

Storyteller Note: It is not recommended to let two or more players play the same Rare Heritage, unless you are running a specific kind of game, such as an all werewolf or all vampire campaign.

Rare Monster Factions

Six Monster sub-types are rare outside the deep pockets of Monsera and the Shaded Isles. They are listed alphabetically in this part, marked Monster Faction. Liris Kant's introduction to the monster peoples appears under Monster Factions at the start of Part 1. Incorporeal Undead cannot be chosen at character creation; their entry explains how a character becomes one.

Corporeal Undead

Monster Faction

Liches, Dullahan, Skeletons, Prometheans, and similar. Corporeal Undead sustain themselves through mana rather than conventional biological processes. Functionally immortal as long as mana is maintained.

From Liris Kant's entry on the monster peoples

The Corporeal Undead are liches, dullahans, skeletons, prometheans, and others sustained by mana rather than biology. Most live in the Shaded Isles, though some live in Monsera proper. Three ancient noble houses have ruled the isles for longer than most records go back: one led by a vampire, one by a lich, and one by a dullahan. The isles joined the Monsera kingdom a generation ago while keeping their own internal government. The transition went more smoothly than expected, largely because the Slime King was both respectful and clear about his terms. The permanent storm over the isles was designed by a lich and remains in place.

Corporeal Undead - Mechanical Block

Average Lifespan: Immortal, as long as mana is maintained.

Innate Attribute (choose 1, note Innate on sheet):

- **Intelligence:** For a character whose ancient accumulated knowledge and sharp analytical mind define them.
- **Composure:** For a character whose unshakeable stillness and emotional detachment define them.

Innate Flaw - Mana Dependent: Corporeal Undead who fully deplete their mana and remain at zero for an extended period begin to deteriorate physically. Each session spent at zero mana deals 1 Aggravated damage that cannot be healed until mana is restored.

Attribute Flaw - Physical: Physical attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Undying Resilience:** Grants a free specialty in Endurance called Undying, providing a bonus die against poison, disease, and environmental hazards that affect living tissue.
- **Death Sense:** Grants a free specialty in Awareness called Death Sense, providing a bonus die on Awareness rolls to detect the presence of death, undead creatures, or necrotic magic in the surrounding area.

Heritage Magic: Deathless

The Corporeal Undead are held together by mana rather than breath. Deathless is the control they have over that state: a body that feels nothing, rebuilds itself from mana, and refuses to stay down.

Primary: Composure + Endurance + Deathless

Secondary: Intelligence + Attunement + Deathless

Extra mana: Attack or damage. 1 die per mana, up to your Deathless dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Unfeeling

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, ignore wound penalties from Bashing damage.

B. Corpse Still

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Composure + Endurance + Deathless
Defense: Perception + Awareness

Effect: Roll when you attune. While attuned you appear fully dead. Seeing through it requires beating your successes with Perception + Awareness.

Rank 2 Terrestrial (choose one)

A. Mana Mending

Mana Cost: 2 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat | **Range:** Self
Dice Pool: Composure + Endurance + Deathless
Defense: None

Effect: Cast during your Upkeep Phase. Basic healing on yourself.

B. Grave Chill

Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Touch
Dice Pool: Composure + Endurance + Deathless
Defense: Target's choice of defense

Effect: On a hit, the target also gains the Chilled condition.

Rank 3 Aerial (choose one)

A. Detached Parts
Mana Cost: 3, upkeep 2 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat | **Range:** An adjacent zone
Dice Pool: Intelligence + Attunement + Deathless
Defense: None
Effect: A hand, head, or other part of you detaches and acts on its own in an adjacent zone to scout or carry something small. You perceive through it.

B. Unbreathing
Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, you are immune to suffocation, airborne poisons, and disease.

Rank 4 Lunar (choose one)

A. Deep Mending
Mana Cost: 4 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat | **Range:** Self
Dice Pool: Composure + Endurance + Deathless
Defense: None
Effect: Cast during your Upkeep Phase. Advanced healing on yourself.

B. Grave Aura
Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** All adjacent zones
Dice Pool: Composure + Endurance + Deathless
Defense: Composure + Presence
Effect: Each enemy in range resists with Composure + Presence when it is cast. Each one you beat suffers -2 dice to attack you while maintained.

Rank 5 Stellar (choose one)

A. Reassemble
Mana Cost: 5 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: Once per scene, when a hit would make you Incapacitated, you collapse instead and reform in an adjacent zone at your next Upkeep Phase without that hit's damage.

B. Drain Life
Mana Cost: 5 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Touch
Dice Pool: Composure + Endurance + Deathless
Defense: Target's choice of defense
Effect: On a hit, regain mana equal to the boxes of damage dealt.

Rank 6 Galactic (choose one)

A. Phylactery
Mana Cost: 6 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only | **Range:** Touch
Dice Pool: Intelligence + Attunement + Deathless
Defense: None
Effect: Over a session of work, bind your existence to one object. While it exists, your death ends with you reforming beside it after one day.

B. Command the Lesser Dead
Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat | **Range:** Mindless undead in sight
Dice Pool: Composure + Endurance + Deathless
Defense: None for mindless undead; undead imprinted by another necromancer or lich roll their controller's dice pool
Effect: Mindless undead in sight, up to your Heritage dots in number, obey you while maintained. Undead imprinted by another necromancer or lich resist with their controller's dice pool.

Rank 7 Cosmic (choose one)

A. Deathless Lord
Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, damage cannot take you past Incapacitated. Bright Magic ignores this protection.

B. Army of the Grave
Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Conjuration, Persistent
Use: Combat | **Range:** Corpses or skeletons in sight
Dice Pool: Composure + Endurance + Deathless
Defense: Target's choice of defense against its attacks
Effect: Raise up to your Heritage dots in bodies as one conjuration. During each Upkeep Phase, each risen body may move one zone or attack one enemy in a zone adjacent to it using your dice pool.

Demon

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

The Demon Continent holds more peoples than any survey could count. Every valley, bog, and mountain pass seems to have its own tribe, and no two look alike. I have met demons with horns and demons with none, demons with skin of every color, demons with extra eyes, tails, or wings, and one small fellow whose face I never once saw beneath the brim of his hat. The continent's high ambient mana seems to push each bloodline in its own direction.

These are the ordinary demons of the continent. They are not the Immortal Demon Kings, not the Immortal Mix descended from Badigadi's line, and not the bestial peoples counted among the monster factions. Most live about two hundred years. Outside the Demon Continent they are still an unusual sight, though Monsera's ports see more of them every year.

The tribes differ so widely that I will not pretend to describe them all. Each carries its own gifts, its own weaknesses, and its own quiet magic in the blood.

Demon - Mechanical Block

Building a Demon: A Demon character is built by the player and the Storyteller together. Decide on the character's tribe and look first, then use that picture to choose the Innate Attribute, Innate Flaw, Attribute Flaw, and Heritage magic below.

Average Lifespan: 200 years.

Innate Attribute: Chosen with the Storyteller to fit the character's tribe. Starts at 2 dots, maximum raised by 1 beyond the column cap. Note Innate on sheet.

Innate Flaw: Chosen with the Storyteller to fit the character's tribe. Like every Innate Flaw, it grants no extra dots. It should be about as much of a drawback as the other heritages' Innate Flaws, such as a penalty die on one kind of roll.

Attribute Flaw: Chosen with the Storyteller. One column (Physical, Social, or Mental) can never be your Affinity column; it can only be your Standard or Aversion column. A frail tribe of spellcasters, for example, would take Physical.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Tribal Gift:** Grants a free specialty in one ability chosen with the Storyteller that reflects your tribe's nature, providing a bonus die when that gift applies.
- **Demon Tongue:** Grants a free specialty in Diplomacy called Demon Tongue, providing a bonus die on rolls to deal with the tribes, domains, and Demon Kings of the Demon Continent.
- **Mana Born:** Grants a free specialty in Attunement called Mana Born, providing a bonus die on rolls to sense dense ambient mana and to resist mana sickness.

Heritage Magic: Tribal Magic

Every demon tribe carries its own magic in the blood. A Demon's Heritage magic is designed by the player and the Storyteller together around the tribe's nature, and it follows every rule for Heritage magic in this chapter. Use these guidelines when building it.

Name: Give the magic a name that fits the tribe.

Pools: Choose a Primary and a Secondary dice pool, each Attribute + Ability + your Heritage dots, like every other Heritage magic.

Ranks: Seven ranks, Core through Cosmic. Each rank offers an Option A and an Option B spell, and the choice is permanent.

Mana: Every spell costs mana equal to its rank. Upkeep is always the cost minus 1, so no Core spell can be persistent.

Balance: Use the other Heritage magics in this chapter as a measuring stick. Rank 1 spells have no lasting effects in combat, and power should rise evenly from rank to rank.

Pacing: The Storyteller may write the spells one rank at a time, as the character awakens each new dot, rather than all seven at creation.

Devils

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

I have a personal stake in this entry. I was one of the first scholars outside Monsera to write about the devils settling on Floor 15 of The Dungeon. That article drew more correspondence than anything else I have published, and most of it came from people who had never met a devil.

Devils are widely misunderstood, and the difficulty is that the common beliefs are not entirely false. They do harvest mana from the emotions of those around them. Hell has been a place of real suffering. What the reputation leaves out is that a people is not a single person, and the history of some devils does not predict the behavior of the one in front of you.

Devils can regenerate mana from any emotion, not only suffering. The Immortal Devil Queen Sciel credits this discovery to her conversations with the Slime King about sixty years ago. If a devil can live on joy as easily as misery, there is no longer any reason to cause misery. Not all devils accept this. Zagan controls four levels of Hell and holds the Duchess Gremory prisoner. Marchosias fights beside him by choice.

Most of the devils who reject Zagan's view now live in Nite City on Floor 15 of The Dungeon. It is a city where nearly everything is legal and cheap, where currency is often emotional rather than financial, and where seven districts correspond to the seven emotional affinities.

Sciel was Nite City's first mayor and held the post until the city could govern itself. Since then she has traveled as an envoy with the Slime King's authority, arguing that devils deserve to exist without proving it every day. She writes books and appears on Crystalz programs. We exchange manuscripts before publication, and her notes on mine are always correct.

Hell has nine levels. Level 9 is the entry point for the banished. Level 1 is the deepest, where Lucifer holds court. Each level is ruled by a prince, princess, duke, or duchess. Zagan has been conquering levels and claiming them for himself. Lucifer has responded with restraint. He cares for the devils, Hyumans, and others in Hell in his own way, and his anti authoritarian philosophy makes simply ordering Zagan to stop feel inconsistent to him. Hell is at a stalemate.

Belethore, Lucifer's son and Sciel's former betrothed, was killed and reincarnated into an ordinary devil family with his memories and most of his power intact. He now goes by Mahk and recently took over Level 14 3/4 Studios, between Floors 14 and 15 of The Dungeon. His shows feature devils alongside people of every heritage, slowly making them ordinary in the public eye.

I am often asked whether devils can be trusted. It is not a question anyone asks about Elves or Dwarves, and it assumes a uniformity that does not exist. The devils I know have been exactly as trustworthy as everyone else I know. It depends on the individual.

A devil's skin color shows their emotional affinity. The Aceditia (Sloth and Diligence) are blue and gray. The Iracunditia (Wrath and Patience) are deep red and black. The Gulanitia (Gluttony and Temperance) are amber and burnt orange. The Vanitia (Pride and Humility) are bronze and copper. The Inviditia (Envy and Kindness) are green and teal. The Carnavitia (Lust and Chastity) are violet and soft pink. The Avaritia (Greed and Charity) are gold and alabaster. Immortal devils show a single solid color. Their descendants carry both colors of their type in a pattern unique to each individual. Skin color tells you a devil's affinity. It does not tell you their character.

Devils - Mechanical Block

Average Lifespan: 400 years. Immortal Devils are Immortal. Devil Spawn are Fey Touched and live 400 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Intelligence:** For a character whose magical aptitude and contractual cunning define them.
- **Charisma:** For a character whose emotional attunement and social presence define them.

Innate Flaw - Devil's Rejects: Devils suffer a 1 die penalty on Persuasion rolls when attempting to convince others of their genuine intentions. The reputation of their kind precedes them in almost every corner of Terrana, especially outside of Monsera and Nite City.

Attribute Flaw - Physical: Physical attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Wings: Almost every devil has wings, though they vary widely in size and usefulness. Some are strong enough for true flight, and some are only for show. Every devil can glide when falling, provided there is room to spread their wings, whether or not they can truly fly.

Devil Type: Choose one of the seven devil types at creation. Your type determines your Emotional Affinity and your skin color combination. Devils can harvest mana from any emotion around them, but harvest more from the Virtue or Vice of their calibration and are naturally drawn to people exhibiting those emotions.

Devil Type	Scale	Primary Color	Secondary Color
Aceditia	Sloth/ Diligence	Blue	Gray
Iracunditia	Wrath/ Patience	Deep Red	Black
Gulanitia	Gluttony/ Temperance	Amber	Burnt Orange
Vanitia	Pride/ Humility	Bronze	Copper
Inviditia	Envy/ Kindness	Green	Teal
Carnavitia	Lust/Chastity	Violet	Soft Pink
Avaritia	Greed/ Charity	Gold	Alabaster

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Devil Wings:** Your wings are strong enough for true flight. Grants a free specialty in Athletics called Flight, providing a bonus die on Athletics rolls made while flying. Without this merit a devil can still glide, but cannot gain altitude.
- **Emotional Taste:** A dotted merit. During combat, if anyone within a number of zones equal to your dots in this merit is showing a strong emotion tied to your Devil Type, you may gain 1 additional mana during your Upkeep Phase. You can do this a number of times per combat equal to your dots in this merit.
- **Emotional Harvest:** Whenever you would regain mana through any means you regain double that amount instead.
- **Devil Spawn:** Available only if one parent is a non-devil heritage. You may choose one merit from that heritage instead of the options listed here. Devil Spawn are Fey Touched (see Fey Touched at the start of this chapter).

Heritage Magic: Contract Magic

Contract Magic is a circle magic. Anyone in Terrana can learn it, though few bother, and devils are the only people born with it. Like all circle magic, a contract can only be written outside combat, and the mana is spent when it is written. A finished contract can be carried and signed at any time, in combat or social combat included. A contract binds only those who sign it willingly unless a spell says otherwise, and its terms take effect the moment it is signed.

Primary: Intelligence + Circle Magic + Contract Magic

Secondary: Charisma + Persuasion + Contract Magic

Extra mana: Writing roll only. 1 die per mana, up to your Contract Magic dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Binding Word

Mana Cost: 1, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None
Effect: A contract holding one simple promise between two signers. Both know at once if it is broken.

B. Fine Print Seal

Mana Cost: 1, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: One document
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None
Effect: Seal an existing agreement or document. Whoever reads it adds your successes as bonus dice to rolls to find loopholes, lies, and hidden clauses in it.

Rank 2 Terrestrial (choose one)

A. Minor Pact

Mana Cost: 2, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None
Effect: A signer gives you 1 mana or 1 Willpower when they sign, in exchange for a favor named in the contract. If you fail to deliver the favor, you take 1 Lethal damage.

B. Witness Clause

Mana Cost: 2, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Charisma + Persuasion + Contract Magic
Defense: None
Effect: The contract records how each signer felt when they signed. Whoever holds it knows if any signer felt fear, deceit, or anger at that moment.

Rank 3 Aerial (choose one)

A. Penalty Clause

Mana Cost: 3, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None
Effect: Whoever breaks the contract takes Bashing damage equal to your successes when writing it, up to your Heritage dots.

B. Truth Circle

Mana Cost: 3, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: One zone or room
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None
Effect: Draw a circle around a room or zone. For the next scene held inside it, anyone who lies suffers -2 dice for that scene, and everyone in the circle knows a lie was told.

Rank 4 Lunar (choose one)

A. Debt Mark

Mana Cost: 4, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None
Effect: While a signer owes you under the contract, they cannot hide their location from you and suffer -2 dice to attack you.

B. Shared Burden

Mana Cost: 4, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Charisma + Persuasion + Contract Magic
Defense: None
Effect: For one session after signing, signers may split damage they take with another signer, half each, rounded in favor of the one hit.

Rank 5 Stellar (choose one)

A. Infernal Clause

Mana Cost: 5, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None
Effect: Penalty Clause whose damage is Lethal.

B. Collect

Mana Cost: 5, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Charisma + Persuasion + Contract Magic
Defense: None
Effect: When you call in the debt, a signer must perform one task within their ability. Refusing triggers the contract's penalty.

Rank 6 Galactic (choose one)

A. Soul Ledger

Mana Cost: 6 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only
Range: One contract or magical agreement
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: The contract's original writing successes
Effect: Study a contract or magical agreement over a scene. Roll against its maker's writing successes. If you win, you may void it.

B. Accepted Gift

Mana Cost: 6, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Whoever accepts the gift
Dice Pool: Charisma + Persuasion + Contract Magic
Defense: Willpower

Effect: Write a contract into a gift: a drink, a token, a pair of gloves. Whoever accepts it is bound to one condition you named unless they beat your successes with Willpower when they accept.

Rank 7 Cosmic (choose one)

A. Grand Contract

Mana Cost: 7 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only
Range: A group, guild, or city of willing signers
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None

Effect: Over a full session of writing, bind up to your Heritage dots x100 willing signers. Penalties may be set up to Aggravated damage.

B. Hell's Notary

Mana Cost: 7, spent when written | **Speed:** Downtime
Type: Utility
Use: Written outside combat; the finished contract can be used any time
Range: Signers
Dice Pool: Intelligence + Circle Magic + Contract Magic
Defense: None

Effect: A contract that trades dots of an Attribute, Ability, or Merit between willing signers, up to half your Heritage dots, rounded up. The Storyteller may require a Sanity cost for large trades.

Dragonfolk

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

I have never met a pure blooded Dragonfolk. I have met several of mixed heritage, corresponded with two more, and read everything the Monsera University library holds on the subject, which is not much. The pure blooded do not oppose scholarship. They decline to be its subject.

What is broadly understood about the pure blooded is this: they are genderless, hatched from eggs, androgynous in appearance, and fixed in number. How the population stays fixed is a private matter involving soul reincarnation, and they do not discuss it. Asking will not get an answer.

Dragonfolk society is hierarchical, with the pure blooded at the top. Below that, rank depends on ability, not lineage. A first generation descendant and a twelfth generation descendant are treated as equals. What matters is demonstrated, ongoing capability. As a result, Dragonfolk are direct in their judgments and expect directness in return.

Mixed heritage Dragonfolk are the ones the wider world meets, and they are rare. Scale patterns show on their skin in certain light, and their eye colors are uncommon in other heritages. People around them describe a sense of weight in the air. I dismissed this as romantic exaggeration until I met my third Dragonfolk.

Older texts call them cold and contemptuous of lesser heritages. The Dragonfolk I interviewed found this either offensive or funny. In my experience they are direct and patient, and when something interests them, they give it complete attention.

Mixed heritage Dragonfolk live about a thousand years. They are rarely in a hurry and find the urgency of shorter lived peoples somewhat comic. They are mostly polite about it.

Dragonfolk - Mechanical Block

Average Lifespan: 1000 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Strength:** For a character whose raw physical power and draconic might define them.
- **Fortitude:** For a character whose natural toughness and resilience define them.

Innate Flaw - Intimidating: Dragonfolk are rare in the world and rumors about their nature have spread far and wide. Dragonfolk suffer a 1 die penalty on Expression rolls as others struggle to read them or feel at ease around them.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Greater Mana Usage:** Each dot in this merit adds 1 to the character's maximum Mana Per Turn beyond the standard calculation.
- **Dragon's Might:** Grants a free specialty in Melee or Martial Arts called Dragon's Might, providing a bonus die on attack rolls that leverage raw physical strength.

Heritage Magic: Dragon Blood

Mixed heritage Dragonfolk carry a weight that other people can feel in the air. Dragon Blood is that inheritance made active: scales, breath, wings, and a presence that presses down on everyone nearby. Dragon breath is raw draconic force and has no element.

Primary: Strength + Martial Arts or Melee + Dragon Blood

Secondary: Fortitude + Presence + Dragon Blood

Extra mana: Attack or damage. 1 die per mana, up to your Dragon Blood dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Scale Skin
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, gain Armor equal to half your Heritage dots, rounded up.

B. Dragon's Presence
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, add your Heritage dots to Presence rolls made to intimidate or command attention.

Rank 2 Terrestrial (choose one)

A. Dragon Breath
Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Strength + Martial Arts or Melee + Dragon Blood
Defense: Target's choice of defense
Effect: Breathe raw draconic force at the target.

B. Weighty Air
Mana Cost: 2, upkeep 1 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** All adjacent zones | **Dice Pool:** None
Defense: None
Effect: While maintained, enemies in range suffer -1 die on Dodge rolls.

Rank 3 Aerial (choose one)

A. Claw and Fang
Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, your natural weapons have a rating equal to your Heritage dots, and attacks with them ignore Armor equal to half your Heritage dots, rounded up.

B. Draconic Will
Mana Cost: 3 | **Speed:** Reaction | **Type:** Defense
Use: Combat and outside combat | **Range:** Self
Dice Pool: Fortitude + Presence + Dragon Blood
Defense: None
Effect: When resisting fear or mental control, roll this dice pool instead of your normal roll.

Rank 4 Lunar (choose one)

A. Breath Cone
Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat
Range: Cone: all zones directly and diagonally forward of you
Dice Pool: Strength + Martial Arts or Melee + Dragon Blood
Defense: Target's choice of defense
Effect: Dragon Breath against every target in the cone. Roll once; each target defends separately.

B. Wings Unfurled
Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Movement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, you manifest wings and fly at double your normal movement.

Rank 5 Stellar (choose one)

A. Dragon Scales
Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, add your Heritage dots to your BDT. You are immune to the Burning and Chilled conditions.

B. Roar of Dominion
Mana Cost: 5 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All enemies in sight
Dice Pool: Fortitude + Presence + Dragon Blood
Defense: Composure + Presence
Effect: Each enemy resists with Composure + Presence. Each one you beat suffers -2 dice to attack you for the rest of the scene.

Rank 6 Galactic (choose one)

A. Breath Line
Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Straight line across the battlefield
Dice Pool: Strength + Martial Arts or Melee + Dragon Blood
Defense: Target's choice of defense
Effect: Dragon Breath in a straight line. Each target defends separately. Damage does not fall off with distance.

B. Dragon's Weight
Mana Cost: 6 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** Up to 3 connected zones in sight
Dice Pool: Fortitude + Presence + Dragon Blood
Defense: Strength + Athletics
Effect: Each enemy in range resists with Strength + Athletics. Each one you beat is knocked prone and cannot stand on their next turn.

Rank 7 Cosmic (choose one)

A. True Dragon
Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: Target's choice of defense against Breath Cone
Effect: While attuned, you take a partial dragon form: you fly, your BDT doubles, and once per turn you may cast Breath Cone without its AP cost. You still pay its mana.

B. Fire of Ages
Mana Cost: 7 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Straight line across the battlefield
Dice Pool: Strength + Martial Arts or Melee + Dragon Blood
Defense: Target's choice of defense
Effect: Breath Line whose hits are treated as meeting the next-higher damage threshold.

Fey

Monster Faction

Dryads, Satyrs, Myconids, and similar. Fey monsters exist slightly sideways from the rest of the world.

From Liris Kant's entry on the monster peoples

The Fey, dryads, satyrs, myconids, and their relations, follow an internal logic that is consistent but does not match that of other peoples. Time works differently for them. Commerce is not something they are ignorant of. They simply do not grasp it. In Monsera they live where ambient mana is thickest, and the city has built around their trees rather than through them.

Fey - Mechanical Block

Average Lifespan: 400 years, though some Fey are Immortal (Storyteller decides).

Innate Attribute (choose 1, note Innate on sheet):

- **Charisma:** For a character whose otherworldly presence and natural magnetism define them.
- **Wisdom:** For a character whose deep attunement to natural and magical forces define them.

Innate Flaw - Otherworldly: Fey monsters suffer a penalty die on Commerce rolls. The mortal preoccupation with money and transactions is something they understand intellectually but struggle to engage with naturally.

Attribute Flaw - Physical: Physical attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Nature Bond:** Grants a free specialty in Survival reflecting their deep and instinctive connection to natural environments and living things.
- **Wellspring:** A dotted merit. During combat, you may gain 1 additional mana during your Upkeep Phase. You can do this a number of times per combat equal to your dots in this merit.

Heritage Magic: Fey Magic

Fey Magic works the way a cartoon character pulls a mallet out of nowhere: the Fey imagines a thing hard enough and it is simply there. It is rarely deadly, because most Fey do not enjoy imagining harm. Good hearted Fey tend to be wonderful healers, since nothing is easier for them than picturing a friend feeling better.

Primary: Wisdom + Expression + Fey Magic

Secondary: Charisma + Attunement + Fey Magic

Extra mana: Attack or damage. 1 die per mana, up to your Fey Magic dots or Max Mana Per Turn, whichever comes first.

Fey from the Dreeming, where kind and wondrous beliefs take shape, tend to use their magic for protection, healing, and fun. Fey from the Seeming, where fears and dark tales are made real, tend to aim theirs at harm, fear, and discomfort. Healing spells use the healing tiers described in the Healing section at the start of this chapter.

Rank 1 Core (choose one)

A. Pocket Pull
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, a small ordinary object you imagine stays in your hand: a cup, a rope, a frying pan. It vanishes when the attunement ends.

B. Imagined Comfort
Mana Cost: 1 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat
Range: Self or one ally in an adjacent zone
Dice Pool: Wisdom + Expression + Fey Magic
Defense: None
Effect: Basic healing.

Rank 2 Terrestrial (choose one)

A. Cartoon Mallet
Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Wisdom + Expression + Fey Magic
Defense: Target's choice of defense
Effect: An imagined comic weapon strikes. On a hit the target also suffers -1 die on their next roll.

B. Make-Believe Bandage
Mana Cost: 2 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat | **Range:** One ally in sight
Dice Pool: Wisdom + Expression + Fey Magic
Defense: None
Effect: Basic healing. It also removes the Bleeding condition.

Rank 3 Aerial (choose one)

A. Imagined Tool

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, any non-magical tool or object up to your own size that you imagine exists.

B. Feel Better

Mana Cost: 3 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat
Range: Self or one ally in sight
Dice Pool: Wisdom + Expression + Fey Magic
Defense: None

Effect: Advanced healing.

Rank 4 Lunar (choose one)

A. Anvil Drop

Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Wisdom + Expression + Fey Magic
Defense: Target's choice of defense

Effect: A heavy object falls on the target. On a hit they are also knocked prone.

B. Daydream Shield

Mana Cost: 4 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self or one ally in sight
Dice Pool: Charisma + Attunement + Fey Magic
Defense: None

Effect: An imagined wall, pillow, or umbrella appears. Roll your dice pool. Each success reduces the attacker's successes by 1.

Rank 5 Stellar (choose one)

A. Toon Logic

Mana Cost: 5 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** One ally in sight | **Dice Pool:** None
Defense: None

Effect: Once per scene, an ally who would be hit is somehow in an adjacent zone instead. The attack misses.

B. Heart's Wish

Mana Cost: 5 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat
Range: Self or one ally in sight
Dice Pool: Wisdom + Expression + Fey Magic
Defense: None

Effect: Expert healing.

Rank 6 Galactic (choose one)

A. Imagined Companion

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Conjuration, Persistent
Use: Combat | **Range:** An adjacent zone
Dice Pool: Charisma + Attunement + Fey Magic
Defense: Target's choice of defense against its attacks

Effect: Imagine a creature into being as a conjuration. During each Upkeep Phase it may move one zone, or attack one enemy in a zone adjacent to it using your dice pool.

B. Mend the Lost

Mana Cost: 6 | **Speed:** Downtime | **Type:** Healing
Use: Outside combat only | **Range:** Touch
Dice Pool: Wisdom + Expression + Fey Magic
Defense: None

Effect: Master healing. Over several turns of incantation, regrow a lost limb, head not included.

Rank 7 Cosmic (choose one)

A. Dream Made Real

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat
Range: All adjacent zones | **Dice Pool:** None
Defense: None

Effect: While maintained, any non-magical object or terrain you can imagine, up to the size of a house, exists within range. It cannot be a creature, a magic item, or anything that acts on its own. Everything you made vanishes when the spell ends.

B. Wake Them Up

Mana Cost: 7 | **Speed:** Downtime | **Type:** Healing
Use: Outside combat only | **Range:** Touch
Dice Pool: Wisdom + Expression + Fey Magic
Defense: None

Effect: Over one scene, resurrect someone whose body still has mana left in its countdown, following the rules in the Resurrection chapter.

Fishfolk

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

The Fishfolk are among the most important peoples in Terrana, and most of Terrana does not know it. For most of recorded history they have done work of great consequence without recognition, and they appear content with that.

They favor the cold, deep northern and southern reaches of the Ringus Sea. Many visit or live in Monsera. They speak and listen like anyone else, but their faces do not show subtle emotional shifts. Mild amusement and mild irritation can look identical. Strong emotions such as delight or grief are obvious. The middle range takes patience to read.

On average they are more naturally gifted with magic than the Merfolk, a point the two heritages still debate. The clearest example is the Tidewardens, the Fishfolk mages who maintain the seal over the Void Opening at the bottom of the Ringus Sea. They are not priests, politicians, or a formal institution. They are sea mages who inherited the duty and carry it steadily.

Until recently, most of the world did not know the seal existed. People knew only that something enormous periodically rose from the Ringus Sea and attacked whatever was nearest, usually Monster Island before it became Monsera. Few connected those attacks to the Void Opening or to the Fishfolk holding it shut.

The seal slows the Opening's growth and reduces how often and how badly things emerge. It is a pressure valve, not a cure. When pressure exceeds the seal, a breach occurs. The Fishfolk deal with the smaller Voidlings themselves. The Kaiju require the Hero Rangers Corps. This division of labor existed informally before the Corps was founded.

Fishfolk live about two hundred years and tend to spend that time on understanding rather than accumulation. The Tidewardens regard the Void neither with fear nor with dismissal, but with the careful attention of people who have studied a dangerous thing for a long time.

They intermarry with the Merfolk fairly often. The two heritages are clear about their differences and have never let those differences become distance.

Fishfolk - Mechanical Block

Average Lifespan: 200 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Fortitude:** For a character whose physical resilience and deep water endurance define them.
- **Intelligence:** For a character whose sharp analytical mind and heightened cognitive capacity define them.

Innate Flaw - Fisheye: Fishfolk facial features make visual expression extremely difficult for others to read. Fishfolk suffer a 1 die penalty on all Expression rolls.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Water Sense:** Grants a free specialty in Magic called Water Sense, providing a bonus die on Water Magic rolls reflecting the Fishfolk's natural attunement to aquatic mana.
- **Deep Dweller:** Grants a free specialty in Endurance called Deep Dweller, providing a bonus die on Endurance rolls involving pressure, depth, sustained physical stress, and harsh environmental conditions.

Heritage Magic: Tidewarden

The magic of the Tidewardens is the magic every Fishfolk carries in some measure: pressure, depth, and the patient work of keeping things from the Void where they belong. It senses, binds, seals, and when it must, crushes.

Primary: Intelligence + Attunement + Tidewarden

Secondary: Fortitude + Endurance + Tidewarden

Extra mana: Attack or damage. 1 die per mana, up to your Tidewarden dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Deep Senses

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, add your Heritage dots to rolls to detect Void-touched creatures and Void energy within a number of zones equal to your Tidewarden dots.

B. Pressure Born

Mana Cost: 1 | **Speed:** Reaction | **Type:** Defense
Use: Combat and outside combat | **Range:** Self
Dice Pool: Fortitude + Endurance + Tidewarden
Defense: None

Effect: When resisting crushing force, depth, or pressure, roll this dice pool instead of your normal roll.

Rank 2 Terrestrial (choose one)

A. Pressure Grip

Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: Fortitude + Endurance

Effect: The target resists with Fortitude + Endurance. If you beat them, they suffer -2 dice on physical rolls on their next turn.

B. Tide Mark

Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat
Range: One creature in sight | **Dice Pool:** None
Defense: None

Effect: While attuned, you know where the marked creature is.

Rank 3 Aerial (choose one)

A. Void Ward

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self or one ally in an adjacent zone
Dice Pool: None | **Defense:** None

Effect: While attuned, the target adds your Heritage dots to their BDT against Voidlings and Void entities.

B. Undertow

Mana Cost: 3 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: Strength + Athletics

Effect: The target resists with Strength + Athletics. If you beat them, they are pulled one zone toward you.

Rank 4 Lunar (choose one)

A. Seal Glyph

Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One Voidling or conjuration in sight
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: Willpower, or a conjuration's maker's dice pool

Effect: The target resists with Willpower, or a conjuration with its maker's dice pool. If you beat it, it cannot act until the end of its next turn.

B. Crushing Depth

Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: Fortitude + Endurance

Effect: Water pressure strikes the target. They defend with Fortitude + Endurance instead of Dodge, and Armor does not apply.

Rank 5 Stellar (choose one)

A. Containment Ring

Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat | **Range:** One zone in sight
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: Strength + Athletics

Effect: Roll when cast. While maintained, nothing can enter or leave the zone without beating your successes with Strength + Athletics.

B. Pressure Shield

Mana Cost: 5 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self or one ally in sight
Dice Pool: Fortitude + Endurance + Tidewarden
Defense: None

Effect: When the target is attacked, roll your dice pool. Each success reduces the attacker's successes by 1.

Rank 6 Galactic (choose one)

A. Banish

Mana Cost: 6 | **Speed:** Instant | **Type:** Utility
Use: Combat
Range: One conjuration, Voidling, or Void entity in sight
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: Willpower, or a conjuration's maker's dice pool

Effect: The target resists with Willpower, or a conjuration with its maker's dice pool. If you beat it and its rank is no higher than your Heritage dots, it is driven out of the world. A banished conjuration ends.

B. Abyssal Weight

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** Up to 3 connected zones in sight
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: None

Effect: While maintained, enemies in those zones suffer -2 dice, and moving through them costs double AP.

Rank 7 Cosmic (choose one)

A. Seal the Opening

Mana Cost: 7 | **Speed:** Downtime | **Type:** Utility
Use: Outside combat only
Range: One Void rift, portal, or opening
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: None

Effect: Over a full scene of ritual work, close the opening. The great Void Opening of the Ringus Sea can only be slowed, never sealed, by one warden alone.

B. Warden of the Deep

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** All Void entities in sight
Dice Pool: Intelligence + Attunement + Tidewarden
Defense: None

Effect: While maintained, each Void entity in sight gains the Rooted condition and takes damage equal to your Heritage dots during each Upkeep Phase.

Incorporeal Undead

Monster Faction

Ghosts and spirits: souls that stayed in the world after their bodies were lost. Sustained by mana, bound to an anchor, and able to touch the world only through Manifestation. Not available at character creation.

From Liris Kant's entry on the monster peoples

Incorporeal Undead are what remains when a soul stays after its body is gone. Like the Corporeal Undead they are sustained by mana, but they have no body to hold it.

Every one I have met was tied to something: a house, a ring, a grandchild. They call it their anchor. Away from it they thin out. I watched one follow a friend two streets from her own doorstep, then turn back, barely visible.

Nobody is born a ghost. Each of them died first. Some will tell you how it happened and some will not.

Speaking with them takes patience. The newly dead can barely make themselves heard. The older ones can move objects, borrow bodies, and in a few cases build something close to a body of their own. Those are rare, and they do not like being studied.

Incorporeal Undead - Mechanical Block

Average Lifespan: Immortal, as long as their mana and anchor last.

Innate Attribute: Keeps the Innate Attribute of the heritage the character had in life.

Innate Flaw - Insubstantial: Incorporeal Undead cannot touch, hold, or carry anything physical, and nothing physical can touch them, except through Manifestation spells. They pass through ordinary walls, doors, and objects. They are bound to an anchor (see Anchor).

Attribute Flaw: Keep the Attribute Flaw of your former heritage.

Becoming Incorporeal: Incorporeal Undead cannot be chosen at character creation. A character can only become one during play, with Storyteller approval, in one of three ways.

Unfinished Business: The character dies without choosing to die, and their body is cremated or destroyed before they can be resurrected. If something holds them that they could not let go of, the soul stays behind.

Soul Binding: A high rank Shade Magic user, such as a necromancer or lich, tears the soul from a dying or dead body and binds it to an anchor. The ghost begins under that caster's control, like imprinted undead.

Failed Resurrection: A resurrection fails after the soul has partly returned. It can no longer enter the body, and it does not leave.

What Carries Over: The character keeps their Attributes, Abilities, Merits, Magical Knowledges, and the Innate Attribute of their former heritage. They gain 1 free dot in Manifestation and choose a Heritage Merit below. Their former Heritage magic and any Combat Styles that need a body go dormant. They can be used only while Full Manifestation, Reclaim Flesh, or a possession is active. Casting schools still work, since a spell is shaped mana and so is a ghost.

Anchor: Every Incorporeal Undead is bound to an anchor: a place, an object, or a person. For each scene spent outside the immediate vicinity of the anchor, such as the house it sits in or the room its person is in, the character's maximum mana pool drops by 1. The lost maximum returns after a full scene spent back at the anchor. If the maximum reaches 0, the character fades and cannot act until they return to the anchor. If the anchor is destroyed, they have one session to bind themselves to a new anchor of similar importance, or they fade permanently.

Damage: Ordinary physical attacks pass through Incorporeal Undead. Magic, Battle Aura, and enchanted weapons hit them normally. A Bright Magic hit is treated as meeting the next-higher damage threshold. While Full Manifestation or Reclaim Flesh is active, physical attacks harm them as well.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Unseen:** Grants a free specialty in Stealth called Unseen, providing a bonus die to rolls to stay unnoticed.
- **Grave Voice:** Grants a free specialty in Insight called Grave Voice, providing a bonus die to read the intentions of the living and the dead.

Heritage Magic: Manifestation

A ghost begins with almost no hold on the world. Manifestation is how that hold grows: first being felt, then seen, then touching things, then borrowing bodies, and at its height building a body of its own for a while.

Primary: Composure + Attunement + Manifestation

Secondary: Charisma + Presence + Manifestation

Extra mana: Attack or damage. 1 die per mana, up to your Manifestation dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Cold Spot
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat
Range: All adjacent zones
Dice Pool: Composure + Attunement + Manifestation
Defense: None
Effect: While attuned, the air in all adjacent zones turns cold and lights there flicker. Living creatures in range feel that something is present.

B. Whisper
Mana Cost: 1 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One living creature in sight
Dice Pool: Charisma + Presence + Manifestation
Defense: None
Effect: The target hears up to one sentence from you. No one else hears it.

Rank 2 Terrestrial (choose one)

A. Nudge
Mana Cost: 2 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One small object in an adjacent zone
Dice Pool: Composure + Attunement + Manifestation
Defense: None
Effect: Move one object weighing a few pounds or less up to one zone, such as opening an unlocked door, tipping a cup, or sliding a key. An object someone is holding cannot be moved.

B. Glimpse
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Charisma + Presence + Manifestation
Defense: None
Effect: While attuned, you are visible as a faint figure of your living self. People who knew you in life can recognize you.

Rank 3 Aerial (choose one)

A. Poltergeist Throw
Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Composure + Attunement + Manifestation
Defense: Target's choice of defense
Effect: Hurl a small loose object from an adjacent zone at the target. Damage is kinetic.

B. Grave Touch
Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One living target in an adjacent zone
Dice Pool: Composure + Attunement + Manifestation
Defense: Fortitude + Endurance
Effect: Your hand passes into the target. They defend with Fortitude + Endurance instead of Dodge. On a hit they take damage and suffer -2 dice on physical rolls on their next turn.

Rank 4 Lunar (choose one)

A. Inhabit Object
Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | **Type:** Conjuration, Persistent
Use: Combat
Range: One object up to the size of a person in an adjacent zone
Dice Pool: Composure + Attunement + Manifestation
Defense: Target's choice of defense against its attacks
Effect: Your presence fills the object, such as a doll, a suit of armor, or a tool, and it becomes a conjuration. During each Upkeep Phase it may move one zone, or attack one enemy in a zone adjacent to it using your dice pool. You perceive through it.

B. Solid Hands
Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, your hands are solid enough to hold, carry, and use objects, tools, and weapons. The rest of you stays insubstantial.

Rank 5 Stellar (choose one)

A. Possession
Mana Cost: 5, lasts half the mana spent in turns, rounded up; pay 4 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | **Type:** Debuff, Countdown
Use: Combat and outside combat
Range: One living creature in an adjacent zone
Dice Pool: Charisma + Presence + Manifestation
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, you enter their body and control it. They stay aware but cannot act. You use their physical Attributes and your own mental and social traits. It ends when the countdown runs out or the body takes damage, whichever comes first, and you reappear in a zone adjacent to them.

B. Full Manifestation

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, you are fully solid and visible as your living self, though plainly a ghost. Physical attacks can harm you, and your dormant Heritage magic and Combat Styles can be used.

Rank 6 Galactic (choose one)

A. Haunting

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Attack, Persistent
Use: Combat | **Range:** Up to 3 connected zones in sight
Dice Pool: Composure + Attunement + Manifestation
Defense: Target's choice of defense

Effect: While maintained, loose objects in those zones fly. During each Upkeep Phase, roll your dice pool once against every enemy in those zones; each defends separately. Damage is kinetic.

B. Drain the Living

Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One living target in an adjacent zone
Dice Pool: Composure + Attunement + Manifestation
Defense: Fortitude + Endurance

Effect: Your hand passes into the target. They defend with Fortitude + Endurance instead of Dodge. On a hit you regain mana equal to the boxes of damage dealt, and they lose 1 Willpower.

Rank 7 Cosmic (choose one)

A. Reclaim Flesh

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Enhancement, Persistent
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: Once per day, conjure a body of mana in the shape of your living self and possess it. While maintained, you look, feel, and pass as alive. Physical attacks harm you, damage goes on your own Health track, and your dormant Heritage magic and Combat Styles can be used. In combat, pay upkeep each Upkeep Phase as normal. Outside combat, pay 7 mana for each hour in the body, up to a number of hours equal to half your Heritage dots, rounded up. When it ends, the body dissolves.

B. Unbound

Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, your anchor no longer limits you: your maximum mana pool does not drop while you are away from it. You can also pass through magical walls and barriers short of Cosmic rank magic.

Merfolk

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

Merfolk and Fishfolk are often confused in popular literature, and both find this irritating. Both are aquatic heritages. Beyond that they differ considerably.

Merfolk favor the warmer eastern and western reaches of the Ringus Sea. They live in coastal settlements there, in Monsera's water districts, and elsewhere as curiosity takes them. They shift between tail and legs at will, smoothly and easily.

Their appearance spans aquatic life broadly. Some have dolphin coloring, some shark markings, some tentacles in place of fins. Most share a strong presence, though it takes different forms. Some have voices that quiet a room. Others have a striking appearance that people notice before anything else.

They intermarry with Fishfolk fairly often. The distinction between the two heritages has never meant hostility. Children of these marriages carry both lines.

The shift between legs and tail is triggered involuntarily by a heavy, unexpected splash of water. It is not painful, but Merfolk describe it as a reflex and an indignity. They cannot will their legs back. They must dry off or wait, preferably in private. Splashing a Merfolk is a social error that often ends a friendship before it starts.

Merfolk - Mechanical Block

Average Lifespan: 100 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Charisma:** For a character whose siren-like presence and social magnetism define them.
- **Perception:** For a character whose sharp aquatic senses define them.

Innate Flaw - Tidal Pull: When a Merfolk is splashed with a significant amount of water they must roll Composure + Endurance to resist their legs reverting to their tail and fins. Failure means they are grounded until they dry off or choose to reenter water fully.

Attribute Flaw - Mental: Mental attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Tide Born:** Grants a free specialty in Athletics called Swimming, providing a bonus die on Athletics rolls made in or under water.
- **Striking Beauty:** Grants a free specialty in either Expression or Performance (player's choice), reflecting the Merfolk's natural magnetism and captivating presence.

Heritage Magic: Siren Song

A Merfolk voice can silence a room. Siren Song, also called Vocal Magic, is that voice carrying mana: it lures, soothes, commands, and at its strongest it can shatter crystal or put a crowd to sleep. A target must be able to hear you to be affected.

Primary: Charisma + Performance + Siren Song

Secondary: Composure + Expression + Siren Song

Extra mana: Attack only. 1 die per mana, up to your Siren Song dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Hush

Mana Cost: 1 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat
Range: All adjacent zones
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Presence
Effect: Everyone in range resists with Composure + Presence. Each one you beat stops speaking until the end of their next turn.

B. Current Rider

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, add your Heritage dots to Athletics rolls made in or under water.

Rank 2 Terrestrial (choose one)

A. Lure

Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, they must move one zone toward you on their next turn.

B. Soothing Song

Mana Cost: 2 | **Speed:** Instant | **Type:** Enhancement
Use: Combat and outside combat | **Range:** Allies in sight
Dice Pool: Composure + Expression + Siren Song
Defense: None
Effect: Each ally ends one fear or panic effect and adds a bonus die to Composure rolls for the rest of the scene.

Rank 3 Aerial (choose one)

A. Enthrall

Mana Cost: 3, lasts half the mana spent in turns, rounded up; pay 2 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | **Type:** Debuff, Countdown
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Insight

Effect: The target resists with Composure + Insight. If you beat them, they cannot attack you. It ends when the countdown runs out or you attack them, whichever comes first.

B. Echo Song

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned and underwater or in darkness, you sense every creature within a number of zones equal to your Siren Song dots.

Rank 4 Lunar (choose one)

A. Siren's Call

Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Insight

Effect: Each enemy in range resists separately with Composure + Insight. Each one you beat must move one zone toward you on their next turn.

B. Wave Voice

Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Endurance

Effect: A sound wave strikes the target. They defend with Composure + Endurance instead of Dodge.

Rank 5 Stellar (choose one)

A. Command Song

Mana Cost: 5 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat
Range: All adjacent zones
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Insight

Effect: Each target in range resists with Composure + Insight. Each one you beat obeys the same command of up to three words on their next turn. The command cannot directly harm them.

B. Lullaby

Mana Cost: 5, lasts half the mana spent in turns, rounded up; pay 4 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | **Type:** Debuff, Countdown
Use: Combat and outside combat
Range: All adjacent zones
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Endurance

Effect: Each target in range resists with Composure + Endurance. Each one you beat falls asleep. The sleep ends when the countdown runs out or the sleeper takes damage, whichever comes first.

Rank 6 Galactic (choose one)

A. Chorus of the Deep

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Enhancement, Persistent
Use: Combat | **Range:** Allies in sight
Dice Pool: Composure + Expression + Siren Song
Defense: None

Effect: While maintained, allies add a bonus die to all rolls. You cannot attack while singing.

B. Shattering Note

Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Endurance

Effect: Wave Voice whose hit is treated as meeting the next-higher damage threshold. Glass, crystal, and crystal network devices in the target's zone break.

Rank 7 Cosmic (choose one)

A. Song of the Ringus Sea

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** All enemies who can hear you
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Insight

Effect: During each Upkeep Phase while maintained, each enemy resists with Composure + Insight. Each one you beat can only move toward you that turn.

B. The Drowning Voice

Mana Cost: 7, lasts half the mana spent in turns, rounded up; pay 6 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | **Type:** Attack, Countdown
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Performance + Siren Song
Defense: Composure + Endurance

Effect: The target resists with Composure + Endurance. If you beat them, they believe they are drowning and take damage equal to your Heritage dots during each Upkeep Phase. It ends when the countdown runs out or when they beat your casting successes with Composure + Endurance on their turn, whichever comes first.

Migurd

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

I met Roxy Migurdia once, as a student at Monsera University, where she was a guest of the faculty. She was small and blue haired and said little until the formal lecture ended. She is the reason most of the world knows the Migurd exist, and she belongs in any honest account of her people.

The Migurd live in the desert of the Demon Continent, in homes built into the shells of giant stone turtles. Over generations the shells have become architecture.

They are about half a foot shorter than Dwarves and taller than Halflings. Every Migurd has blue hair, from pale ice blue to deep navy, and the exact shade helps tell individuals apart. They stop aging in appearance in their twenties and resume around their hundred and fiftieth year, living about two hundred years in total. A Migurd who looks twenty five may be a century and a half old.

Migurd speak to one another by telepathy, with no mana and no effort. Much of what other peoples handle through formal governance, such as settling disputes, sharing information, and building consensus, happens directly and with little room for misunderstanding. They still have a chief and a tribal structure.

Reaching other heritages telepathically costs mana and effort and is less precise. As a result, many Migurd find spoken language awkward. Words lose and distort meaning in ways telepathy does not. Verbal persuasion in particular feels unnatural to them.

Roxy was born without telepathy. Her community was not unkind, but it did not know what to do with her, and she left. When I met her, she carried that history lightly. That same evening she introduced me to Sylphiette, her former student and one of the finest mages of her generation.

The Migurd once lived near the Superd on the Demon Continent and were among the first to suffer the aftermath of the Laplace War. That fear lasted a long time. With the Superd now in Biheiril and the truth of the war better understood, it has faded. The Migurd I spoke with treat it as history.

Migurd - Mechanical Block

Average Lifespan: 200 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Perception:** For a character whose sharp senses and attentiveness to their surroundings define them.
- **Wisdom:** For a character whose deep intuition and calm tribal judgment define them.

Innate Flaw - Lost in Translation: Migurd are a people built for direct mental communication. The art of persuading others through carefully chosen words feels unnatural and exhausting to them. Migurd suffer a 1 die penalty on all Persuasion rolls.

Attribute Flaw - Physical: Physical attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Special Note: Migurd communicate telepathically with other Migurd at no cost. Reaching anyone else uses their Heritage magic, Mindvoice.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Telepathic Read:** Grants a free specialty in Insight called Telepathic Read, providing a bonus die on Insight rolls to read surface intentions and emotional states of those nearby.
- **Demon Continent Instinct:** Grants a free specialty in Awareness called Danger Sense, providing a bonus die on Awareness rolls to detect threats, ambushes, and hostile intentions before they manifest.

Heritage Magic: Mindvoice

Migurd speak to one another mind to mind without effort. Mindvoice is that telepathy pushed past their own people: linking allies, reading intent, and, when it must, striking directly at another mind.

Primary: Perception + Awareness + Mindvoice

Secondary: Wisdom + Insight + Mindvoice

Extra mana: Attack only. 1 die per mana, up to your Mindvoice dots or Max Mana Per Turn, whichever comes first.

Telepathy between Migurd is part of the heritage, costs nothing, and is not a spell. Mindvoice is used to reach anyone else.

Rank 1 Core (choose one)

A. Whisper Link
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat
Range: One willing target in sight | **Dice Pool:** None
Defense: None
Effect: While attuned, you and the target speak mind to mind.

B. Surface Read
Mana Cost: 1 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Wisdom + Insight + Mindvoice
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, you learn their current emotion.

Rank 2 Terrestrial (choose one)

A. Party Link
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat
Range: Willing allies up to your Heritage dots
Dice Pool: None | **Defense:** None
Effect: While attuned, you and the linked allies speak mind to mind at no AP cost.

B. Long Whisper
Mana Cost: 2 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One target you know in the same settlement
Dice Pool: Wisdom + Insight + Mindvoice | **Defense:** None
Effect: Send a message of a few sentences and hear their reply.

Rank 3 Aerial (choose one)

A. Mind Shout
Mana Cost: 3 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Perception + Awareness + Mindvoice
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, they lose their next Reaction and lose 1 AP on their next turn.

B. Shared Sight
Mana Cost: 3 | **Speed:** Instant | **Type:** Enhancement
Use: Combat and outside combat
Range: One ally linked with you
Dice Pool: Wisdom + Insight + Mindvoice | **Defense:** None
Effect: The ally uses your Perception dots in place of their own for one roll.

Rank 4 Lunar (choose one)

A. Thought Shield
Mana Cost: 4 | **Speed:** Reaction | **Type:** Defense
Use: Combat and outside combat
Range: Self or one ally linked with you
Dice Pool: Wisdom + Insight + Mindvoice | **Defense:** None
Effect: When the target resists mental control or fear, they roll this dice pool instead of their own.

B. Coordinated Strike
Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | **Type:** Enhancement, Persistent
Use: Combat | **Range:** Allies linked with you
Dice Pool: None | **Defense:** None
Effect: While maintained, linked allies who attack the same target in the same turn each add a bonus die.

Rank 5 Stellar (choose one)

A. Mind Spike
Mana Cost: 5 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Perception + Awareness + Mindvoice
Defense: Composure + Insight
Effect: Strike the target's mind. They defend with Composure + Insight. Damage is dealt to their Willpower.

B. Deep Read
Mana Cost: 5 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Wisdom + Insight + Mindvoice
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, you learn one memory or secret of your choice.

Rank 6 Galactic (choose one)

A. Hive Link
Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat | **Range:** Every willing ally in sight
Dice Pool: None | **Defense:** None
Effect: While attuned, if one linked ally can see an enemy, all of them can.

B. Mind Lock
Mana Cost: 6 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Perception + Awareness + Mindvoice
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, they cannot act on their next turn.

Rank 7 Cosmic (choose one)

A. Great Communion

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat
Range: A settlement or army of willing minds
Dice Pool: None | **Defense:** None
Effect: While maintained, everyone linked shares what any one of them sees and hears.

B. Overwhelm

Mana Cost: 7 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** All enemies in sight
Dice Pool: Perception + Awareness + Mindvoice
Defense: Composure + Insight
Effect: Mind Spike against every enemy in sight. Roll once; each defends separately.

Shifters

Monster Faction

Changelings, Werewolves, Were-variants, and similar. Shifters are defined by transformation.

From Liris Kant's entry on the monster peoples

The Shifters include changelings and were-types. A werewolf and a changeling share little beyond the ability to change form. What they do share is a less fixed relationship with their own bodies, and many are flexible in outlook as well.

Shifters - Mechanical Block

Average Lifespan: 100 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Charisma:** For a character whose fluid identity and adaptive social presence define them.
- **Dexterity:** For a character whose physical adaptability and transformative agility define them.

Innate Flaw - Unstable Form: When a Shifter takes Aggravated damage they must roll Composure or partially shift involuntarily. This loss of control over their own body is disorienting and may interfere with whatever they were attempting to do at the time.

Attribute Flaw - Mental: Mental attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Faceswap:** Grants a free specialty in Subterfuge called Faceswap, providing a bonus die on Subterfuge rolls made to pass as someone else.
- **Adaptive:** Grants a free specialty in either Athletics or Endurance reflecting their body's natural capacity to physically adapt to the demands placed on it.

Heritage Magic: Transformation

Shifters never fully settle on one shape. Transformation is the inherited control of that fluid body, from changing an eye color to taking on a borrowed face, a beast form, or something far larger. Changelings and were-types each express it differently.

Primary: Charisma + Subterfuge + Transformation

Secondary: Fortitude + Athletics + Transformation

Extra mana: Attack or damage. 1 die per mana, up to your Transformation dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Minor Change
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, your hair, eyes, skin, voice, or small features look however you choose.

B. Shift Limb
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, one limb becomes a claw, tentacle, or tool shape. As a weapon its rating equals your Heritage dots.

Rank 2 Terrestrial (choose one)

A. Borrowed Shape
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Charisma + Subterfuge + Transformation
Defense: Perception + Insight
Effect: Roll when you attune. You take the appearance of a specific person of similar size you have seen. Seeing through it requires beating your successes with Perception + Insight.

B. Fluid Body
Mana Cost: 2 | **Speed:** Reaction | **Type:** Defense
Use: Combat and outside combat | **Range:** Self
Dice Pool: Fortitude + Athletics + Transformation
Defense: None
Effect: When grappled or trapped, escape with this dice pool. You fit through any gap your head fits through.

Rank 3 Aerial (choose one)

A. Beast Shape
Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, you are an animal between the size of a cat and a horse. You gain its movement, such as swimming or climbing, and keep your own mind.

B. Hardened Form

Mana Cost: 3 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: Fortitude + Athletics + Transformation
Defense: None

Effect: When attacked, roll your dice pool. Each success reduces the attacker's successes by 1.

Rank 4 Lunar (choose one)

A. War Form

Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, add 2 to your choice of Strength or Dexterity for all rolls, chosen when you attune. Your natural weapons have a rating equal to your Heritage dots.

B. Perfect Mimicry

Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Charisma + Subterfuge + Transformation
Defense: Perception + Insight, at -2 dice for people who know the original

Effect: Borrowed Shape that also copies voice and mannerisms. Seeing through it requires beating your successes with Perception + Insight, and people who know the original suffer -2 dice to do so.

Rank 5 Stellar (choose one)

A. Size Shift

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, grow large enough that your melee attacks reach adjacent zones, or shrink to Tiny size.

B. Split Self

Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Conjuration, Persistent
Use: Combat | **Range:** An adjacent zone
Dice Pool: Fortitude + Athletics + Transformation
Defense: Target's choice of defense against its attacks

Effect: A second body forms as a conjuration. During each Upkeep Phase it may move one zone or attack using your dice pool. Damage to it goes on your own Health track.

Rank 6 Galactic (choose one)

A. Perfect Copy

Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Charisma + Subterfuge + Transformation
Defense: Perception + Insight, at -2 dice for people who know the original

Effect: Perfect Mimicry that also copies the target's physical Attributes. Abilities and magic are not copied.

B. Regenerative Shift

Mana Cost: 6 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat | **Range:** Self
Dice Pool: Fortitude + Athletics + Transformation
Defense: None

Effect: Change your form and receive Expert healing.

Rank 7 Cosmic (choose one)

A. Thousand Faces

Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, once per turn change into any form you know at no AP cost.

B. Living Myth

Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: Target's choice of defense against your attacks

Effect: While attuned, you take a monstrous form spanning up to 3 connected zones. Your attacks hit every target in one of those zones; each defends separately.

Skyfolk

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

The Skyfolk live on the Heaven Continent, three thousand meters above sea level. Geography and custom have kept them largely separate from the rest of Terrana for all of recorded history. I have met four.

All Skyfolk have wings, but their appearance otherwise varies as widely as Hyumans and birds combined. Skyfolk from different regions of the Heaven Continent can look nothing alike. They live about four hundred years.

Skyfolk do not experience humor. This is not reserve or custom. It is a difference in how they process social information, and they treat it as a fact about themselves, the way someone might treat being unable to see certain colors. Two of the four I met had tried to study humor methodically. Neither succeeded, and both found the attempt interesting.

They are rare enough in the lower world that one walking through Monsera or Breakwater stops traffic. They are aware of this and indifferent to it. They are detached, though not cold, and they tend to view events against a very long timeline.

Courtship resembles that of birds. A male must build a nest or dwelling suitable for raising young before he is considered as a partner, and his plumage weighs heavily in how he is received. Once a year the Heaven Continent holds sky dancing, a competitive aerial display performed at high altitude and judged by females. I have not been invited, and I have decided it would be impolite to ask.

Skyfolk mate for life, and with a four hundred year lifespan a partnership can last three centuries. After a partner dies, most never seek another. The Skyfolk I asked said another partnership would not be impossible, only beside the point.

A small number of immortal Skyfolk exist, described across many cultures as angelic in appearance. I have not met one. Skyfolk asked about them give answers that are technically responsive and contain no information.

Skyfolk - Mechanical Block

Average Lifespan: 400 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Perception:** For a character whose legendary eyesight and atmospheric awareness define them.
- **Dexterity:** For a character whose aerial grace and flight agility define them.

Innate Flaw - Above It All: The Skyfolk way of life is so distinct from every other heritage that Skyfolk struggle to read the motivations, humor, and emotional states of those they encounter outside their own people. Skyfolk suffer a 1 die penalty on Insight rolls when dealing with non-Skyfolk heritages.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Flight: Skyfolk fly naturally at double their normal movement without magic. Record a free specialty in Athletics called Flight, providing a bonus die on Athletics rolls made while flying.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Far Sight:** Grants a free specialty in Awareness called Far Sight, providing a bonus die on Awareness rolls involving long distance observation, spotting hidden things, or reading atmospheric and weather conditions.
- **Wind Born:** Grants a free specialty in Endurance called Wind Born, providing a bonus die on Endurance rolls made while airborne or against environmental hazards related to altitude, wind, and weather.

Heritage Magic: Heaven's Wing

Skyfolk are born to altitude. Their wings carry them without magic. Heaven's Wing is the inherited command of the high air on top of that: speed, eyes that reach the horizon, and the thin, cold sky they can drag down to the ground when they need to.

Primary: Dexterity + Athletics + Heaven's Wing

Secondary: Perception + Awareness + Heaven's Wing

Extra mana: Attack only. 1 die per mana, up to your Heaven's Wing dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Wing Burst

Mana Cost: 1 | **Speed:** Instant | **Type:** Movement
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While flying, move two extra zones this turn at no AP cost.

B. Hawk's Eye

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, you ignore range penalties on Awareness rolls and add your Heritage dots to sight-based Awareness rolls.

Rank 2 Terrestrial (choose one)

A. Stoop

Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Athletics + Heaven's Wing
Defense: Target's choice of defense

Effect: A diving attack after descending at least one zone this turn. Add your Heritage dots to the attack roll.

B. Read the Sky

Mana Cost: 2 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: Everything in sight
Dice Pool: Perception + Awareness + Heaven's Wing
Defense: None

Effect: Learn the position of every flying creature in sight. Allies add a bonus die to ranged attacks on their next turn.

Rank 3 Aerial (choose one)

A. Thin Air

Mana Cost: 3, upkeep 2 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** One zone in sight
Dice Pool: Dexterity + Athletics + Heaven's Wing
Defense: Fortitude + Endurance

Effect: Roll when cast. During each Upkeep Phase, enemies in the zone must beat your successes with Fortitude + Endurance or suffer -2 dice on physical rolls that turn.

B. Hover Shot

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned and airborne, add half your Heritage dots, rounded up, to ranged attack rolls.

Rank 4 Lunar (choose one)

A. Wing Shield

Mana Cost: 4 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self or one ally in an adjacent zone
Dice Pool: Dexterity + Athletics + Heaven's Wing
Defense: None

Effect: When the target is attacked, wrap them in your wings. Roll your dice pool. Each success reduces the attacker's successes by 1.

B. Carry Aloft

Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Movement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, you can carry one ally while flying at no extra AP cost.

Rank 5 Stellar (choose one)

A. Gale Wings

Mana Cost: 5 | **Speed:** Instant | **Type:** Debuff
Use: Combat
Range: Cone: all zones directly and diagonally forward of you
Dice Pool: Dexterity + Athletics + Heaven's Wing
Defense: Strength + Athletics

Effect: Each target resists with Strength + Athletics. Each one you beat is pushed one zone and knocked prone.

B. Long Horizon

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat
Range: Self and allies who can see you | **Dice Pool:** None
Defense: None

Effect: While attuned, you and allies who can see you cannot be surprised.

Rank 6 Galactic (choose one)

A. Heaven Dive

Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Any target in sight
Dice Pool: Dexterity + Athletics + Heaven's Wing
Defense: Target's choice of defense

Effect: You must begin the turn at high altitude. A hit is treated as meeting the next-higher damage threshold.

B. Cloud Veil

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Defense, Persistent
Use: Combat | **Range:** Up to 3 connected zones in sight
Dice Pool: Perception + Awareness + Heaven's Wing
Defense: None

Effect: Clouds cover the zones. While maintained, you are hidden from anyone below them, and ranged attacks into those zones suffer -3 dice.

Rank 7 Cosmic (choose one)

A. Wings of Heaven

Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Movement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: While attuned, move any number of zones each turn at no AP cost. Attacks you make after moving add your Heritage dots to the damage roll.

B. Eye of the Sky

Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Perception + Awareness + Heaven's Wing
Defense: Dexterity + Stealth

Effect: Roll when you attune. While attuned you perceive every zone of the battlefield, and a hidden or invisible creature stays concealed from you only if it beats your successes with Dexterity + Stealth.

Slime

Monster Faction

Slimes. Living mana with a soul. Immortal.

From Liris Kant's entry on the monster peoples

Most slimes are not people. The ones that fill sewers and dungeon floors are mana with a body and nothing behind it. A few are different. They think, speak, and remember, and they are among the rarest peoples in Terrana. By the university's best count there are fewer than a thousand sentient slimes alive today.

Monsera University has studied them for most of a century, with the help of slimes who volunteered. Our conclusion, still debated, is that a sentient slime is a soul made physical by mana. Every slime may carry the start of one, but most never wake. The comparison my colleagues use is reproductive: a father produces countless sperm, and almost none become a person. Awakening is rare in the same way.

A newly awakened slime is a round, glossy blob. With time it learns to hold other shapes, first rounded and shining, later close enough to fool anyone. Slimes have no typical gender. They take one if they like, or none.

Slimes have produced some of Monsera's most notable philosophers, perhaps because a being with no fixed shape has had to think carefully about what stays the same.

Slime - Mechanical Block

Average Lifespan: Immortal (Mana Bound).

Mana Bound: A slime that dies without choosing to is not gone while its body still holds mana. Its mana counts down as normal (Chapter 11), but it does not need Resurrection. Healing works on it the same as on a living character, and it heals naturally as if resting. When all of its damage is removed, it wakes with whatever mana it has left. If its mana reaches 0 first, it dies for good. A slime that chose Blaze of Glory dies like anyone else.

Innate Attribute (choose 1, note Innate on sheet):

- **Fortitude:** For a character whose soft, shock-absorbing body defines them.
- **Wisdom:** For a character whose patient, reflective mind defines them.

Innate Flaw - Bound to Mana: When your Mana Pool is empty, you lose any form from Take Shape and return to your blob form until you recover at least 1 mana. In blob form you suffer a 1 die penalty on rolls that need hands.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Elastic:** Grants a free specialty in Acrobatics called Elastic, providing a bonus die on rolls to squeeze through gaps, stretch, or land a fall.
- **Hidden Pocket:** You can store one hand-sized object inside your body. A normal search cannot find it, and drawing it costs no AP.

Heritage Magic: Morph

A slime's body is mana that has learned to hold a shape. Morph is the control of that body, from a simple disguise to extra limbs, wings, and a hide like stone. Every rank of Morph grants a Default Ability, as well as the choice of an A or B spell.

Primary: Dexterity + Martial Arts + Morph

Secondary: Fortitude + Endurance + Morph

Extra mana: Attack or damage. 1 die per mana, up to your Morph dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

Default Ability: Take Shape (Both) You can hold a humanoid or animal form about your own size instead of your blob form. Changing form costs 1 AP in combat. The form is smooth, rounded, and glossy, and anyone can tell you are a slime. Your stats do not change with your form.

A. Pseudopod Lash

Mana Cost: 1 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target within 2 zones
Dice Pool: Dexterity + Martial Arts + Morph | **Defense:** Target's choice of defense

Effect: Stretch an arm into a whip and strike. A hit deals damage normally.

B. Gel Cushion

Mana Cost: 1 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: Cast when you take Bashing damage. Reduce that damage by your Heritage dots.

Rank 2 Terrestrial (choose one)

Default Ability: Mana Transfer (Both) Spend 1 AP to touch a creature in an adjacent zone and give it mana from your pool, up to your Heritage dots per turn.

A. Cling

Mana Cost: 2, attuned (stays committed) | **Speed:** Instant, Extended | **Type:** Movement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, you can move across walls and ceilings at your normal Move, and add your Heritage dots to rolls to keep your grip or stay on your feet.

B. Engulf

Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in an adjacent zone
Dice Pool: Dexterity + Martial Arts + Morph | **Defense:** Strength + Athletics

Effect: Wrap part of your body around the target. If you beat them, they are Grappled until they beat your successes with Strength + Athletics.

Rank 3 Aerial (choose one)

Default Ability: Lifelike Form (Both) Your Take Shape forms can now pass as the real thing if you choose, down to skin, hair, and eyes. You can change form outside combat in an instant.

A. Reform

Mana Cost: 3 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat | **Range:** Self
Dice Pool: Fortitude + Endurance + Morph | **Defense:** None

Effect: Pull your body back together. Each success is Basic healing on yourself only.

B. Tendril Volley

Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Up to three targets within 2 zones
Dice Pool: Dexterity + Martial Arts + Morph | **Defense:** Target's choice of defense

Effect: Lash out with several tendrils. Make one attack roll; each target defends separately.

Rank 4 Lunar (choose one)

Default Ability: Fluid Body (Both) You can squeeze through any gap your fist fits through. Add your Heritage dots to rolls to escape being Grappled or Rooted.

A. Shape Tool

Mana Cost: 4 | **Speed:** Instant, Extended | **Type:** Utility, Persistent
Use: Outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: Form part of your body into a simple tool such as a lockpick, rope, or blade. If you have touched a key or the lock it opens, you can form a working key on your fingertip. Add your Heritage dots to rolls the tool helps with.

B. Hardened Hide

Mana Cost: 4, attuned (stays committed) | **Speed:** Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, gain Armor equal to your Heritage dots. Your Move is reduced by 1.

Rank 5 Stellar (choose one)

Default Ability: Parachute Body (Both) When you fall, you can flatten and spread your body. You take no falling damage, and you can glide up to your Move sideways for each zone you fall.

A. Whip Arms

Mana Cost: 5, attuned (stays committed) | **Speed:** Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, your unarmed attacks reach 1 zone farther, and you add your Heritage dots to their damage.

B. Absorb Spell

Mana Cost: 5 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: Fortitude + Endurance + Morph | **Defense:** None

Effect: Cast when a spell attack hits you. If your roll beats the attacker's successes, you take no damage from it and gain mana equal to its mana cost, up to your Max Mana Per Turn.

Rank 6 Galactic (choose one)

Default Ability: Size Shift (Both) Your Take Shape forms can be one size larger or smaller than your own. Your stats do not change, but a larger form reaches 1 zone farther with unarmed attacks.

A. Extra Limbs

Mana Cost: 6, attuned (stays committed) | **Speed:** Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, you grow two more arms. You can hold two more weapons or shields, and once per turn you can make one extra unarmed or melee attack at no AP cost, with its own attack roll.

B. Slime Wings

Mana Cost: 6, attuned (stays committed) | **Speed:** Instant, Extended | **Type:** Movement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, you grow wings and can fly at your normal Move, following the Flight rules (Chapter 13).

Rank 7 Cosmic (choose one)

Default Ability: Perfect Copy (Both) Your Take Shape can copy a specific person you have touched, including voice and scent. Add your Heritage dots to Subterfuge rolls made to pass as them.

A. Predation

Mana Cost: 7 | **Speed:** Downtime | **Type:** Utility, Persistent
Use: Outside combat | **Range:** One defeated or willing creature in an adjacent zone
Dice Pool: None | **Defense:** None

Effect: Absorb part of the creature and copy one of its natural traits, such as flight, a natural weapon, a breath attack, or a resistance, as the Storyteller approves. You keep it until you copy a different trait. You can hold one copied trait at a time.

B. Endless Body

Mana Cost: 7 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: Once per story, when you would be Incapacitated or killed, you burst apart instead and reform in your zone at the start of your next turn with all Bashing and Lethal damage healed.

Superd

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

One book changed the world's understanding of the Superd. It was written by a well known Hyuman mage and published to an audience that was not ready for it. Its evidence was too thorough to dismiss.

During the Laplace War, the Demon God Laplace persuaded Superd warriors to trade their tail spears for ones he made. Those spears drove them into indiscriminate slaughter. The world blamed the Superd. For centuries few distinguished between a people who chose violence and a people used as a weapon. The Superd paid for that with isolation and fear.

I visited their settlement in the old forests of the Biheiril Kingdom, by introduction through local contacts. It is small and carefully kept. The people were among the most deliberate I have met. Every adult carries a trident spear formed from their own forked tail, which hardens and detaches as they mature. Each spear is unique.

The spear is the center of Superd identity. They hold that it is the vessel of their soul. This is a spiritual belief, not a physical fact. A Superd who loses their spear can still live and fight, but their community regards them with pity, and among the Superd pity is a heavy judgment. A stolen spear will be recovered at any cost.

They are exceptional in combat. Today their reputation is less about danger than luck: many adventurers believe a Superd in the party means things will go well. Every Superd I met was very good at staying alive and keeping others alive, which may explain the belief.

In recent decades, younger Superd have begun to travel. Some work in Biheiril's towns. A few have gone further. Their elders view this with pride and some worry.

The Superd have a chief and govern themselves through formal authority and long standing consensus. Their political structure is simple. They survived something enormous and remained a people.

Superd - Mechanical Block

Average Lifespan: 1000 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Strength:** For a character whose warrior might and physical power define them.
- **Composure:** For a character whose unshakeable steadiness and calm in the face of conflict define them.

Innate Flaw - Spear Sworn: Superd suffer a 1 die penalty on all attack rolls made with anything other than their personal tail spear. This includes unarmed combat, other weapons, and magic used offensively. A Superd who loses their spear will not fight under any circumstances and will willingly accept death rather than raise another weapon. A stolen spear will be recovered at any cost.

Attribute Flaw - Social: Social attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Physical Note: All Superd have pale skin, green hair, and a red gem embedded in their forehead functioning as a third eye. They are born with a forked tail that hardens and detaches as they mature, becoming their personal trident spear.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Third Eye:** Grants a free specialty in Awareness called Third Eye, providing a bonus die on Awareness rolls to detect living beings and sense the flow of mana in the surrounding area.
- **Soul Spear:** Grants a bonus die on all attack rolls made with the character's personal tail spear. The spear itself is indestructible by conventional means and requires Cosmic rank magic to damage.

Heritage Magic: Soulbound

The red gem on a Superd forehead sees life and mana itself, and the tail spear carries the soul of its owner. Soulbound is the magic of both: sight that nothing living can hide from, and a spear that answers like a limb. Spear Sworn still applies, so Soulbound attacks are made with the personal tail spear.

Primary: Strength + Melee + Soulbound

Secondary: Perception + Awareness + Soulbound

Extra mana: Attack or damage. 1 die per mana, up to your Soulbound dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Third Eye Sight

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, you see living beings through walls and darkness within a number of zones equal to your Soulbound dots.

B. Spear Call

Mana Cost: 1 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: Your spear, anywhere in sight | **Dice Pool:** None
Defense: None
Effect: Your spear returns to your hand.

Rank 2 Terrestrial (choose one)

A. Life Read

Mana Cost: 2 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One creature in sight
Dice Pool: Perception + Awareness + Soulbound
Defense: None
Effect: On a success you learn how injured the creature is and whether it intends you harm.

B. Soul Throw

Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Strength + Melee + Soulbound
Defense: Target's choice of defense
Effect: Throw your spear and call it back in the same action.

Rank 3 Aerial (choose one)

A. Nothing Hidden

Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Perception + Awareness + Soulbound
Defense: Dexterity + Stealth
Effect: Roll when you attune. While attuned, hidden or invisible living creatures in sight must beat your successes with Dexterity + Stealth to stay concealed from you.

B. Soul Strike

Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Strength + Melee + Soulbound
Defense: Target's choice of defense
Effect: A spear attack that ignores Armor equal to your Heritage dots.

Rank 4 Lunar (choose one)

A. Read the Blow

Mana Cost: 4 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: Perception + Awareness + Soulbound
Defense: None
Effect: When attacked, you see the blow gather in the mana flow. Roll your dice pool. Each success reduces the attacker's successes by 1.

B. Spear Dance

Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** All adjacent zones
Dice Pool: Strength + Melee + Soulbound
Defense: Target's choice of defense
Effect: Roll once against every enemy in range; each defends separately.

Rank 5 Stellar (choose one)

A. Mana Flow Sight

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, you see spells gathering before they are cast and know their school and target. One ally you warn adds 2 dice to defend against that spell.

B. Unbreaking Grip

Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, your spear cannot be taken from you or knocked from your hands, and your spear attacks add half your Heritage dots, rounded up, to the damage roll.

Rank 6 Galactic (choose one)

A. Eye of the Hunter

Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat
Range: One target in sight | **Dice Pool:** None
Defense: None
Effect: While attuned, the target cannot hide from you within a day's travel, and you add half your Heritage dots, rounded up, to attacks against it.

B. Soul Lance

Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Straight line across the battlefield
Dice Pool: Strength + Melee + Soulbound
Defense: Target's choice of defense
Effect: Hurl your spear in a straight line. Each target defends separately. The spear returns to you.

Rank 7 Cosmic (choose one)

A. All-Seeing Eye

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Outside combat only | **Range:** A city | **Dice Pool:** None
Defense: None
Effect: While maintained, you perceive every living being within a city.

B. Warrior of Old

Mana Cost: 7 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** All adjacent zones
Dice Pool: Strength + Melee + Soulbound
Defense: Target's choice of defense

Effect: Roll once against every enemy in range. Each hit is treated as meeting the next-higher damage threshold.

Tiny

Monster Faction

Fairies, Pixies, and similar. Small enough to fit in a coat pocket and fast enough that you might not notice them until they have already gone through it.

From Liris Kant's entry on the monster peoples

The Tiny peoples, fairies, pixies, and their kin, are the most misrepresented in popular literature, which treats them as whimsical. They vary in temperament like any people. They live in a world not built for their size, and their adaptations, speed, precision, and access to spaces no one else can reach, make them far more capable than most assume. A fairy who fits in a coat pocket can also get into places you would prefer stayed closed.

Tiny - Mechanical Block

Average Lifespan: 400 years.

Innate Attribute (choose 1, note Innate on sheet):

- **Dexterity:** For a character whose speed and nimble precision define them.
- **Charisma:** For a character whose outsized personality and magnetic presence define them.

Innate Flaw - Tiny: Tiny heritage characters suffer a penalty die on Strength based rolls and cannot wield standard sized weapons without significant penalty.

Attribute Flaw - Physical: Physical attributes cannot be your Affinity column. They can only be your Standard or Aversion column.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Hard to Hit:** Each dot in this merit adds a bonus die to Dodge rolls.
- **Tiny Terror:** Grants a free specialty in Stealth, reflecting their ability to hide in spaces no other heritage could fit.

Heritage Magic: Glamour

Fairies and pixies survive a world built for bigger people by making that world see what they want it to see. Glamour is illusion, misdirection, and a little bit of dust that makes the impossible briefly true.

Primary: Charisma + Subterfuge + Glamour

Secondary: Dexterity + Stealth + Glamour

Extra mana: Attack only. 1 die per mana, up to your Glamour dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Minor Glamour
Mana Cost: 1, upkeep 0 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat | **Range:** One zone in sight
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Perception + Awareness
Effect: Create a small illusion: a sound, a light, or a small object. Seeing through it requires beating your successes with Perception + Awareness.

B. Pixie Dust
Mana Cost: 1 | **Speed:** Instant | **Type:** Movement
Use: Combat and outside combat
Range: One ally in an adjacent zone | **Dice Pool:** None
Defense: None
Effect: The ally falls slowly and ignores Difficult Terrain on their next move.

Rank 2 Terrestrial (choose one)

A. Disguise Glamour
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Perception + Awareness
Effect: Roll when you attune. While attuned you look like another small creature or an object. Seeing through it requires beating your successes with Perception + Awareness.

B. Dazzle
Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Perception + Awareness
Effect: The target resists with Perception + Awareness. If you beat them, they suffer -2 dice on sight-based rolls on their next turn.

Rank 3 Aerial (choose one)

A. Phantom Double
Mana Cost: 3, upkeep 2 each Upkeep Phase
Speed: Instant, Extended | **Type:** Defense, Persistent
Use: Combat | **Range:** An adjacent zone
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Perception + Awareness
Effect: Roll when cast. An illusory copy of you appears. Attackers must beat your successes with Perception + Awareness or target the copy instead.

B. Pixie Flight

Mana Cost: 3 | **Speed:** Instant | **Type:** Movement
Use: Combat | **Range:** One ally in an adjacent zone
Dice Pool: None | **Defense:** None
Effect: The ally can fly at double their normal movement on their next turn.

Rank 4 Lunar (choose one)

A. Glamour Veil

Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self and one ally
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Perception + Awareness
Effect: Roll when you attune. While attuned, you and the ally are invisible to anyone who does not beat your successes with Perception + Awareness. It ends for whichever of you attacks.

B. Befuddle

Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, they attack the nearest creature on their next turn, friend or foe.

Rank 5 Stellar (choose one)

A. Grand Illusion

Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat
Range: Up to 3 connected zones in sight
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Perception + Awareness
Effect: Create illusory terrain: walls, pits, fire. Each turn, creatures must beat your successes with Perception + Awareness to ignore it.

B. Shrink

Mana Cost: 5, lasts half the mana spent in turns, rounded up; pay 4 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | **Type:** Debuff, Countdown
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Fortitude + Endurance
Effect: The target resists with Fortitude + Endurance. If you beat them, they shrink to Tiny size and suffer the Tiny flaw until the countdown runs out.

Rank 6 Galactic (choose one)

A. Fairy Ring

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Debuff, Persistent
Use: Combat | **Range:** One zone in sight
Dice Pool: Charisma + Subterfuge + Glamour
Defense: Composure + Athletics
Effect: Roll when cast. Enemies who enter the zone must beat your successes with Composure + Athletics or lose 2 AP each turn they stay, dancing against their will.

B. Mass Pixie Flight

Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Movement, Persistent
Use: Combat | **Range:** Allies in sight | **Dice Pool:** None
Defense: None
Effect: While maintained, allies in sight can fly at double their normal movement.

Rank 7 Cosmic (choose one)

A. Dreamscape

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat | **Range:** Everyone in sight
Dice Pool: Charisma + Subterfuge + Glamour
Defense: None
Effect: While maintained, you decide what everyone in sight perceives. Once per turn, each creature may roll Perception + Awareness against your successes to see through one detail.

B. Fairy Swarm

Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Conjuration, Persistent
Use: Combat | **Range:** Up to 3 connected zones in sight
Dice Pool: Dexterity + Stealth + Glamour
Defense: Target's choice of defense against its attacks
Effect: A swarm of tiny kin forms as a conjuration. During each Upkeep Phase it attacks every enemy in those zones using your dice pool; each defends separately.

Vampire

From "Peoples of the Known World" by Liris Kant, Third Chair of Natural Philosophy, Monsera University

The vampires of the Shaded Isles noble house are currently the most visible of their kind, a result of the isles joining the Monsera kingdom. I have met several members of the royal family, though not the queen.

Vampires are sustained by mana, which places them among the Corporeal Undead without making them identical to the others. They do not age while their mana is maintained. They can regenerate mana from emotion as devils do, and they can drink blood, which is their most efficient source. They drink openly and without embarrassment, and the wider world accepts it as a known vampire trait.

Sunlight does not destroy them. It drains their mana faster and causes discomfort, so most avoid long exposure. In the Shaded Isles the permanent overcast makes the question moot. Elsewhere they manage it as a known limitation.

A vampire colony exists in the far north of the Central Continent, where the sun is absent for much of the year. I have not visited. Travelers describe an insular community, not hostile but not welcoming, that trades occasionally with nearby Hyuman settlements and is otherwise left alone.

Every vampire has a compulsion tied to their strongest Virtue or Vice. When triggered, it demands to be satisfied, and resisting it is possible but costly. I have met vampires compelled toward acquisition, toward self sabotage, and toward fixation on a single task. None discuss it casually, and I did not press. Those who spoke of it described living with it rather than having overcome it.

Vampires are born or turned. Born vampires grow up with their nature and treat it as a plain fact. Turned vampires come to it through some irreversible event later in life and tend to be more reflective about it, since they remember being something else.

Vampire - Mechanical Block

Average Lifespan: Immortal. Sustained by mana. Does not age while mana is maintained.

Innate Attribute: Any single attribute of the player's choice. Vampires are as varied in natural ability as Hyumans. That attribute starts at 2 dots and its maximum is raised by 1 beyond the column cap. Note Innate on sheet.

Innate Flaw - Compulsion: Every vampire has a compulsion derived from one of their Virtue or Vice extremes. When triggered the vampire must act on their compulsion or take 1 Bashing damage per turn in combat or 1 Bashing damage per scene out of combat until they give in or the trigger is removed. Consult the compulsion table below and work with your Storyteller to determine what specifically triggers yours.

Attribute Flaw: None. Like Hyumans, Vampires may place any attribute group in their Affinity column.

Vampiric Compulsion Scale

- **Humility:** Self Sabotage - compelled to undermine their own success or status in a meaningful way
- **Pride:** Dominance Display - compelled to publicly establish superiority over whoever they perceive as challenging them
- **Charity:** Ruinous Giving - compelled to give away something of genuine value, money, information, or an advantage they cannot afford to lose
- **Greed:** Acquisition - compelled to take something they want whether it belongs to someone else or not
- **Chastity:** Denial - compelled to deny themselves something they genuinely want, a pleasure, an indulgence, or a desire they have been holding back
- **Lust:** Fixation - compelled to pursue whoever has captured their attention and make moves to claim them as their own regardless of consequences
- **Patience:** Paralysis - compelled to wait and do nothing even when action is desperately needed
- **Wrath:** Blood Rage - compelled to physically harm whoever triggered their anger
- **Temperance:** Abstinence - compelled to refuse all nourishment including blood and mana restoration until the feeling passes
- **Gluttony:** Feeding Frenzy - compelled to feed, blood or emotion, from whoever is nearest regardless of consent or consequence
- **Kindness:** Bleeding Heart - compelled to help whoever appears to be suffering even if doing so puts themselves or their allies in danger
- **Envy:** Sabotage - compelled to undermine or damage something belonging to whoever they envy
- **Diligence:** Obsessive Focus - compelled to complete whatever task is in front of them to the exclusion of everything else including immediate threats

- **Sloth:** Shutdown - compelled to stop moving, acting, or engaging entirely until the feeling passes

A Note on Turned Vampires: A character turned into a vampire through play gains the Compulsion flaw and functional immortality. They do not receive the Innate Attribute benefit or a free dot in a Vampiric Power. Vampiric Powers may be purchased with XP like any other Heritage magic.

Heritage Merit (choose 1, record in Merits, Flaws, and Backgrounds section):

- **Resilience:** A dotted merit with no mana cost. Each dot adds 1 to the character's Fortitude everywhere Fortitude is used: Fortitude rolls, BDT (and so LDT and ADT), and Max Mana per Turn. They are not bought Attribute dots, so they do not count toward Level or the Attribute cap.

Heritage Magic: Vampiric Powers

Vampiric Powers are the Heritage magic of vampires. Unlike other heritages, vampires have five of them: Auspex, Blood Sorcery, Celerity, Dominion, and Vigor. A born vampire chooses one Vampiric Power and receives its free dot. The others can be bought with XP like any Heritage magic, at dot x5. Turned vampires receive no free dot.

Vampiric Power: Auspex

Supernatural perception. Heightened senses and empathic reading at low ranks; astral projection and sight across great distances at high ranks.

Primary: Perception + Awareness + Auspex

Secondary: Wisdom + Insight + Auspex

Extra mana: Attack only. 1 die per mana, up to your Auspex dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Heightened Senses
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, add your Heritage dots to Awareness rolls.

B. Emotional Aura
Mana Cost: 1, upkeep 0 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat | **Range:** Everyone in sight
Dice Pool: None | **Defense:** None
Effect: While maintained, you see the emotions of everyone in sight as colors around them.

Rank 2 Terrestrial (choose one)

A. Night Eyes
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, you see normally in total darkness.

B. Read Intent
Mana Cost: 2 | **Speed:** Instant | **Type:** Utility
Use: Combat | **Range:** One target in sight
Dice Pool: Wisdom + Insight + Auspex
Defense: Composure + Subterfuge
Effect: The target resists with Composure + Subterfuge. If you beat them, you learn whether they plan to attack this turn, and whom.

Rank 3 Aerial (choose one)

A. Object Echo
Mana Cost: 3 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat | **Range:** Touch
Dice Pool: Wisdom + Insight + Auspex | **Defense:** None
Effect: On a success you see the last strong emotion or event connected to the object you touch.

B. Spot the Hidden
Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: Perception + Awareness + Auspex
Defense: Dexterity + Stealth
Effect: Roll when you attune. While attuned, a hidden or invisible creature stays concealed from you only if it beats your successes with Dexterity + Stealth.

Rank 4 Lunar (choose one)

A. Mind Glimpse
Mana Cost: 4 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Perception + Awareness + Auspex
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, you read their surface thoughts.

B. Foresight
Mana Cost: 4 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: Perception + Awareness + Auspex
Defense: None
Effect: When attacked, roll your dice pool. Each success reduces the attacker's successes by 1.

Rank 5 Stellar (choose one)

A. Distant Sight
Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat
Range: Any place you know in the same city
Dice Pool: Wisdom + Insight + Auspex | **Defense:** None
Effect: While maintained, you see and hear that place.

B. Truth Sense
Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Everyone in sight
Dice Pool: Wisdom + Insight + Auspex
Defense: Manipulation + Subterfuge
Effect: Roll when you attune. While attuned, you know when anyone in sight lies unless they beat your successes with Manipulation + Subterfuge.

Rank 6 Galactic (choose one)

A. Astral Step
Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Combat and outside combat | **Range:** Self
Dice Pool: Wisdom + Insight + Auspex | **Defense:** None
Effect: While maintained, your spirit leaves your body and moves freely and unseen within a city. Your body is helpless while you are away.

B. Battle Precognition
Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, once per turn, before an enemy acts, you learn their target and action and may cast a Reaction in response.

Rank 7 Cosmic (choose one)

A. Astral Journey
Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Utility, Persistent
Use: Outside combat only | **Range:** Self
Dice Pool: Wisdom + Insight + Auspex | **Defense:** None
Effect: Astral Step that can reach anywhere in the world.

B. Omniscient Moment
Mana Cost: 7 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: The current scene | **Dice Pool:** None
Defense: None
Effect: Once per scene, ask the Storyteller one question about the current scene. They answer truthfully.

Vampiric Power: Blood Sorcery

Blood as a magical medium. Minor enhancement at low ranks; control of other people's blood, barriers and weapons of vitae, and devastating attacks at high ranks.

Primary: Composure + Magic + Blood Sorcery

Secondary: Intelligence + Alchemy + Blood Sorcery

Extra mana: Damage only. 1 die per mana, up to your Blood Sorcery dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Blood Boost
Mana Cost: 1 | **Speed:** Instant | **Type:** Enhancement
Use: Combat and outside combat | **Range:** Self
Dice Pool: Composure + Magic + Blood Sorcery
Defense: None
Effect: Roll your dice pool. Add your successes, up to your Heritage dots, as bonus dice to one physical roll you make this turn.

B. Sense Blood
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, you smell fresh blood within a number of zones equal to your Blood Sorcery dots and add your Heritage dots to rolls to track a creature by its blood.

Rank 2 Terrestrial (choose one)

A. Blood Blade
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: Take 1 Bashing damage to form a weapon from your own blood. While attuned, its rating equals your Heritage dots.

B. Clot
Mana Cost: 2 | **Speed:** Instant | **Type:** Healing
Use: Combat and outside combat
Range: Self or one ally in an adjacent zone
Dice Pool: Intelligence + Alchemy + Blood Sorcery
Defense: None
Effect: Remove the Bleeding condition and give Basic healing.

Rank 3 Aerial (choose one)

A. Blood Bolt
Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Composure + Magic + Blood Sorcery
Defense: Target's choice of defense
Effect: Take 1 Bashing damage to fire a bolt of blood. Damage is piercing.

B. Blood Ward
Mana Cost: 3 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self
Dice Pool: Composure + Magic + Blood Sorcery
Defense: None
Effect: When attacked, roll your dice pool. Each success reduces the attacker's successes by 1.

Rank 4 Lunar (choose one)

A. Boil Blood
Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Composure + Magic + Blood Sorcery
Defense: Fortitude + Endurance
Effect: The target resists with Fortitude + Endurance. If you beat them, they gain the Bleeding condition.

B. Blood Bond
Mana Cost: 4 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat
Range: One willing ally, touch
Dice Pool: Intelligence + Alchemy + Blood Sorcery
Defense: None
Effect: Drink from the ally. You can speak mind to mind with them for one session.

Rank 5 Stellar (choose one)

A. Blood Puppet
Mana Cost: 5 | **Speed:** Instant | **Type:** Debuff
Use: Combat
Range: One target in sight with the Bleeding condition
Dice Pool: Composure + Magic + Blood Sorcery
Defense: Fortitude + Endurance
Effect: The target resists with Fortitude + Endurance. If you beat them, they lose their next action or move one zone where you choose.

B. Crimson Barrier
Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | **Type:** Defense, Persistent
Use: Combat | **Range:** One edge of a zone in sight
Dice Pool: Intelligence + Alchemy + Blood Sorcery
Defense: An attack on the wall must roll more successes than your casting roll
Effect: Raise a wall of blood. It blocks movement. An attack breaks it only if the attacker rolls more successes than you did when casting.

Rank 6 Galactic (choose one)

A. Hemorrhage
Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat
Range: Every enemy in sight with the Bleeding condition
Dice Pool: Composure + Magic + Blood Sorcery
Defense: Target's choice of defense
Effect: Roll once; each target defends separately. Damage is slashing.

B. Blood Feast
Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Touch
Dice Pool: Composure + Magic + Blood Sorcery
Defense: Target's choice of defense
Effect: On a hit, heal Lethal damage on yourself equal to the boxes of damage dealt.

Rank 7 Cosmic (choose one)

A. Exsanguinate
Mana Cost: 7 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Touch
Dice Pool: Composure + Magic + Blood Sorcery
Defense: Target's choice of defense
Effect: A hit is treated as meeting the next-higher damage threshold, and you heal one box for each box it deals.

B. Crimson Tide
Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | **Type:** Attack, Persistent
Use: Combat | **Range:** Up to 6 connected zones in sight
Dice Pool: Composure + Magic + Blood Sorcery
Defense: Fortitude + Endurance, which reduces the damage value
Effect: Roll when cast. Successes plus mana spent set the damage value. Anyone who enters or begins their turn there rolls Fortitude + Endurance to reduce it, takes the rest as damage, and gains the Bleeding condition.

Vampiric Power: Celerity

Supernatural speed. Faster reflexes at low ranks; movement faster than the eye can follow at high ranks.

Primary: Dexterity + Athletics + Celerity

Secondary: Dexterity + Dodge + Celerity

Extra mana: Attack only. 1 die per mana, up to your Celerity dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Quick Reflexes
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, add your Heritage dots to rolls to react to surprise.

B. Fleet Foot
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Movement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, move one extra zone each turn at no AP cost.

Rank 2 Terrestrial (choose one)

A. Blur
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, attacks against you suffer -1 die.

B. Quick Hands
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | **Type:** Utility, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, drawing, stowing, and passing items costs no AP.

Rank 3 Aerial (choose one)

A. Strike and Go
Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Athletics + Celerity
Defense: Target's choice of defense
Effect: Move one zone and attack with no extra AP.

B. Dodge Instinct
Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, once per turn you may Dodge without spending your Reaction.

Rank 4 Lunar (choose one)

A. Second Strike
Mana Cost: 4 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Dexterity + Athletics + Celerity
Defense: Target's choice of defense
Effect: Make two attacks in this action. Roll each separately.

B. Catch
Mana Cost: 4 | **Speed:** Reaction | **Type:** Defense
Use: Combat | **Range:** Self or one ally in an adjacent zone
Dice Pool: Dexterity + Dodge + Celerity | **Defense:** None
Effect: Snatch a thrown weapon or arrow from the air. Roll your dice pool against the attacker's successes. If you win, the attack misses.

Rank 5 Stellar (choose one)

A. Afterimage
Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self
Dice Pool: Dexterity + Dodge + Celerity
Defense: Perception + Awareness
Effect: Roll when you attune. While attuned, attackers must beat your successes with Perception + Awareness or strike an afterimage instead.

B. Across the Field
Mana Cost: 5 | **Speed:** Instant | **Type:** Movement
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: Move to any zone in sight.

Rank 6 Galactic (choose one)

A. Flurry
Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** All adjacent zones
Dice Pool: Dexterity + Athletics + Celerity
Defense: Target's choice of defense
Effect: Roll once against every enemy in range; each defends separately. Each target hit also loses 1 AP on their next turn.

B. Untouchable
Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | **Type:** Defense, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, the first attack against you each turn fails automatically.

Rank 7 Cosmic (choose one)

A. Time Stands Still
Mana Cost: 7 | **Speed:** Instant | **Type:** Utility
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: Once per scene, take a full extra turn immediately.

B. Faster Than Sight

Mana Cost: 7 | **Speed:** Instant | **Type:** Utility
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None

Effect: Once per scene, for one turn, you act as if you had the full 6 AP a character can use in one turn, without spending any of your own.

Vampiric Power: Dominion

Supernatural command of mind and emotion. Awe, fear, attraction, and simple suggestions at low ranks; full compulsion, memory rewriting, and command of crowds at high ranks.

Primary: Charisma + Presence + Dominion

Secondary: Manipulation + Persuasion + Dominion

Extra mana: Attack only. 1 die per mana, up to your Dominion dots or Max Mana Per Turn, whichever comes first.

Unless a spell says otherwise, targets resist Dominion with Composure + Insight against your successes.

Rank 1 Core (choose one)

A. Awe

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None

Effect: While attuned, add your Heritage dots to Presence rolls.

B. Whisper Suggestion

Mana Cost: 1 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Charisma + Presence + Dominion
Defense: Composure + Insight

Effect: The target resists with Composure + Insight. If you beat them, they feel moved to follow one short suggestion on their next turn, such as "step aside" or "look over there." They will not follow a suggestion that would harm them or their allies, or that goes against their nature.

Rank 2 Terrestrial (choose one)

A. Dread Gaze

Mana Cost: 2 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Presence + Dominion
Defense: Composure + Presence

Effect: The target resists with Composure + Presence. If you beat them, they suffer -2 dice to attack you for the rest of the scene.

B. Charm

Mana Cost: 2, lasts half the mana spent in turns, rounded up; pay 1 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | **Type:** Debuff, Countdown
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Manipulation + Persuasion + Dominion
Defense: Composure + Insight

Effect: The target resists with Composure + Insight. If you beat them, they treat you as a friend. It ends when the countdown runs out or you harm them or their allies, whichever comes first.

Rank 3 Aerial (choose one)

A. Command

Mana Cost: 3 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Charisma + Presence + Dominion
Defense: Composure + Insight

Effect: The target resists with Composure + Insight. If you beat them, they obey a command of up to three words on their next turn. The command cannot directly harm them.

B. Entrance

Mana Cost: 3, lasts half the mana spent in turns, rounded up; pay 2 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | **Type:** Debuff, Countdown
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Manipulation + Persuasion + Dominion
Defense: Composure + Insight

Effect: The target resists with Composure + Insight. If you beat them, they follow you and seek your approval. It ends when the countdown runs out or you harm them, whichever comes first.

Rank 4 Lunar (choose one)

A. Forget

Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Manipulation + Persuasion + Dominion
Defense: Composure + Insight

Effect: The target resists with Composure + Insight. If you beat them, they forget the last five minutes.

B. Mass Awe

Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat
Range: All adjacent zones
Dice Pool: Charisma + Presence + Dominion
Defense: Composure + Presence

Effect: Every target in range resists separately with Composure + Presence. Each one you beat suffers -2 dice to attack you for the rest of the scene.

Rank 5 Stellar (choose one)

A. Compel

Mana Cost: 5, lasts half the mana spent in turns, rounded up; pay 4 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | **Type:** Debuff, Countdown
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Charisma + Presence + Dominion
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, they obey your spoken commands until the countdown runs out. A command that would directly harm them lets them roll Composure + Insight again; if they beat your casting successes, the spell ends.

B. Rewrite

Mana Cost: 5 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Manipulation + Persuasion + Dominion
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, you change their memory of one event.

Rank 6 Galactic (choose one)

A. Crowd Command

Mana Cost: 6 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat | **Range:** Everyone in sight
Dice Pool: Charisma + Presence + Dominion
Defense: Composure + Insight
Effect: Everyone in sight resists separately with Composure + Insight. Each one you beat obeys the same command of up to three words on their next turn. The command cannot directly harm them.

B. Puppet

Mana Cost: 6 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** One target in sight
Dice Pool: Charisma + Presence + Dominion
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, you decide their entire next turn. You cannot make them directly harm themselves.

Rank 7 Cosmic (choose one)

A. Thrall

Mana Cost: 7 | **Speed:** Instant | **Type:** Debuff
Use: Combat and outside combat
Range: One target in sight
Dice Pool: Manipulation + Persuasion + Dominion
Defense: Composure + Insight
Effect: The target resists with Composure + Insight. Each time you beat them, mark it. A target marked three times in one session becomes loyal to you until you die or Cosmic rank Bright Magic frees them.

B. King's Word

Mana Cost: 7 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All enemies in sight
Dice Pool: Charisma + Presence + Dominion
Defense: Composure + Presence
Effect: Each enemy in sight resists separately with Composure + Presence. Each one you beat drops what they hold and cannot attack on their next turn.

Vampiric Power: Vigor

Supernatural strength. Feats of lifting and crushing at low ranks; blows that break walls and armies at high ranks.

Primary: Strength + Martial Arts or Melee + Vigor

Secondary: Strength + Athletics + Vigor

Extra mana: Damage only. 1 die per mana, up to your Vigor dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Mighty Grip

Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat and outside combat | **Range:** Self
Dice Pool: None | **Defense:** None
Effect: While attuned, add your Heritage dots to rolls to lift, break, grapple, or crush.

B. Leap

Mana Cost: 1 | **Speed:** Instant | **Type:** Movement
Use: Combat and outside combat | **Range:** Self
Dice Pool: Strength + Athletics + Vigor | **Defense:** None
Effect: Jump to an adjacent zone over obstacles, walls, or gaps.

Rank 2 Terrestrial (choose one)

A. Crushing Blow
Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Strength + Martial Arts or Melee + Vigor
Defense: Target's choice of defense
Effect: The attack ignores Armor equal to half your Heritage dots, rounded up.

B. Toss
Mana Cost: 2 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Strength + Martial Arts or Melee + Vigor
Defense: Target's choice of defense
Effect: Throw a heavy object at the target.

Rank 3 Aerial (choose one)

A. Knockback
Mana Cost: 3 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Strength + Martial Arts or Melee + Vigor
Defense: Target's choice of defense
Effect: On a hit, the target is also sent one zone away and knocked prone.

B. Break Through
Mana Cost: 3 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat | **Range:** Self
Dice Pool: Strength + Athletics + Vigor | **Defense:** None
Effect: Smash through a door, wall, or barrier as part of your movement.

Rank 4 Lunar (choose one)

A. Stomp
Mana Cost: 4 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Strength + Martial Arts or Melee + Vigor
Defense: Dexterity + Athletics
Effect: Each enemy in range resists with Dexterity + Athletics. Each one you beat is knocked prone.

B. Unbreakable Hold
Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self
Dice Pool: Strength + Athletics + Vigor
Defense: Strength + Athletics to escape
Effect: While attuned, a creature trying to escape your grapple rolls Strength + Athletics against this dice pool instead of your normal roll.

Rank 5 Stellar (choose one)

A. Titan Lift
Mana Cost: 5 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** One target in sight
Dice Pool: Strength + Martial Arts or Melee + Vigor
Defense: Target's choice of defense; a thrown creature does not defend
Effect: Lift and throw a creature or a cart sized object at the target. On a hit, the target and a thrown creature both take the damage of the hit, and the target is knocked prone.

B. Thunder Clap
Mana Cost: 5 | **Speed:** Instant | **Type:** Debuff
Use: Combat | **Range:** All adjacent zones
Dice Pool: Strength + Martial Arts or Melee + Vigor
Defense: Fortitude + Endurance
Effect: Each enemy in range resists with Fortitude + Endurance. Each one you beat loses 1 AP on their next turn.

Rank 6 Galactic (choose one)

A. Rending Strike
Mana Cost: 6 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** Melee
Dice Pool: Strength + Martial Arts or Melee + Vigor
Defense: Target's choice of defense
Effect: A hit is treated as meeting the next-higher damage threshold.

B. Wall Breaker
Mana Cost: 6 | **Speed:** Instant | **Type:** Utility
Use: Combat and outside combat | **Range:** An adjacent zone
Dice Pool: Strength + Athletics + Vigor | **Defense:** None
Effect: One blow destroys a structure or barrier in an adjacent zone, of any material short of Cosmic rank magic.

Rank 7 Cosmic (choose one)

A. Godlike Strength
Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | **Type:** Enhancement, Attuned
Use: Combat | **Range:** Self | **Dice Pool:** None
Defense: None
Effect: While attuned, add 3 to Strength for all rolls, and your melee hits ignore Armor.

B. World Breaker
Mana Cost: 7 | **Speed:** Instant | **Type:** Attack
Use: Combat | **Range:** All adjacent zones
Dice Pool: Strength + Martial Arts or Melee + Vigor
Defense: Target's choice of defense
Effect: One blow strikes every target in range. Roll once; each target defends separately. Each target hit is also pushed one zone away from you and knocked prone.

Chapter 9: Merits and Flaws

Special Powers 9
Arcane Enhancements 10

Overview

Older generations call them Blessings and Curses; modern science calls them Merits and Flaws. Both are understood to be the same ambient magic that touches every newborn, simply with different outcomes. A Merit is something the world handed you that helps. A Flaw is something the world handed you that does not. Neither was asked for, and neither can be bought or removed with XP after character creation.

At character creation you have 7 points to spend on Merits. You may take up to 7 points of Flaws, and each Flaw point adds 1 point to your Merit budget, for a possible total of 14. Any points left unspent carry over to your Backgrounds in Step 8.

Your Heritage Merit from Chapter 8 is recorded here too, but it is free and does not use any of these points.

Because Merits and Flaws never change with XP, it helps to fill your Merits, Flaws, and Backgrounds section from the bottom up for Merits and Flaws, and from the top down for Backgrounds. That keeps the two visually apart and easy to read at a glance.

Adjustments for Attributes and Abilities

Before spending any Merit points, consider whether your character needs to go beyond the normal maximums, or would happily accept a weakness in exchange for strength elsewhere.

You may raise or lower the maximum of any single Attribute, or of any Ability group, by spending or recouping Merit points. The cost or refund is always the larger of the two numbers involved.

Raising: Raising a maximum by 1 costs points equal to the new maximum. Raising Intelligence from a maximum of 5 to 6 costs 6 points. Raising it again to 7 costs 7 more, for 13 in total. This is expensive on purpose.

Lowering: Lowering a maximum by 1 refunds points equal to the current maximum. Lowering Manipulation from a maximum of 4 to 3 refunds 4 points.

Ability groups: The same rules apply. Lowering a Noble group valued at 2 down to a maximum of 1 refunds 2 points. Raising a Mage group valued at 5 to a maximum of 6 costs 6.

Adjustments only change what a trait can reach later through XP. They do not change how many dots you spend at creation, and the Golden Rule still stops anything from being filled above 5 during creation.

Note raised maximums as Max Boost 1, Max Boost 2, and so on next to the Attribute, and lowered maximums as Max Loss 1, Max Loss 2. For an Ability group, change the number written next to the group. Write a short note explaining each adjustment so you and your Storyteller can track them.

Example: The Sword Mage

A player wants a sword mage, equally dangerous with blade and spell. They make Physical their Affinity column (6) and Mental their Standard column (5), so Intelligence can only reach 5. They want it to reach 7. Raising to 6 costs 6 and raising to 7 costs 7 more: 13 points, more than their budget of 7.

Social is their Aversion column (4), and Manipulation does not matter to this character, so they lower its maximum from 4 to 3 and recoup 4 points. They also lower the Noble group from 2 to 1 and recoup 2 more. That gives them 6 extra points, which with their starting 7 makes exactly 13. They note Max Boost 2 next to Intelligence and Max Loss 1 next to Manipulation, and change the Noble group's number from 2 to 1.

They still spend 5 points in the Mental column and 2 dots in the Noble group at creation, and Intelligence still cannot be filled above 5 until play begins. After that, it can grow all the way to 7.

Core Merits

Costs are listed per dot unless a set cost is given. A merit's maximum is the most dots you can take in it.

Physical Merits

Merit	Cost	Effect
Ambidextrous	2	No penalty for using your off hand in combat or for fine work.
Bonus Aggravated Health	4 for 1 box, 7 for 2	Unlocks one or both of the dotted Aggravated health boxes on your sheet.
Bonus Lethal Health	3 for 1 box, 5 for 2	Unlocks one or both of the dotted Lethal health boxes on your sheet.
Gifted Athlete	2 per dot, max 3	Each dot adds a bonus die to Athletics rolls and rolls to push your body physically.
Iron Will	2 per dot, max 3	Each dot adds 1 dot of Willpower.
Keen Senses	2 per dot, max 3	Each dot adds a bonus die to Perception rolls.
Natural Armor	4 per dot, max 3	Scales, hide, or tough skin. Each dot adds 1 to your BDT like armor, without wearing any. It stacks with worn armor.
Quick Reflexes	2 per dot, max 3	Each dot adds a bonus die to Initiative rolls (Dexterity + Perception).
Resilience	2 per dot, max 7	Each dot adds 1 to your Fortitude everywhere Fortitude is used: Fortitude rolls, your BDT (and so your LDT and ADT), and Max Mana per Turn. These are not bought Attribute dots, so they do not count toward Level or the Attribute cap.
Survivor's Grit	2 per dot, max 5	Each dot adds a bonus die to rolls to resist environmental hazards, starvation, extreme conditions, and anything that pushes you to the edge of what you can endure.

Social Merits

Merit	Cost	Effect
Animal Kinship	2 per dot, max 3	Animals trust you. Each dot adds a bonus die to rolls to calm, handle, or ride animals and beasts.
Born Negotiator	2 per dot, max 3	Each dot adds a bonus die to Commerce and Diplomacy rolls made to strike a deal.
Come Back	2 per dot, max 3	Each dot adds a bonus die to spoken rolls in social combat. You may also use a sharp remark to start social combat outside a fight.
Commanding Voice	2 per dot, max 3	Each dot adds a bonus die to rolls to give orders, rally allies, or take charge in a crisis.
Disquieting Presence	2 per dot, max 3	Each dot adds a bonus die to Presence rolls. Your eerie nature draws attention whether you want it or not, and it is not always welcome.
Honest Face	2 per dot, max 3	Each dot adds a bonus die to rolls to be believed when you are telling the truth.
Natural Leader	2 per dot, max 3	Once per scene, give one ally bonus dice equal to your dots on a single roll you helped plan.
Silver Tongue	2 per dot, max 3	Each dot adds a bonus die to Persuasion rolls.
Social Butterfly	2 per dot, max 3	Each dot adds a bonus die to social rolls in group settings.
Striking Looks	2 per dot, max 3	Each dot adds a bonus die to social rolls where your appearance matters.

Mental Merits

Merit	Cost	Effect
Calm Mind	2 per dot, max 3	Each dot adds a bonus die to rolls to resist Sanity damage.
Danger Sense	2	Once per scene the Storyteller may warn you of danger before it strikes, even without a roll.
Direction Sense	3	You always know which way you are facing and can retrace any path you have traveled.
Eidetic Memory	2	Perfect recall of anything you have directly experienced. It does not grant knowledge you never had.
Encyclopedic Knowledge	3	Once per scene, in any field where you have at least 1 dot in the matching ability, ask the Storyteller one factual question your character could plausibly know and get a true answer.
Iron Focus	2 per dot, max 3	Each dot adds a bonus die to rolls to resist distraction, fear, and magic that affects the mind.
Jack of All Trades	4	You never roll fewer than 1 die for an ability you have no dots in.
Multilingual	2 per dot, max 5	Each dot grants fluency in one more language. The languages of Terrana are Hyuman Tongue, Demon Tongue, Beast Tongue (with dialects including Elven and Dwarven), Sky Tongue, Sea Tongue, and Dragon Tongue.
Sharp Mind	2 per dot, max 3	Each dot adds a bonus die to Intelligence rolls to solve puzzles, codes, and problems.
Tactical Mind	3	Once per combat, during the Planning Phase, give one ally 1 AP that does not come from your own.

Magical Merits

Merit	Cost	Effect
Arcane Ward	2 per dot, max 3	Each dot adds a bonus die to rolls to resist spells.
Aura Sensitivity	2 per dot, max 3	Sense the emotional state and rough power of beings nearby. Each dot increases the range and accuracy.
Deep Well	4	Regain 1 extra mana during each Upkeep Phase.
Elemental Kinship	2 per dot, max 3	Choose one casting school. Each dot adds 1 to your BDT against that school's attacks.
Leyline Sense	2	You always know the direction of the nearest strong source of mana, such as a dungeon, a ley line, or a Void Opening.
Magical Affinity	5	One free dot in Mana or in a single Magical Knowledge of your choice. A knowledge taken this way gets a P.
Mana Reservoir	2 per dot, max 5	Each dot adds 2 to your Mana Pool.
Spell Memory	2 per dot, max 3	Each dot lets you prepare one more spell beyond your Intelligence.
Spell Touched	2 per dot, max 3	Trace magic from a past event lingers in your body. Each dot adds a bonus die to rolls with one Magical Knowledge chosen at creation.
Steady Focus	2 per dot, max 3	Each dot adds a bonus die to rolls to keep a persistent spell going when you are hurt or distracted.

Innate Power Merits

Merit	Cost	Effect
Familiar Bond	2 per dot, max 3	A creature is bonded to your soul. It works like a SumMonz, but it can stay with you in its basic form at no mana cost, and calling it to full strength costs mana like any summon. It does not count toward how many SumMonz you can have on the field. Taking this Merit at creation gives you one familiar: a tiny or small Rank F creature that is easy to train (see Starter Familiars below). Add your Familiar Bond dots to your familiar's Attack and Defense pools; they never help any other SumMonz. Each dot either strengthens the familiar you have or adds another one.
Fast Healer	2 per dot, max 3	Each dot lets you heal 1 extra Bashing damage whenever you take a short or long rest.
Fey Touched	3 per Gift, max 2 Gifts	One parent was Fey or a devil. Choose Gifts from the Fey Touched list below.
Hard to Kill	4	Once per story arc, when you would mark your last Aggravated box, you do not mark it.
Lucky	5	Once per story arc, reroll any single roll entirely.
Magic Eye	5, or 7 for a greater eye	One of Kishirika's Magic Eyes. Choose from the list below. Only one at creation.
Night Eyes	2	You see in darkness as well as in dim light.
Old Soul	2	You remember more than one life. Choose a second Past Life Occupation.
Second Wind	3	Once per combat, neutralize 2 Bashing damage without spending an action.
Youthful Charisma	2 per dot, max 3	Each dot adds a bonus die to social rolls where seeming innocent, harmless, or younger than you are helps.

Starter Familiars: Choose a Giant Rat, Horned Rabbit, Slime, Cat, Small Dog, Mouse, Ferret, Fox Kit, Raven, Owl, Parrot, Bat, Snake, Lizard, Toad, Hedgehog, Squirrel, or Monkey, or another tiny or small creature with Storyteller approval. A starting familiar has Rank F stats: Attack 4, Defense 4, Damage 3, BDT 3, Health 3 / 2 / 1, Mana 3, M/T 2, Move 1, plus your Familiar Bond dots on Attack and Defense.

Magic Eyes

Empress Kishirika Kishirisu is famous for gifting her Magic Eyes to those who earn her favor. A character can begin play with one through the Magic Eye merit, or receive one from Kishirika during the story. A Magic Eye replaces one of your eyes and can be opened or closed at will.

While open it is attuned: it holds 1 mana committed against your Maximum Mana Per Turn. Closing it returns that mana in your next Upkeep Phase.

Foresight, Absorption, All-Seeing, and Absolute Void are greater eyes and cost 7 points. The rest cost 5.

The Magic Eyes

Eye	Cost	Effect
Mana Perception	5	See mana itself: spells, enchantments, mana flows, and roughly how much mana a being holds.
Identification	5	Look at an item or creature to learn what it is. The Storyteller gives you one key fact each time you look.
X-Ray	5	See through solid matter, up to your Perception in zones.
Clairvoyant	5	See a place you know as if you stood there, anywhere in the same region. You are blind to your own surroundings while you look.
Foresight	7	Glimpse a moment ahead. Add 2 bonus dice to every defense roll while the eye is open.
Absorption	7	When a spell hits you, roll Composure + Attunement. Each success reduces the spell's damage by 1 and adds 1 mana to your pool.
All-Seeing	7	See in total darkness, through illusions and invisibility, and in every direction at once. You cannot be surprised.
Absolute Void	7	Spend 4 mana to turn one zone you can see into an unbreakable barrier until your next turn. Nothing passes through it, including attacks and spells.
Tracking	5	Follow the trail of anyone you have seen, through any terrain, if the trail is no more than a day old.
Superd	5	See living things by their life force, even through walls, and know whether each one means you harm.
Affection	5	Anyone who meets your gaze is drawn to like you. Add 2 bonus dice to social rolls with them; they resist with Composure.

Fey Touched

A character with one Fey or devil parent and one parent of any other heritage is Fey Touched (Chapter 8). They live about 400 years whatever their other parent's lifespan, and they may carry a little of the otherworld in them. Each Gift costs 3 points, up to 2 Gifts.

Wings: You have wings and fly at double your normal movement. Record a free specialty in Athletics called Flight.

Second Bloodline: You may raise your other parent's Heritage magic with XP, starting at 0 dots, following all the normal Heritage magic rules.

Fey Sight: You can see fey, spirits, and glamours that are hidden from ordinary eyes.

Fey Charm: Add a bonus die to Expression and Performance rolls meant to enchant or enthrall an audience.

Otherworldly Look: A feature of your choice marks your heritage: horns, a tail, unusual eyes, or something stranger. Add a bonus die to Presence rolls to unsettle or impress.

Core Flaws

Each Flaw point adds 1 point to your Merit budget, up to 7 Flaw points in total.

Physical Flaws

Flaw	Points	Effect
Addiction	1 per dot, max 5	You need a substance or experience to function at your best. Each dot makes the dependency, and going without, worse.
Blind	7	You cannot see. Sight-based rolls are impossible or made at a severe penalty. Other senses may compensate over time with Storyteller approval.
Chronic Pain	1 per dot, max 3	Once you take any damage in a scene, each dot adds a penalty die to your physical rolls for the rest of it.
Clumsy	1 per dot, max 3	Each dot adds a penalty die to Dexterity rolls that need quick or delicate movement.
Deaf	5	You cannot hear. Hearing-based rolls are impossible, and social rolls that depend on speech suffer heavy penalties.
Frail	1 per dot, max 2	Each dot removes one of your Lethal health boxes.
Glass Jaw	1 per dot, max 3	Each dot lowers your BDT by 1.
Missing Limb	3 for a hand or foot, 5 for an arm or leg	Effects depend on the limb and the Storyteller. Automaton prosthetics are common in Terrana, and some people prefer them.
Sickly	1 per dot, max 3	Each dot adds a penalty die to rolls to resist disease and poison.
Slow	1 per dot, max 3	Each dot lowers your Initiative by 1.

Social Flaws

Flaw	Points	Effect
Awkward	1 per dot, max 3	Each dot adds a penalty die to social rolls with strangers.
Dark Secret	1 per dot, max 4	Something you are hiding. Each dot raises how bad it is and what happens if it comes out.
Debt	1 per dot, max 3	You owe someone powerful. Each dot raises the size of the debt and the threat of not paying.
Enemy	2, 3, or 5 (1 to 3 dots)	A named enemy who grows more powerful with each dot. The Storyteller controls them and brings them in at dramatic moments.
Honest to a Fault	3	You cannot tell a deliberate lie. Subterfuge rolls to deceive automatically fail.
Infamous Family	1 per dot, max 3	Each dot adds a penalty die to social rolls with anyone who knows your family name.
Notoriety	1 per dot, max 3	Each dot adds a penalty die to social rolls with groups who know your bad reputation.
Outcast	1 per dot, max 3	Your own people have cast you out. Each dot adds a penalty die to social rolls with your heritage or home community.
Sworn Rival	2	Someone your equal is determined to beat you and keeps turning up to try. The Storyteller controls them.
Ward	1 per dot, max 3	Someone depends on you completely. Each dot makes them more vulnerable and more trouble.

Mental Flaws

Flaw	Points	Effect
Absent-Minded	1 per dot, max 3	Each dot adds a penalty die to rolls to remember details, plans, or where you left things.
Amnesia	2 to 5 (1 to 4 dots)	Gaps in your memory. Each dot makes them larger and more of your past unreachable.
Compulsion	1 per dot, max 4	A behavior you cannot easily resist. Each dot makes it trigger more often and harder to suppress.
Gullible	1 per dot, max 3	Each dot adds a penalty die to Insight rolls to spot a lie.
Haunted	2 to 4 (1 to 3 dots)	Something follows you: a spirit, a curse, a recurring event. It worsens with each dot, and the Storyteller controls it.
Insomnia	1 per dot, max 2	Each dot lowers the Bashing damage you heal from a long rest by 1.
Nightmares	1 per dot, max 2	Each dot lowers the Willpower you regain from rest by 1.
Paranoid	1 per dot, max 3	Each dot adds a penalty die to rolls to trust or work with others, including helping them.
Phobia	1 per dot, max 4	An irrational fear of something specific. Each dot makes it more crippling when triggered.
Reckless	2	You must pass a Composure roll to retreat or hold back from danger.

Magical Flaws

Flaw	Points	Effect
Cursed	2 to 7, by curse	A magical curse. At 2 points it is an inconvenience; at 7 it defines your life. Choose one of the Curses below or design your own with the Storyteller.
Magic Averse	1 per dot, max 7	Each dot locks you out of one of the seven casting schools. Choose them at creation with Storyteller approval.
Mana Beacon	2	Your mana can be sensed from far away. Spirits, voidlings, and anyone hunting magic find you more easily.
Mana Deficient	1 per dot, max 5	Each dot lowers your Mana Pool by 2.
Mana Leak	1 per dot, max 3	Each dot drains 1 mana from your pool during every Upkeep Phase.
Mana Sensitive	1 per dot, max 3	Each dot adds a penalty die to all rolls in areas of high ambient mana, and mana sickness affects you sooner.
Slow Channel	1 per dot, max 3	Each dot lowers your Maximum Mana Per Turn by 1.
Unstable Magic	1 per dot, max 3	Your spells can misfire. At 1 dot, a casting roll with three or more 1s misfires; at 2 dots, two or more; at 3 dots, any 1. The Storyteller decides what goes wrong.
Void Touched	3	You were exposed to Void energy. Voidlings notice you more readily, and you take a penalty die on rolls to resist Void effects.
Wild Mana	2	Whenever you add extra mana to a roll, roll one die. On a 1 the extra mana is spent but adds nothing.

Curses

Choose one of these curses or design your own with the Storyteller. They come in three tiers: an inconvenience (2 or 3 points), a burden (4 or 5 points), and a curse that defines your life (6 or 7 points). Any curse can be broken in play, usually as the goal of a story.

Hex of Small Misfortunes (2 points): Once per session, the Storyteller can turn one of your successful rolls on a minor task outside combat into a failure. It can only cause a small inconvenience, such as a dropped key, a snapped bootstring, or ink spilled on a letter, never real harm or the loss of a scene.

Beast's Dread (3 points): Animals hate you. You take a penalty die on Ride and on any roll to calm, train, or bond with a creature, and mounts throw you when startled.

Ill-Starred (4 points): The first Fate point you spend each session does nothing.

Withering Flesh (5 points): Healing magic and potions heal 1 less box on you. Wounds that heal naturally leave scars people notice.

The Thing That Follows (6 points): Something bound to the curse, such as a spirit, a voidling, or a dead rival, keeps finding you. The Storyteller brings it into every story arc.

Creeping Doom (7 points): The curse is slowly winning. The Storyteller marks a tally each session. When it fills, something terrible happens, such as a death, a transformation, or a great loss, unless the curse is broken first.

Special Powers

Some characters arrive with something that fits no standard category: a power so specific and so significant that it defines them. These are the big ones, the potentially game-changing ones, borrowed from other stories, other worlds, or invented from scratch.

Special Powers cost 7 points per dot, with a maximum of 2 dots at creation (14 points). Whether more dots can be bought with XP later is entirely up to the Storyteller. Storyteller approval is required for everything in this section, and the Storyteller may change costs, add conditions, or say no if a power does not fit the campaign.

A power this big rarely comes without strings. Consider pairing it with the Devil's Bargain flaw.

Special Powers

Power	Cost	Effect
Devil's Fruit	7 per dot, max 2	Inspired by One Piece. A single transformative power of the Logia, Paramecia, or Zoan type. The player proposes it and the Storyteller sets it. You cannot swim without a heavy penalty.
Shadow Monarch	7 per dot, max 2	Inspired by Solo Leveling. Raise defeated enemies as shadow soldiers whose strength scales with your dots. Requires at least 1 dot in Shade Magic.
Bankai Potential	7 per dot, max 2	Inspired by Bleach. Your main weapon holds a dormant spirit. Awakening it in play unlocks a powered-up form designed with the Storyteller.
Titan Shift	7 per dot, max 2	Inspired by Attack on Titan. Transform into a massive, powerful form for a number of turns per session equal to your dots. You are exhausted when it ends.
Cursed Energy	7 per dot, max 2	Inspired by Jujutsu Kaisen. A personal cursed technique designed with the Storyteller. At higher ranks each use costs 1 Sanity.
Nen Awakening	7 per dot, max 2	Inspired by Hunter x Hunter. Your Nen is awakened as an Enhancer, Emitter, Transmuter, Conjurer, Manipulator, or Specialist, and your type shapes a unique ability designed with the Storyteller.
Witch Factor	7 per dot, max 2	Inspired by Re:Zero. You carry the essence of one of the Witches of Sin: extraordinary power tied to that sin, with consequences that grow the more you use it.
Breath Style	7 per dot, max 2	Inspired by Demon Slayer. A breathing technique that floods your body with power for a number of turns per scene equal to your dots, with extra effects against monsters and demons. Designed with the Storyteller.
Unique Skill	7 per dot, max 2	Inspired by That Time I Got Reincarnated as a Slime. A gift from your arrival in Terrana, such as an analysis voice like the Slime King's Great Sage, or a skill that devours and copies what it consumes. Designed with the Storyteller.
Devil's Bargain (Flaw)	3, 5, or 7 points back (1 to 3 dots)	Pairs with the powers above. You gained something extraordinary and owe something in return: a debt, a limit, or a weakness built into the power. Choose one of the Devil's Bargains below or design your own with the Storyteller.

Devil's Bargains

Choose one of these bargains or design your own with the Storyteller. Each is a debt, a limit, or a weakness. 1 dot gives 3 points back, 2 dots give 5, and 3 dots give 7. A bargain can be paid off or broken in play, but whoever holds the contract wrote it carefully.

One Favor Owed (1 dot, 3 points): Once per story arc, your patron can call in a favor. Until you do it, your power does not work.

The Price of Use (1 dot, 3 points): Each use of the power costs 1 Willpower.

The Tithe (2 dots, 5 points): Your patron feeds on you. Your Mana Pool is 3 lower.

The Bane (2 dots, 5 points): Choose one thing, such as silver, holy ground, running water, or a spoken name. While you touch it or stand in it, the power fails and you take a penalty die on everything.

Soul Collateral (3 dots, 7 points): Your soul belongs to your patron. If you die, you cannot be Resurrected without the patron's consent, and the patron always names a price.

The Contract Comes Due (3 dots, 7 points): The bargain has an end date set with your Storyteller. When it arrives, you pay in full or lose the power forever, and the patron comes to collect.

Arcane Enhancements

Arcane Enhancements, or augmentation, are a special merit open to every character, but they are most common in the Corporate Kingdoms of Shirone, Kikka, and Sanika on the Central Continent, where back-alley augmentation shops make them easier to get than anywhere else in the world.

Each enhancement is its own merit with its own cost, recorded as a separate entry in your Merits section. You may take up to two enhancements at creation. More can be added later at the Storyteller's discretion. In the Corporate Kingdoms, part of the XP cost is replaced by in-game costs, such as jobs, debts, or trades with whoever performs the work, so the XP cost there is lower than anywhere else.

The body's magical channels have limits, and augmentation permanently takes up part of that capacity. Every enhancement lowers your Maximum Mana Per Turn by 1. Heavy enhancements lower it by 2.

A bonus dot from an enhancement is added on top of the trait. It does not change the trait's own dots, so the Golden Rule does not limit it, and it can take a trait past its normal cap. Note Arcane next to the trait on your sheet and write the bonus in its bonus space.

Enhancements

Enhancement	Cost	Effect
Prosthetic Limb	4	A working automaton limb that replaces a lost one and removes the Missing Limb penalty.
Filter Lungs	4	Immune to airborne poisons and gases, and you can hold your breath for 10 minutes.
Optic Implants	4	See in darkness, and add a bonus die to sight-based Perception rolls.
Skill Chip	4	+1 bonus dot to one Ability.
Reinforced Bones	5	+1 to your BDT.
Hidden Blade	5	A retractable weapon built into your arm. It cannot be disarmed and passes searches.
Spring Legs	5	Leap one zone straight up or over an obstacle as part of your move.
Muscle Weave	6	+1 bonus dot to Strength or Fortitude.
Reflex Wiring	6	+1 bonus dot to Dexterity or Perception.
Neural Link	6	+1 bonus dot to Intelligence or Wisdom, and you can interface directly with implements.
Subdermal Plating	7, heavy	+2 to your BDT. It stacks with worn armor.
Jump Jets	8, heavy	Mechanical flight at double your movement. You must use all of your movement every turn or begin to fall.
Mana Capacitor	8, heavy	Stores up to 5 mana outside your pool, which you can draw on in any turn.

Chapter 10: Backgrounds

Backgrounds are the circumstances of your character's life rather than anything inside them. Attributes describe your body and mind, and Abilities describe what you have learned. Backgrounds describe what surrounds you: the people who know you, the resources you can draw on, the reputation you carry, and the networks you move through. They are not you, but they shape what you can do in the world in ways raw ability cannot.

Spending Points: At character creation you have 7 points to spend on Backgrounds, plus any points left over from Merits and Flaws. Freebie Points can also buy Backgrounds at 1 point per dot. Backgrounds are rated up to 7 dots, but no Background can be filled above 5 at creation.

Resources: Every character starts with 1 free dot of Resources, the basic financial footing any working person in Terrana has. More dots are bought normally.

After Creation: Backgrounds cannot be bought with XP. The Storyteller may award Background dots for what you achieve in play: relationships built, resources won, reputations earned.

On Your Sheet: Fill Backgrounds from the top of the Merits, Flaws, and Backgrounds section downward, so they stay apart from your Merits and Flaws, which fill from the bottom up. Guild Standing is recorded under Guilds and Memberships on your OurSpace page.

The list below covers the most common circumstances. If your concept needs a resource or relationship not on it, work one out with your Storyteller. Some Backgrounds, such as Hacker and Subscribers, belong to the modern era and may not exist in games set in another era.

Background List

Like nearly everything in the game, Backgrounds are rated from 1 to 7 dots, and 7 dots is truly enormous. No Background can be filled above 5 at character creation, and 5 is already very high by most measures. Dots 6 and 7 are only reached through play.

Backgrounds

Background	Description
Allies	Reliable people who will actively help you when asked. Define each ally's field or affiliation at creation. Each dot is either a new ally or a more powerful one. 1 dot is a capable friend; 3 dots is someone with real power or several solid friends; 5 dots is a person of major influence who will go to bat for you. 7 dots is one of the most powerful people in the world in your corner. Allies have their own lives and limits. They are not servants.
Contacts	People who feed you information in a chosen field. They will tell you things, but they will not take risks for you. Each dot is a broader network or a deeper source. 1 dot is a single useful source; 3 dots covers a city's worth of whispers in your field; 5 dots means little in your field happens without you hearing of it. 7 dots is an intelligence network that rivals a kingdom's.
Fame	How widely you are known, and for what. 1 dot is local recognition in one community; 3 dots is a name known across a continent in your field; 5 dots is a name that opens conversations in places you have never been. 7 dots is a name known in every corner of Terrana, a living legend.

Background	Description
Fixer	Someone who works outside normal channels and makes things happen: finding work, solving problems quietly, and connecting people. 1 dot is a local fixer for small jobs; 3 dots can find serious work and make big problems vanish within a region; 5 dots has reach across continents. 7 dots can arrange almost anything, anywhere, for the right price. A fixer has their own interests and their own prices.
Followers	People personally loyal to you or your cause, not hired staff. They take risks that Contacts will not, but they are not trained soldiers or specialists. 1 dot is a handful of devoted friends; 3 dots is a small movement; 5 dots is a following large enough to fill a town square. 7 dots is a movement that spans nations.
Hacker	Your skill at getting into and moving through the CCN and the crystal-based systems that run the modern world. Hacking has existed in any real form for only twenty to thirty years. 1 dot is basic access and navigation; 3 dots gets you through most secured systems with time and patience; 5 dots reaches systems their builders believe are unreachable. 7 dots treats the CCN itself as an open book. Every use needs tools and time, and the Storyteller decides what is possible.
Influence	Pull within one institution, organization, or power structure, defined at creation. 1 dot opens doors that would otherwise stay closed; 3 dots gets real favors done; 5 dots means the institution moves when you push it. 7 dots means you effectively control it.
Mentor	A more experienced person invested in your growth. Each dot reflects both their power and how committed they are to you. 1 dot is a capable teacher with limited reach; 3 dots is a respected master; 5 dots is someone the whole world pays attention to. 7 dots is one of the Seven Strongest, or someone of that standing.
Nobility	You were born into a noble family. 1 dot is minor local nobility with a small estate and a name that matters in one town; 3 dots is an established house with regional reach; 5 dots is high nobility with continental recognition and political weight. 7 dots is a literal monarch or head of state, such as a king or president.
Resources	Wealth, income, and lifestyle. Every character starts with 1 free dot. 1 dot is a modest life: a one-bedroom apartment or a dorm room and the basics covered; 3 dots is wealthy by most standards; 5 dots is generational wealth or a major business. 7 dots is wealth on the scale of a Corporate Kingdom. Monthly income, starting funds, and the cost of living are in Chapter 14; track the money you have on hand next to Resources on your sheet.
Retainers	Staff, employees, or trained assistants in your service. Unlike Followers they are professionals: they do the job well, but their loyalty is to the job. Each dot is more retainers or more capable ones. 1 dot is a single assistant; 3 dots is a small skilled staff; 5 dots is a household or company of experts. 7 dots is an organization of hundreds working for you.
Safe House	Secure places to hide, rest, or lie low. Dots can make one location better or, if you say so at creation, add more locations. 1 dot is a single clean, hidden spot with basic supplies; 3 dots is well equipped for a long stay with some defenses; 5 dots is a fortified, fully supplied base for long-term concealment. 7 dots is a hidden stronghold no one has ever found.
Street Cred	Respect within a community or scene you define with the Storyteller. It does not have to be criminal: deep roots in a neighborhood or real standing in an underground scene both count. 1 dot is local respect; 3 dots carries weight across a city or region; 5 dots means people who have never met you know what you stand for. 7 dots makes you a legend of your scene worldwide.
Subscribers	An engaged audience that follows you on the CCN, as a creator, public figure, or someone whose life simply caught people's attention. 1 dot is a modest local following; 3 dots is an audience across several regions; 5 dots is reach large enough to move public opinion. 7 dots is one of the biggest names on the CCN. Fame is general recognition; Subscribers is an audience that follows your output. You can have either without the other.

Guild Standing

Guilds are how the modern world organizes itself, and in Monsera they are the government: every citizen 18 or older may join one, and membership is how a citizen gains a political voice. Seats in the parliamentary cabinet are divided among the ten cabinet guilds. Guilds also operate outposts well beyond Monsera.

Guild Standing measures your rank and pull within one guild. Take it separately for each guild you belong to, and record each one with its dots under Guilds and Memberships on your OurSpace page. Being a member at all is free and needs no dots; Guild Standing is what makes the guild work for you.

Limits: Guild Standing is rated from 1 to 7. The Storyteller sets how many dots can be bought in each guild at creation; in most games the limit is 3 dots in any one guild. Higher standing is earned in play.

The Hero Rangers Corps: The HRC is not a cabinet guild, but it works like one for this Background. Your Guild Standing in the HRC is your rank in the Corps, from Rank 1 trainee to Rank 7 Titan candidate (Chapter 3).

Ranks of Standing

Dots	Standing
1	Member in good standing. You can use the guild's halls, job boards, and services, and other members treat you as one of their own.
2	Respected. You are known within your local chapter, trusted with better work, and can call on fellow members for small favors.
3	Officer. You hold a recognized post in your chapter, can vouch for others, and have a say in local guild business.
4	Chapter head. You lead a local chapter or outpost and can direct its members and resources.
5	Regional leadership. You help run the guild across a region or continent.
6	High council. You sit on the guild's highest council and shape its direction worldwide.
7	Guild head. You lead the guild and hold its seat in Monsera's cabinet.

The Guilds

Guild	Members and Work
Adventurers	Delvers, monster hunters, and explorers. Runs job boards, outposts, and bounties throughout the world.
Arts	Performers, artists, writers, and entertainers, from street musicians to CCN stars.
Farmers	Growers, ranchers, and food producers who feed Monsera and its trade partners.
Hero Rangers Corps	Monsera's military corps against the Rift and its Kaiju, with outposts in every nation. Standing is your Corps rank.
Healers	Doctors, clinics, and healing mages, including curse removal and advanced care.
Laborers	Builders, haulers, miners, and the workers who keep the city running.
Mages	Spellcasters, enchanters, and magical researchers. Keepers of the heptagram.
Makers	Smiths, engineers, and crafters of implements, machines, and gear.
Merchants	Traders, shopkeepers, bankers, and the moneyed interests of Monsera.
Navigators	Sailors, pilots, guides, and anyone who moves people and goods across land, sea, and sky.
Scholars	Researchers, archivists, teachers, and translators.
Thieves (unofficial)	Extralegal and unrepresented, with no cabinet seat. Speaks its own secure dialect, Thieves' Cant. Its members do not advertise their standing.

Chapter 11: Willpower, Fate, Sanity, and Mana

Willpower, Fate, Sanity, and Mana sit outside the normal attribute and ability system. Willpower, Fate, and Sanity are never bought with Freebie Points or XP; they are built and lost through play. Mana is the exception: it can be bought, but only at a steep price. Together these four stats describe the deeper texture of who your character is and what the world asks of them across a campaign.

Every character starts with 5 dots each in Willpower, Fate, and Sanity (Willpower may start at 4 or 6, depending on your highs), and 1 dot of Mana.

Dots and Boxes

Willpower, Fate, and Sanity are each tracked with a row of 10 dots and, beneath it, a row of 10 boxes. The dots are your rating: it can never go above 10. The boxes are a running record of what has happened to that stat in play. They do not reset when you rest, after a session, or at the end of a story chapter. They only change when new marks are added.

A box can be in one of three states: blank, checked, or marked with an X.

Checks: Gains, growth, and healing are marked with checks, filling the row from left to right.

X's: Damage, spending, and loss are marked with X's, filling the row from right to left.

A Mixed Row: When the row is full of checks and X's together, a new check replaces the X nearest the checks, and a new X replaces the check nearest the X's. Each side pushes against the other.

A Full Row: When all 10 boxes are checks, gain 1 dot. When all 10 are X's, lose 1 dot. Either way, erase every mark in the row and start fresh.

Dots can only change through a full row (and a few Merits, Flaws, and Storyteller awards). None of the three can ever go above 10 or below 1. Like an attribute, the last dot can never be lost: a full row of X's at 1 dot is erased, but the dot stays.

Willpower

Willpower is your character's mental and emotional resilience. It is the resource you spend when you need to push past your limits, and the health track you protect when someone tries to break you with words instead of weapons.

Starting Willpower

Willpower starts at 5 dots. If both of your highs are Vices, it starts at 4; if both are Virtues, it starts at 6; one of each leaves it at 5. The Iron Will Merit adds 1 dot per dot of the Merit, up to 3. After creation, moving on the scales never changes your Willpower dots.

Spending Willpower

You can spend 1 Willpower per turn. Spending it takes no action. Mark 1 X and choose one:

Push: Before a roll, add 3 dice to it.

Reroll: After a roll, reroll up to 3 failed dice.

You can keep spending even when your row is mostly X's. If the row fills with X's, you lose a Willpower dot and erase the row. Some Battle Aura techniques at Rank 4 and higher can be paid with Willpower instead of mana (Chapter 13). That payment is separate from this once-per-turn spend, and each point still marks an X.

Taking Willpower Damage

Willpower damage marks X's, the same as spending. It comes from:

Social combat: Willpower is the health track for social combat (see below).

Acting against your scales: Any violation at a Low Virtue or Low Vice, and minor violations at a High position, cost Willpower (Chapter 7, Part 2).

Small scale shifts: When the Storyteller moves one of your scales a short way.

Social Combat

In social combat, the attacker rolls a Social Attribute plus a relevant Ability. The defender rolls Willpower plus Composure. Each success the attacker has over the defender deals 1 Willpower damage. How each side acts can earn bonus or penalty dice from their scales.

A social combat ends when either side fills their row with X's (losing a Willpower dot, or erasing the row at 1 dot), or when 5 or more damage is dealt in a single retort. A defender who rolls 5 or more successes over the attacker makes a Critical Comeback: the attacker loses momentum and the exchange ends in the defender's favor.

Regaining Willpower

Resting does not erase X's. Willpower is regained by earning checks, which push the X's back. The Storyteller awards checks when your character acts meaningfully on their Driving Factors or Trope, holds firm on what they believe at a real cost, or takes genuine time off to do things they love after a demanding job. A session where a character fully embodies their drive earns more than one where they only touched on it.

Fill the whole row with checks and you gain a Willpower dot.

Fate

Fate is your character's karmic weight in the world: how deeply they are woven into the story of Terrana and how much they can bend it. Where Willpower is for tackling the thing right in front of you, Fate is your ability to weave the world's story in your favor, and to stand against outcomes that seem preordained.

Fate is not spent. It is built and lost through how much influence your character has in the world.

How Much Fate

Player characters start at 5 dots simply by being reincarnates: arriving in this world from another is itself a significant karmic event. The average person has about 3. Kings and other figures of great worldly power typically have 8 or more. Death itself has a Fate of 10.

Building and Losing Fate

Checks: Making plans that succeed, striking and keeping deals, taking opportunities, forming ties with important people, and engaging with the forces that shape history.

X's: Plans that fail, broken deals, opportunities ignored, refusing the requests of powerful people, and losing a Fate contest.

A full row of checks gains a Fate dot; a full row of X's loses one. Fate can never fall below 1.

Bending the Story

When your character works with the flow of the world, asking it for something it has no reason to refuse, the Storyteller should generally let Fate carry the moment without a roll. A dying friend getting to see the flowers bloom one more time is a story the world is willing to tell.

When your character pushes against something with its own Fate, the two meet in a Fate contest.

Fate Contests

Both sides roll their Fate dots as a dice pool. The side with more successes gets its way; the defender wins ties. The winner marks a check and the loser marks an X.

Opposing Fate can be pooled. A character trying to stop a death rolls against Death's 10. A character trying to stop an arranged royal wedding rolls against the combined Fate of the two kingdoms behind it, which may be 16 dice or more. Challenging the groom to a duel instead is not a Fate contest at all; it is just a duel.

Fate is fickle. Pushing against forces far heavier than you is a quick way to lose it, and learning when Fate is worth testing is part of the game.

Sanity

Sanity is your character's connection to reality, their psychological stability, and their capacity to process what the world puts in front of them. Most of Terrana can be managed. Voidlings are different: their existence is hostile to the ordered mind, and parties that face them regularly need to look after each other.

Sanity damage accumulates differently from physical or social damage and heals differently. Lost Sanity changes who the character is, not just what they can do. Your Sanity dots are also your dice pool for resisting Voidling horror and other Void effects.

Taking Sanity Damage

Sanity damage marks X's. It comes from:

Severe violations at a High position: acting fundamentally against a High Virtue or High Vice (Chapter 7, Part 2).

Significant scale shifts: when the Storyteller moves a scale a long way.

The Void: exposure to Voidlings and Void phenomena, whatever happens to the body.

Resisting a compulsion: sustained resistance to a vampire's compulsion without resolution.

Some powers: a few Merits and spells cost Sanity to use.

Healing the Mind

Sanity heals by living life and having fun, marked with checks. What heals the mind varies from person to person, so this is intentionally broad: acting on your Driving Factors over time, spending real time with people you care about, or some form of therapy that fits the character. That might be an actual therapist, a fortune teller, a night drinking with friends, a hot spring, or a creative hobby. The Storyteller decides how many checks it earns based on how genuinely the character engaged, not just whether they went through the motions.

Losing Sanity Dots

Every character starts at 5 Sanity. When a full row of X's costs a dot, the player and Storyteller give the character a mental trauma shaped by what caused the loss. It may change how they interact with the world, and it grows more extreme the lower Sanity falls.

5 or higher: Stable. No trauma.

4: A phobia or lasting quirk tied to what caused the loss.

3: A serious trauma that shapes how the character acts and reacts.

2: A severe trauma that can take over in moments of stress.

1: The player loses control. The Storyteller runs the character until long-term care brings them back.

Sanity can never drop below 1. Like an attribute, losing the last dot would mean the character no longer exists.

Gaining Sanity Dots

A full row of checks gains a dot and a deeper, more resilient hold on reality. Recovering a dot can soften or remove a trauma. At 10, the character's grasp of reality is so complete that they no longer see the world the way ordinary people do. The player loses control, and the Storyteller runs the character.

Mana

Everything in Terrana carries mana: rocks, trees, insects, rivers, and the air between things. It is the fundamental substance of the world and the medium magic moves through. Anyone raised here has at least 1 dot from growing up surrounded by it. To someone who arrives with none, the same ambient mana is closer to poison.

Mana Dots

Mana is rated from 1 to 10 dots, the only trait with ten. Every character starts with 1. At creation it can only be raised with Freebie Points, at 7 points per dot, and the Golden Rule still applies. After creation, each dot costs the new dot x7 in XP. Mana counts toward your Level.

Mana Pool

Mana Pool = (Magic dots + Circle Magic dots + every Magical Knowledge dot) x Mana.

Every Magical Knowledge counts: casting schools, Battle Aura, the Circle Magic disciplines, and Heritage magic, including each Vampiric Power a vampire learns. For example, Magic 1, Circle Magic 4, Battle Aura 2,

Summoning Magic 3, and Blood Sorcery 3 make 13, so with Mana 2 the pool is 26. Learning Celerity at 1 dot raises it to 28. With no dots in any of these, your pool is 0. Some items let other abilities, such as Alchemy, Attunement, or Implements, count too. The Mana Reservoir Merit and Mana Deficient Flaw adjust the pool.

Maximum Mana Per Turn

Max Mana Per Turn (M/T) = Fortitude + Mana.

This is the most mana you can safely spend in one turn, however large your pool is. Upkeep costs paid during the Upkeep Phase count toward it. Attuned effects and items hold part of it for as long as they are active, and some Arcane Enhancements lower it permanently.

Spending Mana

Mana pays for spells, techniques, and other magical effects. Mana can also enhance a roll at 1 die per mana, declared before rolling and assigned to the attack or the damage roll. Spending mana to boost anything is always limited to your dots in that magic or combat ability, or your M/T, whichever comes first.

Attuned and Committed Mana

Attuned: Artifacts, augmentations, and attuned default abilities hold part of your M/T while active. No further mana is needed to use them.

Committed: Persistent effects cost their upkeep (the spell's cost minus 1) every Upkeep Phase, and that upkeep counts toward your M/T.

Ending an attuned or committed effect returns that mana to your M/T during the following Upkeep Phase.

Running Dry

A character who spends their pool down to 0 drops unconscious and is Incapacitated until they recover mana. A character whose pool is 0 only because they have no dots in Magic or Circle Magic is not affected.

Mana Recovery

In combat you recover mana during each Upkeep Phase, based on your Mana dots, plus 1 if you took damage since your last turn. Recovery never takes you above your pool. Outside combat, a few minutes of rest refills the pool, so unless a party fights battle after battle without a break, they start every encounter full.

Mana Dots	Per Upkeep Phase
1 to 3	1 mana
4 to 6	2 mana
7 to 8	3 mana
9	4 mana
10	5 mana
Took damage	+1 mana

Mana Burn

You may choose to spend more than your M/T in a single turn, but every mana over the limit burns. Filling all of your Aggravated boxes through Mana Burn knocks you incapacitated immediately. Any Mana Burn that deals even 1 Aggravated leaves a permanent Mana Burn mark; what it looks like, how visible it is, and whether it changes anything are up to the Storyteller. Repeated burns can leave lasting deformities.

Over M/T	Damage
1	1 Bashing
2	1 Lethal
3	1 Aggravated
4	2 Aggravated
5 or more	3 Aggravated, +1 per mana over 5

Mana Sickness

1 dot of Mana covers the world's baseline density comfortably. Some places are far denser: ancient magical sites, areas near Void openings, and places where something significant happened to the local mana. Elevated density deals Bashing damage; extreme concentration deals Lethal. The Storyteller decides what counts as elevated or extreme.

Direct summons from other worlds who arrive with no Mana take Bashing damage from the world itself until they develop 1 dot through play.

Mana and Voidlings

Voidlings feed on mana. Ambient mana sustains them at a basic level, but strong Mana signatures draw them. A party with several high-Mana characters in Void-adjacent territory should expect concentrated Voidling attention.

Mana After Death

When a character dies without choosing to, the mana they held counts down by 1 each day, and resurrection is possible until it runs out (Chapter 13).

Chapter 12: Martial Combat Styles

In This Chapter

The Basics **2**

Introduction 2

How Styles Work 2

Learning Styles 2

The Styles at a Glance 2

Combat Terms 3

Styles and Battle Aura 3

The Twelve Styles **4**

Quickcut Style (Short Blades) 4

Silver Arc Style (Long Blades) 5

Timberfall Style (Axes) 6

Heron's Reach Style (Polearms) 7

Wallguard Style (Shields) 8

Ten Count Style (Boxing) 9

Drifting Leaf Style (Kung Fu) 10

Main Event Style (Wrestling) 11

Windreader Style (Bows) 12

Sundown Style (Hand Guns) 13

Iron Rain Style (Large Guns) 14

Dragon's Blade Style (Natural Weapons) 15

Not every fighter in Terrana casts spells. Sword schools, fight pits, hunting lodges, and drill yards all pass down their own ways of fighting, and a master of one is as dangerous as any mage. A Combat Style is one of those traditions: a single form of combat, trained from the first lesson to mastery.

Each Style covers one form, such as short blades, polearms, or boxing. Every dot teaches something new, in a fight or outside one. The knife fighter learns to skin game before learning to throw a blade, and the wrestler learns to work a crowd long before the piledriver. Styles are built to pair with Battle Aura, which pours fighting spirit into whatever Style a character practices.

How Styles Work

Ranks: A Style has seven dots, named on the Rank Scale used across the character sheet: Elementary, Intermediate, Advanced, Saint, Royal, Imperial, and Divine (F through S).

Pools: Every Style lists a Primary pool, used for its attacks, and a Secondary pool, used to defend or support. Both are an Attribute plus an Ability.

What Each Dot Gives: Every rank has a Default Ability and two Options. When you buy the dot, you gain the Default Ability and pick Option A or Option B for free.

The option you did not pick is not lost: you can buy it later for Rank x2 XP, without raising the Style again.

Use: Every entry is marked Combat, Outside combat, or Both, the same as spells.

Your Dots: When an entry says "your dots," it means your dots in that Style. A bonus to your own rolls or an ally's rolls equals your dots. A bonus to BDT equals half your dots, rounded up. Penalties a technique puts on an enemy never scale: they stay at the flat amount written.

Learning Styles

At Creation: In Step 10, your Physical column decides how many Combat Style dots you spend: 7 for Affinity, 5 for Standard, or 3 for Aversion. Spread them across any Styles you like. The Golden Rule applies, so no Style can go above 5 dots at creation. Mark every Style you take in this step with a P for Primary.

Freebie Points: Combat Style dots cost 4 Freebie Points each. A new Style bought with freebies is marked with an S for Secondary.

XP: A Primary Style costs the new dot x5. Any other Style costs the new dot x6. The option you did not pick at a rank costs Rank x2 XP.

Divine and the God Titles: Reaching the Divine rank makes you one of the finest practitioners alive, but titles such as Sword God or Water God are not ranks of a Style. They are won and held (Chapter 5).

The Styles at a Glance

Style	Form	Primary Pool	Secondary Pool
Quickcut Style	Short Blades	Dexterity + Melee	Dexterity + Stealth
Silver Arc Style	Long Blades	Dexterity + Melee	Perception + Dodge
Timberfall Style	Axes	Strength + Melee	Fortitude + Endurance
Heron's Reach Style	Polearms	Dexterity + Melee	Perception + Awareness
Wallguard Style	Shields	Strength + Melee	Fortitude + Endurance
Ten Count Style	Boxing	Strength + Martial Arts	Fortitude + Endurance
Drifting Leaf Style	Kung Fu	Dexterity + Martial Arts	Perception + Dodge
Main Event Style	Wrestling	Strength + Martial Arts (or Athletics)	Fortitude + Endurance
Windreader Style	Bows	Dexterity + Ranged	Perception + Awareness
Sundown Style	Hand Guns	Dexterity + Ranged	Perception + Awareness
Iron Rain Style	Large Guns	Fortitude + Ranged	Strength + Athletics
Dragon's Blade Style	Natural Weapons	Dexterity + Martial Arts	Perception + Dodge

Combat Terms

Zones: Only one creature or object can be in a zone. Melee attacks reach adjacent zones, so "all adjacent zones" means everyone right next to you. A charge or leap always ends in an empty zone.

One Attack Roll: A technique that hits several targets, or the same target several times, still makes a single attack roll. Each target, and each strike, defends against that roll separately.

Counter: When your defense roll beats an attack, a Counter lets you strike back using that same defense roll as your attack roll. The attacker defends normally, and has to be within reach of your weapon.

Armor Penetration: BDT is Fortitude + Armor, plus any magic that raises it. Fortitude here includes Resilience and any other bonus to Fortitude. Armor Penetration lowers the Armor part of the target's BDT by the amount listed, for your hit only, and their LDT and ADT drop with it. Full Armor Penetration ignores the whole Armor part. It never lowers Fortitude.

Magic Penetration: Works the same way on the magic part of a BDT: points added by spells, enchantments, or magical gear.

Stacking Penetration: Penetration from different sources adds together, but neither kind can take its part of a BDT below 0.

Lowering Armor: Some techniques lower a target's Armor for the rest of the scene. That damages their gear, so it helps everyone attacking them, unlike Armor Penetration, which only applies to your own hit.

Called Shots: Aiming at a specific limb, weapon, or vital spot costs -2 dice on the attack roll. Its effect only happens if the attack hits.

Range: Melee weapons hit adjacent zones, or one zone farther with Reach. Thrown weapons go up to double your Strength in zones. Bows, guns, and ranged spells can hit anywhere you have line of sight to; half cover gives -2 dice (Chapter 14).

Conditions: Bleeding, Prone, Rooted, and Grappled work as written in the Conditions rules. A Bleeding effect from a Style has a rating equal to your dots. When a technique makes a target lose AP on their next turn, that is how a stun works in Terrana.

Styles and Battle Aura

Battle Aura is built to work with every Style. Its attack techniques roll the Attribute + Ability of the Style you are fighting with, plus your dots in that Style. With its second dot, Battle Aura gives Aura Edge, an attuned ability that adds Armor Penetration and Magic Penetration to your weapon and unarmed attacks. Aura Edge stacks with any Armor Penetration your Style gives (Chapter 13).

Quickcut Style

Short Blades

Small blades: get close, cut what matters, and be gone before the other side reacts.

Covers: daggers, knives (skinning knives and work knives too), stilettos, short swords, throwing knives.

Primary: Dexterity + Melee **Secondary:** Dexterity + Stealth

Rank 1: Elementary

Default Ability: **Skinner's Hands** *(Outside combat)* You're skilled at field-dressing, skinning, butchering, and knife work (whittling, cutting rope, scraping hides). Add your dots to rolls to skin or harvest a creature. Each success also saves one extra usable part (hide, sinew, horn, or gland).

Option A: **Quick Hands** *(Combat)* Drawing or swapping to a short blade costs no AP. Add your dots to initiative if you start combat with one in hand.

Option B: **Find the Gap** *(Combat)* Add your dots to attack rolls against a target that hasn't acted yet this round.

Rank 2: Intermediate

Default Ability: **Throwing Edge** *(Both)* You can throw any short blade using this Style's Primary pool, at a target up to double your Strength in zones away. It works outside a fight too, to hunt small game or cut a rope.

Option A: **Twin Grip** *(Combat)* Wield a short blade in each hand. When you attack with both, add your dots to that one attack roll.

Option B: **Pin and Run** *(Combat)* When a thrown blade hits, spend 1 AP to pin the target's clothing or foot. They're Rooted until the end of their next turn.

Rank 3: Advanced

Default Ability: **Hidden Steel** *(Both)* You get one extra Belt slot (slot 4), which can only hold short blades. Drawing from it costs no AP. Add your dots to rolls to keep a blade hidden when you're searched.

Option A: **Opening Cut** *(Combat)* On a hit, spend 1 AP to give the target Bleeding, at a rating equal to your dots.

Option B: **Slip Away** *(Combat)* After you make a melee attack, move 1 zone for free.

Rank 4: Saint

Default Ability: **Butcher's Eye** *(Outside combat)* One look tells you how a creature is put together and where it's weak. Add your dots to rolls to cut out poison, treat a wound with a knife, or track something you've wounded.

Option A: **Weak Point** *(Combat)* Once per round, a short blade hit has Armor Penetration equal to half your dots.

Option B: **Dancer's Step** *(Combat)* Add your dots to defense rolls against an adjacent enemy you've hit this round.

Rank 5: Royal

Default Ability: **Fan of Knives** *(Combat)* One thrown attack can target up to three creatures within throwing range, using one attack roll.

Option A: **Second Strike** *(Combat)* If your attack roll beats the target's defense by 3 or more successes, add your dots to the damage.

Option B: **Ghost Step** *(Combat)* Once per round, when your defense roll beats an adjacent attack, make a Counter with a short blade, then move 1 zone for free.

Rank 6: Imperial

Default Ability: **Unseen Approach** *(Both)* Add your dots to Stealth rolls. Your first hit on a target that hasn't noticed you counts as meeting the next-higher damage threshold.

Option A: **Severing Strike** *(Combat)* A called shot that hits a limb gives the target -2 dice on rolls using that limb for the rest of the scene.

Option B: **Breath Cut** *(Combat)* Spend 2 AP: on a hit, the target also loses 2 AP on their next turn.

Rank 7: Divine

Default Ability: **Every Edge Is Mine** *(Both)* Anything with an edge or point (a glass shard, a broken sword, a sharpened spoon) counts as a short blade for you, with a Rating equal to your dots.

Option A: **Death of a Thousand Cuts** *(Combat)* Spend 3 AP: one attack roll against every enemy in all adjacent zones. Each one you hit also gets Bleeding, at a rating equal to your dots.

Option B: **The Last Mercy** *(Combat)* Once per story, a hit on a target at their -4 wound penalty or worse automatically meets their ADT.

Silver Arc Style

Long Blades

The sword schools: reading an opening and closing it before the other side reacts. For a two-handed greatsword, you may use Strength + Melee as the Primary pool.

Covers: longswords, sabers, katanas, rapiers, broadswords, greatswords.

Primary: Dexterity + Melee **Secondary:** Perception + Dodge

Rank 1: Elementary

Default Ability: **Sword Sense** *(Outside combat)* One look tells you a blade's quality, balance, and maker, and you can sharpen, maintain, and care for any sword. Add your dots to rolls to appraise or repair a blade.

Option A: **Clean Line** *(Combat)* Add your dots to an attack roll made right after moving 1 zone.

Option B: **High Guard** *(Combat)* Add your dots to defense rolls on any round you don't attack.

Rank 2: Intermediate

Default Ability: **The Salute** *(Outside combat)* You know the dueling customs of Terrana's sword schools. A formal challenge from you has to be openly answered or openly refused. Add your dots to social rolls about duels, honor, and exhibition bouts.

Option A: **Riposte** *(Combat)* Once per round, when your defense roll beats an adjacent melee attack, make a Counter.

Option B: **Bind** *(Combat)* On a hit, spend 1 AP to tie up the target's weapon. Their next attack roll takes a flat penalty die.

Rank 3: Advanced

Default Ability: **Versatile Grip** *(Combat)* Switch between a one-handed and two-handed grip for free. Two-handed, add half your dots to damage. One-handed, your other hand is free for a shield or an item.

Option A: **Twin Blades** *(Combat)* Wield a long blade in each hand. When you attack with both, add your dots to that one attack roll.

Option B: **Disarming Edge** *(Combat)* On a hit, spend 1 AP to make the target drop their weapon into an adjacent zone.

Rank 4: Saint

Default Ability: **Named Strike** *(Both)* Name your signature cut. Once per scene, add your dots to its damage. Anyone who has seen it before recognizes your school, which helps your reputation and ruins disguises.

Option A: **Crossing Cut** *(Combat)* One attack roll against two adjacent enemies.

Option B: **Perfect Parry** *(Combat)* Once per scene, a failed defense roll against a melee attack counts as a success.

Rank 5: Royal

Default Ability: **Duelist's Name** *(Outside combat)* Anyone who knows sword work knows you. Add your dots to social rolls to impress or intimidate them.

Option A: **Blade Dance** *(Combat)* Spend 2 AP: one attack roll against every enemy in all adjacent zones.

Option B: **Unbroken Rhythm** *(Combat)* Once you've hit the same target three times in a row this scene, add your dots to all your attack and defense rolls against them for the rest of the scene.

Rank 6: Imperial

Default Ability: **Cut the Unseen** *(Both)* Your blade can strike and harm incorporeal and conjured things as if they were solid, and can cut what usually can't be cut (smoke-forms, webs of spun magic).

Option A: **Unseen Line** *(Combat)* Once per scene, the target can't add bonus dice from any source to their defense against this attack.

Option B: **Return Stroke** *(Combat)* When your defense roll beats a melee attack by 3 or more successes, make a Counter. This is in addition to any other Counter you have.

Rank 7: Divine

Default Ability: **Master of the School** *(Outside combat)* You're recognized as a sword master. You may found a school, and anyone who trained under you can call on your name.

Option A: **One Thousand Schools** *(Combat)* Spend 3 AP: move up to 2 zones and make one attack roll against every enemy you pass adjacent to. End in any empty zone along your path.

Option B: **One Perfect Cut** *(Combat)* Once per story, a hit that meets BDT counts as meeting ADT.

Timberfall Style

Axes

Heavy, committed swings that break shields, dent armor, and end a fight in a hit or two.

Covers: hatchets, hand axes, battle axes, bearded axes, greataxes.

Primary: Strength + Melee **Secondary:** Fortitude + Endurance

Rank 1: Elementary

Default Ability: **Woodsman's Grip** *(Outside combat)* You can fell trees, split logs, clear brush, and build simple shelters and fires in half the usual time with an axe. Add your dots to rolls to cut through wood, doors, or barricades.

Option A: **Heavy Hands** *(Combat)* Add your dots to damage while wielding an axe in two hands.

Option B: **Hook and Pull** *(Combat)* On a hit, spend 1 AP to hook the target with your axe head. Either pull them 1 zone toward you into an empty zone, or yank their shield aside so they lose its Armor bonus until their next turn.

Rank 2: Intermediate

Default Ability: **Toss the Hatchet** *(Both)* You can throw hatchets and hand axes using this Style's Primary pool, up to 2 zones.

Option A: **Shield Breaker** *(Combat)* A hit on a shield-bearer lowers that shield's Armor bonus by 1 for the rest of the scene. This stacks.

Option B: **Second Wind** *(Combat)* After you take damage, spend 1 AP to add your dots to your next attack roll this round.

Rank 3: Advanced

Default Ability: **Battle Rhythm** *(Outside combat)* Woodchopping contests, lumberjack feats, work songs, war chants. Add your dots to rolls for feats of strength, or to keep a work crew or war band moving.

Option A: **Cleave** *(Combat)* One attack roll against your target and one other adjacent enemy.

Option B: **Momentum** *(Combat)* If you only moved last round and didn't attack, add your dots to this round's attack roll.

Rank 4: Saint

Default Ability: **Splitter** *(Both)* Your axe has full Armor Penetration against doors, barricades, wooden walls, and other objects. One hit breaks open an ordinary wooden door.

Option A: **Armor Breaker** *(Combat)* On a hit, the target's Armor drops by 1 for the rest of the scene. This stacks.

Option B: **Rooted Stance** *(Combat)* Add your dots to rolls to resist being pushed, knocked Prone, or Rooted.

Rank 5: Royal

Default Ability: **Woodsman's Legacy** *(Outside combat)* With an axe and timber, you can build a raft, a palisade, or a footbridge in a few hours instead of days.

Option A: **Wide Arc** *(Combat)* Spend 2 AP: one attack roll against every enemy in all adjacent zones.

Option B: **Bone Breaker** *(Combat)* A called shot that hits a limb gives the target -2 dice on rolls using that limb until it's healed.

Rank 6: Imperial

Default Ability: **Unstoppable Swing** *(Combat)* Once per scene, an attack has full Armor Penetration.

Option A: **Felling Blow** *(Combat)* A hit that meets LDT also knocks the target Prone.

Option B: **Berserker's Due** *(Combat)* While you're at your -2 wound penalty or worse, add your dots to damage.

Rank 7: Divine

Default Ability: **Timber** *(Both)* One swing fells anything that grew or was built from wood: a gate, an old tree, a ship's mast. Outside combat this takes no time at all. In combat it costs 3 AP.

Option A: **The Woodsman's Judgment** *(Combat)* Spend 3 AP: one attack roll against every enemy in all adjacent zones. Everyone you hit is knocked Prone.

Option B: **World Splitter** *(Combat)* Once per story, a hit has full Armor Penetration and counts as meeting the next-higher damage threshold. The target's weapon or shield also breaks.

Heron's Reach Style

Polearms

Reach and spacing: control the distance and the fight is already decided.

Covers: spears, pikes, halberds, glaives, naginata, tridents, quarterstaffs.

Primary: Dexterity + Melee **Secondary:** Perception + Awareness

Rank 1: Elementary

Default Ability: **Reach** *(Combat)* With a polearm, you can attack targets up to 2 zones away, not only adjacent ones.

Option A: **Herder's Staff** *(Outside combat)* Add your dots to rolls to herd animals, fish with a spear, or test ice, mud, or deep water ahead of you.

Option B: **Held Line** *(Combat)* Add your dots to attack rolls against an enemy who moved into your reach this round.

Rank 2: Intermediate

Default Ability: **Pole Vault** *(Both)* Once per round, vault on your polearm to move 1 extra zone. You can clear a gap, a low wall, or a Prone body this way.

Option A: **Sweep** *(Combat)* A low strike knocks the target Prone instead of dealing damage.

Option B: **Push Back** *(Combat)* A hit also pushes the target 1 zone away from you.

Rank 3: Advanced

Default Ability: **Standard Bearer** *(Outside combat)* A banner on your polearm draws people to you. Add your dots to rolls to lead, signal, or hold a group together.

Option A: **Set Against the Charge** *(Combat)* When an enemy who moved this round attacks you, add your dots to your defense roll. If your defense beats their attack, make a Counter.

Option B: **Cutting Line** *(Combat)* One attack roll against two enemies in a straight line within your reach.

Rank 4: Saint

Default Ability: **Phalanx** *(Combat)* You and any adjacent ally holding a polearm or shield each add half your dots to defense rolls.

Option A: **Pin** *(Combat)* On a hit, spend 1 AP to leave the target Rooted until the end of their next turn.

Option B: **Whirling Guard** *(Combat)* On a round you don't attack, make one defense roll, adding your dots, and use it against every melee attack made on you that round.

Rank 5: Royal

Default Ability: **Long Reach** *(Combat)* Your Reach extends to 3 zones.

Option A: **Lever and Lift** *(Outside combat)* Use your polearm as a lever or pole. Add your dots to rolls to pry open gates, lift a portcullis, or knock down something high.

Option B: **Zone Denial** *(Combat)* An enemy within your reach has to spend 1 extra AP for each zone it moves away from you.

Rank 6: Imperial

Default Ability: **Unyielding** *(Combat)* An enemy you've hit this round can't push you, Root you, or knock you Prone.

Option A: **Line Breaker** *(Combat)* Spend 2 AP: one attack roll against every enemy in a straight line out to the end of your reach.

Option B: **Piercing Thrust** *(Combat)* A hit on a Rooted or Prone target has full Armor Penetration.

Rank 7: Divine

Default Ability: **Heron's Patience** *(Both)* You can stand perfectly still for hours. You notice anything that moves within your reach, even while resting, and it can't catch you by surprise. Add your dots to Awareness rolls.

Option A: **The Unbroken Spear** *(Combat)* Spend 3 AP: one attack roll against every enemy within your reach.

Option B: **Sky Piercer** *(Combat)* Once per story, throw your polearm like a javelin at any target you can see. It hits automatically and counts as meeting the next-higher damage threshold.

Wallguard Style

Shields

A shield used as both wall and weapon, protecting the people next to you as much as yourself.

Covers: bucklers, round shields, kite shields, tower shields.

Primary: Strength + Melee **Secondary:** Fortitude + Endurance

Rank 1: Elementary

Default Ability: **Watchful Guard** *(Outside combat)* Bodyguard work, sentry duty, watching a camp. Add your dots to Awareness rolls to spot threats to someone you're protecting.

Option A: **Sturdy Stance** *(Combat)* While holding a shield on a round you don't attack, add half your dots to your BDT.

Option B: **Shield Bash** *(Combat)* Attack with your shield using this Style's Primary pool. A hit pushes the target 1 zone away.

Rank 2: Intermediate

Default Ability: **Cover Ally** *(Combat)* Spend 1 AP: an adjacent ally adds your dots to their next defense roll this round.

Option A: **Hold the Line** *(Combat)* Add your dots to rolls to resist being pushed, knocked Prone, or moved.

Option B: **Arrow Catcher** *(Combat)* Add your dots to defense rolls against ranged attacks.

Rank 3: Advanced

Default Ability: **Shield Wall** *(Combat)* While an adjacent ally also holds a shield, you both add half your dots to your BDT.

Option A: **Turtle** *(Combat)* On a round you take no Action, make one defense roll, adding your dots, and use it against every attack made on you that round.

Option B: **Dent the Plate** *(Combat)* A hit with your shield lowers the target's Armor by 1 for the rest of the scene. This stacks.

Rank 4: Saint

Default Ability: **Steady the Line** *(Both)* Add your dots to rolls to lead a defense. Adjacent allies add your dots to rolls to resist fear.

Option A: **Counter Bash** *(Combat)* Once per round, when your defense roll beats a melee attack, make a Counter with your shield.

Option B: **Interpose** *(Combat)* Once per round, when an adjacent ally is hit, you take the hit instead, and your BDT applies.

Rank 5: Royal

Default Ability: **Shield Throw** *(Combat)* Throw your shield using this Style's Primary pool, up to 3 zones. A hit pushes the target 1 zone. The shield rebounds to your hand at the start of your next turn.

Option A: **Unbreakable Guard** *(Combat)* Once per scene, a hit that would meet your LDT counts as meeting only your BDT.

Option B: **Bulwark** *(Combat)* Cover Ally now protects every adjacent ally for the same 1 AP.

Rank 6: Imperial

Default Ability: **Ride the Shield** *(Both)* Ride your shield down a slope, snowbank, or staircase, or float on it as a small raft. In combat, one adjacent ally behind it adds your dots to defense rolls against ranged attacks.

Option A: **Ram** *(Combat)* Move up to 2 zones in a straight line and make one attack roll against the first enemy you reach. On a hit they're pushed 1 zone and knocked Prone.

Option B: **Ricochet Throw** *(Combat)* Your Shield Throw can hit two targets with one attack roll, bouncing from one to the other.

Rank 7: Divine

Default Ability: **Living Wall** *(Combat)* An enemy has to spend 1 extra AP to move into any zone adjacent to you.

Option A: **The Last Wall** *(Combat)* For the rest of the scene, you can redirect any attack against an adjacent ally onto yourself, adding your dots to your defense roll against it.

Option B: **Unbroken** *(Combat)* Once per story, while you hold your shield, you can't be Incapacitated this scene. Damage that would Incapacitate you leaves your last Health box empty instead.

Ten Count Style

Boxing

The fist style built for damage: footwork, combinations, and taking a punch to land a better one.

Covers: bare fists, wraps, gloves, knuckle-dusters, cestus.

Primary: Strength + Martial Arts **Secondary:** Fortitude + Endurance

Rank 1: Elementary

Default Ability: **Iron Chin** *(Both)* Add your dots to rolls to resist being knocked out, losing AP, or being intimidated by physical threats.

Option A: **Jab** *(Combat)* On a hit, spend 1 AP for a second strike on the same target, which they defend against using that same attack roll.

Option B: **Bob and Weave** *(Combat)* Add your dots to defense rolls against fists and melee weapons.

Rank 2: Intermediate

Default Ability: **Roadwork** *(Outside combat)* Running, skipping rope, hours of training. Add your dots to Athletics rolls for long runs and hard exertion. You don't tire from a long march or a chase.

Option A: **Body Shot** *(Combat)* A hit also makes the target lose 1 AP on their next turn.

Option B: **Guard Up** *(Combat)* While fighting unarmed, add half your dots to your BDT against unarmed attacks.

Rank 3: Advanced

Default Ability: **Prize Fighter** *(Outside combat)* Add your dots to rolls to win over a crowd, talk up a fight, or read the odds on one.

Option A: **Combination** *(Combat)* If your attack roll beats the target's defense by 3 or more successes, a follow-up punch adds your dots to the damage.

Option B: **Cut Off the Ring** *(Combat)* On a hit, the target has to spend 1 extra AP to move away from you on their next turn.

Rank 4: Saint

Default Ability: **Cornerman** *(Outside combat)* You know how to patch up cuts and swelling. Outside combat, each success on your roll heals as Basic healing, Bashing damage only.

Option A: **Haymaker** *(Combat)* Spend 1 AP to add your dots to damage. If you miss, take a flat penalty die on defense rolls until your next turn.

Option B: **Counterpuncher** *(Combat)* Once per round, when your defense roll beats an adjacent attack, make a Counter.

Rank 5: Royal

Default Ability: **Granite Jaw** *(Combat)* Your Bashing wound penalties count one step lower (-1 becomes none, -2 becomes -1, -4 becomes -2).

Option A: **Liver Shot** *(Combat)* On a hit, the target takes a flat penalty die on every roll until the end of their next turn.

Option B: **Barrage** *(Combat)* Spend 2 AP: one attack roll strikes the same target three times, and they defend against it three times.

Rank 6: Imperial

Default Ability: **Ring Sense** *(Combat)* Add your dots to initiative. No one within 2 zones of you can catch you by surprise.

Option A: **Knockout Blow** *(Combat)* A called shot to the head that hits makes the target lose 3 AP on their next turn.

Option B: **Rope-a-Dope** *(Combat)* Each attack that misses you this round adds 1 die to your next attack roll, up to your dots.

Rank 7: Divine

Default Ability: **Champion's Belt** *(Both)* Add your dots to social rolls anywhere fighting is respected. Once per story, you can declare a fight a sanctioned bout, and most people will honor its rules.

Option A: **Final Bell** *(Combat)* Spend 3 AP: one attack roll strikes the same target a number of times equal to your dots, and they defend against each strike separately.

Option B: **Down for the Count** *(Combat)* Once per story, a hit that meets LDT on a target at their -2 wound penalty or worse knocks them out (Incapacitated).

Drifting Leaf Style

Kung Fu

The fist style built for avoiding hits: flow, redirected force, and never being where the blow lands.

Covers: open-hand forms, palms, kicks, sweeps.

Primary: Dexterity + Martial Arts **Secondary:** Perception + Dodge

Rank 1: Elementary

Default Ability: **Flowing Breath** *(Both)* Add your dots to rolls to resist pain, fear, or exhaustion, using breathing and meditation.

Option A: **Redirect** *(Combat)* Once per round, when your defense roll beats an adjacent melee attack, send the attacker stumbling 1 zone in any direction you choose, into an empty zone.

Option B: **Still Water** *(Combat)* Once per round, after a successful defense roll, move 1 zone for free.

Rank 2: Intermediate

Default Ability: **Silk Step** *(Both)* Add your dots to Acrobatics rolls. You can run along a wall for 1 zone, cross narrow ledges at full speed, and jump 1 extra zone.

Option A: **Deflecting Palm** *(Combat)* Add your dots to defense rolls against ranged attacks.

Option B: **Sweeping Kick** *(Combat)* A low kick knocks the target Prone instead of dealing damage.

Rank 3: Advanced

Default Ability: **Feather Fall** *(Both)* For falling damage, count every fall as shorter by a number of zones (10 feet each) equal to your dots.

Option A: **Pressure Point** *(Combat)* On a hit, spend 1 AP: the target takes a flat penalty die on rolls using one limb for the rest of the scene.

Option B: **Locking Hand** *(Combat)* On a hit, spend 1 AP to leave the target Rooted until the end of their next turn.

Rank 4: Saint

Default Ability: **Empty Hand** *(Combat)* While unarmed, add your dots to defense rolls against armed enemies.

Option A: **Counting River** *(Combat)* On a hit, strike the same target a second time for free. They defend against that same attack roll.

Option B: **Borrowed Force** *(Combat)* Once per round, when your defense roll beats an adjacent melee attack, make a Counter. Add the attacker's weapon Rating to its damage.

Rank 5: Royal

Default Ability: **Monk's Discipline** *(Outside combat)* You can go without food or sleep for a number of days equal to your dots with no penalty.

Option A: **Leaf on the Wind** *(Combat)* Once per scene, a failed defense roll counts as a success.

Option B: **Rising Kick** *(Combat)* Leap 1 zone and attack. A hit knocks the target Prone.

Rank 6: Imperial

Default Ability: **One Inch Strike** *(Combat)* Add your dots to the damage of any strike you make without moving that round.

Option A: **Mountain Stillness** *(Combat)* On a round you don't move, every attack against you takes a flat penalty die.

Option B: **Snatch the Arrow** *(Combat)* Once per round, when your defense roll beats a thrown or fired attack, catch it and send it back as a Counter at any target in sight.

Rank 7: Divine

Default Ability: **Leaf Walking** *(Both)* Each round, you can cross a number of zones equal to your dots over water, leaves, or branches too thin to hold you.

Option A: **The Thousand Hand Form** *(Combat)* Spend 3 AP: one attack roll against every enemy in all adjacent zones, then move 1 zone for free.

Option B: **Enlightened Palm** *(Combat)* Once per story, one unarmed strike has full Armor Penetration and full Magic Penetration, and counts as meeting the next-higher damage threshold.

Main Event Style

Wrestling

The fist style built for holds and throws, done with a showman's flair. It builds on the Grapple and Takedown actions and the Grappled condition (no belt items or attacks; in Upkeep, Strength + Athletics to break free).

Covers: grappling, throws, holds, slams, and anything that isn't nailed down (chairs, tables, ladders).

Primary: Strength + Martial Arts (or Athletics) **Secondary:** Fortitude + Endurance

Rank 1: Elementary

Default Ability: **Crowd Favorite** *(Outside combat)* An entrance, a taunt, a pose. Add your dots to rolls to work a crowd, intimidate someone before a fight, or sell a story.

Option A: **Lock Up** *(Combat)* On an unarmed hit, spend 1 AP: the target is Grappled by you instead of taking damage.

Option B: **Body Slam** *(Combat)* On an unarmed hit, the target is also knocked Prone.

Rank 2: Intermediate

Default Ability: **Steel Chair** *(Both)* Improvised objects (chairs, bottles, ladders, tables) count as proper weapons for you. Add half your dots to their damage.

Option A: **Clothesline** *(Combat)* If you moved at least 1 zone before attacking, a hit adds your dots to damage and knocks the target Prone.

Option B: **Sleeper Hold** *(Combat)* While you have someone Grappled, every Upkeep they fail to break free, they lose 2 AP that turn.

Rank 3: Advanced

Default Ability: **Kayfabe** *(Outside combat)* You can fake a fight, a fall, or an injury well enough to fool anyone watching. Add your dots to Chicanery or Subterfuge rolls to stage anything physical.

Option A: **Suplex** *(Combat)* While grappling, spend 1 AP to slam your target: damage equal to your dots, the target is knocked Prone, and the grapple ends.

Option B: **Dropkick** *(Combat)* Leap 1 zone and attack. A hit pushes the target 1 zone. If you miss, you land Prone.

Rank 4: Saint

Default Ability: **No-Sell** *(Combat)* Once per scene, shrug off a hit. It counts as meeting one threshold lower (LDT becomes BDT; BDT does no damage).

Option A: **Figure-Four Leglock** *(Combat)* Every Upkeep your target stays Grappled by you, they take damage equal to your dots. When they break free, they're Rooted until the end of their next turn.

Option B: **DDT** *(Combat)* While grappling, spend 1 AP: damage equal to your dots, the target loses 2 AP on their next turn, and the grapple ends.

Rank 5: Royal

Default Ability: **Face of the Match** *(Outside combat)* Fans and rivals know your name. Add your dots to social rolls with anyone who loves a good fight. Once per story, call in a favor from a fan.

Option A: **Piledriver** *(Combat)* While grappling, spend 2 AP: damage equal to twice your dots, the target is knocked Prone, and the grapple ends.

Option B: **Powerbomb** *(Combat)* While grappling, spend 2 AP to throw your target 1 zone into another enemy. One attack roll against both. Everyone hit is knocked Prone, and the grapple ends.

Rank 6: Imperial

Default Ability: **Off the Top Rope** *(Both)* From any height (a table, a balcony, a ledge), dive onto a target up to 2 zones away. Add your dots to the attack roll. You take no falling damage from the dive.

Option A: **Chokeslam** *(Combat)* Spend 2 AP: lift an adjacent target and slam them down. Damage equal to your dots, they're knocked Prone, and they lose 2 AP on their next turn. No grapple needed.

Option B: **Signature Move** *(Combat)* Name your finisher. Once per scene, a successful Grapple on a target at their -4 wound penalty or worse ends their fight: they submit or are knocked out (Incapacitated).

Rank 7: Divine

Default Ability: **Undisputed Champion** *(Both)* Once per story, declare a bout a title match. For the rest of the scene, you can't be pinned, made to submit, or knocked out by non-lethal means.

Option A: **The Finish** *(Combat)* While grappling, spend 3 AP: damage equal to three times your dots, counted as meeting the next-higher damage threshold. The grapple ends.

Option B: **Tag Team** *(Combat)* When an adjacent ally attacks a target you have Grappled, they add your dots to their attack roll.

Windreader Style

Bows

Patience, breath control, and a called shot that never needed calling.

Covers: shortbows, longbows, recurves, crossbows.

Primary: Dexterity + Ranged **Secondary:** Perception + Awareness

Rank 1: Elementary

Default Ability: **Hunter's Eye** *(Outside combat)* Add your dots to rolls to track, stalk, or read animal sign.

Option A: **Steady Draw** *(Combat)* Add your dots to attack rolls made without moving that round.

Option B: **Ready Nock** *(Combat)* Add your dots to initiative while holding a bow.

Rank 2: Intermediate

Default Ability: **Fletcher's Craft** *(Outside combat)* You can make arrows and string bows from raw materials, about a quiver's worth of arrows in an hour.

Option A: **Pinning Shot** *(Combat)* On a hit, spend 1 AP to leave the target Rooted until the end of their next turn.

Option B: **Cover Shot** *(Combat)* Spend 1 AP: an ally within your range adds your dots to their next defense roll.

Rank 3: Advanced

Default Ability: **Quiver Belt** *(Both)* You get one extra Belt slot (slot 4), for special arrows only. Drawing from it costs no AP.

Option A: **Arcing Shot** *(Combat)* Ignore cover. You can also hit a target you can't see if an ally can see it.

Option B: **Silent Shot** *(Combat)* Shooting doesn't give away your position if you're hidden. Add your dots to Stealth rolls right after a shot.

Rank 4: Saint

Default Ability: **Trick Arrows** *(Both)* You know how to rig rope arrows (a line between two zones that anyone can cross), smoke, noisemakers, and blunt arrows that deal kinetic damage.

Option A: **Marksman's Patience** *(Combat)* Spend your whole Action aiming. Your next shot adds twice your dots to the attack roll.

Option B: **Twin Nock** *(Combat)* One attack roll against two targets within range.

Rank 5: Royal

Default Ability: **Long Eye** *(Combat)* Ignore the -2 dice penalty for half cover.

Option A: **Volley** *(Combat)* Spend 2 AP: one attack roll against a target zone and every zone adjacent to it.

Option B: **Heart Seeker** *(Combat)* A called shot to a vital spot has full Armor Penetration.

Rank 6: Imperial

Default Ability: **Eagle Eye** *(Both)* You see clearly at great distances, enough to read a sign a mile away.

Option A: **Splitting Shot** *(Combat)* When you hit, the arrow keeps going and also hits the next creature in a straight line behind the target, using the same attack roll.

Option B: **The Last Arrow** *(Combat)* Once per scene, re-roll a missed shot at your full pool.

Rank 7: Divine

Default Ability: **Wind's Voice** *(Both)* You always know what the wind and weather will do. Your arrows ignore penalties from wind, weather, and magical concealment.

Option A: **The Thousand Arrow Storm** *(Combat)* Spend 3 AP: one attack roll against every enemy you can see within range.

Option B: **One True Shot** *(Combat)* Once per story, an arrow automatically hits anything you can see and meets its ADT.

Sundown Style

Hand Guns

Fast target acquisition, snap shots, and drawing before the other side clears leather.

Covers: pistols, revolvers, derringers, flintlock pistols.

Primary: Dexterity + Ranged **Secondary:** Perception + Awareness

Rank 1: Elementary

Default Ability: **Gunsmith's Hands** *(Outside combat)* You can clean, maintain, and repair hand guns and cast your own bullets. Add your dots to rolls to fix or identify firearms.

Option A: **Fast Draw** *(Combat)* Drawing a holstered hand gun costs no AP. Add your dots to initiative while one is holstered.

Option B: **Point Blank** *(Combat)* Add your dots to damage against an adjacent target.

Rank 2: Intermediate

Default Ability: **Trick Shooting** *(Outside combat)* Coins in the air, candle wicks, bottles off a fence. Add your dots to rolls to show off your shooting.

Option A: **Double Tap** *(Combat)* One attack roll fires twice at one target, and they defend against it twice.

Option B: **Hip Fire** *(Combat)* Add your dots to attack rolls made after moving that round.

Rank 3: Advanced

Default Ability: **Speed Loader** *(Combat)* You get one extra Belt slot (slot 4), for ammunition only. Reloading from it costs no AP.

Option A: **Disarm Shot** *(Combat)* A called shot to the hand or weapon that hits makes the target drop it into an adjacent zone.

Option B: **Covering Fire** *(Combat)* Spend 1 AP: an ally within your range adds your dots to their next defense roll.

Rank 4: Saint

Default Ability: **Two Guns** *(Combat)* Wield a hand gun in each hand. When you fire both, add your dots to that one attack roll.

Option A: **Ricochet** *(Combat)* Bank a shot off a hard surface to ignore cover.

Option B: **Gunslinger's Volley** *(Combat)* One attack roll against two targets within range.

Rank 5: Royal

Default Ability: **Reputation** *(Outside combat)* Your name gets around saloons and frontier towns. Add your dots to rolls to intimidate, and most people think twice before drawing on you.

Option A: **Fan the Hammer** *(Combat)* Spend 2 AP: one attack roll fires up to three times, at any mix of targets in range. Each shot is defended separately.

Option B: **Dead Eye** *(Combat)* A called shot to a vital spot that hits counts as meeting the next-higher damage threshold.

Rank 6: Imperial

Default Ability: **Showdown** *(Combat)* You win every initiative tie, and you act before any enemy you can see who starts combat with a weapon holstered.

Option A: **Empty the Chamber** *(Combat)* Once per scene, spend all your remaining AP on one shot at one target, adding twice your dots to the damage.

Option B: **Last Stand** *(Combat)* While you're at your -2 wound penalty or worse, add your dots to attack rolls.

Rank 7: Divine

Default Ability: **Bullet Time** *(Combat)* Once per scene, act for one turn as if you had the full 6 AP.

Option A: **The Last Gunslinger** *(Combat)* Spend 3 AP: one attack roll against every enemy you can see within range.

Option B: **One Bullet, One Truth** *(Combat)* Once per story, a shot automatically hits anything you can see and meets its ADT.

Iron Rain Style

Large Guns

Bracing, controlling recoil, and putting enough lead downrange that cover stops mattering.

Covers: rifles, muskets, shotguns, machine guns, cannons, heavy support weapons.

Primary: Fortitude + Ranged **Secondary:** Strength + Athletics

Rank 1: Elementary

Default Ability: **Gunner's Hands** *(Outside combat)* You can haul, mount, and maintain heavy weapons, and you carry a large gun without slowing down.

Option A: **Brace** *(Combat)* Add your dots to attack rolls made without moving that round.

Option B: **Scope In** *(Combat)* Add your dots to called shots.

Rank 2: Intermediate

Default Ability: **Demolition Sense** *(Outside combat)* Add your dots to rolls to find structural weak points, where to breach a wall, or the best firing position.

Option A: **Suppressing Fire** *(Combat)* Spend 1 AP: one attack roll at a target zone and every zone adjacent to it. It deals no damage, but every enemy there takes a flat penalty die on their next roll, whether you hit or not.

Option B: **Knockback** *(Combat)* A hit pushes the target 1 zone away.

Rank 3: Advanced

Default Ability: **Ammo Belt** *(Combat)* You get one extra Belt slot (slot 4), for ammunition only. Reloading from it costs no AP.

Option A: **Armor Piercing** *(Combat)* Your shots have Armor Penetration equal to half your dots.

Option B: **Field Repair** *(Both)* Clear a jam or fix a damaged gun for 1 AP in combat. Outside combat, add your dots to repair rolls.

Rank 4: Saint

Default Ability: **Dug In** *(Combat)* On a round you don't move, add half your dots to your BDT against ranged attacks.

Option A: **Wide Blast** *(Combat)* One attack roll against every zone directly and diagonally forward of you.

Option B: **Long Shot** *(Combat)* Your shots punch through thin cover such as wood, plaster, or a thin wall: a target with full cover behind it has only half cover.

Rank 5: Royal

Default Ability: **Quartermaster's Eye** *(Outside combat)* One look at an enemy camp tells you roughly their numbers, gear, and supplies.

Option A: **Breach** *(Combat)* A shot destroys a door, a section of wooden wall, or one piece of cover.

Option B: **Walking Fire** *(Combat)* Spend 2 AP: one attack roll against every enemy in a straight line within range.

Rank 6: Imperial

Default Ability: **Unshakeable** *(Combat)* On a round you don't move, enemy effects can't push you, knock you Prone, or make you lose AP.

Option A: **Devastator** *(Combat)* A hit lowers the target's Armor by 2 for the rest of the scene.

Option B: **Scorched Line** *(Combat)* Once per round, a shot at a target you've already hit this scene has full Armor Penetration.

Rank 7: Divine

Default Ability: **One-Man Battery** *(Both)* You can load, aim, and fire siege weapons (cannons, ballistae) alone, with no crew.

Option A: **The Siege Breaker** *(Combat)* Spend 3 AP: one attack roll against every enemy within 2 zones of a target zone. All cover in that area is destroyed.

Option B: **Last Belt** *(Combat)* Once per story, one attack automatically hits every enemy in your line of sight and meets at least their LDT.

Dragon's Blade Style

Natural Weapons

Claws, fangs, and horns: the weapons you were born with, sharpened by practice into a fighting art.

Covers: claws, talons, fangs, horns, tusks, beaks, tails, and limbs shaped by magic (such as Shift Limb or a Slime's Morph). Anyone whose heritage or magic gives them natural weapons can learn it.

Primary: Dexterity + Martial Arts **Secondary:** Perception + Dodge

Rank 1: Elementary

Default Ability: **Natural Arsenal** *(Combat)* Your natural weapons count as a weapon with a Rating equal to half your dots, rounded up, unless your Heritage Magic gives them a better one. They can't be dropped or disarmed.

Option A: **Rake** *(Combat)* Attack with two natural weapons at once, such as both claws or a claw and a bite. Add your dots to that one attack roll.

Option B: **Pounce** *(Combat)* Add your dots to an attack roll made right after moving at least 1 zone.

Rank 2: Intermediate

Default Ability: **Climbing Claws** *(Both)* Add your dots to climbing rolls. You can climb wood, stone, or ice with no gear.

Option A: **Rend** *(Combat)* On a hit, spend 1 AP to give the target Bleeding.

Option B: **Latch On** *(Combat)* On a hit, spend 1 AP: the target is Grappled by you. While you hold them, you can still attack them with your other natural weapons.

Rank 3: Advanced

Default Ability: **Ram** *(Combat)* Move up to 2 zones in a straight line and strike the first enemy you reach with your horns, head, or body. A hit pushes them 1 zone away. You end in an empty zone.

Option A: **Feral Frenzy** *(Combat)* Each hit on the same target this round adds 1 die to your next attack roll against them, up to your dots.

Option B: **Sweep** *(Combat)* A tail, a wing, or a low swipe knocks the target Prone instead of dealing damage.

Rank 4: Saint

Default Ability: **Thick Hide** *(Combat)* While you wear no armor, add half your dots to your BDT.

Option A: **Hamstring** *(Combat)* A called shot to a leg that hits leaves the target Rooted until the end of their next turn, and they spend 1 extra AP to move for the rest of the scene.

Option B: **Gore** *(Combat)* A Ram that hits with horns, tusks, or fangs also has Armor Penetration equal to half your dots and gives the target Bleeding.

Rank 5: Royal

Default Ability: **Apex Presence** *(Both)* Beasts know a predator when they see one. Add your dots to rolls to intimidate or command animals, and to intimidate anyone who sees your natural weapons bared.

Option A: **Whirlwind of Claws** *(Combat)* Spend 2 AP: one attack roll against every enemy in all adjacent zones.

Option B: **Savage Maul** *(Combat)* Spend 2 AP: claw, claw, bite. One attack roll strikes the same target three times, and they defend against it three times.

Rank 6: Imperial

Default Ability: **Spirit Claws** *(Combat)* Your natural weapons can harm incorporeal and conjured things as if they were solid, and they have Magic Penetration equal to half your dots.

Option A: **Throat Strike** *(Combat)* A called shot to the throat that hits makes the target lose 2 AP on their next turn, and they can't speak until the end of it.

Option B: **Blood Feast** *(Combat)* Once per scene, when a bite meets the target's LDT, heal Bashing damage equal to half your dots.

Rank 7: Divine

Default Ability: **Apex Predator** *(Both)* Creatures of animal intelligence won't attack you unless magic or a master forces them to, and nothing within 3 zones can catch you by surprise.

Option A: **The Red Hunt** *(Combat)* Spend 3 AP: move up to 2 zones and make one attack roll against every enemy you pass adjacent to. Everyone you hit also gets Bleeding. End in any empty zone along your path.

Option B: **Death Grip** *(Combat)* Once per story, while you have a target Grappled, one bite or claw automatically hits and meets their ADT.

Circle Magic and Combat.....260

Magic in Terrana is not a gift handed to a chosen few. It is a force that moves through the world and through every living thing in it. Mana cycles through the soil, the sky, and the blood. Learning to shape it is less like discovering a talent and more like learning to breathe deliberately. Anyone willing to put in the work can reach it. Very few reach the higher ranks.

This chapter covers four kinds of magic. Battle Aura pours mana through the body and weapon and pairs with the Martial Combat Styles of Chapter 12. Part One covers the seven casting schools: the combat-legal disciplines any character can learn through training, study, and hard-earned experience. Part Two covers combination magic: spells that emerge when two or more schools are cast together as one effect, producing things neither school could achieve alone. Part Three covers circle magic: ritual-based magic that works outside the seven schools and outside the combat turn structure entirely.

Every spell entry in this chapter follows the same format. Mana cost. Speed. Type. Range. Dice pool. Effect. The description is flavor. The effect block is mechanical law. If an entry does not answer your question, flag it specifically so the rule can be refined through future play.

Mana itself (your Mana Pool, Max Mana Per Turn, recovery, Mana Burn, attuned and committed mana, and running dry) is covered in Chapter 11.

How Casting Works

Dice Pools

When casting a spell, the basic dice pool is Attribute plus Magical Ability plus dots in the relevant school, up to the spell's rank. The spell entry states which Attribute and Ability apply. Mana spent to enhance a roll adds 1 die per mana, declared before rolling, assigned to either the attack roll or the damage roll. Not both at once. The amount of mana that can enhance a roll is capped at your dots in that school or your M/T, whichever is lower.

What Every Spell Entry Tells You

Mana Cost: Total mana to cast

Speed: Instant, Reaction, or Extended

Type: One or more keywords describing the spell's function

Range: Target zone, self, or AoE shape

Dice Pool: Exact roll to make

Effect: The mechanical outcome

Description: Flavor text

The defensive roll is always stated in the Effect. If a spell entry does not name what the target rolls to resist, flag it specifically so the entry can be corrected.

Defenders Choose Their Defense

A target being attacked by magic chooses their own defense unless the spell explicitly says otherwise. Each spell entry lists the default defense, which is the roll that makes the most sense for what the spell physically does:

Dexterity + Dodge: getting out of the way of bolts, projectiles, spikes, grasping vines, and other targeted attacks

Strength + Athletics: bracing against being pushed, pulled, or dragged, and breaking free once held

Dexterity + Acrobatics: keeping your footing on slick or shifting ground and landing safely from a fall

Fortitude + Endurance: resisting effects that work on the body, such as cold, poison, exhaustion, burning terrain, and mana drain

A defender can also try a situational defense when it fits, such as catching a large thrown object or bracing to tank

it. Counter-magic follows the Magical Resistance rules below.

Upkeep and Persistent Spells

A Persistent spell has a duration counted in turns. Each Upkeep Phase the countdown ticks down by 1. Paying the upkeep cost during the Upkeep Phase freezes the countdown for that turn. The upkeep cost for any spell is the spell's mana cost minus 1.

Countdown spells are a subtype of Persistent. Duration equals half the total mana spent, rounded up. Paying upkeep (cost minus 1) during the Upkeep Phase freezes the countdown for one turn. The countdown resumes on any turn upkeep is not paid.

Magical Resistance

When a spell targets a character who wants to resist its effect, the defender rolls a resistance pool that includes their dots in the relevant magic. Most resistance rolls are written as Fortitude plus Endurance with the caster's school dots added. Resistance is a separate roll, not a comparison against the attacker's successes. The spell entry names the defensive roll.

Upcasting

Additional mana beyond a spell's base cost can be spent to either add dice to the roll or augment the spell's effect. Both options cannot be chosen at once. Declare before rolling. For combination spells, augmentation costs extra mana scaled to the number of schools involved: 2-school spells cost 2 mana per augmentation, 3-school cost 3, and so on.

Mana Bleed: Any effect that makes a target lose mana during an Upkeep Phase is Mana Bleed. Most Mana Bleed comes from Shade Magic and the combination spells built on it. Losing mana all at once from a single hit is a drain, not a bleed.

Prepared Spells

A caster does not have open access to every spell they know during combat. Spells must be prepared ahead of time. Preparation happens outside of combat and represents the caster arranging their intent, attunement, and focus before the fight.

The number of spells a character can have prepared at any time is equal to their dots in Intelligence. A character with 3 Intelligence can have 3 spells prepared. A character with 5 can have 5.

Prepared spells can be swapped freely outside of combat. There is no cost and no time restriction beyond being out of a fight. In combat, the prepared list is fixed until the fight ends.

A spell from any school the character knows can fill a prepared slot, including combination spells the character meets the prerequisites for. The prepared list does not need to be filled entirely. A character may go into a fight with fewer prepared spells than their Intelligence allows.

Learning the Casting Schools

Every dot in a casting school also grants a default ability. It comes with the dot automatically, in addition to the spell option chosen for that dot. Default abilities come in three kinds. Some cost mana each time they are used. Some are attuned: they hold part of your M/T for as long as they are active, and ending one returns that mana to your M/T during the following Upkeep Phase. Some are permanent improvements to how that school's spells work.

The seven casting schools are the combat-legal magical disciplines available to any character willing to train in them. Each is a standalone knowledge tracked under Magical Knowledges on the sheet. Each runs from Core (dot 1) through Cosmic (dot 7), with two technique options available at each dot. When a dot is purchased the player chooses one option. The unchosen option can be bought later for Rank x2 XP.

A school designated as Primary costs new dot times 5 XP. Any other school costs new dot times 6 XP. Every school taken in Step 11 of character creation is Primary and marked with a P; a school gained any other way is Secondary and marked with an S.

The Rank scale for Magical Knowledges is: Core (1) / Terrestrial (2) / Aerial (3) / Lunar (4) / Stellar (5) / Galactic (6) / Cosmic (7).

Battle Aura

Battle Aura is not one of the seven casting schools. It is a separate discipline of physical enhancement that runs mana through the body and weapon. It can be used alongside any of the seven schools but is learned and tracked independently under Magical Knowledges.

Battle Aura does not produce elemental effects on its own. From Rank 4 it can carry the energy of one casting school through imbuing (see Imbuing below).

Mana assigned to Battle Aura can go to either the attack roll or the damage roll. Declare before rolling.

Starting at Rank 4, techniques may be activated by spending Willpower instead of their mana cost. Rank 4 costs 1 Willpower, Rank 5 costs 2 Willpower, Rank 6 costs 3 Willpower, and Rank 7 costs 4 Willpower. Additional mana can still be spent on top of a Willpower activation for further enhancement. Spending Willpower this way is not an action and does not cost AP. It is separate from the 1 Willpower you may spend each turn to push or reroll (Chapter 11), and each point paid marks an X on your Willpower row.

Default Abilities

Like the seven casting schools, every Battle Aura dot grants a default ability. It comes with the dot automatically, in addition to the technique chosen for that dot. As with the casting schools, the unchosen technique can be bought later for Rank x2 XP.

Battle Aura and Combat Styles

Battle Aura is built to work with every Combat Style. Wherever a Battle Aura dice pool lists Attribute + Ability + Combat Style, use the Attribute and Ability of the Combat Style you are fighting with, plus your dots in that Style.

Armor Penetration ignores points of the armor portion of a target's DT. Magic Penetration ignores points of the portion added by spells, enchantments, or magical gear. Penetration from different sources adds together, but neither can lower its portion below 0. Several Combat Styles grant Armor Penetration of their own, and Aura Edge (Rank 2) adds both kinds to every weapon and unarmed attack. The Martial Combat Styles chapter has the full rules.

Imbuing (Rank 4)

Starting at Rank 4, a practitioner can imbue an attack with the energy of one of the seven casting schools: Fire, Water, Air, Earth, Nature, Bright, or Shade. This is not combination magic. Combination magic weaves casting schools together into a new spell. Imbuing simply carries a school's energy on a Battle Aura technique or a weapon or unarmed attack.

An imbued attack takes on the nature of that school. A Fire-imbued strike is a fire attack, a Water-imbued strike is a water attack, and so on, including Elemental Advantages and that school's mana assignment rule (see Imbuing Attacks). The practitioner may spend additional mana on the imbued attack up to their Battle Aura dots plus their dots in the imbued school, or their M/T, whichever comes first. An attack can be imbued with only one school at a time, and the practitioner needs at least 1 dot in the school they imbue.

Flight (Rank 6)

Empowered Flight is unlocked at Rank 6. Taking off costs 6 mana, or 3 Willpower. Moving at altitude costs an upkeep of 5 mana each Upkeep Phase, and hovering in place costs half that, rounded up (3 mana). While flying you move at double your normal movement. Taking damage that meets your BDT while airborne requires a Dexterity + Athletics roll against the damage dealt. On a failure you begin to fall, land during your next Upkeep Phase, and take falling damage as normal.

Winged flyers use the Athletics specialty Flight instead and need no mana. Anything that flies moves at double its normal movement. Mechanical flight (machines, vehicles, and devices) must use all of its movement every turn or begin to fall.

Rank 1: Core

The practitioner can feel and deliberately direct their fighting spirit for the first time. The enhancement is small but real.

Default Ability: **Surge** *(1 mana per die, Instant)* Push fighting spirit into your body for one Strength, Dexterity, or Fortitude roll that isn't an attack, such as lifting, climbing, sprinting, or breaking free of a grapple. Each mana adds 1 die, up to the usual cap. Outside of combat, from Rank 2 on, one Surge can carry you through a whole extended task, such as a long climb or a day of hauling.

Aura Fist

Mana Cost: 1
Speed: Instant
Type: Enhancement, Attack
Range: Adjacent zone
Dice Pool: Attribute + Ability + Combat Style. Mana spent adds to declared roll portion.

Effect: Channel fighting spirit into unarmed strikes. Declare before rolling whether mana adds bonus dice to the attack roll or the damage roll. 1 mana per bonus die. Mana spent this way is capped at your Battle Aura dots or your M/T, whichever comes first. Defend: Dexterity + Dodge.

The practitioner's fists or feet are coated in fighting spirit. Lasts for this action only.

Aura Blade

Mana Cost: 1
Speed: Instant
Type: Enhancement, Attack
Range: Your weapon's reach
Dice Pool: Attribute + Ability + Combat Style. Mana spent adds to declared roll portion.

Effect: Channel fighting spirit into a wielded weapon. Declare before rolling whether mana adds bonus dice to the attack roll or the damage roll. 1 mana per bonus die. The weapon's base rating is enhanced by the aura coating for this action. Mana spent this way is capped at your Battle Aura dots or your M/T, whichever comes first. Defend: Dexterity + Dodge.

The wielded weapon is coated in fighting spirit for a single strike.

Rank 2: Terrestrial

The practitioner can sustain their Battle Aura across multiple turns. Enhancement becomes persistent. They begin developing defensive applications.

Default Ability: **Aura Edge** *(Attuned: holds 2 of your M/T while active)* Your weapon and unarmed attacks gain Armor Penetration and Magic Penetration equal to half your Battle Aura dots, rounded up. They ignore that many points of the armor portion of a target's DT, and that many points of the portion added by magic. This stacks with Armor Penetration from your Combat Style.

Iron Body

Mana Cost: 2
Speed: Instant, Extended
Type: Enhancement, Persistent
Range: Self
Dice Pool: Fortitude + Endurance

Effect: Channel fighting spirit into the body to enhance Fortitude. The practitioner adds mana spent to their BDT for as long as the effect is maintained. Upkeep cost is 1 mana per Upkeep Phase. Can be maintained alongside other Battle Aura effects.

The body hardens with concentrated fighting spirit, reinforcing it against incoming strikes.

Aura Coat

Mana Cost: 2
Speed: Instant, Extended
Type: Enhancement, Persistent
Range: Self, wielded weapon
Dice Pool: Attribute + Ability + Combat Style. Mana spent adds to declared roll portion.

Effect: Sustain a Battle Aura coating on a wielded weapon across multiple turns. Declare before the first activation whether bonus dice are assigned to attack or damage rolls. This assignment is fixed for the duration. Upkeep cost is 1 mana per Upkeep Phase. The effect can be dropped and reactivated to change the assignment.

The weapon is coated in a sustained layer of fighting spirit that persists between strikes.

Rank 3: Aerial

The fighting spirit becomes reactive. The practitioner can respond to incoming attacks defensively. The aura becomes more visually distinct at this rank, often taking on a color unique to the practitioner. From this rank onward the practitioner may always spend additional mana beyond a technique's base cost to add further bonus dice, up to their M/T.

Default Ability: **Aura Read** *(2 mana, Instant)* Read the fighting spirit of one creature you can see within a number of zones equal to your Battle Aura dots. Roll Perception + Awareness + Battle Aura. On a success you learn its highest Combat Style rank, its Battle Aura rank, and whether it means to fight you right now. With 3 or more successes you also learn whether it is hiding how strong it is.

Aegis Pulse

Mana Cost: 3
Speed: Reaction
Type: Defense
Range: Self
Dice Pool: Fortitude + Endurance + Battle Aura

Effect: When struck by an attack that meets the practitioner's BDT, spend 3 mana as a Reaction to channel fighting spirit into the body at the moment of impact. Roll Fortitude + Endurance + Battle Aura dots. Each success reduces the incoming damage value by 1. Triggers after the attacker's damage roll but before damage is applied.

A sudden flare of fighting spirit at the moment of impact, hardening the body against the blow.

Counter Pulse

Mana Cost: 3
Speed: Reaction
Type: Attack
Range: The attacker, in an adjacent zone
Dice Pool: Attribute + Ability + Combat Style + Battle Aura

Effect: When taking a point of damage from an attacker in an adjacent zone, spend 3 mana as a Reaction to immediately return a strike against the attacker. Roll as a standard melee attack. Additional mana may be declared toward attack or damage as normal. The counter resolves after the incoming attack is applied. Defend: Dexterity + Dodge.

The practitioner channels their fighting spirit into an immediate counter strike following damage from a melee attack.

Rank 4: Lunar

Fighting spirit can be projected beyond the body for the first time. Attacks no longer require physical contact. The practitioner sends their aura forward in a straight line from their fist, foot, or weapon. They can also imbue their attacks with the energy of one casting school (see Imbuing).

Default Ability: **Aura Hand** *(3 mana, Instant)* Reach out with projected fighting spirit up to 2 zones away and roll Strength + Athletics + Battle Aura. Push or pull a creature 1 zone into an empty zone (Defend: Strength + Athletics), or lift, move, or hold an object you could lift with your own hands, such as opening a door or catching a falling ally.

Aura Wave

Mana Cost: 4, or 1 Willpower
Speed: Instant
Type: Attack
Range: Ranged, straight line from caster through any number of zones
Dice Pool: Attribute + Ability + Combat Style + Battle Aura

Effect: Project fighting spirit forward in a straight line. The wave travels through every zone in that line. Every target in the line is hit and defends separately. The caster rolls once and applies the same attack successes to all targets. Damage is rolled separately after a successful hit. Additional mana may be spent to add bonus dice to attack or damage before rolling. Defend: Dexterity + Dodge.

A visible wave of fighting spirit launched forward in a straight line.

Aura Parry

Mana Cost: 4, or 1 Willpower
Speed: Reaction
Type: Defense
Range: Self
Dice Pool: Attribute + Ability + Combat Style + Battle Aura

Effect: When targeted by a ranged or melee attack, spend 4 mana or 1 Willpower as a Reaction to project fighting spirit outward as a deflecting force. Roll Attribute + Ability + Combat Style + Battle Aura dots. Each success reduces the incoming attack's success total by 1. If the defender's successes meet or exceed the attacker's the attack is fully deflected. Usable against both physical and magical attacks.

The practitioner projects their fighting spirit outward at the moment of an incoming attack.

Rank 5: Stellar

The practitioner can now project their fighting spirit outward in a cone.

Default Ability: **Battle Presence** *(Permanent)* People near you can feel your fighting spirit without being touched. Add your Battle Aura dots to rolls to intimidate, and to your own rolls to resist fear.

Aura Cone

Mana Cost: 5, or 2 Willpower
Speed: Instant
Type: Attack, AoE
Range: AoE-Cone
Dice Pool: Attribute + Ability + Combat Style + Battle Aura

Effect: Project fighting spirit outward in a cone covering all zones directly in front of and diagonally forward of the practitioner. The caster rolls once and applies the same attack successes to all targets in the cone. Each target defends separately. Damage is rolled separately after a successful hit. Additional mana may be spent to add bonus dice to attack or damage. Can hit allies. Defend: Dexterity + Dodge.

A fan of fighting spirit projected outward from the body, covering a wide forward arc.

Aura Transfer

Mana Cost: 5, or 2 Willpower
Speed: Instant, Extended
Type: Enhancement, Persistent
Range: One target in an adjacent zone
Dice Pool: Intelligence + Magic + Battle Aura

Effect: Channel fighting spirit into an ally, temporarily enhancing one physical attribute (Strength, Dexterity, or Fortitude) by a number of dots equal to successes rolled, up to the practitioner's Battle Aura dots. Duration maintained by upkeep of 4 mana per Upkeep Phase. The practitioner must remain within one zone of the target to maintain the effect.

The practitioner channels their fighting spirit directly into an ally, temporarily bolstering their physical capabilities.

Rank 6: Galactic

The practitioner gains Empowered Flight. Attacks can be projected in two directions simultaneously. The aura can now protect others.

Default Ability: **Empowered Flight** *(see Flight above)* You can fly by projecting fighting spirit downward, following the Flight rules at the start of this section.

Twin Wave

Mana Cost: 6, or 3 Willpower
Speed: Instant
Type: Attack
Range: Ranged, two straight lines from the caster in any two directions
Dice Pool: Attribute + Ability + Combat Style + Battle Aura

Effect: Project fighting spirit in two straight lines simultaneously. Each line can point in any direction. The caster rolls once and applies the same attack successes to all targets in both lines. Each target defends separately. Damage is rolled separately after a successful hit. Additional mana may be spent to add bonus dice to attack or damage. Defend: Dexterity + Dodge.

Two simultaneous waves of fighting spirit projected in different directions.

Aura Shroud

Mana Cost: 6, or 3 Willpower
Speed: Instant, Extended
Type: Defense, Persistent
Range: Self and up to two allies in adjacent zones
Dice Pool: Fortitude + Endurance + Battle Aura

Effect: Project fighting spirit outward to cover the practitioner and up to two allies in adjacent zones in a protective aura. Each protected target adds the practitioner's Battle Aura dots to their BDT for as long as the effect is maintained. Upkeep cost is 5 mana per Upkeep Phase. The practitioner must remain within one zone of each protected target. If a target moves beyond one zone away the effect on that target ends immediately.

The practitioner extends their fighting spirit outward to cover allies in a protective layer.

Rank 7: Cosmic

The practitioner has achieved complete mastery. The aura is a constant visible presence felt by anyone nearby. Techniques may be activated by spending 4 Willpower. The practitioner can release their fighting spirit in all directions simultaneously or concentrate it into a single devastating output.

Default Ability: **Sovereign Aura** *(Attuned: holds 4 of your M/T while active)* Enemies within a number of zones equal to your Battle Aura dots, whose Battle Aura and Combat Style ratings are all lower than your Battle Aura dots, roll Composure + Presence when they first come into range. If they roll fewer successes than your Battle Aura dots, they lose 1 die on all rolls while they stay in range. Outside of combat, anyone affected won't start a fight with you unless they're cornered.

Omega Burst

Mana Cost: 7, or 4 Willpower
Speed: Instant
Type: Attack, AoE
Range: AoE, all zones adjacent to the practitioner
Dice Pool: Attribute + Ability + Combat Style + Battle Aura

Effect: Release fighting spirit in an explosive burst radiating outward in all directions. Every target in any zone adjacent to the practitioner is hit. The caster rolls once and applies the same attack successes to all targets. Each target defends separately. Damage is rolled and applied to all targets hit successfully. Additional mana may be spent to add bonus dice to attack or damage. All targets, whether damaged or not, are pushed one zone away from the caster. Defend: Dexterity + Dodge.

A total release of fighting spirit in all directions at once. Every nearby target is pushed back.

Aura Ascendant

Mana Cost: 7, or 4 Willpower
Speed: Instant, Extended
Type: Enhancement, Persistent
Range: Self
Dice Pool: Intelligence + Magic + Battle Aura

Effect: Channel fighting spirit into complete physical transcendence. Once active, all three physical attributes (Strength, Dexterity, and Fortitude) are enhanced by a number of dots equal to successes rolled, up to the practitioner's Battle Aura dots. All existing Battle Aura persistent effects are maintained at no additional upkeep cost for the duration. Upkeep cost is 6 mana per Upkeep Phase or 2 Willpower per scene. Ends immediately if the practitioner is incapacitated.

A total channeling of fighting spirit into the body simultaneously enhancing all physical attributes.

Combination magic is what happens when two or more casting schools are woven together as a unified effect. The result is a distinct spell neither school could produce alone. Every combination spell is learned separately. Meeting the prerequisites does not automatically grant access to the spell.

Healing Magic

No single casting school can heal. Healing comes only from combination magic. Bright Magic on its own does not heal anyone.

A healing spell does not repair damage directly. Radiant energy surrounds the target as they are given a PHP (Pool of Healing Points) equal to the cast successes. The healing does not begin on its own. The target spends points from the pool during their own turn. Spending PHP does not take an action.

Healing Tiers

Every healing spell names its healing tier. The tier decides what each point in the pool can do. Each point spent buys one option from that tier. To slake a damage box is to lower it one type (Aggravated to Lethal, or Lethal to Bashing). To neutralize a box is to remove it.

Basic: neutralize 1 Bashing, or slake 1 Lethal to Bashing. Cannot affect Aggravated.

Advanced: neutralize 2 Bashing, neutralize 1 Lethal, or slake 1 Aggravated to Lethal.

Expert: neutralize 4 Bashing, neutralize 2 Lethal, or neutralize 1 Aggravated.

Master healing regrows lost limbs and is never used in combat. Resurrection is the only tier above Master (see Resurrection).

How Long a Pool Lasts

Every healing spell states how long its pool lasts. Many pools last until the end of the target's next turn, and any unused points are lost. Stronger spells let the energy linger using the countdown mechanic: the pool lasts a number of turns equal to half the mana spent, rounded up, and paying the spell's upkeep (mana cost minus 1) during the Upkeep Phase freezes the countdown for that turn. When the pool ends, any unused points are lost.

Resurrection

Death in Terrana is not always the end, but coming back is rare.

The Countdown: When a character dies without choosing to, the mana they held at the moment of death stays in the body and counts down by 1 each day. While any remains, the soul can still be called back.

Rising Undead: If the count reaches 0 and the body was not cremated, it soaks up the ambient mana around it and rises as mindless undead. Sentient undead are far rarer: they take an act of a god, or a personality implanted by a powerful Shade user.

A Chosen Death: A character who chose Blaze of Glory chose their death and cannot be resurrected.

The Spell: Only one spell can call someone back: Resurrection, a six-school combination of Fire, Water, Air, Nature, Bright, and Shade at 6 dots each (Six-School Combinations). Very few people alive have the training to cast it, which is why resurrection is precious and never routine. Healing magic can repair a body, but only Resurrection can bring back the person in it.

Imbuing Attacks

A weapon or unarmed attack can carry the energy of a casting school in two ways: Battle Aura imbuing, available from Battle Aura Rank 4, and Augmentation, a circle magic that builds magic into weapons with an augment slot. Either way, an attack can carry only one school's energy at a time.

When an attack carries a school's energy, that school's fixed rule decides which roll its mana can go to:

Fire: Damage roll only

Water: Either roll

Air: Attack roll only

Earth: Damage roll only

Nature: Either roll

Bright: Attack roll only

Shade: Damage roll only

Battle Aura: Either roll

Imbuing is not a spell. It does not produce a spell block with type, range, or defensive roll. It is mana fed into an existing physical attack.

Elemental Advantages

The five combat magic schools do not exist in isolation. They interact with one another in structured ways, and understanding those interactions is one of the most important things a caster can learn. Some elements carry inherent advantages against others, making attacks more effective, walls harder to break, and spell effects more difficult to resist. Ignoring this will cost you. Using it well can turn a fight before your opponent realizes what is happening.

Every element has a strong advantage against one other element and a moderate advantage against a second. The reverse is also true: every element is weakened against two others. These relationships are fixed and apply any time two elements interact in combat, whether through direct spell attacks, elemental walls and shields, terrain effects, or combination spells that carry elemental tags. An advantage needs something elemental on the other side to oppose: a wall, shield, terrain, or elemental effect, or a creature with an elemental type. A summoned water elemental, for example, is struck by Air Magic with advantage and by Fire Magic with disadvantage.

How Advantages Work

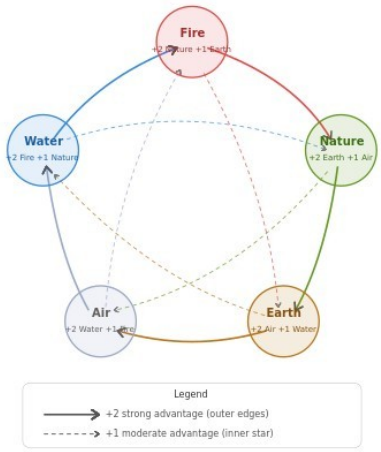
A strong advantage (+2) means the attacking element gains 2 additional dice on rolls made against the target element. This applies to attack rolls when the spell directly opposes an elemental effect, and to the damage roll when striking a target who is protected by or empowered with the opposing element. When attacking an elemental wall or shield, the defending element's DT bonus is also affected: the shielded target gains double the bonus against an element it is strong against, and half the bonus against an element it is weak against.

A moderate advantage (+1) works the same way but adds only 1 die. It is still meaningful, particularly at higher ranks where the difference of a single die can push a result past a Damage Threshold.

These bonuses apply in both directions. A Fire mage attacking a Water wall is rolling at a disadvantage. A Water mage attacking a Fire wall is rolling with 2 extra dice. Players and Storytellers should keep this in mind when choosing which spell to cast into which situation.

The Elemental Relationships

The diagram below shows all five elemental relationships. Solid outer arrows represent the +2 strong advantage, flowing clockwise around the star. Dashed inner arrows represent the +1 moderate advantage, cutting across to the element two steps away.



Reading the diagram: each element's strong advantage points to the element immediately clockwise on the outer ring. Each element's moderate advantage points to the element two steps clockwise via the inner star line.

Quick Reference

Fire: +2 against Nature, +1 against Earth

Nature: +2 against Earth, +1 against Air

Earth: +2 against Air, +1 against Water

Air: +2 against Water, +1 against Fire

Water: +2 against Fire, +1 against Nature

Bright Magic and Shade Magic have no elemental strengths or weaknesses. They do not interact with the elemental advantage system. Their advantages and disadvantages are tied entirely to living and undead targets rather than to opposing elemental forces.

Combination spells carry the elemental tags of every school used to cast them. A combination spell using Fire and Water, for example, is both strong and weak depending on what it encounters. The Storyteller and player should note which schools are involved in a combination cast and apply the relevant bonuses and penalties accordingly.

Part One: The Casting Magics

The seven casting schools are Fire, Water, Air, Earth, Nature, Bright, and Shade. Each runs from Core (1) to Cosmic (7). Every rank grants a Default Ability and offers two spells: choose one when you buy the dot.

Fire Magic

Fire Magic is the school of combustion, heat, and destruction by burning. Its spells deal damage directly and impose the Burning condition. Fire is aggressive and direct. It gains mana assignment to the damage roll only. It carries elemental advantages against Nature and Earth and is weakest against Water and Air.

Fire Magic has elemental interactions with elemental defenses and conjurations: +2 against Nature, +1 against Earth, -1 against Air, -2 against Water.

Rank 1: Core

The practitioner can kindle and hurl small flames. Fire at this rank is close-range and straightforward. There is nothing subtle about it.

Default Ability: **Heat Tolerance** *(Permanent)* Damage you take from ordinary, non-magical heat and flame is halved (rounded down), and you can briefly handle hot coals or metal.

Ignite

Mana Cost: 1
Speed: Instant
Type: Attack, Fire
Range: Adjacent zone
Dice Pool: Dexterity + Magic + Fire dots

Effect: Launch a small flame at a target in an adjacent zone. On a hit the target takes damage equal to excess successes. Defend: Dexterity + Dodge. Outside of combat, Ignite can set an unattended combustible object on fire, and that fire burns as ordinary flame.

A flick of concentrated heat thrown directly at a target.

Kindle

Mana Cost: 1
Speed: Instant
Type: Utility, Fire
Range: Self / touch
Dice Pool: Intelligence + Magic + Fire dots

Effect: Set fire to any flammable material the caster touches or holds. Alternatively, light a small flame on something that can burn, such as a torch or candle. Once lit it is ordinary fire and burns as normal. Cannot be used as an attack. Can destroy documents, ignite traps, or light a campfire with one success.

The most basic application of fire. Make a thing burn.

Rank 2: Terrestrial

The caster can project fire to greater distances and begin to shape it into persistent effects.

Default Ability: **Warmth** *(Attuned: holds 1 of your M/T while active)* You and allies in adjacent zones are unaffected by non-magical cold and cannot gain the Chilled condition from weather.

Fire Bolt

Mana Cost: 2
Speed: Instant
Type: Attack, Fire
Range: Targeted
Dice Pool: Dexterity + Magic + Fire dots

Effect: A bolt of fire strikes a single target at any range within line of sight. On a hit deals damage equal to excess successes and applies the Burning condition. Defend: Dexterity + Dodge or appropriate cover.

A reliable aimed bolt. Goes where it is aimed. Burns what it hits.

Burning Ground

Mana Cost: 2
Speed: Instant
Type: Utility, Persistent, Fire
Range: Zone
Dice Pool: Intelligence + Magic + Fire dots

Effect: Cover a zone in low flames. Any target entering or remaining in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase. Failure deals 1 damage and applies the Burning condition. Water Magic applied to the zone reduces cast successes by the Water caster's successes. Upkeep: 1.

The ground burns. Not intensely. But it burns.

Rank 3: Aerial

Fire becomes a cone and a shield. The caster can now catch themselves with it.

Default Ability: **Reach of Flame** *(Permanent)* Your Fire spells with a range of Adjacent zone can target a zone one step further away.

Fire Breath

Mana Cost: 3
Speed: Instant
Type: Attack, AoE, Fire
Range: AoE-Cone
Dice Pool: Dexterity + Magic + Fire dots

Effect: A cone of flame erupts from the caster, covering all zones directly in front and diagonally forward. Caster rolls once and applies the same attack successes to all targets. Each target defends separately. All targets hit gain the Burning condition. Defend: Dexterity + Dodge.

A broad expulsion of fire from the caster's hands or mouth.

Flame Wall

Mana Cost: 3
Speed: Instant
Type: Conjuration, Persistent, Fire
Range: Adjacent zone border
Dice Pool: Intelligence + Magic + Fire dots

Effect: A wall of flame rises along a border between two zones. Any target attempting to cross the border must roll Fortitude + Endurance vs cast successes or take damage equal to excess successes and gain the Burning condition. The wall provides cover to targets on either side. Water Magic reduces cast successes by the Water caster's successes. Upkeep: 2.

A vertical sheet of fire that punishes anyone who walks through it.

Rank 4: Lunar

The caster can wrap themselves in fire as a persistent defense and project fire in straight lines.

Default Ability: **Flare** *(2 mana, Reaction)* When an enemy in an adjacent zone attacks you, a flash of fire bursts from your body. That attack loses 2 dice.

Fire Lash

Mana Cost: 4
Speed: Instant
Type: Attack, Fire
Range: Ranged, straight line through any number of zones
Dice Pool: Dexterity + Magic + Fire dots

Effect: A whip of concentrated flame projects in a straight line from the caster, hitting every target in that line. Caster rolls once and applies the same attack successes to all targets. Each target defends separately. All targets hit gain the Burning condition. Damage is rolled separately after a successful hit.

A lash of fire that cuts a straight line through everything in its path.

Ember Cloak

Mana Cost: 4
Speed: Instant, Extended
Type: Defense, Persistent, Fire
Range: Self
Dice Pool: Fortitude + Magic + Fire dots

Effect: The caster wraps themselves in a sustained layer of fire. Any target who strikes the caster in melee takes damage equal to half the original cast successes (rounded down) and gains the Burning condition. The cloak also adds the cast successes to the caster's BDT against water-based attacks. Upkeep: 3.

The caster burns. Anyone who reaches for them learns it immediately.

Rank 5: Stellar

Fire can be launched as a large explosion or concentrated into armor-piercing intensity.

Default Ability: **Searing** *(Permanent)* Damage from your Fire spells ignores 1 point of the armor portion of a target's DT.

Fireball

Mana Cost: 5
Speed: Instant
Type: Attack, AoE, Fire
Range: AoE-4 (2x2 zone area), any targeted zone within line of sight
Dice Pool: Dexterity + Magic + Fire dots

Effect: A sphere of fire detonates in a 2x2 zone area. Caster rolls once and applies the same attack successes to all targets in the area. Each target defends separately. All targets hit gain the Burning condition. Can hit allies. The caster may choose any adjacent 2x2 zone area within line of sight.

The classic. A ball of fire that explodes on impact and covers the area.

Piercing Flame

Mana Cost: 5
Speed: Instant
Type: Attack, Armor Pen, Fire
Range: Targeted
Dice Pool: Dexterity + Magic + Fire dots

Effect: A focused lance of fire heated beyond normal flame burns through defenses. Carries Armor Pen: before rolling, declare additional mana toward Armor Pen. Every 2 mana reduces the armor portion of the target's DT by 1 for this attack. Target hit gains the Burning condition. Defend: Dexterity + Dodge or appropriate cover.

Fire focused down to a point of intense penetration.

Rank 6: Galactic

The caster can rain fire from above and animate a sustained fire entity.

Default Ability: **Living Flame** *(Attuned: holds 2 of your M/T while active)* Your body is wreathed in fire. Any target that hits you with a melee attack gains the Burning condition.

Rain of Fire

Mana Cost: 6
Speed: Instant
Type: Attack, AoE, Fire
Range: AoE, any number of adjacent zones chosen by caster, up to Fire dots
Dice Pool: Dexterity + Magic + Fire dots

Effect: Fire falls from above across a number of zones up to the caster's Fire dots. The caster rolls once and applies the same attack successes to all targets in all chosen zones. Each target defends separately. All targets hit gain the Burning condition. The caster must be able to see or have previously visited every chosen zone. Water Magic in a targeted zone reduces cast successes in that zone by the Water caster's successes.

The sky over multiple zones ignites. Everyone below learns at once.

Fire Elemental

Mana Cost: 6
Speed: Instant
Type: Conjuration, Persistent, Fire
Range: Any adjacent zone
Dice Pool: Intelligence + Magic + Fire dots

Effect: Summons a fire elemental in an adjacent zone. It cannot act on the turn it is summoned. On subsequent turns the caster may command it to attack one target in its zone or an adjacent zone, using the caster's Fire dice pool. Any target it hits gains the Burning condition. The elemental has a Vitality pool equal to double the cast successes. Water Magic reduces the Vitality pool by the Water caster's successes. Upkeep: 5.

A semi-autonomous entity of concentrated flame that attacks on command.

Rank 7: Cosmic

Fire at this rank is an extinction event for a zone or a conflagration that envelops every target on the field.

Default Ability: **Heart of the Sun** *(Permanent)* Burning applied by your Fire spells deals 1 Lethal on a successful resistance roll and 1 Aggravated on a failed one.

Inferno

Mana Cost: 7
Speed: Instant
Type: Attack, AoE, Fire
Range: All zones within line of sight
Dice Pool: Dexterity + Magic + Fire dots

Effect: Fire envelops every zone the caster can see. Caster rolls once. Every target in every visible zone must defend. Each target defends separately. All targets hit gain the Burning condition. The caster's own zone is affected. Defend: Dexterity + Dodge.

The world, briefly, is on fire.

Eternal Flame

Mana Cost: 7
Speed: Instant
Type: Utility, Persistent, Fire
Range: Zone
Dice Pool: Intelligence + Magic + Fire dots

Effect: The caster creates a fire that will not die naturally. It fills the zone permanently, dealing damage equal to cast successes to any target who enters or remains, and applying the Burning condition. It cannot be extinguished by normal means. Water Magic reduces cast successes by the Water caster's successes but cannot dispel it without matching or exceeding the successes entirely. If the successes are fully matched the Eternal Flame is extinguished. Upkeep: 6.

A fire that stays. It does not go out. It does not diminish. It simply burns.

Water Magic

Water Magic is the school of fluid force, cold, and flow. Its spells deal damage, apply the Chilled condition, move targets, and can shift between offense and defense with notable flexibility. Water can assign mana to either the attack roll or the damage roll. It carries elemental advantages against Fire and Nature and is weakest against Air and Earth.

Elemental interactions: +2 against Fire, +1 against Nature, -1 against Earth, -2 against Air.

Rank 1: Core

Water at this rank is a jet and a chill. The caster can hurl water with force and apply cold to surfaces or targets.

Default Ability: **Water Breathing** *(Attuned: holds 1 of your M/T while active)* You can breathe underwater and swim at your normal movement.

Water Bolt

Mana Cost: 1
Speed: Instant
Type: Attack, Water
Range: Adjacent zone
Dice Pool: Dexterity + Magic + Water dots

Effect: A high-pressure bolt of water hits a target in an adjacent zone. On a hit deals damage equal to excess successes. Defend: Dexterity + Dodge.

Water moving very fast in one direction. It hits hard.

Chill Touch

Mana Cost: 1
Speed: Instant
Type: Attack, Utility, Water
Range: Touch
Dice Pool: Intelligence + Magic + Water dots

Effect: The caster applies intense cold through touch. Against an unwilling target this is a touch attack: on a hit the target takes damage equal to excess successes. Defend: Dexterity + Dodge. Outside of combat, Chill Touch can freeze a small amount of water, frost a surface, or chill food and drink, and the cold fades naturally.

Cold applied directly. Not violence yet. Just cold.

Rank 2: Terrestrial

Water can be projected at range and used to create treacherous terrain.

Default Ability: **Purify** *(1 mana, Instant)* Make up to a zone of water clean and safe to drink, or draw a few gallons of fresh water out of the air.

Water Jet

Mana Cost: 2
Speed: Instant
Type: Attack, CC, Water
Range: Targeted
Dice Pool: Dexterity + Magic + Water dots

Effect: A focused stream of pressurized water hits a single target within line of sight. On a hit deals damage equal to excess successes. Any target hit must roll Strength + Athletics vs cast successes or be pushed 1 zone away from the caster. Defend: Dexterity + Dodge.

A stream of water that pushes as hard as it hits.

Ice Patch

Mana Cost: 2
Speed: Instant
Type: Utility, Persistent, Water
Range: Zone
Dice Pool: Intelligence + Magic + Water dots

Effect: Freezes the surface of a zone with a thin layer of ice. The zone becomes difficult terrain. Any target entering or moving through the zone must roll Dexterity + Acrobatics vs cast successes or fall prone (Knocked Down condition). Fire Magic applied to the zone reduces cast successes by the Fire caster's successes. Upkeep: 1.

The floor gets slick. The transition from upright to down is fast.

Rank 3: Aerial

The caster can reach further with ice and begin to use water as a reactive defense.

Default Ability: **Flowing Form** *(Permanent)* You gain 1 bonus die on Dexterity + Dodge rolls against Fire Magic.

Frost Lance

Mana Cost: 3
Speed: Instant
Type: Attack, Water
Range: Targeted
Dice Pool: Dexterity + Magic + Water dots

Effect: A lance of ice fires at a target within line of sight. On a hit deals damage equal to excess successes and applies the Chilled condition. On 3+ excess successes the Chilled condition escalates to Frozen (the target cannot move at all and loses their movement action until freed, which requires either Fire Magic applied to them or a Strength + Athletics roll vs cast successes as an action). Defend: Dexterity + Dodge.

Cold compressed to a point and thrown. It gets into the target in more ways than one.

Water Shield

Mana Cost: 3
Speed: Reaction
Type: Defense, Water
Range: Self
Dice Pool: Fortitude + Magic + Water dots

Effect: When an attack is declared against the caster, spend 3 mana as a Reaction to raise a barrier of rushing water. Roll Fortitude + Magic + Water dots. Each success adds 1 to the caster's DT against this specific attack. Against fire-based attacks, double the DT bonus from this roll. Against earth or nature-based attacks, the shield provides no bonus.

Water intercedes between the caster and whatever is coming.

Rank 4: Lunar

Water can fully freeze targets and put out fire across a whole zone.

Default Ability: **Water Walking** *(Attuned: holds 2 of your M/T while active)* You can move across the surface of water and other liquids as if it were solid ground.

Flash Freeze

Mana Cost: 4
Speed: Instant
Type: Attack, CC, Water
Range: Targeted
Dice Pool: Intelligence + Magic + Water dots

Effect: Water erupts from the ground around a target, instantly freezing them in place. Target must roll Fortitude + Endurance vs cast successes. On failure, the target gains the Frozen condition (cannot move, loses movement action, -2 dice to all rolls while frozen). On 3+ excess successes the target also takes damage equal to excess successes as the ice compresses. Fire Magic applied to the target reduces the successes on the freeze and can end it. Defend: Fortitude + Endurance.

Sudden total freezing. Not cold. Frozen.

Quench

Mana Cost: 4
Speed: Instant
Type: Utility, Water
Range: Zone within line of sight
Dice Pool: Intelligence + Magic + Water dots

Effect: Water floods a zone and puts out fire. Every Burning condition on targets in the zone ends. Each Fire Magic effect in the zone (walls, burning ground, fire conjurations) loses successes equal to the cast successes, and any reduced to 0 ends. On 3+ successes the zone also becomes difficult terrain until the start of the next Upkeep Phase.

Every flame in the zone goes out at once.

Rank 5: Stellar

Water can draw targets toward the caster and form persistent body armor from ice.

Default Ability: **Deep Cold** *(Permanent)* A target that gains the Chilled condition from your Water spells also loses their free move while Chilled.

Tidal Pull

Mana Cost: 5
Speed: Instant
Type: Attack, CC, Water
Range: Targeted
Dice Pool: Dexterity + Magic + Water dots

Effect: A wave of water crashes against a single target and drags them toward the caster. On a hit deals damage equal to excess successes. Any target hit must roll Strength + Athletics vs cast successes or be dragged 1 zone toward the caster per 2 excess successes (minimum 1 zone on failure). Defend: Dexterity + Dodge.

A wave that hits a target and pulls them back with it.

Ice Armor

Mana Cost: 5
Speed: Instant, Extended
Type: Defense, Persistent, Water
Range: Self
Dice Pool: Fortitude + Magic + Water dots

Effect: The caster encases themselves in a layer of magical ice. Add cast successes to the caster's BDT against all physical attacks. Additionally, the ice absorbs damage: the first time the caster would take damage each round, reduce that damage by the cast successes before applying it. Fire attacks deal double damage to the Ice Armor, reducing the BDT bonus by the fire damage dealt. Upkeep: 4.

Ice plate. It holds until it is melted. Which takes work.

Rank 6: Galactic

Water at this rank can blanket multiple zones in ice and redirect incoming attacks.

Default Ability: **Slip Away** *(3 mana, Reaction)* When you would be pushed, pulled, or dragged, you flow like water instead. Ignore the forced movement and move 1 zone in a direction of your choice.

Blizzard

Mana Cost: 6
Speed: Instant
Type: Attack, AoE, Water
Range: AoE, up to Water dots zones chosen by caster
Dice Pool: Intelligence + Magic + Water dots

Effect: Ice and freezing wind blast across a number of zones up to the caster's Water dots. Caster rolls once. Every target in every chosen zone must defend. Each

defends separately. All targets hit gain the Chilled condition. On 3+ excess successes, a target gains Frozen instead. Fire Magic in a targeted zone reduces cast successes in that zone. Defend: Fortitude + Endurance.

Multiple zones become extremely cold and hostile all at once.

Countercurrent

Mana Cost: 6
Speed: Reaction
Type: Defense, Water
Range: Self or adjacent ally
Dice Pool: Dexterity + Magic + Water dots

Effect: When the caster or an adjacent ally is the target of a ranged attack or targeted spell, spend 6 mana as a Reaction. Roll Dexterity + Magic + Water dots. If the roll's successes exceed the attack's successes, the attack is redirected to a target of the caster's choice within range of the original attack. If the successes do not exceed the attack's, the attack proceeds normally. Cannot be used against melee attacks.

An incoming attack gets turned around and aimed somewhere else.

Rank 7: Cosmic

Water at this rank can flood an entire area or lock it permanently under ice.

Default Ability: **Absolute Zero** *(Permanent)* Frozen conditions from your Water spells can only be ended by Fire Magic that exceeds your cast successes, and a Frozen target cannot use Reactions.

Deluge

Mana Cost: 7
Speed: Instant
Type: Attack, AoE, Water
Range: All zones within line of sight
Dice Pool: Dexterity + Magic + Water dots

Effect: A massive wave floods every visible zone. Caster rolls once. Every target in every visible zone must defend. Each defends separately. All targets hit take damage equal to excess successes, gain the Chilled condition, and must roll Strength + Athletics vs cast successes or be pushed 1 zone in the direction of the wave. After the water passes, all affected zones become difficult terrain as water and debris remain. Defend: Strength + Athletics.

A wave fills everything that can be seen. There is nowhere to go.

Glacier

Mana Cost: 7
Speed: Instant, Extended
Type: Conjuration, Persistent, Water
Range: Zone of caster's choice within line of sight
Dice Pool: Intelligence + Magic + Water dots

Effect: A massive glacier rises and fills the target zone entirely. The zone is impassable without destroying sections of glacier (each section has Vitality equal to cast successes, and there are 4 sections). Targets inside when it forms are Frozen and Pinned until the ice is destroyed or melted. Fire Magic reduces the glacier's Vitality by the Fire caster's successes per turn applied. Upkeep: 6.

A zone becomes a glacier all at once.

Air Magic

Air Magic is the school of wind, speed, and precision. Its spells excel at ranged attacks, movement disruption, and battlefield control through gusts and visibility reduction. Air assigns mana to the attack roll only. It carries elemental advantages against Water and Fire and is weakest against Earth and Nature.

Elemental interactions: +2 against Water, +1 against Fire, -1 against Nature, -2 against Earth.

Rank 1: Core

Air at this rank is a gust and a nudge. The caster can move air with intent and begin shaping where things fly.

Default Ability: **Light Step** *(Permanent)* Treat every fall as one vertical zone shorter when working out falling damage.

Wind Strike

Mana Cost: 1
Speed: Instant
Type: Attack, Air
Range: Adjacent zone
Dice Pool: Dexterity + Magic + Air dots

Effect: A focused gust of air impacts a single target in an adjacent zone. On a hit deals damage equal to excess successes. Defend: Dexterity + Dodge.

Wind with a point to it.

Gust

Mana Cost: 1
Speed: Instant
Type: Utility, CC, Air
Range: Adjacent zone
Dice Pool: Dexterity + Magic + Air dots

Effect: A controlled gust of wind pushes a target in an adjacent zone. On 1 success the target is pushed 1 zone in a direction the caster chooses. Defend: Strength + Athletics. Can also be used to push objects or redirect projectiles (Storyteller discretion for non-combat applications).

A targeted push of air with real force behind it.

Rank 2: Terrestrial

The caster can move air across larger distances and begin stripping defenses.

Default Ability: **Whisper** *(1 mana, Instant)* Send a short spoken message of a sentence or two on the wind to one person within line of sight. Only they hear it.

Air Blade

Mana Cost: 2
Speed: Instant
Type: Attack, Air
Range: Targeted
Dice Pool: Dexterity + Magic + Air dots

Effect: A blade of compressed air launches at a single target within line of sight. On a hit deals damage equal to excess successes. Carries a minor bleed chance: on 3+ excess successes, target gains the Bleeding condition. Defend: Dexterity + Dodge.

Air made sharp. It cuts.

Deflecting Wind

Mana Cost: 2
Speed: Reaction
Type: Defense, Air
Range: Self
Dice Pool: Dexterity + Magic + Air dots

Effect: When targeted by a ranged projectile or physical ranged attack, spend 2 mana as a Reaction. Roll Dexterity + Magic + Air dots. Each success reduces the incoming attack's success total by 1. If the caster's successes fully meet the attacker's, the attack misses entirely. This does not work against melee attacks or magical targeted spells unless they have a physical projectile component.

A wall of moving air that blows an incoming attack off course.

Rank 3: Aerial

The caster can blanket zones in wind and begin using air to enhance their own mobility.

Default Ability: **Tailwind** *(Attuned: holds 2 of your M/T while active)* Your movement increases by 1 zone each turn.

Cyclone

Mana Cost: 3
Speed: Instant
Type: Attack, AoE, CC, Air
Range: AoE-Cone
Dice Pool: Dexterity + Magic + Air dots

Effect: A cone of cutting wind erupts from the caster covering all zones directly in front and diagonally forward. Caster rolls once. Each target defends separately. All targets hit are pushed 1 zone directly away from the caster. If a target cannot be pushed (blocked by a wall or barrier), they instead take 1 additional damage. Defend: Strength + Athletics.

Everything in front gets blown back.

Wind Sprint

Mana Cost: 3
Speed: Instant
Type: Utility, Air
Range: Self
Dice Pool: Dexterity + Magic + Air dots

Effect: A burst of wind at the caster's back doubles their movement distance for this turn. This is not flight; the caster must still move along the ground. The effect is immediate and lasts for the turn only. No defend roll required. On 3+ successes, the caster may also choose to move through one zone that would normally cost extra AP (Difficult Terrain, Overgrowth, etc.) without the penalty this turn.

The wind pushes from behind. The caster moves faster than they should.

Rank 4: Lunar

The caster can send a straight-line storm and begin to disrupt incoming attacks across the field.

Default Ability: **Eye of the Wind** *(Permanent)* Your ranged Air spells ignore dice penalties from wind, weather, and non-magical visibility.

Tornado Bolt

Mana Cost: 4
Speed: Instant
Type: Attack, CC, Air
Range: Ranged, straight line through any number of zones
Dice Pool: Dexterity + Magic + Air dots

Effect: A concentrated tornado travels in a straight line from the caster, hitting every target in that line. Caster rolls once and applies the same attack successes to all targets. Each target defends separately. Any target hit is Knocked Down (prone). Damage is rolled separately after a successful hit. Defend: Dexterity + Dodge.

A miniature tornado shot in a line, knocking everyone it touches off their feet.

Wind Wall

Mana Cost: 4
Speed: Instant
Type: Defense, Persistent, Air
Range: Adjacent zone border
Dice Pool: Intelligence + Magic + Air dots

Effect: A sustained wall of wind rises along a zone border. All ranged physical attacks and targeted spells attempting to cross the wall must roll vs cast successes as a barrier. If the attack's successes do not exceed the wall successes, the attack is deflected. Any target attempting to cross the border must roll Strength + Athletics vs cast successes or be pushed back 1 zone. Earth Magic reduces cast successes by the Earth caster's successes. Upkeep: 3.

A wall of wind that stops things from passing through it.

Rank 5: Stellar

Air can now be used to strip visibility across a whole zone and push multiple targets simultaneously.

Default Ability: **Updraft Leap** *(3 mana, Instant)* Leap up to 2 vertical zones, or across 2 zones, and land safely.

Shearing Gale

Mana Cost: 5
Speed: Instant
Type: Attack, AoE, CC, Air
Range: Zone
Dice Pool: Dexterity + Magic + Air dots

Effect: A high-force gale tears through an entire zone. Caster rolls once and applies the same attack successes to all targets in the zone. Each target defends separately. All targets hit are pushed 1 zone away from the caster and are Knocked Down. The caster picks the direction for all pushed targets simultaneously. Can hit allies. Defend: Strength + Athletics.

A gale strong enough to move everything in a zone at once.

Fog of War

Mana Cost: 5
Speed: Instant
Type: Utility, Persistent, Air
Range: Zone
Dice Pool: Intelligence + Magic + Air dots

Effect: Dense wind-driven fog fills the zone. All ranged attacks and targeted spells originating from or aimed at targets inside the zone suffer a die penalty equal to cast successes. The penalty applies to everyone equally, allies included. Targets inside the fog cannot be clearly seen from outside. Melee attacks within the zone are unaffected. Upkeep: 4.

A fog thick enough that ranged targeting becomes near impossible.

Rank 6: Galactic

Air at this rank can fling targets completely clear of the battlefield or provide the caster with genuine flight.

Default Ability: **Gale Force** *(Permanent)* Targets your Air spells push or Knock Down are pushed 1 additional zone.

Updraft Strike

Mana Cost: 6
Speed: Instant
Type: Attack, CC, Air
Range: Targeted
Dice Pool: Dexterity + Magic + Air dots

Effect: A focused vertical updraft hits a single target, launching them into the air. On a hit deals damage equal to excess successes. The target is Knocked Down and lifted 1 zone directly upward (if indoors or in a covered

area, they hit the ceiling and take additional damage equal to excess successes). When they fall back down on their next Upkeep Phase, they take falling damage unless they succeed on Dexterity + Acrobatics vs cast successes. Defend: Strength + Athletics.

Up. Involuntarily.

Sustained Flight

Mana Cost: 6
Speed: Instant, Extended
Type: Utility, Persistent, Air
Range: Self
Dice Pool: Intelligence + Magic + Air dots

Effect: The caster achieves sustained flight through magical air manipulation. While active, the caster can move in three dimensions freely. While flying they move at double their normal movement. Taking damage that exceeds their DT while airborne requires Dexterity + Athletics vs the damage dealt. Failure begins a fall, landing on the caster's next Upkeep Phase. Hovering costs half upkeep (3 mana, rounded up). Full flight costs full upkeep. Upkeep: 5.

The air carries the caster. They go where they choose.

Rank 7: Cosmic

Air at this rank can clear an entire field or create a permanent zone of absolute wind.

Default Ability: **Storm Crown** *(Attuned: holds 3 of your M/T while active)* Ranged attacks and targeted spells against you lose dice equal to your Air dots.

Grand Cyclone

Mana Cost: 7
Speed: Instant
Type: Attack, AoE, CC, Air
Range: All zones within line of sight
Dice Pool: Dexterity + Magic + Air dots

Effect: A massive cyclone fills the entire visible area. Caster rolls once. Every target in every visible zone must defend. Each target defends separately. All targets hit are Knocked Down and pushed 1d10 divided by 2 zones (round up) in a direction the caster picks per target. Targets pushed into barriers take additional damage equal to excess successes. Defend: Strength + Athletics. The caster's zone is affected.

The wind takes everyone somewhere else.

Eye of the Storm

Mana Cost: 7
Speed: Instant, Extended
Type: Utility, Persistent, Air
Range: Zone of caster's choice within line of sight
Dice Pool: Intelligence + Magic + Air dots

Effect: The caster creates a permanent zone of absolute tempest around a chosen zone, while the chosen zone itself becomes the calm eye. The surrounding zones (all zones adjacent to the eye) become impassable: any target attempting to move through them must roll Strength + Athletics vs cast successes each attempt, and failure leaves them in the current zone, taking damage equal to excess successes from the wind. All ranged attacks crossing through or originating from the surrounding zones automatically fail. The eye zone is completely calm. Upkeep: 6.

A permanent storm with a quiet center. The storm belongs to the caster.

Earth Magic

Earth Magic is the school of stone, endurance, and terrain control. Its spells build barriers, reshape the battlefield, and deliver heavy damage. Earth assigns mana to the damage roll only. It carries elemental advantages against Air and Water and is weakest against Nature and Fire.

Elemental interactions: +2 against Air, +1 against Water, -1 against Fire, -2 against Nature.

Rank 1: Core

Earth at this rank is a stone and a wall. The caster can hurl chunks of rock and raise simple barriers.

Default Ability: **Stonefoot** *(Permanent)* You gain 1 bonus die on rolls to resist being pushed, pulled, or Knocked Down.

Stone Throw

Mana Cost: 1
Speed: Instant
Type: Attack, Earth
Range: Adjacent zone
Dice Pool: Dexterity + Magic + Earth dots

Effect: A stone the size of a fist launches from the ground and strikes a target in an adjacent zone. On a hit deals damage equal to excess successes. Defend: Dexterity + Dodge.

A rock. Thrown with magic. It hits hard.

Earthen Shield

Mana Cost: 1
Speed: Reaction
Type: Defense, Earth
Range: Self
Dice Pool: Fortitude + Magic + Earth dots

Effect: When an attack is declared against the caster, spend 1 mana as a Reaction to raise a brief earthen barrier. Roll Fortitude + Magic + Earth dots. Each success adds 1 to the caster's DT against this specific attack. The barrier crumbles immediately after blocking.

Earth up in front of the caster. Gone after the attack.

Rank 2: Terrestrial

Earth can be thrown from distance and used to create lasting terrain obstacles.

Default Ability: **Shape Stone** *(1 mana, Instant)* Reshape a small amount of stone or earth by hand: dig a hole, raise a step, seal a crack, or carve a handhold.

Rock Barrage

Mana Cost: 2
Speed: Instant
Type: Attack, Earth
Range: Targeted
Dice Pool: Dexterity + Magic + Earth dots

Effect: A rapid barrage of stones launches at a single target within line of sight. On a hit deals damage equal to excess successes. The sheer volume of stones gives the attack a secondary push: on 3+ excess successes, the target is pushed 1 zone away from the caster. Defend: Dexterity + Dodge.

Several rocks at once. Still from the ground. Still going where they are aimed.

Rubble Field

Mana Cost: 2
Speed: Instant
Type: Utility, Persistent, Earth
Range: Zone
Dice Pool: Intelligence + Magic + Earth dots

Effect: Shattered stone fills the zone, creating difficult terrain. Movement into or through the zone costs 1 additional AP. Any target entering the zone must roll Dexterity + Acrobatics vs cast successes or trip and fall prone (Knocked Down condition). Upkeep: 1.

The ground becomes a mess of broken rock. Walking through it is a problem.

Rank 3: Aerial

The caster can raise walls and begin to use earth to bind targets in place.

Default Ability: **Bedrock** *(Permanent)* Earth Magic defensive spells you cast add 1 more to the DT bonus they grant.

Stone Spike

Mana Cost: 3
Speed: Instant
Type: Attack, CC, Earth
Range: Targeted
Dice Pool: Dexterity + Magic + Earth dots

Effect: A spike of stone erupts from the ground directly below a target. On a hit deals damage equal to excess successes. Any target hit must roll Dexterity + Dodge vs cast successes or be pinned: they are Rooted until the spike is broken (Strength + Athletics vs cast successes as an action) or they take 1 damage to wrench free. Defend: Dexterity + Dodge.

A spike of rock explodes up from beneath a target's feet.

Stone Wall

Mana Cost: 3
Speed: Instant
Type: Conjuration, Persistent, Earth
Range: Adjacent zone border
Dice Pool: Intelligence + Magic + Earth dots

Effect: A wall of stone rises along a border between two zones. The wall blocks movement across that border entirely. The wall has a Vitality pool equal to double the cast successes. Attacks that deal at least the wall's current pool value in a single hit bypass the wall. Fire Magic does not damage it. Nature Magic reduces the Vitality pool by the Nature caster's successes over time. Upkeep: 2.

Stone rises between two zones and stays there.

Rank 4: Lunar

Earth can now be used to deliver a devastating single-target strike or to build substantial lasting structures.

Default Ability: **Tremorsense** *(2 mana, Instant)* Until the start of the next Upkeep Phase, you know the location of every creature touching the ground in adjacent zones, even hidden ones.

Boulder Crash

Mana Cost: 4
Speed: Instant
Type: Attack, CC, Earth
Range: Targeted
Dice Pool: Dexterity + Magic + Earth dots

Effect: A massive boulder conjures from the earth and crashes into a single target. On a hit deals damage equal to excess successes plus the caster's Earth dots as a flat bonus. Target must roll Strength + Athletics vs cast successes or be Knocked Down. If the target is already prone, they instead suffer an additional 2 damage from the full impact. Defend: Dexterity + Dodge.

A very large rock applied to a single target with a great deal of force.

Tremor

Mana Cost: 4
Speed: Instant
Type: Attack, AoE, CC, Earth
Range: Zone (caster's zone)
Dice Pool: Strength + Magic + Earth dots

Effect: The caster stamps or strikes the ground, sending a tremor through their entire zone. Caster rolls once. Every target in the zone must defend. Each target defends separately. Any target hit is Knocked Down. Damage is rolled separately after a successful hit. The caster is unaffected. Defend: Dexterity + Dodge or Fortitude + Endurance.

The ground shakes. Everyone on it goes down.

Rank 5: Stellar

Earth can be used to reshape the ground beneath multiple zones and fortify the caster's body.

Default Ability: **Living Stone** *(Attuned: holds 3 of your M/T while active)* Your skin hardens like stone. Your BDT increases by 1.

Stoneskin

Mana Cost: 5
Speed: Instant, Extended
Type: Defense, Persistent, Earth
Range: Self
Dice Pool: Fortitude + Magic + Earth dots

Effect: Stone forms beneath and through the caster's skin, dramatically increasing physical resilience. Add cast successes to the caster's BDT against all physical attacks. Additionally, the caster's melee attacks deal additional damage equal to half the cast successes (rounded down) as the stone reinforces their strikes. The caster's movement is reduced by 1 zone while active. Upkeep: 4.

The caster becomes partially stone. They are harder to hurt and harder to ignore.

Earthquake

Mana Cost: 5
Speed: Instant
Type: Attack, AoE, CC, Earth
Range: AoE, all zones adjacent to the caster
Dice Pool: Intelligence + Magic + Earth dots

Effect: The earth shifts violently outward from the caster. Caster rolls once. Every target in any adjacent zone must defend. Each defends separately. All targets hit are Knocked Down. The affected zones become difficult terrain for the remainder of the scene (movement costs 1 additional AP). Defend: Dexterity + Dodge. The caster's zone is unaffected.

The ground around the caster becomes unreliable all at once.

Rank 6: Galactic

Earth at this rank can sink an entire zone into rubble or call a barrage of stone down from above.

Default Ability: **Unyielding Ground** *(Permanent)* Difficult terrain created by your Earth spells costs enemies 1 additional AP to move through, and you and your allies ignore it.

Meteor Strike

Mana Cost: 6
Speed: Instant
Type: Attack, AoE, CC, Earth
Range: AoE-4 (2x2 zone area), any targeted zone within line of sight
Dice Pool: Dexterity + Magic + Earth dots

Effect: A chunk of dense earth the size of a room falls from above onto a 2x2 zone area. Caster rolls once. Every target in the area must defend separately. All targets hit are Knocked Down. Any target hit by 4 or more excess successes is also pinned under debris (Rooted until they succeed on Strength + Athletics vs cast successes as an action). The affected zones become difficult terrain. Defend: Dexterity + Dodge.

A great deal of earth falls on a great deal of people at once.

Stone Fortress

Mana Cost: 6
Speed: Instant, Extended
Type: Conjuration, Persistent, Earth
Range: Caster's zone
Dice Pool: Intelligence + Magic + Earth dots

Effect: Stone walls, roof, and floor rise around the caster's zone, forming a sealed fortification. The structure blocks movement across all four borders unless a gate is designated at cast time. The structure has a Vitality pool equal to triple the cast successes (split evenly across the four walls). Each wall section must be destroyed separately. Attacks targeting the interior must breach a wall first. Upkeep: 5.

A stone fort rises from the ground in a turn. The caster is inside it.

Rank 7: Cosmic

Earth at this rank can move the ground itself or turn the caster into something that barely qualifies as a creature anymore.

Default Ability: **Mountain's Weight** *(Permanent)* A target Knocked Down by your Earth spells is also Rooted until their next Upkeep Phase.

Continental Shift

Mana Cost: 7
Speed: Instant
Type: Attack, AoE, CC, Earth
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + Earth dots

Effect: The caster moves the ground. Every zone within line of sight shifts by 1 zone in a direction the caster chooses (or different directions per zone at the cost of 1 additional mana per zone with varying directions). Any target in a zone that shifts must roll Dexterity + Acrobatics vs cast successes or be Knocked Down and take damage equal to excess successes. Zones that shift into other zones cause both to become difficult terrain. The caster's zone does not shift.

The caster moves the world. Only a little. It is enough.

Earth Titan

Mana Cost: 7
Speed: Instant, Extended
Type: Enhancement, Persistent, Earth
Range: Self
Dice Pool: Fortitude + Magic + Earth dots

Effect: The caster's body is encased and augmented by a massive form of living stone, doubling their size and dramatically altering their capabilities. Strength and Fortitude each gain dots equal to cast successes (up to Earth dots maximum). All melee attacks deal additional damage equal to Earth dots. The caster gains immunity to Knocked Down and Rooted conditions. The caster's movement is reduced by 2 zones while active. Upkeep: 6.

The caster stops being a person and starts being a problem.

Nature Magic

Nature Magic is the school of living growth, vines, spores, and organic force. Its spells can root and entangle targets, create terrain effects, and deal damage over time. Nature can assign mana to either the attack roll or the damage roll. It carries elemental advantages against Earth and Air and is weakest against Fire and Water.

Elemental interactions: +2 against Earth, +1 against Air, -1 against Water, -2 against Fire.

Rank 1: Core

Nature at this rank grows vines and throws thorns. The caster can work with the living world in direct and basic ways.

Default Ability: **Forest Sense** *(Permanent)* You gain 1 bonus die on Survival rolls in natural wilderness, and you can always identify a plant and what it does.

Thorn Shot

Mana Cost: 1
Speed: Instant
Type: Attack, Nature
Range: Adjacent zone
Dice Pool: Dexterity + Magic + Nature dots

Effect: A sharp organic projectile launches at a target in an adjacent zone. On a hit deals damage equal to excess successes. Defend: Dexterity + Dodge.

A thorn. Much faster than normal thorns.

Entangle

Mana Cost: 1
Speed: Instant
Type: Utility, Nature
Range: Adjacent zone
Dice Pool: Intelligence + Magic + Nature dots

Effect: Vines erupt from the ground, seize a target in an adjacent zone, and drag them. On a success the target is pulled 1 zone toward the caster. Defend: Dexterity + Dodge. Outside of combat, Entangle can bind an unresisting object or tie down cargo, and the vines stay until cut.

Vines grab a target and hold on.

Rank 2: Terrestrial

Nature can now be used across greater distances and begins to poison.

Default Ability: **Bloom** *(1 mana, Instant)* Make a plant grow a full season in moments: ripen fruit, sprout a seed into a sapling, or spread a vine across a wall.

Vine Whip

Mana Cost: 2
Speed: Instant
Type: Attack, CC, Nature
Range: Targeted
Dice Pool: Dexterity + Magic + Nature dots

Effect: A vine lashes out at a target within line of sight. On a hit deals damage equal to excess successes. Any target hit must roll Strength + Athletics vs cast successes or be pulled 1 zone toward the caster. Defend: Dexterity + Dodge.

A vine that reaches and pulls.

Spore Burst

Mana Cost: 2
Speed: Instant
Type: Attack, Nature
Range: Adjacent zone
Dice Pool: Intelligence + Magic + Nature dots

Effect: A cloud of toxic spores bursts at a target in an adjacent zone. Target must roll Fortitude + Endurance vs cast successes. Failure applies the Poisoned condition with a damage value of 1 per 2 excess successes (minimum 1). The Poisoned condition deals its damage value at each Upkeep Phase until the condition ends or the target is treated. Fire Magic ignites the spores and ends the condition but deals 1 damage. Defend: Fortitude + Endurance.

A burst of organic poison. Invisible. Persistent.

Rank 3: Aerial

The caster can fill zones with growth and begin to use nature as a barrier.

Default Ability: **Thornhide** *(Attuned: holds 2 of your M/T while active)* Thorns grow along your skin and clothing. Any target that hits you with a melee attack takes 1 damage.

Thorn Barrage

Mana Cost: 3
Speed: Instant
Type: Attack, AoE, Nature
Range: AoE-Cone
Dice Pool: Dexterity + Magic + Nature dots

Effect: A spray of razor-sharp thorns erupts in a cone from the caster, covering all zones directly in front and diagonally forward. Caster rolls once. Each target defends separately. All targets hit gain the Bleeding condition. Defend: Dexterity + Dodge.

A wide spray of thorns. Messy. Effective.

Vine Curtain

Mana Cost: 3
Speed: Instant
Type: Conjuration, Persistent, Nature
Range: Adjacent zone border
Dice Pool: Intelligence + Magic + Nature dots

Effect: A dense curtain of vines rises along a zone border. The vines block passage: any target attempting to cross must roll Strength + Athletics vs cast successes or become Rooted for 1 turn. On success, they cross but their movement for this turn ends. The curtain has a Vitality pool equal to double the cast successes. Fire Magic reduces the Vitality pool by the Fire caster's successes. Upkeep: 2.

A wall of vines that would rather hold than block.

Rank 4: Lunar

Nature can now seize targets from range and fill entire zones with suffocating growth.

Default Ability: **Deep Roots** *(Permanent)* Targets Rooted by your Nature spells need 1 additional success to break free.

Constricting Roots

Mana Cost: 4
Speed: Instant
Type: Attack, Persistent, CC, Nature
Range: Targeted
Dice Pool: Intelligence + Magic + Nature dots

Effect: Roots erupt and seize a target. On a hit the target gains the Rooted condition. Each Upkeep Phase the target remains Rooted, they also take damage equal to the original cast successes as the roots tighten. The target may attempt Strength + Athletics vs cast successes during their Upkeep Phase to break free. Fire Magic applied to the target ends the effect. Defend: Dexterity + Dodge.

Roots that seize and keep tightening.

Overgrowth Zone

Mana Cost: 4
Speed: Instant
Type: Utility, Persistent, CC, Nature
Range: Zone
Dice Pool: Intelligence + Magic + Nature dots

Effect: Dense plant growth erupts across the zone. Movement into or through the zone costs 2 additional AP. Targets entering the zone roll Dexterity + Dodge vs cast successes or become Rooted until their next Upkeep Phase. Fire Magic reduces cast successes by the Fire caster's successes. Upkeep: 3.

The zone becomes a problem for anyone who needs to move through it.

Rank 5: Stellar

Nature can lash multiple targets at once and open the wild for allies to move through.

Default Ability: **Plant Memory** *(3 mana, Instant)* Touch a plant and ask it what it witnessed in the last day. It answers with simple impressions of who passed and what happened.

Barrage of Thorns

Mana Cost: 5
Speed: Instant
Type: Attack, AoE, Nature
Range: Zone
Dice Pool: Dexterity + Magic + Nature dots

Effect: Thorns erupt from the ground throughout a zone, targeting all targets in it simultaneously. Caster rolls once and applies the same attack successes to all targets. Each defends separately. All targets hit gain the Bleeding condition. Defend: Dexterity + Dodge. The caster may exclude zones from the effect if they wish, targeting fewer than the full zone.

The entire zone becomes hostile ground.

Green Passage

Mana Cost: 5
Speed: Instant, Extended
Type: Utility, Buff, Persistent, Nature
Range: Self and allies in adjacent zones, up to Nature dots in targets
Dice Pool: Intelligence + Magic + Nature dots

Effect: The wild opens for the caster and their allies. While active, affected targets ignore difficult terrain created by plants or natural ground, cannot be Rooted by Nature Magic or plant-based effects, and gain bonus dice equal to cast successes on Stealth rolls in zones with plant growth. Upkeep: 4.

Branches part. Roots settle. The forest lets you through.

Rank 6: Galactic

Nature at this rank can seize multiple targets at once or create a permanent living forest on the battlefield.

Default Ability: **Virulence** *(Permanent)* Poisoned conditions from your Nature spells start with a damage value 2 higher.

Grove of Thorns

Mana Cost: 6
Speed: Instant
Type: Attack, AoE, Persistent, CC, Nature
Range: AoE, up to Nature dots zones chosen by caster
Dice Pool: Intelligence + Magic + Nature dots

Effect: The caster fills a number of zones up to their Nature dots with thorns and roots. In all chosen zones: any target entering or remaining must roll Dexterity + Dodge vs cast successes or become Rooted. Any target

who is Rooted takes damage equal to cast successes each Upkeep Phase. Fire Magic in a targeted zone reduces cast successes in that zone. Upkeep: 5.

A spreading thicket that grabs and holds everything it can reach.

Living Armor

Mana Cost: 6
Speed: Instant, Extended
Type: Defense, Persistent, Nature
Range: Self
Dice Pool: Intelligence + Magic + Nature dots

Effect: Living bark and vine weave around the caster in a shifting organic shell. Add cast successes to the caster's BDT against physical attacks. When the caster takes damage while this is active, the armor regenerates 1 success to its BDT bonus at each Upkeep Phase (the natural regeneration maintains the shell). Fire attacks bypass the regeneration: each Fire attack reduces the DT bonus by the Fire caster's school dots. Upkeep: 5.

The caster is wrapped in something alive. It grows back when damaged.

Rank 7: Cosmic

Nature at this rank can overwhelm the battlefield with life or draw all the life out of an area.

Default Ability: **Verdant Path** *(Attuned: holds 4 of your M/T while active)* Plants surge up wherever you walk. Each zone you leave becomes difficult terrain for enemies until the start of the next Upkeep Phase.

World Tree

Mana Cost: 7
Speed: Instant, Extended
Type: Conjuration, Persistent, CC, Nature
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + Nature dots

Effect: A massive tree erupts from the ground and sends roots and branches throughout the entire visible area. Every visible zone gains the effects of Overgrowth Zone using the cast successes as the roll result. Any target in a zone when the tree erupts must roll Dexterity + Dodge vs cast successes or be immediately Rooted. The tree itself occupies the caster's zone and has a Vitality pool equal to triple the cast successes. If the tree's pool reaches 0, all Overgrowth effects end simultaneously. Upkeep: 6.

A tree grows. Immediately and everywhere. The battlefield adapts to the tree.

Blight

Mana Cost: 7
Speed: Instant
Type: Attack, AoE, Persistent, Nature
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + Nature dots

Effect: The caster drains all living energy from the visible area. Caster rolls once. Every living target in every visible zone must resist. Each target resists separately. On a failure targets take damage equal to excess successes and gain the Poisoned condition with a value equal to the original cast successes. All natural plant material in the affected zones withers and dies, destroying any existing Nature Magic terrain effects in those zones. Undead targets in the zones are unaffected. Defend: Fortitude + Endurance.

Everything green dies. The people in it follow.

Bright Magic

Bright Magic is the school of radiant energy and illumination. It does not heal on its own; healing comes from combining Bright with other schools. It is the only school capable of transferring mana between characters. Bright damages undead, buffs living targets, and cannot harm the living through a standard Bright attack. Exceptions require specific high-rank spells that name the exception explicitly. Bright assigns mana to the attack roll only.

Bright Magic has no elemental interactions with the five elemental schools. Its interactions are tied to living and undead targets.

Rank 1: Core

Bright at this rank produces light. The caster can direct radiant energy with purpose and find that it damages undead while leaving the living untouched.

Default Ability: **Sense Undead** *(Permanent)* You always know when undead are in adjacent zones, even when they are hidden.

Radiant Bolt

Mana Cost: 1
Speed: Instant
Type: Attack, Bright, Undead
Range: Adjacent zone
Dice Pool: Dexterity + Magic + Bright dots

Effect: A bolt of radiant energy strikes a target in an adjacent zone. This attack only damages undead targets. Against a living target it deals no damage. On a hit against an undead target deals damage equal to excess successes. Defend: Dexterity + Dodge.

A flash of radiant energy. For most people, harmless. For undead, not.

Glow

Mana Cost: 1
Speed: Instant
Type: Utility, Bright
Range: Zone
Dice Pool: Intelligence + Magic + Bright dots

Effect: A flash of radiant light fills a zone. Every unlit non-magical light source in the zone (torches, lamps, candles) lights up and stays lit as ordinary flame. Any Dimmed effect in the zone ends if the Glow successes meet or exceed its cast successes.

The shadows have nowhere left to sit.

Rank 2: Terrestrial

Bright can now reach further and begin to provide persistent support.

Default Ability: **Halo** *(Attuned: holds 1 of your M/T while active)* A soft light surrounds you. Non-magical darkness has no effect on you, and you can light your surroundings at will.

Light Ray

Mana Cost: 2
Speed: Instant
Type: Attack, Bright, Undead
Range: Targeted
Dice Pool: Dexterity + Magic + Bright dots

Effect: A concentrated ray of radiant energy strikes an undead target at range. Only damages undead. On a hit deals damage equal to excess successes. Additionally, any active Shade Magic effects on the target lose 1 success from their pool on a successful hit. Defend: Dexterity + Dodge.

Radiant energy with reach. It strips shadow from what it touches.

Blessing

Mana Cost: 2
Speed: Instant, Extended
Type: Buff, Persistent, Bright
Range: Touch or adjacent zone target
Dice Pool: Intelligence + Magic + Bright dots

Effect: The caster charges a target with radiant energy, providing a minor but persistent benefit. Add cast successes as bonus dice to one specified roll type (attack, defense, or a single Attribute + Ability combination declared at cast time). This bonus applies until the effect ends. Upkeep: 1.

A sustained radiant enhancement that makes one kind of task easier.

Rank 3: Aerial

The caster can flood a zone with radiant light that strengthens the living and weakens the undead.

Default Ability: **Radiance** *(Permanent)* Your Bright attacks against undead ignore 1 point of the armor portion of their DT.

Holy Burst

Mana Cost: 3
Speed: Instant
Type: Attack, AoE, Bright, Undead
Range: AoE-Cone
Dice Pool: Dexterity + Magic + Bright dots

Effect: A cone of radiant energy erupts from the caster covering all zones directly in front and diagonally forward. Only damages undead targets. Living targets in the cone are unaffected. Caster rolls once. Each undead target in the cone defends separately. Defend: Dexterity + Dodge.

A burst of holy light that sweeps a cone of undead targets.

Beacon

Mana Cost: 3
Speed: Instant, Extended
Type: Utility, Buff, Persistent, Bright
Range: Zone
Dice Pool: Intelligence + Magic + Bright dots

Effect: Brilliant radiant light fills the zone. Living allies in the zone gain bonus dice equal to cast successes on all attack rolls. Undead enemies in the zone must roll Fortitude + Endurance vs cast successes at their Upkeep Phase or lose 1 mana. No one in the zone can benefit from darkness or Stealth while the Beacon holds. Shade Magic that meets or exceeds the cast successes dispels it. Upkeep: 2.

A light so bright it feels like courage.

Rank 4: Lunar

The caster can transfer mana to allies and sweep radiant energy across an entire zone.

Default Ability: **Inspire** *(2 mana, Instant)* An ally in an adjacent zone gains 1 bonus die on their next roll this turn.

Radiant Wave

Mana Cost: 4
Speed: Instant
Type: Attack, AoE, Bright, Undead
Range: Zone
Dice Pool: Dexterity + Magic + Bright dots

Effect: A wave of radiant energy sweeps through an entire zone. Only damages undead targets in the zone. Living targets are unaffected. Caster rolls once and applies the same attack successes to all undead targets. Each undead target defends separately. Defend: Dexterity + Dodge.

The zone flares with radiant energy. Everything undead in it learns.

Mana Transfer

Mana Cost: 4 (spent by the caster; the amount transferred is separate)
Speed: Instant
Type: Utility, Bright
Range: Touch or adjacent zone target
Dice Pool: Intelligence + Magic + Bright dots

Effect: The caster transfers mana from their pool to a willing target. On a success, the caster may transfer up to their Bright dots in mana from their own pool to the target's pool, without exceeding the target's Mana Pool cap. The 4 mana cost is spent on the casting itself and is not part of the transferred amount. Can target living targets only.

The caster opens a channel and lets mana flow. The only Bright ability that can do this.

Rank 5: Stellar

Bright can now break the hold on undead and begin to affect them with powerful single-target annihilation.

Default Ability: **Purity** *(Permanent)* You gain bonus dice equal to half your Bright dots (rounded up) on resistance rolls against Shade Magic.

Smite

Mana Cost: 5
Speed: Instant
Type: Attack, Bright, Undead
Range: Targeted
Dice Pool: Dexterity + Magic + Bright dots

Effect: A concentrated beam of radiant energy locks onto an undead target. Only damages undead. On a hit deals damage equal to excess successes doubled. Additionally, any Shade Magic persistent effects on the target end immediately. On 5+ excess successes, the target must also roll Fortitude + Endurance vs cast successes or be Stunned (loses their next action). Defend: Dexterity + Dodge.

Radiant energy that hits an undead target with twice the force. Then strips their shadows.

Turn Undead

Mana Cost: 5
Speed: Instant
Type: Utility, CC, Bright, Undead
Range: Zone
Dice Pool: Intelligence + Magic + Bright dots

Effect: A wave of radiant authority rolls through the zone. Every undead target in the zone must resist separately. Mindless undead that fail flee directly away from the caster for turns equal to excess successes. Undead that were animated or are commanded by another caster are released from that command for the rest of the scene. Sentient undead that fail lose their next action. Defend: Composure + Insight.

The dead remember, for a moment, that they were meant to rest.

Rank 6: Galactic

Bright can consecrate zones and strike all undead targets in sight simultaneously.

Default Ability: **Aura of Dawn** *(Attuned: holds 3 of your M/T while active)* Undead in zones adjacent to you lose 1 die on attack rolls.

Consecration

Mana Cost: 6
Speed: Instant
Type: Utility, Persistent, Bright
Range: Zone
Dice Pool: Intelligence + Magic + Bright dots

Effect: Radiant energy is pressed into a zone, consecrating it. All undead targets in the zone take damage equal to cast successes each Upkeep Phase. All living targets in the zone gain cast successes as bonus dice on resistance rolls. Shade Magic attacks aimed at targets in the zone lose 1 success before resolving. Cannot be dispelled by Shade Magic below the cast successes value. Upkeep: 5.

The zone is consecrated. The undead feel it immediately.

Radiant Pillar

Mana Cost: 6
Speed: Instant
Type: Attack, AoE, Bright, Undead
Range: AoE, all zones within line of sight
Dice Pool: Dexterity + Magic + Bright dots

Effect: Pillars of radiant light descend on every visible zone simultaneously. Only damages undead targets. Living targets are unaffected. Caster rolls once and applies the same attack successes to all undead in all visible zones. Each undead target defends separately. Defend: Dexterity + Dodge.

Light falls everywhere at once. Every undead target in sight is addressed.

Rank 7: Cosmic

Bright at this rank can burn an undead out of existence or pour so much radiant energy into a space that undead cannot exist within it.

Default Ability: **Sanctified** *(Permanent)* When your Bright Magic opposes or dispels Shade Magic, your successes count double.

Final Light

Mana Cost: 7
Speed: Instant
Type: Attack, Bright, Undead
Range: Targeted
Dice Pool: Dexterity + Magic + Bright dots

Effect: A column of pure radiant energy strikes a single undead target. Only damages undead. On a hit deals damage equal to excess successes tripled. Any undead Incapacitated by this spell is destroyed outright and cannot rise again. Every Shade Magic persistent effect in the target's zone ends. Defend: Dexterity + Dodge.

There is no getting back up from this.

Holy Ground

Mana Cost: 7
Speed: Instant, Extended
Type: Utility, Persistent, Bright
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + Bright dots

Effect: Radiant energy saturates the entire visible area at a level that undead cannot endure. Any undead target in any visible zone takes damage equal to cast successes each Upkeep Phase. Any undead who enters a visible zone takes the same damage immediately. The caster and all living allies in the area gain cast successes as a bonus DT pool against all attacks. Shade Magic attacks in the area lose 2 successes before resolving. Upkeep: 6. Cannot be dispelled by Shade Magic below the cast successes.

The entire visible world is consecrated simultaneously. Undead cannot stand in it.

Shade Magic

Shade Magic is the school of darkness, mana drain, and corruption. It damages living targets, buffs undead, obscures vision, and drains mana directly from a target's pool. It cannot harm undead through a standard Shade attack. Exceptions require specific spells that name them. Shade assigns mana to the damage roll only.

Mana Bleed: Many Shade spells leave living targets losing mana at every Upkeep Phase (see How Casting Works).

Ethereal Shade, available at higher ranks, locks a target to their base Mana recovery rate with no damage bonus applied, regardless of how much damage they have taken.

Shade Magic has no elemental interactions with the five elemental schools. Its interactions are tied to living and undead targets.

Rank 1: Core

Shade at this rank produces darkness and begins to drain. The caster can direct shadow energy against living targets. Undead targets are immune to standard Shade damage but benefit from its other effects.

Default Ability: **Darksight** *(Permanent)* You see in non-magical darkness as if it were lit.

Shadow Bolt

Mana Cost: 1
Speed: Instant
Type: Attack, Shade, Living
Range: Adjacent zone
Dice Pool: Dexterity + Magic + Shade dots

Effect: A bolt of shadow energy strikes a living target in an adjacent zone. Only damages living targets. Against undead it deals no damage. On a hit deals damage equal to excess successes. Defend: Dexterity + Dodge.

Shadow with force behind it. The living feel it.

Dim

Mana Cost: 1
Speed: Instant
Type: Utility, Shade
Range: Zone
Dice Pool: Intelligence + Magic + Shade dots

Effect: A breath of shadow snuffs out every non-magical light source in a zone (torches, lamps, candles). They stay out until relit. Any light created by Bright Magic in the zone ends if the Dim successes meet or exceed its cast successes.

The light goes. Not all at once. But enough.

Rank 2: Terrestrial

Shade reaches further and begins to pull mana from living targets.

Default Ability: **Hush** *(1 mana, Instant)* Every sound you make is muffled until the start of the next Upkeep Phase. You gain 2 bonus dice on Stealth rolls during that time.

Corruption Bolt

Mana Cost: 2
Speed: Instant
Type: Attack, Drain, Shade, Living
Range: Targeted
Dice Pool: Dexterity + Magic + Shade dots

Effect: A bolt of shadow energy strikes a living target at range. Only damages living targets. On a hit deals damage equal to excess successes. Additionally, the target loses 1 mana directly from their pool per success on this attack. The mana is drained and lost. Defend: Dexterity + Dodge.

Shadow that drains as well as damages.

Shadow Cloak

Mana Cost: 2
Speed: Instant, Extended
Type: Utility, Persistent, Shade
Range: Self
Dice Pool: Intelligence + Magic + Shade dots

Effect: The caster wraps themselves in shadow, becoming harder to perceive. While active, all targeted attacks and spells against the caster lose dice equal to cast successes. The effect is broken if the caster attacks or casts. Can be maintained through movement. Upkeep: 1.

Shadows gather around the caster. They are harder to see. Harder to target.

Rank 3: Aerial

Shade can now obscure multiple zones and begin to corrode living targets over time.

Default Ability: **Lingering Dark** *(Permanent)* Darkness from your Shade spells can only be dispelled by Bright Magic that exceeds your cast successes.

Shadow Spike

Mana Cost: 3
Speed: Instant
Type: Attack, Shade, Living
Range: Targeted
Dice Pool: Dexterity + Magic + Shade dots

Effect: A lance of dense shadow drives into a living target. Only damages living targets. On a hit deals

damage equal to excess successes. The nature of the wound makes it resist recovery: the next PHP the target receives this scene is reduced by the excess successes of this attack. Defend: Dexterity + Dodge.

Shadow that leaves a mark harder to heal than ordinary wounds.

Fog of Dread

Mana Cost: 3
Speed: Instant
Type: Utility, Persistent, Shade
Range: Zone
Dice Pool: Intelligence + Magic + Shade dots

Effect: Thick supernatural darkness fills the zone. All ranged attacks and targeted spells from or aimed at targets inside the zone lose dice equal to cast successes. Living enemies in the zone must roll Composure + Insight vs cast successes at their Upkeep Phase or lose 1 mana. Undead allies in the zone gain bonus dice equal to cast successes on all attack rolls. Bright Magic that meets or exceeds the cast successes dispels it. Upkeep: 2.

The darkness fills the zone and stays. The living find it draining.

Rank 4: Lunar

Shade can now lock down mana recovery through Ethereal Shade and begin striking from ambush.

Default Ability: **Veil** *(Attuned: holds 2 of your M/T while active)* While you are in a Dimmed or Darkened zone, you gain bonus dice equal to your Shade dots on Stealth rolls.

Ethereal Shade

Mana Cost: 4
Speed: Instant, Extended
Type: Drain, Persistent, Shade, Living
Range: Targeted
Dice Pool: Intelligence + Magic + Shade dots

Effect: A layer of shadow energy locks onto a living target, suppressing their mana recovery. While active, the target's mana recovery is fixed at their base rate only, with no bonus for taking damage. The target cannot recover bonus mana through any means except direct Mana Transfer while this effect is active. Additionally, the target loses mana equal to half the cast successes (rounded up) each Upkeep Phase. Bright Magic applied to the target ends the effect. Defend: Fortitude + Endurance. Upkeep: 3.

A layer of shadow that limits how fast a living target can recover magic.

Shadow Step

Mana Cost: 4
Speed: Instant
Type: Utility, Shade
Range: Any zone in darkness or shadow within line of sight
Dice Pool: Intelligence + Magic + Shade dots

Effect: The caster steps through shadow, teleporting instantly to any zone within line of sight that is Dimmed, Darkened, or occupied by a shadow-based effect (Fog of Dread, Shadow Cloak, etc.). On 3+ successes, the caster arrives unseen for their first action from the new position (they may make one attack before being locatable by sight). Zones in full daylight without any shadow cannot be targeted.

Where there is shadow, the caster can be.

Rank 5: Stellar

Shade can now drain large amounts of mana directly and animate undead targets as temporary allies.

Default Ability: **Grave Whisper** *(3 mana, Instant)* Touch a corpse and ask it one question. It answers with what it knew in life, in as few words as possible.

Mass Drain

Mana Cost: 5
Speed: Instant
Type: Attack, Drain, AoE, Shade, Living
Range: Zone
Dice Pool: Intelligence + Magic + Shade dots

Effect: Shadow energy sweeps through a zone, draining mana from every living target in it. Caster rolls once. Every living target in the zone must resist separately. For each target, excess successes determine how much mana is drained from their pool. Undead targets in the zone are unaffected. Defend: Fortitude + Endurance.

Shadow that reaches all living targets in a zone at once.

Animate Dead

Mana Cost: 5
Speed: Instant
Type: Utility, Shade
Range: Touch
Dice Pool: Intelligence + Magic + Shade dots

Effect: The caster channels Shade energy into a recently deceased body (died within the last scene). The corpse rises as an undead under the caster's command for the rest of the scene. The animated corpse uses the base physical statistics of the deceased, with no magical abilities. It can attack in melee using the caster's Shade dice pool. It has a Vitality pool equal to cast successes. Bright Magic deals its normal undead damage to it. Upkeep: 4.

Something dead gets up. It does what the caster says.

Rank 6: Galactic

Shade at this rank can corrupt the entire visible area and create permanent zones of supernatural darkness.

Default Ability: **Hunger** *(Permanent)* Living targets that lose mana to your Shade spells lose 1 additional mana.

Black Pulse

Mana Cost: 6
Speed: Instant
Type: Attack, AoE, Drain, Shade, Living
Range: All zones within line of sight
Dice Pool: Dexterity + Magic + Shade dots

Effect: Shadow energy expands from the caster in a pulse reaching every visible zone. Only damages living targets. Undead targets in the zones are unaffected. Caster rolls once. Every living target in every visible zone must resist separately. Each target hit takes damage equal to excess successes and loses mana equal to half those excess successes (rounded down) directly from their pool. Defend: Dexterity + Dodge.

Shadow goes everywhere. Everything living in sight feels it.

Permanent Darkness

Mana Cost: 6
Speed: Instant
Type: Utility, Persistent, Shade
Range: Zone
Dice Pool: Intelligence + Magic + Shade dots

Effect: The caster presses shadow energy permanently into a zone. The zone becomes Darkened: all ranged attacks and targeted spells in or out of the zone lose dice equal to cast successes. Undead targets in the zone gain bonus dice equal to cast successes on all rolls. Bright Magic reduces cast successes by the Bright caster's successes but cannot fully dispel it unless the Bright caster's successes fully exceed the cast successes on a single cast. Upkeep: 5.

The darkness becomes a permanent feature of the zone.

Rank 7: Cosmic

Shade at this rank can eclipse an entire area or begin to unmake the living world.

Default Ability: **Umbral Form** *(Attuned: holds 4 of your M/T while active)* Your body becomes partly shadow. While you are in a Dimmed or Darkened zone, attacks and targeted spells against you lose dice equal to your Shade dots.

Eclipse

Mana Cost: 7
Speed: Instant, Extended
Type: Utility, Persistent, Shade
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + Shade dots

Effect: Every visible zone is plunged into absolute supernatural darkness. All ranged attacks and targeted spells anywhere in the area automatically lose dice equal to cast successes. All undead targets in the area gain cast successes as bonus dice on all rolls. All living targets must roll Fortitude + Endurance vs cast successes each Upkeep Phase or lose mana equal to excess successes. The Eclipse persists until the upkeep is not paid. Bright Magic that fully matches the cast successes in a single roll dispels it. Upkeep: 6.

The area goes dark. Not dim. Dark. The kind of dark that drains.

Soul Drain

Mana Cost: 7
Speed: Instant
Type: Attack, Drain, Shade, Living
Range: Targeted
Dice Pool: Intelligence + Magic + Shade dots

Effect: A focused beam of shadow energy drives into a living target and pulls. Only damages living targets. On a hit deals damage equal to excess successes and drains mana equal to triple the excess successes directly from the target's pool. Additionally, the target must roll Fortitude + Endurance vs cast successes or lose access to their mana pool for 1 turn (they cannot spend or recover mana). Defend: Fortitude + Endurance. Willpower can be spent to resist the mana lockout: 1 Willpower negates it entirely.

Shadow that reaches into a living target and pulls out more than mana.

Part Two: Combination Magic

Prerequisites and Dot Cap

Every combination spell states the minimum dots required in each school. The dot cap is the lowest rating among all schools involved. If you have 5 dots in Fire but only 2 in Earth, a Fire plus Earth combination is capped as though both schools were at 2. The combination spell's rank cannot exceed that cap regardless of individual school ratings.

Learning Combination Spells

A combination spell can be taken for free when gaining a new dot in one of its required schools, if that dot satisfies the prerequisites. Instead of taking one of the two standard options for that dot, the player takes the combination spell. This is the only way to learn a combination spell for free. Otherwise a combination spell costs Rank x2 XP for each school it combines, where Rank is the dots it requires in each school.

Mana Cost and Upkeep

A combination spell costs mana equal to the total dots it requires: the number of schools multiplied by the dots required in each. A two-school spell requires 2 dots in each school, 4 dots in all, and costs 4 mana. A three-school spell requires 3 dots in each, 9 in all, and costs 9 mana. Upkeep is always the mana cost minus 1.

Combination Spells in Artifacts and Implements

A combination spell imbued in an artifact or implement does not require the user to meet dot prerequisites. The item is treated as having the required dots built into it. The user simply provides the mana.

Creation Magic

Creation Magic is the single combination of all seven casting schools at 7 dots each. It is the only way to bring new autonomous life into the world, and it can be the work of many people together. Its full rules are at the end of this part.

Two-School Combinations

Prerequisite: 2 dots in each school. Mana cost: 4. Upkeep: 3.

Crushing Vine (Water + Nature)

Prerequisite: 2 dots Water, 2 dots Nature
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Attack, Persistent, CC
Range: Targeted
Dice Pool: Dexterity + Magic + Water dots + Nature dots (cap at lowest)

Effect: Water-fed vines erupt from the ground and constrict a target. Target is Rooted. Each Upkeep Phase the target remains Rooted they take damage equal to the original attack successes. The target can attempt to break free by rolling Strength + Athletics against the original cast successes during their Upkeep Phase.

Living vines fed by flowing water seize the target and squeeze.

Cursed Ground (Earth + Shade)

Prerequisite: 2 dots Earth, 2 dots Shade
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, Drain, Corrupt, Buff
Range: Zone
Dice Pool: Intelligence + Magic + Earth dots + Shade dots (cap at lowest)

Effect: Living targets in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase or lose mana equal to the excess successes. Undead targets in the zone gain bonus dice equal to caster successes on attack rolls. Bright Magic applied to the zone dispels it.

Dark energy seeps up through the earth, corrupting the ground itself.

Decay (Nature + Shade)

Prerequisite: 2 dots Nature, 2 dots Shade
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: N/A
Speed: Reaction
Type: Utility, CC
Range: Targeted spell
Dice Pool: Intelligence + Magic + Nature dots + Shade dots (cap at lowest)

Effect: Cast as a Reaction when an enemy spell is being cast. Roll as a counterspell. Each success reduces the target spell's cast successes by 1. Can negate the spell entirely if successes meet or exceed the caster's. Against Battle Aura combination spells, Decay only affects the magical enhancement portion, not the physical attack component.

Dark organic energy unravels the structure of an incoming spell before it can take effect.

Disruption (Bright + Shade)

Prerequisite: 2 dots Bright, 2 dots Shade
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: N/A
Speed: Reaction (declared when a target begins casting)
Type: Counter
Range: Any target within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: When a target declares they are casting a spell, the caster may spend 4 mana as a Reaction to attempt Disruption. Roll Disruption against the caster's Intelligence + Magic + highest casting school dots. On a tie, both spells fail. On a success, the target's spell fails and they lose the mana they spent. On excess successes, the target loses additional mana equal to the excess successes. If the target wins, their spell proceeds normally. Disruption may only be attempted once per casting. Willpower spent by the target adds 1 success to their defense roll.

Bright and Shade collide inside a spell as it forms. The result is collapse. The opposing forces tear the cast apart from the inside.

Dust Storm (Air + Earth)

Prerequisite: 2 dots Air, 2 dots Earth
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, CC
Range: Zone
Dice Pool: Intelligence + Magic + Air dots + Earth dots (cap at lowest)

Effect: A churning cloud of mineral debris fills the zone. All targets in the zone suffer a visibility penalty equal to cast successes on all ranged attack and targeted spell rolls. Movement through the zone costs 1 additional AP.

Wind-driven stone and grit scour the air, cutting visibility to near zero.

Flame Whip (Fire + Nature)

Prerequisite: 2 dots Fire, 2 dots Nature
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, CC
Range: Adjacent zone
Dice Pool: Attribute + Ability + Fire dots + Nature dots (cap at lowest)

Effect: A burning vine lashes out at a target in an adjacent zone. On a successful hit the target is pulled 1 zone toward the caster and gains the Burning condition. Defend: Dexterity + Dodge.

A crackling tendril of flaming plant matter snaps across the distance and drags.

Hallowed Ground (Earth + Bright)

Prerequisite: 2 dots Earth, 2 dots Bright
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, Buff, Cleanse
Range: Zone
Dice Pool: Intelligence + Magic + Earth dots + Bright dots (cap at lowest)

Effect: Radiant energy is pressed into the earth and radiates upward. Living targets in the zone gain bonus dice on resistance rolls equal to cast successes. Conditions on living targets in the zone are suppressed for as long as they remain in the zone (conditions resume on leaving). Undead targets in the zone suffer a die penalty equal to cast successes on all rolls. Shade Magic dispels it.

The ground itself glows faintly with radiant force.

Magma (Fire + Earth)

Prerequisite: 2 dots Fire, 2 dots Earth
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, CC, Attack
Range: Zone
Dice Pool: Intelligence + Magic + Fire dots + Earth dots (cap at lowest)

Effect: Molten rock covers the zone. Any target entering or remaining in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase. Failure deals damage equal to excess successes and applies the Burning condition. Movement through or within the zone costs 1 additional AP. Water Magic applied to the zone reduces cast successes by the Water caster's successes.

The earth opens and bleeds molten rock across the zone.

Mending Bloom (Nature + Bright)

Prerequisite: 2 dots Nature, 2 dots Bright
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, Healing
Range: Zone
Dice Pool: Intelligence + Magic + Nature dots + Bright dots (cap at lowest)

Effect: Radiant plant growth fills a zone. Each Upkeep Phase, any living target who remains in the zone is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Basic. The pool lasts until the end of that target's next turn, and any unused points are lost. The upkeep cost may be paid by either the original caster or any target in the zone. Shade Magic dispels it.

Soft glowing blossoms spread across the zone, breathing light into those who rest within it.

Miasma (Air + Shade)

Prerequisite: 2 dots Air, 2 dots Shade
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, Debuff, Corrupt
Range: Zone
Dice Pool: Intelligence + Magic + Air dots + Shade dots (cap at lowest)

Effect: A dark mist fills the zone with a pool of penalty dice equal to cast successes. Any living target in the zone rolls against this pool before every roll they make, losing dice equal to the Miasma's penalty pool successes that turn. The pool depletes as it is used. Undead targets in the zone gain bonus dice equal to current pool size instead. Bright Magic dispels it.

A creeping dark fog that saps the will and precision of anyone breathing it in.

Mist (Fire + Water)

Prerequisite: 2 dots Fire, 2 dots Water
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, CC
Range: Zone
Dice Pool: Intelligence + Magic + Fire dots + Water dots (cap at lowest)

Effect: Steam fills the zone, reducing visibility. All ranged attacks and targeted spells originating from or aimed at targets inside the zone suffer a die penalty equal to cast successes. Movement through the zone is not impaired but targets inside cannot be clearly seen from outside.

Heat meets water and produces a rolling cloud of dense steam.

Overgrowth (Earth + Nature)

Prerequisite: 2 dots Earth, 2 dots Nature
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, CC
Range: Zone
Dice Pool: Intelligence + Magic + Earth dots + Nature dots (cap at lowest)

Effect: Dense plant growth bursts up through the earth and fills the zone. Movement into or through the zone costs 2 additional AP. The growth has a Vitality pool equal to double the cast successes. Fire spells or melee attacks with bladed weapons reduce the Vitality pool rather than targeting individuals. When the Vitality pool reaches 0 the growth is destroyed.

The earth erupts with a wall of thick tangled growth impossible to move through quickly.

Plasma (Fire + Air)

Prerequisite: 2 dots Fire, 2 dots Air
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Armor Pen
Range: Targeted
Dice Pool: Dexterity + Magic + Fire dots + Air dots (cap at lowest)

Effect: A bolt of superheated ionized gas launches at a single target. Carries Armor Pen: the caster may declare additional mana toward Armor Pen before rolling. Every 2 mana spent reduces the armor portion of the target's DT by 1 for this attack. Armor Pen is declared separately from mana spent on attack or damage dice. Defend: Dexterity + Dodge or appropriate cover.

Superheated plasma that burns through armor as readily as flesh.

Quagmire (Water + Earth)

Prerequisite: 2 dots Water, 2 dots Earth
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, CC
Range: Zone
Dice Pool: Intelligence + Magic + Water dots + Earth dots (cap at lowest)

Effect: Water-saturated earth turns the zone into difficult terrain. Movement into or through the zone costs 2 additional AP. Targets entering the zone roll Strength + Athletics vs cast successes or become Rooted until their next Upkeep Phase. Rooted targets who attempt to move roll Strength + Athletics against cast successes; success allows movement at cost, failure keeps them Rooted.

The earth drinks water until it becomes a sucking trap.

Radiant Flame (Fire + Bright)

Prerequisite: 2 dots Fire, 2 dots Bright
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: N/A (attack mode) / 3 (utility mode)
Speed: Instant
Type: Attack, Utility, Cleanse
Range: Targeted (attack) / Zone (utility)
Dice Pool: Dexterity + Magic + Fire dots + Bright dots (cap at lowest) for attack mode, Intelligence in place of Dexterity for utility mode

Effect: Declare attack or utility mode before casting. Attack mode: deals damage; successes are doubled against undead. Utility mode: creates a sustained area of radiant fire that cannot be mechanically extinguished and deals no harm to living targets. The light dispels mundane darkness and Shade-based obscuring effects. Shade Magic does not extinguish it.

Fire touched by radiant energy. In attack form it burns twice as bright against the dead. In utility form it simply burns, clean and permanent.

Radiant Wind (Air + Bright)

Prerequisite: 2 dots Air, 2 dots Bright
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, Buff
Range: Zone
Dice Pool: Intelligence + Magic + Air dots + Bright dots (cap at lowest)

Effect: Radiant-charged wind fills the zone and creates a bonus die pool for ranged attacks. Living targets in the zone draw from this pool when making ranged attacks, adding those dice to their roll. The pool starts with dice equal to cast successes. On upkeep phases where 3 or more mana is spent on upkeep, roll the bonus mana spent and add the successes to the pool. Shade Magic dispels it.

Glowing wind that lofts projectiles and steadies aim.

Sanctified Water (Water + Bright)

Prerequisite: 2 dots Water, 2 dots Bright
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: N/A (attack) / 3 (utility)
Speed: Instant
Type: Attack, Utility, Cleanse
Range: Targeted (attack) / Zone (utility)
Dice Pool: Dexterity + Magic + Water dots + Bright dots (cap at lowest) for attack mode, Intelligence in place of Dexterity for utility mode

Effect: Declare attack or utility mode before casting. Attack mode: deals radiant water damage; doubles successes against undead. Utility mode: the zone is flooded with sanctified water, cleansing one condition per turn from living targets who remain in it and dealing

damage to undead who enter or remain. Shade Magic dispels utility mode.

Water infused with radiant energy, purifying to the living and lethal to the dead.

Shadowflame (Fire + Shade)

Prerequisite: 2 dots Fire, 2 dots Shade
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3 (condition mode)
Speed: Instant
Type: Attack, Utility, Drain, Corrupt
Range: Targeted
Dice Pool: Dexterity + Magic + Fire dots + Shade dots (cap at lowest)

Effect: Declare attack or condition mode before casting. Attack mode: deals damage to a target. Condition mode: applies a persistent Shadowflame burn that drains mana from the target's pool each Upkeep Phase equal to the original cast successes, directly from the mana pool without the mana being spent. Bright Magic applied to the target or the target spending their action extinguishes the condition.

Fire that burns dark. In attack form it simply destroys. In condition form it feeds.

Spore Cloud (Air + Nature)

Prerequisite: 2 dots Air, 2 dots Nature
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, CC, Debuff
Range: Zone
Dice Pool: Intelligence + Magic + Air dots + Nature dots (cap at lowest)

Effect: A cloud of organic spores is dispersed across the zone. Living targets in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase. Failure applies a die penalty to all rolls equal to excess successes, lasting until the target has an Upkeep Phase outside the zone. Fire Magic ignites and dispels the cloud.

A thick organic cloud that gets into everything and makes every movement a struggle.

Tempest (Water + Air)

Prerequisite: 2 dots Water, 2 dots Air
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Utility, Persistent, CC
Range: Zone
Dice Pool: Intelligence + Magic + Water dots + Air dots (cap at lowest)

Effect: A localized storm of wind and rain fills the zone. Ranged attacks and targeted spells into or out of the zone suffer a die penalty equal to cast successes. Targets in the zone must roll Strength + Athletics vs cast successes each Upkeep Phase or be pushed 1 zone in a direction the caster chooses.

A concentrated storm that bucks and tosses everything caught inside it.

Venom (Water + Shade)

Prerequisite: 2 dots Water, 2 dots Shade
Mana Cost: 4
Upcast: 2 mana per additional die or effect
Upkeep: 3
Speed: Instant
Type: Attack, Persistent, Drain, Corrupt
Range: Targeted
Dice Pool: Dexterity + Magic + Water dots + Shade dots (cap at lowest)

Effect: Launches a bolt of corrupted fluid. On a hit, living targets gain the Poisoned condition with a damage value equal to cast successes. The Poison also drains mana from the target's pool each Upkeep Phase equal to the current damage value. Excess attack successes reduce the mana drain amount (to a minimum of 0) rather than adding to the Poison damage. Undead targets hit have one active condition removed instead. Bright Magic or Cleanse ends the condition.

Dark fluid that poisons the living and paradoxically purges conditions from the dead.

Three-School Combinations

Prerequisite: 3 dots in each school. Mana cost: 9. Upkeep: 8.

Ashfall (Fire + Air + Shade)

Prerequisite: 3 dots Fire, 3 dots Air, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Drain
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Dark burning cinders rain down across the zone. All targets in the zone suffer a visibility penalty equal to cast successes on ranged attacks and targeted spells. Living targets must roll Fortitude + Endurance each Upkeep Phase or lose mana equal to half the cast successes (rounded up). Undead targets in the zone gain a bonus dice pool equal to cast successes on attack rolls. Bright Magic dispels it.

Burning debris falls continuously, choking the zone with heat, ash, and dark energy.

Balance (Nature + Bright + Shade)

Prerequisite: 3 dots Nature, 3 dots Bright, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Utility, CC
Range: Targeted
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: All conditions on the target, positive and negative alike, are suspended for a number of turns equal to cast successes. During this window the target cannot gain new conditions and all existing ones are inert. When the duration ends all suspended conditions resume simultaneously in their original state. Affects living and undead targets equally.

Life energy drawn from both light and dark holds a target in perfect, fragile equilibrium.

Black Fog (Fire + Water + Shade)

Prerequisite: 3 dots Fire, 3 dots Water, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Drain
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A toxic heated mist fills the zone. All targets suffer a visibility penalty equal to cast successes. Living targets must roll Fortitude + Endurance each Upkeep Phase or become Exhausted and lose mana equal to excess successes directly from their pool. Undead targets in the zone gain a bonus dice pool equal to cast successes. Exhausted lasts until the target has an Upkeep Phase outside the zone. Water Magic dispels it.

Hot poisonous fog that clogs lungs, drains energy, and aids the dead.

Choking Ash (Air + Earth + Shade)

Prerequisite: 3 dots Air, 3 dots Earth, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Drain
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Suffocating dark mineral debris fills the zone. All targets suffer a visibility penalty equal to cast successes. Living targets must roll Fortitude + Endurance each Upkeep Phase or become Exhausted and lose mana equal to excess successes. Undead targets gain a bonus dice pool equal to cast successes. Water Magic dispels it.

Grit and dark energy combine into an airborne assault that chokes and drains.

Cinders (Fire + Earth + Shade)

Prerequisite: 3 dots Fire, 3 dots Earth, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, Drain, CC
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Corrupted smoldering earth covers the zone. Living targets in the zone must roll Fortitude + Endurance each Upkeep Phase or lose mana equal to excess successes AND take damage equal to the cast successes.

Undead targets in the zone gain a bonus dice pool equal to cast successes. Water Magic applied to the zone reduces the cast successes by the Water caster's successes.

The ground itself smolders with dark fire, burning mana and flesh together.

Cleansing Gale (Water + Air + Bright)

Prerequisite: 3 dots Water, 3 dots Air, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, Cleanse, CC
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A radiant windstorm fills the zone. Living allies in the zone have one condition removed per turn they remain. Living enemies in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase or gain the Exhausted condition. Any undead target (ally or enemy) in the zone must roll the same or gain Exhausted with an additional 2-die penalty to all rolls for the duration. Exhausted lasts until target has Upkeep Phase outside the zone.

A wind that strips away ailments from the living and punishes the dead for breathing.

Convergent Flame (Fire + Bright + Shade)

Prerequisite: 3 dots Fire, 3 dots Bright, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Armor Pen
Range: Targeted
Dice Pool: Attribute + Magic + lowest dots among combined schools

Effect: Fire balanced between radiant and dark energies deals damage to both living and undead equally. Neither living nor undead receives resistance to this damage. Carries Armor Pen: caster may declare additional mana toward Armor Pen before rolling; every 2 mana reduces armor portion of target's DT by 1 for this attack. Armor Pen declared separately from attack and damage dice.

A fire that burns everything equally, indifferent to what it touches.

Cursed Bog (Water + Earth + Shade)

Prerequisite: 3 dots Water, 3 dots Earth, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Drain
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Corrupted waterlogged terrain fills the zone. Living targets must roll Fortitude + Endurance vs cast successes each Upkeep Phase or become Exhausted and lose mana equal to excess successes directly from their pool. Targets attempting to move in the zone roll Strength + Athletics vs cast successes or become Rooted until their next Upkeep Phase. Undead targets in the zone gain a bonus dice pool equal to cast successes. Bright Magic dispels it.

A bog of dark water that saps living strength and sustains the dead.

Cursed Roots (Earth + Nature + Shade)

Prerequisite: 3 dots Earth, 3 dots Nature, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Drain
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Corrupted root growth erupts across the zone. The zone has a Vitality pool equal to double the cast successes. Targets entering the zone roll Dexterity + Dodge vs cast successes or become Rooted. Rooted living targets must roll Fortitude + Endurance each Upkeep Phase or lose mana equal to excess successes. Undead targets in the zone gain a bonus dice pool equal to cast successes. Fire Magic reduces the Vitality pool by the Fire caster's successes.

Dark roots that hold on and feed on whatever they catch.

Decrease Weight (Air + Bright + Shade)

Prerequisite: 3 dots Air, 3 dots Bright, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant, Extended
Type: Utility, Persistent
Range: Targeted (object or creature in line of sight)
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster halves the effective weight of a single target, object, or creature. For creatures, this halves their weight for all purposes: movement costs 1 fewer AP per zone (minimum 1), Athletics rolls involving lifting or jumping gain bonus dice equal to cast successes, and

falling damage is halved. For objects, the effect works as above. On 3+ successes, the caster may reduce the target's weight to one-quarter instead of one-half. At one-quarter weight, the target floats if exposed to any significant updraft or wind effect. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn. Resist: Fortitude + Endurance.

Air carries the target. Bright and Shade open a gap in the way weight applies to them. They are not floating. They are simply much less here than they were.

Forge Light (Fire + Earth + Bright)

Prerequisite: 3 dots Fire, 3 dots Earth, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect; weapon properties can be added at 2 mana per property
Upkeep: 8
Speed: Instant
Type: Conjuration, Persistent
Range: Caster's zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Conjures a weapon of radiant forged light in the caster's zone. The weapon has both the Burning and Radiant properties and a base damage rating equal to cast successes. On upcast, the caster may spend 2 mana per additional weapon property at the time of casting. The weapon can be picked up and used by any character in the caster's zone but cannot be conjured directly into an ally's hands. If the weapon is not picked up it persists as a hazard in the zone.

A weapon of blazing radiant metal that exists only because it was willed into existence.

Glass Shards (Fire + Air + Earth)

Prerequisite: 3 dots Fire, 3 dots Air, 3 dots Earth
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE
Range: AoE-Cone
Dice Pool: Attribute + Magic + lowest dots among combined schools

Effect: Superheated sand fuses into razor fragments and launches in a cone from the caster. The caster rolls once and applies the same attack successes to all targets in the cone. Each target defends separately. Targets hit gain the Bleeding condition. Can hit allies.

Sand fused into glass in mid-air and launched as a spray of cutting shards.

Hallowed Mire (Water + Earth + Bright)

Prerequisite: 3 dots Water, 3 dots Earth, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, Cleanse, CC, Buff
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Sanctified waterlogged terrain fills the zone. Living allies in the zone have one condition removed per turn and gain a bonus dice pool equal to cast successes. Living enemies in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase or gain Exhausted. Any undead target (ally or enemy) in the zone must roll the same or gain Exhausted with an additional 2-die penalty to all rolls. Shade Magic dispels it.

Holy water pressed into the ground, nourishing the living and weakening the dead.

Healing Grove (Water + Nature + Bright)

Prerequisite: 3 dots Water, 3 dots Nature, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, Healing, Cleanse, AoE
Range: AoE-4 (2x2 zone area)
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Radiant plant growth fills a 2x2 zone area. Each Upkeep Phase, living allies in any of the covered zones are given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Advanced. The pool lasts until the end of that target's next turn, and any unused points are lost. Living enemies in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase or gain Exhausted. Undead targets (ally or enemy) in the zone must roll the same or gain Exhausted with an additional 2-die penalty. Shade Magic dispels it.

A grove of radiant living plants that mends allies and punishes the dead.

Hot Sap Spitting Plant (Fire + Water + Nature)

Prerequisite: 3 dots Fire, 3 dots Water, 3 dots Nature
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Conjuration, Persistent
Range: Adjacent zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A plant entity erupts in an adjacent zone. It cannot act on the turn it is summoned. On subsequent turns the caster may command it to make one heated sap attack using the caster's dice pool. The attack applies

the Burning condition on a hit. The plant has a Vitality pool equal to the cast successes. Earth Magic reduces the Vitality pool by the Earth caster's successes. When Vitality reaches 0 the plant is destroyed. Upkeep paid by caster.

A tough organic entity that spits scalding sap on command.

Increase Weight (Earth + Bright + Shade)

Prerequisite: 3 dots Earth, 3 dots Bright, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant, Extended
Type: Utility, CC, Persistent
Range: Targeted (object or creature in line of sight)
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster doubles the effective weight of a single target, object, or creature. For creatures, this doubles their weight for all purposes: movement costs 1 additional AP per zone, Athletics rolls involving lifting or jumping lose dice equal to cast successes, and any effect that depends on or interacts with weight (including Decrease Weight) applies to the doubled value. For objects, the effect works as above. The maximum target is any single creature or object in line of sight. On 3+ successes, the caster may choose to quadruple the weight instead of doubling it. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn. Resist: Fortitude + Endurance.

Earth locks into the target. Bright and Shade balance the effect into a sustained field. Everything the target does takes more effort than it should.

Lava (Fire + Earth + Nature)

Prerequisite: 3 dots Fire, 3 dots Earth, 3 dots Nature
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Attack
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Molten rock is forced upward through living root systems and covers the zone. Difficult terrain: all movement into or through the zone costs 2 additional AP. Any target entering or remaining in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase. Failure deals damage equal to excess successes and applies the Burning condition. Water Magic applied to the zone reduces cast successes by the Water caster's successes.

Root channels crack open under the heat of molten earth.

Living Rain (Water + Air + Nature)

Prerequisite: 3 dots Water, 3 dots Air, 3 dots Nature
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: First turn of existence: visibility penalty equal to cast successes on all ranged attacks and targeted spells in or out of the zone. Second turn onward: rapid plant growth also takes root in the zone. Targets entering or already in the zone must roll Dexterity + Dodge vs cast successes each Upkeep Phase or become Rooted. Earth Magic reduces cast successes by the Earth caster's successes; if reduced to 0 the spell is dispelled.

A rain that carries seeds and spores. By the second turn, the ground is already growing.

Miasma Bloom (Air + Nature + Shade)

Prerequisite: 3 dots Air, 3 dots Nature, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Drain
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Corrupted organic spores fill the zone. Living targets in the zone must roll Fortitude + Endurance each Upkeep Phase. On a failure they gain the Poisoned condition and lose mana equal to the cast successes directly from their pool. On a success they still lose mana equal to the successes minus their Fortitude + Endurance successes, to a minimum of 0. Undead targets in the zone gain a bonus dice pool equal to cast successes. Fire Magic ignites and dispels the cloud.

Spores that rot from the inside out, poisoning and draining in the same breath.

Phoenix Bloom (Fire + Nature + Bright)

Prerequisite: 3 dots Fire, 3 dots Nature, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Conjuration, Persistent
Range: Any unoccupied zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Summons a phoenix-like conjuration of radiant fire. It appears in any unoccupied zone and cannot act on the turn it is summoned. On subsequent turns the caster may command it to attack or heal. Attack command: it fires from its current zone using the caster's dice pool.

Heal command: it must occupy the same zone as the target, and the target is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Basic. The pool lasts until the end of the target's next turn, and any unused points are lost. The conjuration has a Vitality pool equal to cast successes. Water Magic reduces the Vitality pool by the Water caster's successes.

A creature of living fire and radiant energy that exists to fight or mend.

Plague Marsh (Water + Nature + Shade)

Prerequisite: 3 dots Water, 3 dots Nature, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Drain
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Festering corrupted plant-choked water fills the zone. Living targets in the zone must roll Fortitude + Endurance each Upkeep Phase. On a failure they gain the Poisoned condition and lose mana equal to cast successes from their pool. On a success they still lose mana equal to the cast successes minus their roll successes, to a minimum of 0. Undead targets in the zone gain a bonus dice pool equal to cast successes. Bright Magic dispels it.

Stagnant corrupt water choked with diseased growth.

Poison Fog (Water + Air + Shade)

Prerequisite: 3 dots Water, 3 dots Air, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Drain
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A cold toxic mist fills the zone. Visibility penalty equal to cast successes on all ranged attacks and targeted spells. Living targets must roll Fortitude + Endurance each Upkeep Phase or gain the Poisoned condition and lose mana equal to cast successes. On a success they still lose mana equal to cast successes minus roll successes, to a minimum of 0. Undead targets in the zone gain a bonus dice pool equal to cast successes. Bright Magic dispels it.

Cold poisonous mist. Kills slowly. Feeds the dead.

Quagmire Storm (Water + Air + Earth)

Prerequisite: 3 dots Water, 3 dots Air, 3 dots Earth
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, CC
Range: Targeted
Dice Pool: Attribute + Magic + lowest dots among combined schools

Effect: A targeted blast of storm-driven mud hits a single target. On a hit the target is pushed 1 zone in a direction the caster chooses and gains the Blind (Targeted) condition. Blind (Targeted) lasts until the target spends an action to clear their vision; they may still move while Blind.

A concentrated burst of wet earth launched with enough force to displace and disorient.

Radiant Dust (Air + Earth + Bright)

Prerequisite: 3 dots Air, 3 dots Earth, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Buff
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A shimmering cloud of illuminated mineral particles fills the zone. Living enemies in the zone who fail a Fortitude + Endurance roll vs cast successes each Upkeep Phase gain the Blind (Zone) condition, which lasts until they have an Upkeep Phase outside the zone. Living allies in the zone gain a bonus dice pool equal to cast successes. Shade Magic dispels it.

Sparkling mineral dust that blinds enemies while guiding allies.

Sacred Grove (Earth + Nature + Bright)

Prerequisite: 3 dots Earth, 3 dots Nature, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, Buff, CC
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Sanctified earth and plant growth fill the zone. Living allies in the zone gain bonus dice equal to cast successes on all rolls and have one condition removed per turn they remain. Living enemies in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase or gain Exhausted. Undead targets (ally or enemy) must pass the same roll or gain Exhausted with a 2-die penalty to all rolls. Shade Magic dispels it.

A space where living things are strengthened by the earth and light together.

Sacred Steam (Fire + Water + Bright)

Prerequisite: 3 dots Fire, 3 dots Water, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, Cleanse, CC
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Purifying steam infused with radiant energy fills the zone. Living allies in the zone have one condition removed per turn they remain. Living enemies in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase or gain Exhausted. Undead targets (ally or enemy) in the zone must pass the same roll or gain Exhausted with a 2-die penalty. The steam cannot be extinguished by Fire Magic; Shade Magic dispels it.

Radiant steam that burns conditions away from allies and forces undead out.

Solar Flare (Fire + Air + Bright)

Prerequisite: 3 dots Fire, 3 dots Air, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, CC, AoE
Range: AoE-Cone
Dice Pool: Attribute + Magic + lowest dots among combined schools

Effect: A blinding burst of radiant light in a cone. The caster rolls once and applies the same attack successes to all targets. Each target defends separately. All targets hit gain the Blind (Targeted) condition. Undead targets hit take damage equal to cast successes doubled in addition to the Blind condition. Shade Magic reduces cast successes by the Shade caster's successes.

A blast of pure radiant fire that blinds everyone and burns undead twice over.

Spore Blast (Fire + Air + Nature)

Prerequisite: 3 dots Fire, 3 dots Air, 3 dots Nature
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE
Range: AoE-4 (2x2 zone area)
Dice Pool: Attribute + Magic + lowest dots among combined schools

Effect: Floating spores drift to a 2x2 zone area and detonate on arrival. The caster rolls once and applies the same attack successes to all targets in the affected zones. Each target defends separately. The explosion is instantaneous with no persistent terrain effect. Can hit allies. The caster may choose any adjacent 2x2 zone area within their cast range.

Dandelion-like spores that drift to their destination before detonating.

Spore Light (Air + Nature + Bright)

Prerequisite: 3 dots Air, 3 dots Nature, 3 dots Bright
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, Healing, CC
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Luminescent spores fill the zone. Each Upkeep Phase, living allies in the zone are given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Basic. The pool lasts until the end of that target's next turn, and any unused points are lost. Living enemies in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase or gain a 2-die penalty to all rolls until they have an Upkeep Phase outside the zone. Undead targets in the zone must pass the same roll or gain Exhausted. Shade Magic dispels it.

Glowing spores that mend allies and disorient everyone else.

Swamp (Water + Earth + Nature)

Prerequisite: 3 dots Water, 3 dots Earth, 3 dots Nature
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Dense waterlogged terrain choked with plant growth fills the zone. Movement into or through the zone costs 3 additional AP. Targets entering the zone roll Strength + Athletics vs cast successes or become Rooted. Rooted targets who attempt to move roll Strength + Athletics against cast successes; failure keeps them Rooted. Fire Magic reduces cast successes by the Fire caster's successes.

A zone made nearly impassable by water and growth working together.

Tempest Inferno (Fire + Water + Air)

Prerequisite: 3 dots Fire, 3 dots Water, 3 dots Air
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Attack
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A superheated hurricane of steam fills the zone. Visibility penalty equal to cast successes on all ranged attacks and targeted spells. Targets in the zone must roll Fortitude + Endurance vs cast successes each Upkeep Phase. Failure deals damage equal to excess successes and pushes the target 1 zone in a direction the caster chooses. Earth Magic reduces cast successes by the Earth caster's successes.

A superheated storm that scalds, blinds, and scatters.

Tidal Convergence (Water + Bright + Shade)

Prerequisite: 3 dots Water, 3 dots Bright, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE, CC
Range: Zone
Dice Pool: Attribute + Magic + lowest dots among combined schools

Effect: A wave of balanced opposing energies crashes through a zone. The caster rolls once and applies the same attack successes to all targets in the zone, living and undead alike. Neither type receives resistance to this damage. All targets hit, whether damaged or not, are pushed 1 zone away from the caster. The caster chooses the direction.

A tidal force drawn from opposing energies that moves everything in its path.

Vines of Rotfire (Fire + Nature + Shade)

Prerequisite: 3 dots Fire, 3 dots Nature, 3 dots Shade
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Attack, Persistent, CC, Drain, Corrupt
Range: Targeted
Dice Pool: Attribute + Magic + lowest dots among combined schools

Effect: Dark flaming vines erupt from the ground and seize a living target, applying the Rooted condition. Each Upkeep Phase the target remains Rooted they take damage equal to the original attack successes and lose mana equal to half the successes (rounded up). Undead targets hit instead have one active condition removed and gain a bonus dice pool equal to cast successes until they leave the zone. Bright Magic dispels the vines. Target may attempt to break free by rolling Strength + Athletics vs original cast successes during their Upkeep Phase.

Burning dark vines that hold on and feed off the living, but free the dead.

Volcanic Spring (Fire + Water + Earth)

Prerequisite: 3 dots Fire, 3 dots Water, 3 dots Earth
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Utility, Persistent, CC, Attack
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Superheated water is forced through cracked earth, erupting as scalding geysers across the zone. Each Upkeep Phase the zone is active, targets inside must roll Dexterity + Dodge vs cast successes or be struck by a geyser and take damage equal to excess successes plus the Burning condition. Difficult terrain: movement into or through the zone costs 1 additional AP. Nature Magic reduces cast successes by the Nature caster's successes.

The ground beneath the zone cracks open with scalding eruptions.

Wooden Wall (Air + Earth + Nature)

Prerequisite: 3 dots Air, 3 dots Earth, 3 dots Nature
Mana Cost: 9
Upcast: 3 mana per additional die or effect
Upkeep: 8
Speed: Instant
Type: Conjuration, Persistent
Range: Adjacent zone border
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Dense conjured timber forms a wall along a border between two zones. The wall blocks movement across that border entirely until destroyed. The wall has a Vitality pool equal to double the cast successes. Fire spells reduce the Vitality pool by the Fire caster's successes. Melee attacks with bladed weapons reduce it by damage successes. This is a physical barrier, not an elemental wall; elemental advantage rules do not apply to it.

Dense timber that did not grow here but exists regardless.

Four-School Combinations

Prerequisite: 4 dots in each school. Mana cost: 16. Upkeep: 15.

Ashen Waste (Fire + Earth + Nature + Shade)

Prerequisite: 4 dots Fire, 4 dots Earth, 4 dots Nature, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, Corrupt, AoE, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The area is scorched and blighted. Every Nature Magic terrain effect in the area ends when the spell is cast. Each Upkeep Phase, living targets in the area must roll Fortitude + Endurance vs cast successes or take damage equal to excess successes and gain the Poisoned condition. Undead in the area gain bonus dice equal to cast successes on all rolls. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Nothing grows here now, and the dead like it that way.

Black Blizzard (Fire + Water + Air + Shade)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Air, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, Drain, AoE, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A freezing storm of dark snow fills the area. All ranged attacks and targeted spells into or out of the area lose dice equal to cast successes. Each Upkeep Phase, living targets in the area must roll Fortitude + Endurance vs cast successes or gain the Chilled condition and lose mana equal to half the cast successes (rounded up). Undead in the area gain bonus dice equal to cast successes on attack rolls. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

A winter that eats warmth and mana alike.

Black Lightning (Fire + Air + Nature + Shade)

Prerequisite: 4 dots Fire, 4 dots Air, 4 dots Nature, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Drain
Range: Targeted
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A bolt of dark lightning strikes a target. On a hit the target takes damage equal to excess successes. Living targets also lose mana equal to the excess successes, and cannot use Reactions until the start of their next turn. Defend: Dexterity + Dodge.

Lightning that strikes the body and the soul's reserves at once.

Blessed Downpour (Water + Air + Nature + Bright)

Prerequisite: 4 dots Water, 4 dots Air, 4 dots Nature, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Healing, AoE, Persistent
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A soft radiant rain falls across a wide area. Each Upkeep Phase, every living ally in the area is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Advanced. The pool lasts until the end of the target's next turn, and any unused points are lost. Undead in the area gain the Chilled condition each Upkeep Phase. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Rain that carries life to everyone it touches.

Bog Revenant (Water + Earth + Nature + Shade)

Prerequisite: 4 dots Water, 4 dots Earth, 4 dots Nature, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Conjuration, Persistent
Range: Any unoccupied adjacent zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Mud, bone, and dead roots rise from the ground as a mindless undead conjuration. It cannot act on the turn it is summoned. On later turns the caster may command it to attack a target in an adjacent zone using

the caster's dice pool. A target hit by it takes damage equal to excess successes and must roll Strength + Athletics vs cast successes or become Rooted. It has a Vitality pool equal to triple the cast successes. Bright Magic attacks against it deal double damage. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

The bog gives back what it took, and none of it is friendly.

Caustic Bloom (Fire + Water + Nature + Shade)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Nature, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Armor Pen, Corrupt
Range: Targeted
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A burst of corrosive, rotting sap strikes a target. On a hit the target takes damage equal to excess successes and gains the Poisoned condition with a value equal to the cast successes. The armor portion of the target's DT is reduced by the cast successes until the end of the scene as the sap eats through it. Defend: Dexterity + Dodge.

Lye and rot, flung hard enough to stick.

Chain of Heaven (Fire + Air + Nature + Bright)

Prerequisite: 4 dots Fire, 4 dots Air, 4 dots Nature, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE
Range: Targeted, then jumps
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: Radiant lightning strikes a target, then leaps to additional enemies. After the first target, the lightning jumps to up to the caster's Bright dots in additional targets, each in a zone adjacent to the last target hit. Each target defends separately against the same attack successes. Targets hit take damage equal to excess successes. Undead targets take double damage. The lightning will not jump to the caster's allies. Defend: Dexterity + Dodge.

It knows exactly who it is looking for.

Crucible Bind (Fire + Earth + Bright + Shade)

Prerequisite: 4 dots Fire, 4 dots Earth, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, CC, Persistent
Range: Targeted
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A ring of molten stone held by crushing force closes around a single target, living or undead. On a hit the target becomes Rooted and takes damage equal to excess successes. Each Upkeep Phase the target remains Rooted they take damage equal to the cast successes. The target may roll Strength + Athletics vs cast successes during their Upkeep Phase to break free, which ends the spell. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn. Defend: Dexterity + Dodge.

Heat to soften, weight to hold, and two opposite forces to seal it shut.

Crystal Sanctuary (Water + Air + Earth + Bright)

Prerequisite: 4 dots Water, 4 dots Air, 4 dots Earth, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Defense, Persistent
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A shining dome of crystal and water forms over the zone. Ranged attacks and targeted spells from outside the dome against anyone inside lose dice equal to the cast successes. Undead cannot enter the dome unless they succeed on Fortitude + Endurance vs cast successes. Allies inside gain bonus dice equal to half the cast successes (rounded up) on resistance rolls. The dome has a Vitality pool equal to triple the cast successes; Shade Magic attacks against it deal double damage. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

A shelter that light passes through and very little else.

Drowning Mire (Water + Air + Earth + Shade)

Prerequisite: 4 dots Water, 4 dots Air, 4 dots Earth, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, CC, Drain, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The ground in the area becomes a dark, sucking bog. Any target entering or starting their turn in the area must roll Strength + Athletics vs cast successes or become Rooted. Each Upkeep Phase, living targets in the area must roll Fortitude + Endurance vs cast successes or take damage equal to excess successes and lose the same amount of mana. Undead move through the area freely. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

It pulls you down, and it does not let go.

Ember Rain (Fire + Water + Nature + Bright)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Nature, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Healing, Cleanse, AoE, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Warm glowing rain falls over the area. Each Upkeep Phase, every living ally in the area is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Advanced. The pool lasts until the end of the target's next turn, and any unused points are lost. When the rain first falls, every living ally in the area also has one Burning, Chilled, or Poisoned condition removed. Undead in the area gain the Burning condition each Upkeep Phase. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Rain that feels like a hearth after a long night.

Fulgurite Strike (Fire + Air + Earth + Nature)

Prerequisite: 4 dots Fire, 4 dots Air, 4 dots Earth, 4 dots Nature
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE
Range: AoE-Line
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A bolt of lightning tears across the ground in a straight line, fusing the earth into glass behind it. Every target in the line defends separately. Targets hit take damage equal to excess successes and gain the Burning condition. Every zone in the line becomes difficult terrain from the glassed ground. Defend: Dexterity + Dodge.

Where the lightning ran, the ground turned to glass.

Full Gravity (Air + Earth + Bright + Shade)

Prerequisite: 4 dots Air, 4 dots Earth, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Utility, CC, Persistent
Range: Targeted (object or creature in line of sight)
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster takes complete control of a target's relationship to gravity, increasing or decreasing it in either direction by factors. The caster chooses direction and intensity at cast time. Each success on the roll increases the factor by 1 in either direction. At 1 success: weight is halved or doubled. At 3 successes: weight is quartered or quadrupled. At 5 successes: target is weightless (floats freely without wind) or crushed (takes 1 damage each Upkeep Phase from compression and cannot move on their own). At 7+ successes: the target can be projected upward as if launched (weightless + upward velocity) or collapsed inward under extreme gravity (Pinned condition, 2 damage each Upkeep Phase). Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn. Resist: Fortitude + Endurance. Increasing successes in the crushing direction requires re-rolling each turn at the same cost.

Bright and Shade together can regulate fundamental forces when guided by Earth and Air. What they can do to weight in either direction is a matter of how many successes the caster can bring to it.

Hearthroot (Fire + Earth + Nature + Bright)

Prerequisite: 4 dots Fire, 4 dots Earth, 4 dots Nature, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Healing, Persistent
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A warm stone hearth wrapped in glowing roots rises in the zone. Each Upkeep Phase, every living ally in the zone is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Expert. The pool lasts until the end of the target's next turn, and any unused points are lost. Undead in the zone gain the Burning condition each Upkeep Phase. The hearth has a Vitality pool equal to double the cast successes; if it is destroyed

the spell ends. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Sit by this fire and the worst of it mends.

Kiln Storm (Fire + Water + Air + Earth)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Air, 4 dots Earth
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A storm of superheated glass and fired clay shards tears through the area. Caster rolls once and every target in the area defends separately. Targets hit take damage equal to excess successes and gain both the Burning and Bleeding conditions. All zones in the area become difficult terrain from the broken shards. Defend: Dexterity + Dodge.

Four elements melt, fire, and shatter into a single scouring storm.

Kilnborn Guardian (Fire + Water + Earth + Nature)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Earth, 4 dots Nature
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Conjuration, Persistent
Range: Any unoccupied adjacent zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster shapes fired clay bound with living roots into a guardian. It cannot act on the turn it is summoned. On later turns the caster may command it to attack a target in an adjacent zone using the caster's dice pool, or to guard an ally in its zone, adding the cast successes to that ally's BDT until the guardian's next action. The guardian has a Vitality pool equal to triple the cast successes. Water Magic reduces its Vitality by the Water caster's successes. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Clay fired in the moment, held together by roots that refuse to let go.

Mirror Mist (Water + Air + Bright + Shade)

Prerequisite: 4 dots Water, 4 dots Air, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Defense, Utility, Persistent
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A mist of reflecting light and shadow fills the zone, filling it with images of everyone inside. Any attack or targeted spell against a target in the zone requires the attacker to first roll Perception + Awareness vs cast successes. On a failure the attack strikes a reflection and misses. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

You see them. You see them again. You see them everywhere.

Monsoon (Water + Air + Earth + Nature)

Prerequisite: 4 dots Water, 4 dots Air, 4 dots Earth, 4 dots Nature
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Utility, CC, AoE, Persistent
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Torrential rain floods the area. The area is difficult terrain. All ranged attacks and targeted spells into or out of the area lose dice equal to half the cast successes (rounded up). Plants surge up through the mud: each Upkeep Phase, every target in the area must roll Strength + Athletics vs cast successes or become Rooted until their next Upkeep Phase. Fire Magic effects in the area lose successes equal to the cast successes each Upkeep Phase. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

The rains come, and the land answers by growing.

Obsidian Storm (Fire + Air + Earth + Shade)

Prerequisite: 4 dots Fire, 4 dots Air, 4 dots Earth, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Drain, AoE
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A whirlwind of black volcanic glass shreds the area. Caster rolls once and every target in the area defends separately. Targets hit take damage equal to excess successes and gain the Bleeding condition. Living

targets hit also lose mana equal to their excess successes taken. Defend: Dexterity + Dodge.

Black glass that cuts and keeps cutting.

Petrify (Earth + Nature + Bright + Shade)

Prerequisite: 4 dots Earth, 4 dots Nature, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: CC, Persistent
Range: Targeted
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Stone and wood creep over a single target and lock them in place. The target must roll Fortitude + Endurance vs cast successes. On a failure the target gains the Petrified condition. During each Upkeep Phase they may roll Strength + Athletics vs cast successes to break free. Bright or Shade Magic that meets or exceeds the cast successes ends it early. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn. Resist: Fortitude + Endurance.

Life held still, neither living nor dead, until it is let go.

Plague Fog (Water + Air + Nature + Shade)

Prerequisite: 4 dots Water, 4 dots Air, 4 dots Nature, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, Drain, AoE, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A sickly green fog fills the area and drifts. During each Upkeep Phase the caster may move the whole fog 1 zone in any direction. Each Upkeep Phase, living targets in the fog must roll Fortitude + Endurance vs cast successes or gain the Poisoned condition with a value equal to the cast successes and lose mana equal to half the cast successes (rounded up). Air Magic reduces the cast successes by the Air caster's successes. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

A sickness with somewhere to be.

Pressure of the Deep (Water + Earth + Bright + Shade)

Prerequisite: 4 dots Water, 4 dots Earth, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, CC, Persistent
Range: Targeted
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The crushing weight of the deep ocean settles on a single target. While the spell lasts, the target's movement costs 1 additional AP per zone and all of their rolls lose dice equal to half the cast successes (rounded up). Each Upkeep Phase the target takes damage equal to the cast successes unless they succeed on Fortitude + Endurance vs cast successes. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn. Resist: Fortitude + Endurance.

The whole sea, pressing on one person.

Prism Storm (Fire + Water + Air + Bright)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Air, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Cleanse, AoE
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A shower of glowing ice crystals falls across the area. Undead targets in the area take damage equal to excess successes and gain the Chilled condition. Living allies in the area each have one Burning or Chilled condition removed. Living enemies are unharmed but lose 1 die on ranged attacks until the start of the next Upkeep Phase from the glare. Defend: Dexterity + Dodge.

Ice that catches the light and turns it into a weapon against the dead.

Pyre of Balance (Fire + Nature + Bright + Shade)

Prerequisite: 4 dots Fire, 4 dots Nature, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, Healing, Persistent
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A pyre of light and dark flame burns in the zone. Each Upkeep Phase, every enemy in the zone, living or undead, takes damage equal to the cast successes unless

they succeed on Fortitude + Endurance vs cast successes. When any enemy in the zone becomes Incapacitated, every living ally in the zone is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Advanced. The pool lasts until the end of the target's next turn, and any unused points are lost. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

What burns away feeds what remains.

Sacred Canopy (Air + Earth + Nature + Bright)

Prerequisite: 4 dots Air, 4 dots Earth, 4 dots Nature, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Defense, Debuff, Persistent
Range: AoE-9 (3x3 zone area) centered on the caster's zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A great tree of light spreads its canopy over the area. Ranged attacks and targeted spells against allies under the canopy lose dice equal to the cast successes. Each Upkeep Phase, undead under the canopy must roll Fortitude + Endurance vs cast successes or gain the Exhausted condition. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Shade, but the kind made by light.

Sap Siphon (Water + Nature + Bright + Shade)

Prerequisite: 4 dots Water, 4 dots Nature, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Healing, Drain
Range: Targeted
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A vine of light and shadow lashes a living enemy and draws their life into an ally. On a hit the target takes damage equal to excess successes. One living ally within line of sight is then given a PHP (Pool of Healing Points) equal to the excess successes. Healing tier: Advanced. The pool lasts until the end of the target's next turn, and any unused points are lost. Undead cannot be targeted by this spell. Defend: Dexterity + Dodge.

Taken from one, given to another.

Sunforged Armor (Fire + Water + Earth + Bright)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Earth, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Buff, Defense, Persistent
Range: Self and allies in adjacent zones, up to Bright dots in targets
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Radiant glazed ceramic forms over each target like armor. Each target adds the cast successes to their BDT. Undead attacking a protected target lose dice equal to cast successes. Shade Magic that meets or exceeds the cast successes shatters the armor on one target. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Armor fired in holy light and cooled in an instant.

Sunglass Lens (Fire + Air + Earth + Bright)

Prerequisite: 4 dots Fire, 4 dots Air, 4 dots Earth, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack
Range: Targeted
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: The caster forms a lens of glass in the air and focuses radiant sunlight through it onto a single target. On a hit the target takes damage equal to excess successes doubled. On 3+ excess successes the target also gains the Blind (Targeted) condition. Undead hit by this spell also gain the Burning condition. Defend: Dexterity + Dodge.

A single point of sunlight, made unbearable.

Tar Pit (Fire + Water + Earth + Shade)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Earth, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, CC, Drain, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Black boiling pitch floods the area. The area is difficult terrain. Any target entering or starting their turn in the area must roll Strength + Athletics vs cast successes or become Rooted, and every Rooted target gains the Burning condition. Each Upkeep Phase, living targets in the area lose mana equal to half the cast successes (rounded up). Water Magic reduces the cast successes by the Water caster's successes. Countdown: lasts turns equal to half the mana spent, rounded up.

Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Hot, black, and patient.

Teleportation (Air + Nature + Bright + Shade)

Prerequisite: 4 dots Air, 4 dots Nature, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Utility
Range: Self and willing allies in adjacent zones
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster folds the space between two points and steps through it. The caster and up to the cast successes in willing allies in their zone or adjacent zones are moved instantly to unoccupied zones of the caster's choice within line of sight. On 5+ successes the destination can instead be any place the caster has personally been and can picture clearly, at any distance. Teleportation cannot place anyone in an occupied zone. For long-distance travel between prepared points, see Teleportation in Circle Magic.

One step here, the next step somewhere else entirely.

Thornwood Maze (Air + Earth + Nature + Shade)

Prerequisite: 4 dots Air, 4 dots Earth, 4 dots Nature, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: CC, Utility, Persistent
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Walls of dark, thorned wood erupt across the area, forming a maze. The caster designates which zone borders are open paths when casting. Crossing any other border inside the area requires pushing through the thorns: the target rolls Strength + Athletics vs cast successes, takes damage equal to the caster's excess successes on a failure, gains the Bleeding condition, and living targets also lose 1 mana. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Every way out is a way through thorns.

Thunderstorm (Fire + Water + Air + Nature)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Air, 4 dots Nature
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Attack, AoE, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Black clouds gather over the area and lightning falls through the rain. Each Upkeep Phase, every target in the area must defend against the cast successes. Targets hit take damage equal to excess successes and lose their free move for that turn from the shock. Targets wearing metal armor lose 2 dice on this defense. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn. Defend: Dexterity + Dodge.

Rain to carry it, heat to spark it, air to throw it, and something living to call it down.

Twilight Steam (Fire + Water + Bright + Shade)

Prerequisite: 4 dots Fire, 4 dots Water, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Utility, Persistent
Range: Zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A shimmering steam of light and shadow fills the zone and unravels magic. Each Upkeep Phase, every persistent spell effect in the zone (from any school, including the caster's own) loses successes equal to the cast successes, and any reduced to 0 ends. Any target casting a spell while inside the zone loses dice equal to half the cast successes (rounded up). Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

In the haze between light and dark, spells forget how they were made.

Twin Corona (Fire + Air + Bright + Shade)

Prerequisite: 4 dots Fire, 4 dots Air, 4 dots Bright, 4 dots Shade
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Defense, Attack, Persistent
Range: Self
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A ring of light and dark fire circles the caster. Any target that makes a melee attack against the caster takes

damage equal to the cast successes, living or undead alike. Ranged attacks and targeted spells against the caster lose dice equal to half the cast successes (rounded up). Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Two fires, opposite in every way, agreeing on one thing: keep away.

Wellspring (Water + Earth + Nature + Bright)

Prerequisite: 4 dots Water, 4 dots Earth, 4 dots Nature, 4 dots Bright
Mana Cost: 16
Upcast: 4 mana per additional die or effect
Upkeep: 15
Speed: Instant, Extended
Type: Healing, Cleanse, Persistent
Range: Touch or adjacent zone target
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A spring of radiant water rises around a living target and soaks into their wounds. The target is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Expert. The pool lingers using the countdown mechanic: it lasts turns equal to half the mana spent, rounded up, and paying the upkeep during the Upkeep Phase freezes it. Unused points are lost when it ends. When cast, the target also has one condition of their choice removed.

The kind of water people walk for days to find.

Five-School Combinations

Prerequisite: 5 dots in each school. Mana cost: 25. Upkeep: 24.

Renewal (Fire + Water + Air + Nature + Bright)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Air, 5 dots Nature, 5 dots Bright
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Healing
Range: Touch
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Can only be cast outside combat. The target is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Master. Each point can regrow one lost limb, eye, or organ, or neutralize 1 Aggravated damage. The pool lasts until the end of the scene, and any unused points are lost.

What was lost grows back as though it had never been gone.

Black Meteor (Fire + Water + Air + Earth + Shade)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Air, 5 dots Earth, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Drain, AoE
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A meteor of dark burning stone falls on the area. Caster rolls once and every target in the area defends separately. Targets hit take damage equal to excess successes and gain the Burning condition. Living targets hit also lose mana equal to the cast successes. Every zone in the area becomes Darkened until the start of the next Upkeep Phase. Defend: Dexterity + Dodge.

The sky goes dark before it lands.

Blackfire Wildwood (Fire + Air + Earth + Nature + Shade)

Prerequisite: 5 dots Fire, 5 dots Air, 5 dots Earth, 5 dots Nature, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Attack, Corrupt, AoE, Persistent
Range: Zone, spreading
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A forest of dark, burning trees erupts in a zone and spreads. During each Upkeep Phase the wood spreads into one adjacent zone of the caster's choice. Every zone of the wood is difficult terrain. Each Upkeep Phase, every living target in the wood must roll Fortitude + Endurance vs cast successes or take damage equal to excess successes and gain the Burning and Bleeding conditions. Undead move through the wood freely. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

A forest that burns and keeps growing anyway.

Drowned World (Water + Air + Earth + Nature + Shade)

Prerequisite: 5 dots Water, 5 dots Air, 5 dots Earth, 5 dots Nature, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Attack, CC, Drain, AoE, Persistent
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Dark water floods the area and the ground beneath it turns to choking mire. The area is difficult terrain, and every target in it must roll Strength + Athletics vs cast successes when they try to leave a zone or become Rooted. Each Upkeep Phase, living targets in the area must roll Fortitude + Endurance vs cast successes or take damage equal to excess successes and lose the same amount of mana. Undead in the area gain bonus dice equal to the cast successes on all rolls. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

The water rises, and it brings the bottom of the lake with it.

Gravity Tide (Water + Air + Earth + Bright + Shade)

Prerequisite: 5 dots Water, 5 dots Air, 5 dots Earth, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Utility, CC, AoE
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A tide of shifting weight rolls through the area. For each target in the area, the caster chooses: move them up to 2 zones in any direction, or double or halve their weight until the end of their next turn. Unwilling targets roll Strength + Athletics vs cast successes to resist being moved and Fortitude + Endurance vs cast successes to resist the weight change.

Gravity, rearranged like furniture.

Gravity Well (Fire + Air + Earth + Bright + Shade)

Prerequisite: 5 dots Fire, 5 dots Air, 5 dots Earth, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Attack, CC, AoE, Persistent
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A collapsing point of burning force forms at the center of the area. Each Upkeep Phase, every target in the area must roll Strength + Athletics vs cast successes or be pulled 1 zone toward the center. Any target that starts its turn in the center zone takes damage equal to the cast successes and gains the Burning condition. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Everything falls toward the fire.

Lifeforge (Fire + Water + Earth + Nature + Bright)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Earth, 5 dots Nature, 5 dots Bright
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Healing, Cleanse, AoE, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Warm earth, flowing water, living growth, and radiant fire knit together in the area. Every living ally in the area is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Expert. The pool lingers using the countdown mechanic: it lasts turns equal to half the mana spent, rounded up, and paying the upkeep during the Upkeep Phase freezes it. Unused points are lost when it ends. When cast, every living ally in the area also has all conditions removed.

The forge where bodies are made whole again.

Phoenix Form (Fire + Water + Nature + Bright + Shade)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Nature, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Buff, Attack, Healing, Persistent
Range: Self
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster takes the form of a great bird of light and shadow fire. While active the caster can fly with the Flight specialty, their attacks apply the Burning condition on a hit, and they add the cast successes to their BDT. Each Upkeep Phase, every living ally in a zone adjacent to the caster is given a PHP (Pool of Healing Points) equal to half the cast successes (rounded up). Healing tier: Basic. The pool lasts until the end of the target's next turn, and any unused points are lost. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Wings of fire that burn your enemies and warm your friends.

Plague Storm (Fire + Water + Air + Nature + Shade)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Air, 5 dots Nature, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Attack, Drain, AoE, Persistent
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A green-black storm of poisoned rain and dark lightning settles over the area. Each Upkeep Phase, every living target in the area must roll Fortitude + Endurance vs cast successes or take damage equal to excess successes, gain the Poisoned condition with a value equal to the cast successes, and lose mana equal to half the cast successes (rounded up). Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

A storm that does not pass. It lingers and it spreads.

Primordial Storm (Fire + Water + Air + Earth + Nature)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Air, 5 dots Earth, 5 dots Nature
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE, CC
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: Every element of the natural world strikes the area at once. Caster rolls once and every target in the area defends separately. Targets hit take damage equal to excess successes and gain the Burning, Chilled, and Rooted conditions, and are Knocked Down. Every zone in the area becomes difficult terrain. Defend: Dexterity + Dodge.

Fire, flood, wind, stone, and root, all arriving together.

Reshape the Land (Fire + Earth + Nature + Bright + Shade)

Prerequisite: 5 dots Fire, 5 dots Earth, 5 dots Nature, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Utility
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster permanently reshapes the land in the area. They may raise or lower ground by one vertical zone, create or remove difficult terrain, raise walls of stone or wood along zone borders, grow or burn away forests, and open or close pits. The changes are physical and permanent, and do not need upkeep. Any target standing where the ground moves must roll Dexterity + Acrobatics vs cast successes or be Knocked Down and take damage equal to excess successes.

The map is now a suggestion.

Rotting Caldera (Fire + Water + Earth + Nature + Shade)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Earth, 5 dots Nature, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Attack, Corrupt, Drain, AoE, Persistent
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The ground in the area cracks open into a corrupted volcanic basin. The area is difficult terrain. Each Upkeep Phase, every living target in the area must roll Fortitude + Endurance vs cast successes or take damage equal to excess successes, gain the Burning and Poisoned conditions, and lose mana equal to half the cast successes (rounded up). Undead in the area gain bonus dice equal to the cast successes on all rolls. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Fire, rot, and steam rising from a wound in the world.

Sky Citadel (Air + Earth + Nature + Bright + Shade)

Prerequisite: 5 dots Air, 5 dots Earth, 5 dots Nature, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Defense, Utility, Persistent
Range: AoE-4 (2x2 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A fortress of stone and living wood tears free of the ground and floats one vertical zone above it, held aloft by light and shadow. Allies inside or on the citadel cannot be reached by ground melee attacks, and ranged attacks and targeted spells against them lose dice equal to the cast successes. The citadel moves 1 zone in any direction during each Upkeep Phase at the caster's command. It has a Vitality pool equal to four times the cast successes. When the spell ends it settles gently to the ground. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

A hill that decided it would rather be a cloud.

Soul Lightning (Fire + Air + Nature + Bright + Shade)

Prerequisite: 5 dots Fire, 5 dots Air, 5 dots Nature, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, Drain, Utility
Range: Targeted
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A bolt of lightning that strikes the spirit rather than the flesh. On a hit, the target loses mana equal to double the excess successes. Living targets also take damage equal to excess successes. The caster may give any amount of the drained mana to allies within line of sight, split as they choose, without exceeding any ally's Mana Pool cap. Defend: Dexterity + Dodge.

It takes what they had and hands it to someone better.

Starforged Titan (Fire + Water + Earth + Bright + Shade)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Earth, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Conjuration, Persistent
Range: Any unoccupied adjacent zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster forges a towering construct of glowing metal and stone, balanced by light and shadow. It cannot act on the turn it is summoned. On later turns the caster may command it to make one attack against a target in an adjacent zone using the caster's dice pool, dealing damage to living and undead alike, or to stand guard, adding the cast successes to the BDT of every ally in its zone and adjacent zones until its next action. It has a Vitality pool equal to four times the cast successes and is immune to the Knocked Down and Rooted conditions. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

A guardian built from everything the forge can give.

Stormbreaker (Fire + Water + Air + Bright + Shade)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Air, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Utility, Counter, AoE
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A storm of opposing light and shadow tears through every working of magic in the area. Every persistent spell effect in the area whose cast successes are equal to or lower than this spell's cast successes ends immediately. Effects with higher cast successes lose successes equal to this spell's cast successes. Conjurations in the area take damage equal to the cast successes.

Where it passes, the magic of others simply comes undone.

Sunfall (Fire + Water + Air + Earth + Bright)

Prerequisite: 5 dots Fire, 5 dots Water, 5 dots Air, 5 dots Earth, 5 dots Bright
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A radiant meteor of molten stone falls on the area. Caster rolls once and every target in the area defends separately. Targets hit take damage equal to excess successes and gain the Burning condition. Undead take double damage. Living allies in the area take no damage and instead have one condition removed. The impact zone becomes difficult terrain. Defend: Dexterity + Dodge.

A piece of the sun, dropped with intent.

Veil Rain (Water + Air + Nature + Bright + Shade)

Prerequisite: 5 dots Water, 5 dots Air, 5 dots Nature, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Utility, Persistent
Range: AoE-9 (3x3 zone area), any zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A rain that hides and reveals falls across the area. For each target in the area the caster chooses veiled or revealed. Veiled targets cause ranged attacks and targeted spells against them to lose dice equal to the cast successes. Revealed targets cannot benefit from Stealth, darkness, or invisibility. The caster may change any target's choice during each Upkeep Phase. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Some are hidden in it. Some cannot hide from it.

Verdant Sanctuary (Water + Air + Earth + Nature + Bright)

Prerequisite: 5 dots Water, 5 dots Air, 5 dots Earth, 5 dots Nature, 5 dots Bright
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: Healing, Defense, AoE, Persistent
Range: AoE-9 (3x3 zone area) centered on the caster's zone
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A living garden of light, water, and stone grows across the area. Each Upkeep Phase, every living ally in

the area is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Advanced. The pool lasts until the end of the target's next turn, and any unused points are lost. Undead cannot enter the area unless they succeed on Fortitude + Endurance vs cast successes, and undead already inside gain the Exhausted condition. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

A place the dead cannot reach and the living do not want to leave.

Worldroot (Water + Earth + Nature + Bright + Shade)

Prerequisite: 5 dots Water, 5 dots Earth, 5 dots Nature, 5 dots Bright, 5 dots Shade
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: 24
Speed: Instant, Extended
Type: CC, Drain, Utility, Persistent
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A vast network of roots spreads beneath every zone the caster can see. During each Upkeep Phase the caster may target any one creature standing on the ground in sight: it must roll Strength + Athletics vs cast successes or become Rooted. Each Upkeep Phase, every Rooted living enemy loses mana equal to half the cast successes (rounded up), and the caster may give that mana to allies on the ground, without exceeding their Mana Pool caps. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

The ground itself takes a side.

Wrath of the Sun (Fire + Air + Earth + Nature + Bright)

Prerequisite: 5 dots Fire, 5 dots Air, 5 dots Earth, 5 dots Nature, 5 dots Bright
Mana Cost: 25
Upcast: 5 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE
Range: AoE-Line, extending to the edge of line of sight
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A beam of radiant lightning races across the battlefield in a straight line, glassing the ground as it goes. Every target in the line defends separately. Targets hit take damage equal to excess successes and gain the Burning condition. Undead take double damage. Every zone in the line becomes difficult terrain. Defend: Dexterity + Dodge.

A line drawn across the world in light.

Six-School Combinations

Prerequisite: 6 dots in each school. Mana cost: 36. Upkeep: 35.

Grand Restoration (Water + Air + Earth + Nature + Bright + Shade)

Prerequisite: 6 dots Water, 6 dots Air, 6 dots Earth, 6 dots Nature, 6 dots Bright, 6 dots Shade
Mana Cost: 36
Upcast: 6 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Utility, Counter, Cleanse
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster returns the battlefield to its natural state. Every spell effect in sight (terrain, walls, zones, conjurations, and conditions caused by magic) with cast successes equal to or lower than this spell's cast successes ends immediately. Effects with higher cast successes lose successes equal to this spell's cast successes. The caster chooses whether their own and their allies' effects are spared.

As though none of it had ever happened.

Heartfire Bond (Fire + Air + Earth + Nature + Bright + Shade)

Prerequisite: 6 dots Fire, 6 dots Air, 6 dots Earth, 6 dots Nature, 6 dots Bright, 6 dots Shade
Mana Cost: 36
Upcast: 6 mana per additional die or effect
Upkeep: 35
Speed: Instant, Extended
Type: Buff, Utility, Persistent
Range: Self and every ally within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The caster binds the mana of their allies into one shared fire. While active, every bound character may spend mana from any bound character's pool as if it were their own, with that character's permission. Each bound character's M/T is increased by the cast successes. If a bound character is Incapacitated, they are released from the bond. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

Many fires, one flame.

Resurrection (Fire + Water + Air + Nature + Bright + Shade)

Prerequisite: 6 dots Fire, 6 dots Water, 6 dots Air, 6 dots Nature, 6 dots Bright, 6 dots Shade
Mana Cost: 36
Upcast: 6 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Healing, Resurrection
Range: Touch
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: Can only be cast outside combat, on the body of someone who died without choosing to. The body must not be cremated or destroyed, and its mana countdown must not have reached 0. The caster needs at least as many successes as the days since death. On a success, the target returns to life with every Lethal box marked, takes 1 Sanity damage from the trauma of dying, and has 1 mana. A character who chose Blaze of Glory cannot be brought back.

Light and shadow together pull a soul back across the threshold.

Nightfall (Fire + Water + Air + Earth + Nature + Shade)

Prerequisite: 6 dots Fire, 6 dots Water, 6 dots Air, 6 dots Earth, 6 dots Nature, 6 dots Shade
Mana Cost: 36
Upcast: 6 mana per additional die or effect
Upkeep: 35
Speed: Instant, Extended
Type: Attack, Drain, AoE, Persistent
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The world goes dark and cold across every zone the caster can see. Every zone in sight becomes Darkened. Each Upkeep Phase, every living enemy in sight must roll Fortitude + Endurance vs cast successes or take damage equal to excess successes, gain the Chilled condition, and lose mana equal to the cast successes. Undead in sight gain bonus dice equal to the cast successes on all rolls. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

The sun goes out, and it is not coming back for a while.

Starfall (Fire + Water + Air + Earth + Bright + Shade)

Prerequisite: 6 dots Fire, 6 dots Water, 6 dots Air, 6 dots Earth, 6 dots Bright, 6 dots Shade
Mana Cost: 36
Upcast: 6 mana per additional die or effect
Upkeep: N/A
Speed: Instant
Type: Attack, AoE, CC
Range: All zones within line of sight
Dice Pool: Dexterity + Magic + lowest dots among combined schools

Effect: A rain of falling stars strikes every zone the caster can see. Caster rolls once and every enemy in sight defends separately. Enemies hit take damage equal to excess successes, gain the Burning condition, and are Knocked Down. Living and undead are struck alike. Every zone struck becomes difficult terrain. Defend: Dexterity + Dodge.

The sky falls, one star at a time, all at once.

Sunrise (Fire + Water + Air + Earth + Nature + Bright)

Prerequisite: 6 dots Fire, 6 dots Water, 6 dots Air, 6 dots Earth, 6 dots Nature, 6 dots Bright
Mana Cost: 36
Upcast: 6 mana per additional die or effect
Upkeep: 35
Speed: Instant, Extended
Type: Healing, Attack, AoE, Persistent
Range: All zones within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: A second dawn breaks over the battlefield. Every living ally in sight is given a PHP (Pool of Healing Points) equal to the cast successes. Healing tier: Expert. The pool lingers using the countdown mechanic: it lasts turns equal to half the mana spent, rounded up, and paying the upkeep during the Upkeep Phase freezes it. Unused points are lost when it ends. Every undead in sight takes damage equal to the cast successes and gains the Burning condition. Every Dimmed, Darkened, or Shade Magic darkness effect in sight with cast successes equal to or lower than this spell's ends.

The night ends early, and everyone can feel it.

Titan Awakening (Fire + Water + Earth + Nature + Bright + Shade)

Prerequisite: 6 dots Fire, 6 dots Water, 6 dots Earth, 6 dots Nature, 6 dots Bright, 6 dots Shade
Mana Cost: 36
Upcast: 6 mana per additional die or effect
Upkeep: 35
Speed: Instant, Extended
Type: Conjuration, Persistent
Range: Any unoccupied zone within line of sight
Dice Pool: Intelligence + Magic + lowest dots among combined schools

Effect: The land itself rises as a colossal titan of stone, root, water, and fire. It occupies a 2x2 zone area and cannot act on the turn it is summoned. On later turns the caster may command it to make one attack against every enemy in zones adjacent to it using the caster's dice pool, each defending separately, or to crush a single target for damage equal to excess successes tripled. It has a Vitality pool equal to five times the cast successes and is immune to the Knocked Down, Rooted, Burning, and Chilled conditions. Countdown: lasts turns equal to half the mana spent, rounded up. Paying the upkeep during the Upkeep Phase freezes the countdown for that turn.

The mountain stood up.

Creation Magic

Creation Magic is the single combination of all seven casting schools. It is a miracle. It is the only magic in Terrana that brings something genuinely new into existence: a being with a will of its own, a material that has never existed, a thing that remains when the magic is gone.

Prerequisite: 7 dots in Fire, Water, Air, Earth, Nature, Bright, and Shade for a single caster

Mana Cost: 49

Upcast: 7 mana per additional die or effect

Upkeep: N/A (what it creates is permanent)

Speed: Instant for a single caster, or gathered over time

Type: Creation

Range: Touch or adjacent zone

Dice Pool: Intelligence + Magic + lowest dots among combined schools

A Miracle Shared

Creation Magic does not have to come from one caster, and it does not have to be paid all at once. Throughout history it has manifested through the combined efforts of many people. A circle of mages might each play their part, one shaping the body, another the mind, another the spark that holds it together. Their mana and will build toward the same creation until it is complete.

It does not always happen on purpose. Thousands of years ago, the people of a town believed a god lived in the mountain beside them. Generation after generation, their prayers, their belief, and the ambient magic of the land gathered in that mountain until the god they imagined manifested and took up residence there. It lives there still.

Benevolent and Malevolent

Creation Magic answers whatever is poured into it. It has made benevolent beings who protect the people who imagined them, and it has made evil ones. Every daemon in existence was given life by the combined fears of people. What a people dread long enough and deeply enough can become real.

Creation Is Not Conjuration

A conjuration is mana shaped into a temporary form. It needs upkeep, it ends when the upkeep stops or the caster is Incapacitated, and it can be dispelled. Creation Magic is different. What it makes exists on its own the moment it is complete. It needs no upkeep, it does not end when its creators fall, and it cannot be dispelled, because it is no longer a spell. It is part of the world.

Autonomous Life

Creation Magic is the only way to make fully autonomous life. Soul Summoning can create an entity that follows its summoner's commands, but that entity has no will of its own. A being made through Creation Magic thinks, chooses, and acts for itself.

A created being is not bound to obey those who made it. Anyone who wants its help has to earn it, ask for it, or make a pact with it, the same as with any other autonomous being. A created being can learn and use all seven casting schools, combination magic, and anything else a person can learn. The player and the Storyteller build a created being together as a new character.

What Successes Decide

The successes behind a creation set how complex it can be:

1 to 2 successes: a simple object, material, or plant life

3 to 4 successes: a living creature with animal instincts but no will beyond them

5 to 6 successes: an autonomous being with its own mind and will

7 or more successes: an autonomous being of significant power, or a material with properties never seen before

Creation and the World

Resurrection is a separate spell (see Resurrection). Creation Magic makes something new rather than restoring what was lost.

Circle magic covers all ritual-based magical disciplines that operate outside the seven casting schools and Battle Aura. The defining rule is that circle magic cannot be used in combat. The preparation required cannot be compressed into the turn structure without losing what makes it work.

A finished circle magic item, scroll, or contract can be used at any time, including in combat. A devil carrying a pre-signed contract into a negotiation can activate it during social combat. A scroll prepared before the encounter can be read aloud during the fight. The

restriction applies to the creation and preparation of circle magic, not to the use of a finished product.

Part Three: Circle Magic

Circle magic covers all ritual-based magical disciplines that operate outside the seven casting schools and Battle Aura. The defining rule is that circle magic cannot be used in combat. The preparation required cannot be compressed into the turn structure without losing what makes it work.

A finished circle magic item, scroll, or contract can be used at any time, including in combat. A devil carrying a pre-signed contract into a negotiation can activate it during social combat. A scroll prepared before the encounter can be read aloud during the fight. The restriction applies to the creation and preparation of circle magic, not to the use of a finished product.

How Circle Magic Is Learned

Circle magic disciplines appear under Magical Knowledges on the character sheet alongside the seven casting schools. They follow the same XP cost structure. They do not follow the same seven-rank spell list format.

Each discipline has its own rules for what the practitioner can accomplish at different dot ratings, and those rules are listed under each discipline's entry.

The Disciplines of Circle Magic

Circle Magic is not a school of direct casting. It is a meta-discipline - a body of knowledge that allows a practitioner to capture, store, transfer, and reshape magical effects that other schools produce. A mage with Circle Magic dots can write what they know into the world in ways that persist beyond their own attention, and can interact with phenomena that raw casting cannot reach.

Circle Magic replaces the Magic ability in any Circle Magic roll. Where a casting school uses Intelligence + Magic + school dots, a circle of that spell uses Intelligence + Circle Magic + school dots. A Circle Magic roll that does not draw on a casting school uses Intelligence + Circle Magic. The successes from that roll are committed at the moment the circle or scroll or contract is made. They do not change after creation.

Circle Magic is learned separately from casting schools and has its own dot progression on the character sheet. A character does not need to know any particular school to study Circle Magic, but many of its disciplines only become truly powerful when combined with a deep knowledge of other schools.

The disciplines below represent the major branches of study within Circle Magic. A practitioner may pursue any combination of them. Some practitioners specialize deeply in one form; others take a broader approach.

Scroll Magic

Scroll Magic is the foundational discipline of Circle Magic and the one most practitioners learn first. A scroll is a prepared vessel for a single spell, committed at creation and released later by anyone who can provide the mana.

Creating a Scroll

To create a scroll, the caster must know the spell they wish to encode and have at least as many Circle Magic dots as the spell's rank. They draw the appropriate circle on a suitable medium - paper, cloth, stone, skin - channeling both the spell's school and the Circle Magic framework simultaneously.

The caster rolls Intelligence + Circle Magic + the spell's school dots. The successes achieved are locked into the scroll at creation. These successes serve as the spell's outcome when the scroll is later released. The caster does not roll again at release. For damage spells, the scroll's creator writes the damage type and notes the success count on the scroll itself.

Mana cost at creation: the creator spends the spell's full mana cost at the time of creation, plus 1 additional mana per Circle Magic dot involved as the framework cost.

Releasing a Scroll

Anyone holding a scroll can release it by spending the spell's mana cost from their own pool. They do not need to know the spell's school. The scroll activates using the success count locked in at creation. The scroll is consumed upon release.

A scroll cannot be released in the same turn it is drawn out. Drawing a scroll takes a standard action. Releasing it takes a standard action on the following turn.

Scroll Limits

A character can carry prepared scrolls equal to their Circle Magic dots. Scrolls kept in inventory beyond combat reach take no limit slot. A scroll created by someone else functions normally. Scrolls degrade after one month if not stored in a proper Circle Satchel (a minor magical item worth noting on equipment lists).

Divination

Divination uses Circle Magic to read information from time, place, and connection rather than imposing effects on the world. A diviner asks questions of the fabric of things.

Basic Divination

With 1-2 Circle Magic dots, a practitioner can read recent impressions from objects and places. Roll Intelligence + Circle Magic. Each success reveals one fact about the most recent significant event tied to the object or location. The scene is the minimum time frame; exact timing requires more successes.

Advanced Divination

With 3-5 dots, a practitioner can trace connections between people and objects across distances. They can ask directional questions (which way, how far) or temporal ones (when did this happen, how long ago). The difficulty scales with distance and time elapsed. A question about something that happened yesterday in the same city is trivial. A question about something that happened three decades ago in another country requires a very high success count.

Prophetic Divination

With 6-7 dots, a practitioner can look forward. Future divination is never exact. The GM provides images, sensations, and symbolic impressions rather than facts. Probability is not certainty, and the future shifts based on choices made. What a 6-dot diviner sees is the most likely outcome from the current moment forward; a 7-dot diviner sees several branching paths and their relative likelihood. Neither sees inevitability.

Future divination costs 5 mana per attempt and requires at least 30 uninterrupted minutes outside of combat.

Summoning Magic

Summoning Magic brings entities from other planes or states of being into the physical world. It is divided into two branches with different prerequisites, rules, and risks.

Fiend Summoning

Fiend Summoning calls creatures that already exist in the world. A summoner gains a fiend by catching it, making a pact with it, or buying it. When a fiend is not needed it lives in a ranch or another place where it can live happily.

Each fiend is tied to a device etched with its soul mark. The summoner carries that device and uses it to call the fiend to the battlefield from wherever it is in the world. The device can take any form, such as a ball or a coin. In the current day it is most popular to keep them on cards, and fiends are bought, sold, and traded this way. In common use these creatures are called SumMonz.

Fiends can use the five main elemental casting schools (Fire, Water, Air, Earth, and Nature) and Battle Aura.

Soul Summoning

Soul Summoning covers beings that do not fall into the fiend category. These beings live in a demi-plane or a similar place and are summoned from there. They include fey beings, undead creatures, devils, and even a completely new being of the player's own design.

A summoner can make a pact with an existing being that already has its own autonomy, such as a fey or a devil. A summoner can also create an entity of their own. Without Creation Magic that entity is not fully autonomous life. It is an entity that follows the summoner's commands.

Soul summoned beings can use all seven casting schools, including combination magic. This is the main system difference between the two branches of summoning.

The SumMonz League

Most people, even those in the SumMonz League, do not know or care about the distinction between fiends and soul summoned beings. What they do care about is that elemental creatures are affected differently by elemental attacks. A water sprite deals more damage to a fire sprite, and so on, following the Elemental Advantages.

Using Your SumMonz

Cards in Combat: Circle magic cannot be started in combat, but a card etched with a soul mark is a finished product, so you can summon from one mid-fight. Without the card you cannot summon that SumMonz.

Summoning: During either Move or Use Item phase, spend mana equal to the SumMonz's rank to call it to an empty zone next to you. It counts as using a belt item and follows the same AP costs. Calling it back to its card is free.

How Many: You can have 1 SumMonz on the field at 1 to 2 dots of Summoning Magic, 2 at 3 to 4 dots, 3 at 5 to 6, and 4 at 7. You never have to keep that many out. You can carry up to 6 cards at once.

Where They Live: Fiends you are not carrying live at a ranch or another place where they can live happily. Soul summoned beings live in the Dreeming or the Seeming and are called from there.

Commanding: A summoned SumMonz acts on your turn, and commanding it costs you no action. It moves and attacks in the same phases you do, using its own pools.

Support: You can give your SumMonz AP and mana the same way you would give them to an ally, and any healing that works on a character works on a SumMonz.

Rank Limit: A SumMonz's rank can never be raised above your Summoning Magic dots. One that outranks you, such as a gift or a fiend whose summoner died, may refuse commands. A Composure + Summoning Magic roll against its rank x2 brings it in line for the scene.

Knocked Out: A SumMonz that is Incapacitated returns to its card and cannot be summoned again until after a long rest.

Elements: Elemental Advantages apply to SumMonz exactly as they do to spells and conjurations.

SumMonz Stats

Every SumMonz is built from its rank (R), from 1 at F to 7 at S, using the same numbers as every creature in the Bestiary (Chapter 15).

Attack and Defense: 2R + 2 dice each.

Damage: a damage pool of R + 2 dice, rolled like a weapon's. Add the attack's excess successes and compare the total to the target's thresholds.

Thresholds: BDT R + 2, LDT BDT x2, ADT BDT x3.

Health: R + 2 Bashing boxes, R + 1 Lethal boxes, and R Aggravated boxes.

Mana: Pool 3R, M/T R + 1. A SumMonz pays for its own techniques from its own pool.

Movement: 1 zone per turn. A flying SumMonz moves at double.

Techniques: Up to 4, chosen from spells of a rank no higher than its own, rolled with its own Attack pool. Fiends draw from Fire, Water, Air, Earth, and Nature Magic and Battle Aura. Soul summoned beings draw from all seven casting schools and combination magic.

Evolving

While a SumMonz is on the field, you can pour more mana into it to push it into a stronger form. Forms go in order: a SumMonz has to reach its second form before its third, and its third before its fourth. Your Summoning Magic dots decide how far you can push it. This counts toward your Max Mana Per Turn, and an evolved form may rise above your Summoning Magic dots while it lasts.

Second Form (3 dots): Spend mana equal to the second form's rank. The SumMonz rises 1 rank, its stats rise to match, and it gains its form technique.

Third Form (5 dots): From its second form, spend mana equal to the third form's rank. It rises another rank, grows to fill a 2x2 zone area, and gains its third form technique.

Fourth Form (7 dots): From its third form, spend mana equal to the fourth form's rank. It rises another rank, grows to fill a 3x3 zone area, and gains its fourth form technique.

Holding a Form: An evolved form burns its own mana each Upkeep Phase: 1 for the second form, 2 for the third, and 3 for the fourth. When its mana runs out, it reverts to its first form. If you call it back and do not summon it again within 2 turns, it also reverts.

Item Circles

Summoning Magic is also the craft of calling objects. Draw a summoning circle on something you own, and you can later call it to your hand, or to an empty zone next to you, from wherever it is. Calling it costs mana equal to its size tier and counts as using a belt item. You can keep a number of items marked equal to your Summoning Magic dots, and the largest size you can call equals your dots.

Size 1: something you hold in one hand, such as a key, a dagger, or a potion.

Size 2: anything one person can carry, such as a sword, a pack, or a lute.

Size 3: something two people would carry, such as a chest or a saddle.

Size 4: a horse-sized load, such as a cart or a cannon.

Size 5: a wagon or a rowboat.

Size 6: a carriage, a small ship, or a cottage's worth of goods.

Size 7: anything, up to a ship or a whole building, within limits the Storyteller sets.

Getting and Growing SumMonz

Catching: Weaken a wild fiend until all of its Lethal boxes are filled, then press a blank card to it and roll Wisdom + Summoning Magic against its rank x2. On a success its soul mark is etched into the card. Blank cards are sold by rank and priced like any item of that rank (Chapter 14).

Pacts: A fiend or soul summoned being that can talk may agree to a pact instead. Play it out as a social scene, usually Persuasion or Diplomacy against its Composure. It will want something in return.

Buying and Trading: SumMonz cards are bought, sold, and traded like any item of their rank (Chapter 14). Whoever holds the card holds the SumMonz.

Growing: Raise a SumMonz's rank by spending XP equal to the new rank x3, never above your Summoning Magic dots. Each new rank can add one technique, up to 4.

Creating: A soul summoned being of your own design starts at rank 1 and grows the same way. Without Creation Magic it follows your commands but has no will of its own.

Starting SumMonz: A character with Summoning Magic dots at creation starts with one Rank 1 (F) SumMonz on its own card, chosen with the Storyteller, like a first partner. Every other SumMonz has to be caught, bargained for, bought, or created in play.

Starter Fiends: Giant Rat (Battle Aura), Horned Rabbit (Battle Aura), Slime (Water), Ember Kit (Fire), Cinder Newt (Fire), Puddle Frog (Water), Frost Ferret (Water), Breeze Sparrow (Air), Gust Bat (Air), Pebble Mole (Earth), Rock Tortoise (Earth), Moss Pup (Nature), Thorn Hedgehog (Nature), Scrapper Pup (Battle Aura), or Iron Beetle (Battle Aura). All are Rank F: Attack 4, Defense 4, Damage 3, BDT 3, Health 3 / 2 / 1, Mana 3, M/T 2, Move 1.

Starter Spirits: A soul summoned being can look like almost anything you imagine, using any of the seven schools, with the same Rank F stats as a fiend. Examples: Candle Wisp (Bright), Lantern Sprite (Bright), Shadow Imp (Shade), Bone Puppet (Shade), Paper Crane (Air), Teacup Ghost (Water), Haunted Doll (Shade), or Fey Sprite (Nature). Anything else is designed with your Storyteller.

Familiars: A familiar does not count toward how many SumMonz you can have on the field. With 1 dot of Familiar Bond and 1 dot of Summoning Magic, you can have your familiar and one SumMonz out together. Only your familiar gets your Familiar Bond dots.

Example: Cinder is an Ember Fox fiend (Fire and Battle Aura) of rank D (3): Attack 8, Defense 8, Damage 5, BDT 5, Health 5 / 4 / 3, Mana 9, M/T 4, Movement 1.

Summoning Cinder costs 3 mana. With 5 dots of Summoning Magic, pouring in 4 more evolves it into Blazetail (rank 4), and 5 more after that into Pyre Vixen (rank 5), who fills a 2x2 area.

Summoner's Sheet: Track up to 6 SumMonz, with all their forms, on the Summoner's Sheet at the back of this book.

Summoning Magic by Dots

Each dot keeps everything below it and adds more.

Rank 1, Core: 1 SumMonz on the field, first form only. Item Circles up to size 1.

Rank 2, Terrestrial: Still 1 on the field. Item Circles up to size 2. You sense soul marks: you know the rank of any SumMonz card or summoned creature you can see.

Rank 3, Aerial: 2 on the field. Second Form unlocks. Item Circles up to size 3.

Rank 4, Lunar: 2 on the field. Item Circles up to size 4. Swap: in one action, call one SumMonz back and send another out in its place.

Rank 5, Stellar: 3 on the field. Third Form unlocks. Item Circles up to size 5.

Rank 6, Galactic: 3 on the field. Item Circles up to size 6. Quick Recovery: an Incapacitated SumMonz can be summoned again after a short rest, not a long one.

Rank 7, Cosmic: 4 on the field. Fourth Form unlocks. Item Circles of any size, within limits the Storyteller sets.

Teleportation

Teleportation Magic uses circles drawn at both origin and destination to create an instantaneous passage between two prepared points. Unlike Shadow Step (which uses existing darkness), Teleportation Magic creates its own passage.

Paired Circles

The standard use of Teleportation requires the caster to have previously prepared a destination circle and have it active. A destination circle takes 10 minutes to inscribe, costs Circle Magic dots in mana, and persists for up to a month without maintenance. The caster keeps a resonance token - a small inscribed object - that lets them call the circle when opening the transit.

Activating a transit: roll Intelligence + Circle Magic. The transit opens on 1 success and remains open for 1 turn per success, allowing any number of willing travelers to pass through. The mana cost is 2 per Circle Magic dot. A caster may only have active destination circles equal to their Circle Magic dots at one time.

One-Way Teleportation

With 5+ Circle Magic dots, a caster can force a teleportation without a prepared destination circle, selecting any location they have personally visited and can visualize clearly. This is harder: the roll loses 2 dice, the mana cost doubles, and the transit only allows one traveler (the caster). On a failure, the teleportation does not occur and the mana is spent. On a botch (all dice fail), the transit occurs but deposits the caster somewhere adjacent to rather than at the intended destination.

Teleportation to an Unknown Location

Teleporting to a location one has never seen requires a combination of Divination and Teleportation (minimum 5 dots in Circle Magic and at least 1 success on a prior Divination roll about the location). This is extremely difficult and the margin for error is significant. This is the purview of the most experienced practitioners only.

Contract Magic

Contract Magic makes binding agreements - magical compacts with real teeth. A contract created through Circle Magic is enforced not by trust but by force. The moment both parties sign or otherwise accept the terms, the magic takes hold.

Crafting a Contract

A Circle Magic practitioner draws up a contract by scribing its terms within a circle. The terms must be specific and possible to verify. Vague language works against the writer: the magic interprets terms literally, and ambiguity is resolved against the party who drafted the contract. The caster rolls Intelligence + Circle Magic to set the contract's power level. More successes mean a tighter binding with harsher consequences for breach.

A contract must specify: the parties involved, the terms each party agrees to, the duration, and the consequence for breach. The consequence for breach must be proportionate in some form - a contract cannot specify death for a minor obligation, though what counts as proportionate is a matter for the GM and the players to navigate.

Signing and Activation

A contract activates the moment all named parties have accepted its terms. Acceptance can be a signature, a spoken agreement in the circle's presence, or any other clear act of consent. Coerced signatures are valid but contested: a party who signed under direct magical compulsion may challenge the contract before a higher power (a guild, a court, a more powerful Circle mage).

Once activated, the contract is a persistent magical effect. Both parties feel its presence as a faint but unmistakable sensation whenever they take an action that might be relevant to the terms.

Breach and Consequences

If a party breaches the terms of an active contract, the magic triggers. Mild contracts impose conditions (Disadvantaged on relevant rolls, recurring minor damage). Strong contracts (created by high-success casters) can be genuinely dangerous - the breaching party may take Lethal or even Aggravated damage, lose mana, or suffer persistent conditions until the breach is resolved. The magic does not care about intent; it cares about the letter of the terms.

A contract can be dissolved by mutual consent of all parties. It can also be broken by destroying the physical medium on which it was written, though this requires more successes on a Circle Magic roll than were used to create it.

Devil Contracts

Devil contracts are a specific and particularly binding form of Contract Magic. A contract with a devil follows all the rules above but adds several complications. Devils negotiate their terms very carefully and always seek the version of events most favorable to their interpretation. They will not sign a contract they cannot fulfill, but they will sign contracts designed to make fulfillment advantageous on their terms.

A devil that breaches its contract suffers consequences in proportion to the breach, as with any contract, but these consequences extend to their standing in their home plane. Devils take contract obligations seriously for this reason.

A human party that breaches a devil contract typically suffers worse consequences than a comparable mundane contract would impose, because devils draft their contracts with that asymmetry built in. Reading every clause carefully before signing is not just good advice - it is a survival skill.

Binding Rituals

Binding Rituals use Circle Magic to affix magical effects, spirits, or entities to objects, locations, or thresholds. Unlike contracts, bindings do not require consent from the target. They are imposed by force or prepared in advance.

Object Binding

An object can be bound with any spell effect the caster knows. The object stores the effect until a trigger condition is met. The trigger must be specific and detectable: "when touched by a person not carrying my resonance token," "when this seal is broken," "when someone speaks the word carved on the lid." Abstract triggers do not work.

Binding an effect to an object requires the caster to have both the spell and at least Circle Magic dots equal to the spell's rank. They cast the spell into the object rather than into the world, rolling Intelligence + Circle Magic + the spell's school dots. The successes are stored with the binding. The bound effect can trigger once (expendable binding) or repeatedly at the cost of a mana charge per trigger (persistent binding, which requires the object to have a mana reservoir).

Location Binding

A location can be bound with effects that trigger on entry, exit, or condition. Location bindings are used to create traps, wards, and persistent environmental effects. A Zone-scale location binding covers one zone. Larger areas require higher Circle Magic dots and proportionally more successes.

Location bindings persist for a month per Circle Magic dot used in the creation. A permanent location binding requires at least 6 Circle Magic dots and a very high success count. Permanent bindings are rare and usually notable features of the places that contain them.

Entity Binding

Entity binding captures an entity and forces it into an object or location. It requires a contest between the binder's Circle Magic roll and the entity's resistance and costs 5 mana per Circle Magic dot.

Once bound, the entity is contained. It is aware of its imprisonment. It retains its personality and goals. This is worth remembering when dealing with pacted creatures who were bound rather than persuaded.

Ward Magic

Wards are protective or alerting circles placed on zones, objects, or thresholds. They are a specialized subset of location bindings focused specifically on detecting intrusion, deflecting effects, or creating contained areas of magical influence.

Alert Wards

An alert ward triggers silently and notifies the creator when a condition is met. The notification is a mental impression - a directional sense of activation, the general nature of what triggered it, and a rough sense of distance. Alert wards do not require high success counts; even 1 success on the creation roll produces a functional ward. Higher successes give more precise information on trigger.

Alert wards cost 1 mana per Circle Magic dot to create and persist for a week per success.

Defensive Wards

A defensive ward interposes itself between a protected zone or object and incoming magical effects. When a spell targets something inside a defensive ward, the ward's creation successes act as a resistance DT against that spell. The ward absorbs hits by losing successes; when reduced to 0, it breaks.

Defensive wards cost 3 mana per Circle Magic dot to create. They persist until broken or until a month has passed. They can be recharged by spending mana equal to their original creation cost, which restores their success pool.

Exclusion Wards

An exclusion ward creates an invisible line that certain types of entities or effects cannot cross. A ward against undead, against fey, against fire effects, or against a specific named entity requires the caster to have at least as many Circle Magic dots as the category's power level. Low-level undead can be warded off by a 2-dot exclusion; a named ancient vampire requires 6+.

Exclusion wards do not damage entities; they simply prevent passage. A powerful enough entity can push through an exclusion ward by spending Willpower and succeeding on a contested roll against the ward's creation successes.

Augmentation

Augmentation is the circle magic of building magic into weapons so that their attacks can carry it. A weapon can only receive an augmentation if its description lists an augment slot.

An augmentation can be made from any of the seven casting magics, or even from other circle magics. Using an augmentation during an attack still requires spending mana. Each augmentation has its own parameters, set when it is made, that determine what it can and cannot do. An augmented attack follows the same mana assignment rules as any attack carrying a school's energy (see Imbuing Attacks).

Spatial Magic

Spatial Magic folds space so that a container holds far more than its outside size should allow. It is used most often to make magical storage implements: bags, chests, pouches, rings, and similar items.

Storage is counted per kind of object. The strength of the design, set by the Circle Magic dots put into it, decides how many of each kind of object it can hold. Each dot doubles the amount:

1 dot: 1 of each kind of object

2 dots: 2 of each kind of object

3 dots: 4 of each kind of object

4 dots: 8 of each kind of object

5 dots: 16 of each kind of object

6 dots: 32 of each kind of object

7 dots: 64 of each kind of object

A storage implement made at 3 dots can hold 4 swords, 4 potions, 4 loaves of bread, and 4 of every other kind of object at the same time. The creator chooses the strength of the design, up to their own Circle Magic dots.

Time Magic

Time Magic is the deepest and most demanding branch of Circle Magic. It is not fully expressible within the conventional dot scale, and serious time magic lies beyond what any practitioner currently active has reliably achieved. However, it is an area of active study, and the foundations are accessible.

Minor Temporal Effects (4-5 dots)

A practitioner with 4-5 Circle Magic dots can produce minor temporal effects: slowing or accelerating the passage of time within a small object (aging a fruit, preserving a body, slowing the burning of a candle). These effects do not affect living creatures and do not change the past or future. They manipulate the rate at which time passes for inert things within a prepared circle.

Temporal Stasis (6 dots)

At 6 Circle Magic dots, a practitioner can create a Temporal Stasis circle that suspends time within a small zone or object entirely. Anything inside the circle stops aging, stops changing, stops experiencing duration. The effect persists until the circle is broken. This is used to preserve things perfectly: wounds, artifacts, living creatures placed voluntarily inside. A creature placed in stasis does not experience the time that passes while stasis is active.

Temporal Stasis cost: 10 mana to create, 2 mana per day to maintain for a persistent circle. Breaking a stasis circle (from outside) requires meeting or exceeding its creation successes on a Circle Magic roll.

Temporal Observation (7 dots)

At 7 Circle Magic dots, a practitioner can observe the past of a specific location - not through Divination's impressions, but through direct temporal viewing. They see events as they occurred, with clarity proportional to success count and proximity to the present. One success per decade of distance is the rough scale.

Temporal Observation cannot change the past. It does not allow communication with the past. It is purely a window. The practitioner sees and hears; they cannot interact.

True Time Manipulation (Beyond 7 Dots)

The ability to directly alter past events, travel through time, or bring future states into the present is theoretically within the reach of Circle Magic but lies beyond the standard dot scale. Whether such a thing is truly possible - and what it would cost - remains one of the open questions in the magical world. Practitioners who pursue this path report that the circles required are of extraordinary complexity, the mana costs staggering, and the philosophical implications not easily survived.

If a player wishes to pursue time travel as a long-term goal for their character, discuss with your GM. It is a valid aspiration. The path to it is not charted here because it has not yet been charted at all.

Circle Magic and Combat

No circle magic can be initiated during combat. Any technique that requires setup, preparation, drawn lines, or spoken incantation taking longer than one instant cannot be started once initiative has been called. A practitioner who was mid-ritual when combat begins has their ritual interrupted unless the Storyteller rules otherwise.

The exception is finished products. A scroll, contract, ward trigger, or bound item that was completed before the fight started can be activated as normal. Activating a finished product follows the product's own rules for speed and cost, not the rules for ritual preparation.

Chapter 14: Equipment and Items

In This Chapter

The Basics **262**
Introduction 262
Money 262

Loot **270**
Rolling for Loot 270
Loot Rank 270
What You Found 270
Bonus Tables 271
Artifact Quirks 273

Gear does not make the adventurer, but it helps. This chapter covers what things cost, what you can carry into a fight, the weapons and armor of modern Terrana, the everyday tools and magic that fill a delver's pack, and the tables a Storyteller rolls on when a party finds something worth keeping.

The weapons and prices here describe modern Terrana. Games set in the distant past, a fallen future, or the space era change what is available and what it costs (Chapter 16).

Money

Monsera's influence has standardized currency across the major trade routes. Coins are the everyday money of Terrana, and mana crystals of matching value change hands just as freely, since every implement in the world runs on them. The values in our world's dollars are only a guide for the table.

Exchange Rate

Coin	Value (USD)	Mana Crystal Equivalent	Used For
Small Copper	$0.10	Mana Crystal Dust	Minor daily items
Large Copper	$1.00	Mana Crystal Shards	Standard daily goods
Small Silver	$10.00	Small Mana Crystals	Modest gear and services
Large Silver	$100.00	Mana Crystals	High-end equipment and weapons
Small Gold	$1,000.00	Large Mana Crystals	Rare artifacts and property
Large Gold	$10,000.00	Huge Mana Crystals	Major investments
King's Gold	$100,000.00	None	State-level transfers only

Every character starts with 1 free dot of Resources (Chapter 10), and Resources sets your lifestyle and income. Money on hand is tracked separately: write your current funds next to Resources on your sheet and keep it up to date as you earn and spend.

Cost of Living

Resources	Lifestyle	Per Day	What It Looks Like
0	Poor	2 Large Copper	A hostel bunk, plain food, and not much else
1	Modest	3 Small Silver	A one-bedroom apartment or a dorm room, simple meals, the basics covered
2	Comfortable	6 Small Silver	A nice apartment, eating well, a little left over for fun
3	Well-Off	1 Large Silver	Middle class: a house or a large apartment, a vehicle, and some savings
4	Prosperous	2 Large Silver	Upper middle class: a fine home, good food, and few money worries
5	Wealthy	1 Small Gold	A grand home, staff, and the best of most things
6	Lavish	3 Small Gold	Estates and luxury without thinking about the cost
7	Royal	Whatever the crown pays	Functionally a monarch. A placeholder; players cannot start this high

Resources and Money

Starting Funds is the money your character has when play begins. Poor (0 dots) is here for examples and for alternate era games.

Dots	Monthly Income	Starting Funds	Who This Is
0	None	5 Large Copper	Getting by on odd jobs
1	1 Small Gold	3 Large Silver	A working person living modestly
2	3 Small Gold	1 Small Gold	A skilled professional or a successful delver
3	6 Small Gold	2 Small Gold	Middle class
4	1 Large Gold	3 Small Gold	Upper middle class: a business owner or a top professional
5	5 Large Gold	2 Large Gold	Wealthy: generational wealth or a major business
6	1 King's Gold or more	3 Large Gold	One of the richest people in a nation
7	A kingdom's treasury	As much as the scene needs	Functionally a king

Item Ratings and Prices

Every weapon, piece of armor, tool, and magic item has a Rating from 1 to 7, matching the same F through S ranks used everywhere else. A Rating adds to the rolls the item is made for: a weapon's Rating adds to its damage, armor's Rating adds to your BDT, and a set of lockpicks adds its Rating to Sleight of Hand rolls to open a lock.

Weapons and Armor: A weapon or a piece of armor gets its Rating from its rank alone: F rank is +1, E is +2, D is +3, C is +4, B is +5, A is +6, and S is +7. A rusty F rank greatsword and an F rank dagger both add 1 to damage; what makes the greatsword different is its damage Attribute, its properties, and the Style it uses. Ordinary store-bought weapons and armor are usually F or E rank. A rank and S rank pieces are true masterworks, rarely seen and almost never for sale.

Other Items: Tools, rings, and other gear also have a rank, but their bonuses are usually smaller than a weapon's, as listed in their entries and on the loot tables.

Prices by Rating

Rating	Rank	Typical Price	Example
1	F	2 to 9 Large Copper	A plain knife or a store-bought sword, a bedroll
2	E	1 to 9 Small Silver	A well-made weapon, a leather jacket, a climbing kit
3	D	1 to 9 Large Silver	A fine weapon, a chain shirt, a CCN crystal
4	C	1 to 9 Small Gold	An expert's weapon, tactical armor, a minor magic ring
5	B	1 to 9 Large Gold	A master's weapon, full plate, a crystal-engine car
6	A	1 to 9 King's Gold	A famous blade, enchanted plate, a small airship
7	S	Rarely for sale	Legendary arms, unique artifacts

Carrying Gear

Equipment Slots: Your sheet has a slot for each place you can wear or hold something: Headgear, Torso, Left Arm, Right Arm, Legs, Footwear, Main Weapon, Side Arm, Alt Weapons, and Stowed Items. Gloves, bracers, and rings go on the arm they are worn on; paired items go on both arms.

Weapons: You can carry at most 3 weapons and wield at most 2 at once. Swapping to an alt weapon costs 1 AP or your attack action that turn.

The Belt: Before combat, set up to 3 items on your belt for quick use. The first belt item you use in a turn is free, the second costs 1 AP, and the third costs 2 more AP, so using all three in one turn costs 3 AP. Items are used during the Move or Use Item phases; moving and using an item in the same phase costs AP.

Belt Slots 4 to 7: Extra belt slots open only when an item or ability grants them, such as Quickcut's Hidden Steel or Windreader's Quiver Belt, each of which opens slot 4 for one kind of item.

Stowed Items: Anything not worn, wielded, or on your belt is stowed. Retrieving a stowed item costs 1 AP or your attack action.

Weapons

How Weapons Work

Attack: Your attack roll is the Attribute + Ability + Combat Style listed for the weapon's Style (Chapter 12). Without the Style, roll the Attribute + Ability alone.

Damage: Your damage pool is the weapon's damage Attribute + its Rating, which comes from its rank (+1 at F up to +7 at S). Add the attack's excess successes and compare the total to the target's BDT, LDT, and ADT.

Damage Attribute: Each weapon lists the Attribute that drives its damage. Most use Strength or Dexterity, and firearms and bows use Perception, but some weapons use another Attribute entirely: a whip that works by trickery might use Manipulation, and a focus weapon might use Intelligence.

Range: Melee weapons hit adjacent zones, or one zone farther with the Reach property. Thrown weapons and objects can be thrown accurately up to double your Strength in zones, fewer for large or heavy things (Storyteller's call). Bows, guns, and ranged spells have no set range: they can hit anywhere on the battlefield you have line of sight to.

Line of Sight and Cover: Draw a straight line from the center of your square to the center of the target's square. If it passes through both the front and the back of the square the target is hiding behind, the target has full cover and cannot be hit. If it only crosses a side and the back of that square, or a corner, the target has half cover: -2 dice to the attack. Otherwise the shot is clear.

AP: Most weapons attack with your normal attack action. A weapon with an AP cost needs that much AP spent on top of the attack.

Properties

Concealable: Small enough to hide easily. +2 dice to keep it hidden when searched.

Light: Can be wielded in your off hand alongside another weapon.

Loud: Firing it gives away your position, even if you are hidden.

Mounted: Must be braced, set on a stand, or fired from a vehicle. You cannot move in a turn you fire it.

Reload (X): After X attacks, spend 1 AP or your attack action to reload.

Reach: Can hit a target one zone farther than adjacent.

Thrown: Can be thrown up to double your Strength in zones, using the Style's Primary pool.

Two-Handed: Needs both hands. You cannot hold a shield or a second weapon.

Versatile: Can be used one-handed or two-handed. With Silver Arc's Versatile Grip, two-handed adds half your dots to damage.

Quickcut Weapons (Short Blades)

Weapon	Damage	Range	AP	Properties
Work knife or skinning knife	Dexterity	Adjacent	0	Concealable, Light, Thrown
Dagger	Dexterity	Adjacent	0	Concealable, Light, Thrown
Stiletto	Dexterity	Adjacent	0	Concealable, Light
Throwing knives (set of 3)	Dexterity	Thrown	0	Concealable, Thrown
Short sword	Dexterity	Adjacent	0	Light

Silver Arc Weapons (Long Blades)

Weapon	Damage	Range	AP	Properties
Rapier	Dexterity	Adjacent	0	None
Saber	Dexterity	Adjacent	0	None
Longsword or katana	Dexterity	Adjacent	0	Versatile
Broadsword	Strength	Adjacent	0	Versatile
Greatsword	Strength	Adjacent	0	Two-Handed

Timberfall Weapons (Axes)

Weapon	Damage	Range	AP	Properties
Hatchet or hand axe	Strength	Adjacent	0	Light, Thrown
Battle axe	Strength	Adjacent	0	Versatile
Bearded axe	Strength	Adjacent	0	Versatile
Greataxe	Strength	Adjacent	0	Two-Handed

Heron's Reach Weapons (Polearms)

Weapon	Damage	Range	AP	Properties
Quarterstaff	Strength	Adjacent	0	Reach, Two-Handed
Spear	Strength	Adjacent	0	Versatile, Thrown
Trident	Strength	Adjacent	0	Versatile, Thrown
Naginata or glaive	Dexterity	Adjacent	0	Reach, Two-Handed
Halberd or pike	Strength	Adjacent	0	Reach, Two-Handed

Wallguard Weapons (Shields)

Weapon	Damage	Range	AP	Properties
Buckler bash	Strength	Adjacent	0	Light
Round shield bash	Strength	Adjacent	0	None
Kite shield bash	Strength	Adjacent	0	None
Tower shield bash	Strength	Adjacent	0	None

Ten Count and Drifting Leaf Weapons (Unarmed)

Weapon	Damage	Range	AP	Properties
Bare fists or feet	Strength or Dexterity	Adjacent	0	No Rating unless worn gear adds one
Hand wraps	Strength or Dexterity	Adjacent	0	Concealable
Gloves or knuckle-dusters	Strength	Adjacent	0	Concealable
Cestus	Strength	Adjacent	0	None

Main Event Weapons (Wrestling and Improvised)

Weapon	Damage	Range	AP	Properties
Grapples and slams	Strength	Adjacent	0	No Rating; uses the Style's techniques
Bottle, chair, or ladder	Strength	Adjacent	0	Breaks after a scene; Steel Chair adds half your dots
Table or heavy furniture	Strength	Adjacent	1	Two-Handed

Windreader Weapons (Bows)

Weapon	Damage	Range	AP	Properties
Shortbow	Perception	Line of sight	0	Two-Handed
Recurve bow	Perception	Line of sight	0	Two-Handed
Longbow	Perception	Line of sight	0	Two-Handed
Hand crossbow	Perception	Line of sight	0	Reload (1)
Crossbow	Perception	Line of sight	0	Two-Handed, Reload (1)

Sundown Weapons (Hand Guns)

Weapon	Damage	Range	AP	Properties
Derringer	Perception	Line of sight	0	Concealable, Loud, Reload (2)
Flintlock pistol	Perception	Line of sight	0	Loud, Reload (1)
Pistol	Perception	Line of sight	0	Loud, Reload (12)
Revolver	Perception	Line of sight	0	Loud, Reload (6)

Iron Rain Weapons (Large Guns)

Weapon	Damage	Range	AP	Properties
Musket	Perception	Line of sight	0	Two-Handed, Loud, Reload (1)
Shotgun	Perception	Line of sight	0	Two-Handed, Loud, Reload (6)
Rifle	Perception	Line of sight	0	Two-Handed, Loud, Reload (10)
Machine gun	Perception	Line of sight	1	Two-Handed, Loud, Mounted, Reload (30)
Cannon	Perception	Line of sight	2	Loud, Mounted, Reload (1); needs a crew of 3 without One-Man Battery

Other Weapons

Weapon	Damage	Range	AP	Properties
Whip	Manipulation	Adjacent	0	Reach; uses Melee, no Style
Club or baton	Strength	Adjacent	0	Concealable
Sling	Perception	Line of sight	0	Uses Ranged; no Style

A mage's focus is a weapon for spells. Like a weapon's Rating, a focus adds +1 at F up to +7 at S to the damage of spells from the school it boosts, and the Rating comes from its rank. You still pay each spell's full mana cost. Each focus names its school, such as Tidecaller's Wand (C rank): +4 Water Magic. Rare ones boost two or more schools. A focus only boosts the casting roll itself when its entry says so, and some powerful ones hold a specific spell you can cast without mana or by spending a stored charge. Foci are artifacts, not implements.

Mage's Foci

Focus	Hands	Melee Damage	Properties
Wand	One	None	Light, Concealable; boosts one school
Rod or scepter	One	Strength (as a club)	Boosts one school
Orb or crystal	One	None	Light; boosts one school
Tome or grimoire	One	None	Boosts one school
Mage staff	Two	Strength (as a quarterstaff)	Reach, Two-Handed; boosts one school

Armor

Only armor worn on the body and the head adds to your Armor, and your Armor is added to your BDT (Fortitude + Armor). Arms, legs, rings, gloves, boots, and the like give other properties instead, such as bonus dice or bonus ability dots, and the most expensive pieces can even grant attribute dots.

Armor Rating: Like weapons, armor gets its Rating from its rank: F +1 up to S +7.

Armor Classes: The class decides which ranks a piece can come in. Light armor runs from F to D (Armor 1 to 3), Medium from D to B (3 to 5), and Heavy from B to S (5 to 7).

Who Can Wear What: Your Physical column limits what you can wear. Aversion: Light armor only. Standard: Light or Medium. Affinity: any armor. The same limit applies to shields.

Helmets: A helmet adds 1 Armor; a full helm adds 2, but only with Heavy body armor.

Magic and Armor: Armor can be enchanted for added effects, but only rarely to add more Armor. Points added by magic count as the magic part of your BDT, which Magic Penetration can ignore.

Body Armor

Armor	Class	Ranks	Armor	Notes
Padded clothing or a heavy coat	Light	F to D	1 to 3	Passes for everyday clothes
Leather jacket or leathers	Light	F to D	1 to 3	The classic delver look
Brigandine or reinforced leather	Light	F to D	1 to 3	Quiet; no penalty to Stealth
Chain shirt	Medium	D to B	3 to 5	Worn under a coat
Tactical vest or scale	Medium	D to B	3 to 5	Modern or traditional protection
Half plate or tactical armor	Medium	D to B	3 to 5	Hard plates over vital areas
Splint or lamellar	Heavy	B to S	5 to 7	Heavy, loud, and reliable
Full plate	Heavy	B to S	5 to 7	A knight's armor
Crystal-powered plate	Heavy	B to S	5 to 7	Modern heavy armor; A and S rank pieces are almost never for sale

Shields

Shield	Class	Armor Bonus	Notes
Buckler	Light	+1	Leaves the hand mostly free
Round shield	Light	+1	Easy to carry and throw
Kite shield	Medium	+2	Covers most of the body
Tower shield	Heavy	+3	A wall you carry

Gear and Supplies

Tools add their Rating to the rolls they are made for. Prices are typical for modern Monsera and vary by place and Storyteller.

Gear and Supplies

Item	Rating	Price	What It Does
Backpack or satchel	1	5 Large Copper	Carries your stowed items
Bedroll and tent	1	9 Large Copper	Shelter for a long rest outdoors
Rations (one week)	1	4 Small Silver	Food that keeps
Rope and grappling hook	1	6 Large Copper	+1 to Athletics rolls to climb
Climbing kit	2	4 Small Silver	+2 to Athletics rolls to climb
Lockpicks	2	3 Small Silver	+2 to Sleight of Hand rolls to open locks
Disguise kit	2	5 Small Silver	+2 to Chicanery rolls to disguise yourself
Medical kit	2	6 Small Silver	+2 to Survival or Crafts rolls to treat wounds outside combat
Field tools (any trade)	2	5 Small Silver	+2 to Crafts rolls for that trade
Binoculars or spyglass	2	4 Small Silver	+2 to Awareness rolls at a distance
Lamp implement	1	3 Small Silver	Light that never needs oil; runs on mana crystal dust
CCN crystal (phone)	2	2 Large Silver	Calls, messages, maps, and the CCN anywhere with signal
Spatial pouch	3	4 Large Silver	Holds twice as much of one kind of object (Spatial Magic 1)
Spatial pack	5	3 Large Gold	Holds sixteen times as much of one kind of object (Spatial Magic 5)

Potions and Mana Crystals

Healing comes only from combination magic, so a healing potion is a small implement: a combination healing spell bottled by a circle mage. Drinking one is a belt item. It gives you a PHP (Pool of Healing Points) at its healing tier that lasts until the end of your next turn (Chapter 13).

Mana crystals hold mana. Besides serving as money, a crystal can be used as a belt item to recover mana equal to its size, which uses it up. Recovery never takes you above your Mana Pool.

Potions and Mana Crystals

Item	Rating	Price	Effect
Minor healing potion	1	5 Large Copper	PHP 3, Basic healing
Healing potion	3	5 Large Silver	PHP 3, Advanced healing
Greater healing potion	5	5 Large Gold	PHP 3, Expert healing
Antidote	2	3 Small Silver	Ends the Poisoned condition
Small Mana Crystal	1	1 Small Silver	Recover 1 mana
Mana Crystal	2	1 Large Silver	Recover 2 mana
Large Mana Crystal	4	1 Small Gold	Recover 4 mana
Huge Mana Crystal	5	1 Large Gold	Recover 8 mana

Vehicles and Mounts

Driving and Riding: Vehicles use the Pilot ability and living mounts use Ride. A vehicle or mount's Rating adds to those rolls, and its Speed is how many zones it moves per turn in combat.

Flight: Anything that flies moves at double its normal movement. Mechanical flight (airships, flying cars, and other machines) must use all of its movement every turn or begin to fall.

Vehicle Armor: People inside a closed vehicle add its Armor to their BDT against attacks from outside.

Vehicles and Mounts

Vehicle or Mount	Rating	Speed	Armor	Price
Riding horse or runner lizard	2	4	0	5 Large Silver
War mount	3	4	1	3 Small Gold
Crystal-engine motorcycle	3	6	0	4 Small Gold
Crystal-engine car	4	5	2	2 Large Gold
Small boat	2	3	1	2 Small Gold
Sailing ship	4	4	3	5 Large Gold
Skiff (small airship)	5	6 (flying, double)	2	3 King's Gold

Magic Items

Magic items come in two kinds: implements and artifacts. The difference is whether someone designed the magic or the world put it there.

Implements

An implement is made on purpose to produce a specific effect, usually with circle magic. Implements are part of everyday life in Terrana: microwaves, fridges, lamps that never need oil, and storage pouches made with Spatial Magic are all implements. In games set in the future or in space, replicators and similar devices are implements too.

An implement does what it was designed to do. Its effect is known, repeatable, and the same every time. Using one costs mana each time, but it never needs attunement.

Artifacts

An artifact is an item that spent time somewhere with a high density of mana, such as a dungeon, and soaked up random magical abilities. Any item can become an artifact this way, from an ordinary object to an implement. No one designs an artifact's abilities, and two artifacts that started as the same item can end up nothing alike.

Attunement: To use an artifact you must attune to it, which holds part of your Max Mana Per Turn equal to its Rating for as long as you stay attuned. Once attuned, it needs no further mana to use.

Augmentations

An augmentation is a magical or mechanical enhancement built into the body or into a weapon with an augment slot, made with the Augmentation circle magic (Chapter 13). Body augmentations work like a natural limb while attuned and hold M/T equal to their Rating. Arcane Enhancements bought as Merits (Chapter 9) work differently and lower M/T permanently.

Spells Held in Items

A spell held in an implement or artifact, including a combination spell, does not require the user to meet its dot prerequisites. The item has the required dots built in; the user simply provides the mana.

Loot

Rolling for Loot

When a party finds treasure, the Storyteller can choose it or roll for it. Rolling takes three steps:

1. Loot Rank: Roll a d10 on the Loot Rank table for where the party is. This sets the item's rank, F through S.

2. What You Found: Roll a d100 to see what kind of item it is.

3. Bonus: Roll a d10 on the Bonus table for the item's rank. Where a bonus says "an ability" or "an attribute," roll on the Which Ability or Which Attribute table, or pick one that fits the item.

A weapon or armor gets its Rating from its rank (F +1 to S +7), and the bonus table adds something extra on top. Coin, potions, and crystals skip step 3. An item of B rank or higher, or any item found deep in a dungeon, may also roll on Artifact Quirks.

Loot Rank

Where	F	E	D	C	B	A	S
Floors 1 to 10, or ordinary places	1 to 6	7 to 9	10	None	None	None	None
Floors 11 to 30	1 to 3	4 to 7	8 to 9	10	None	None	None
Floors 31 to 50	1	2 to 4	5 to 8	9 to 10	None	None	None
Floors 51 to 70	None	1 to 2	3 to 5	6 to 8	9 to 10	None	None
Floors 71 to 90	None	None	1 to 2	3 to 5	6 to 8	9 to 10	None
Floors 91 to 100, or legendary places	None	None	None	1 to 3	4 to 7	8 to 9	10

What You Found (d100)

d100	Item	d100	Item
01 to 08	Coin pouch (rank x 1 d10 in the coin of that rank)	51 to 54	Body armor
09 to 12	Mana crystals (rank decides the size)	55 to 57	Helmet
13 to 18	Healing potion (F to D minor, C and B healing, A and S greater)	58 to 60	Shield
19 to 21	Short blade	61 to 64	Ring
22 to 24	Long blade	65 to 67	Gloves or bracers
25 to 26	Axe	68 to 70	Boots
27 to 28	Polearm	71 to 73	Cloak or coat
29 to 30	Fist weapon	74 to 76	Amulet or necklace
31 to 33	Bow or crossbow	77 to 78	Belt (opens a belt slot)
34 to 35	Hand gun	79 to 81	Tool kit
36 to 37	Large gun	82 to 85	Implement (useful device)
38 to 39	Mage's focus (boosts the school that fits the place)	86 to 88	Spell scroll (a spell of that rank)
40 to 41	Thrown weapons	89 to 91	Spatial pouch or pack
42 to 45	Antidotes or supplies	92 to 95	Jewelry or art (worth a coin of that rank)
46 to 50	Trade goods or monster parts	96 to 00	Artifact (roll a bonus and an Artifact Quirk)

F Rank Bonuses (d10)

d10	Bonus
1	+1 die to rolls with one ability
2	+1 die to rolls with one ability
3	+1 die to this weapon's attack rolls, or +1 die to resist one kind of attack while wearing this armor
4	+1 die to rolls with one ability, in one situation (for example, Stealth at night)
5	+1 die to resist one condition (Burning, Chilled, Poisoned, or Bleeding)
6	+1 die to Initiative
7	+1 die to rolls with one ability
8	Never dulls, rusts, or wears out
9	Glows softly on command (no mana)
10	+1 die to rolls with one ability, plus roll again on this table

E Rank Bonuses (d10)

d10	Bonus
1	+1 dot to one ability (can exceed your normal maximum by 1)
2	+1 die to rolls with two abilities
3	A free specialty on one ability while you carry it
4	+1 die to this weapon's attack rolls, or +1 die to Dodge rolls while wearing this armor
5	+1 to Max Mana Per Turn
6	+1 die to rolls with one ability and to resist one condition
7	+1 die to Initiative and to Awareness rolls
8	+1 dot to one ability
9	Opens belt slot 4 for one kind of item
10	+1 dot to one ability, plus roll again on the F table

D Rank Bonuses (d10)

d10	Bonus
1	+2 dots to one ability
2	+1 dot to two abilities
3	+1 die to all rolls with one ability group
4	+2 to Max Mana Per Turn
5	+2 dice to this weapon's attack rolls, or +2 dice to resist one condition
6	Holds a rank 1 or 2 spell (the user provides the mana)
7	Immune to one condition
8	+1 movement zone per turn
9	+2 dots to one ability
10	+1 dot to two abilities, plus roll again on the E table

C Rank Bonuses (d10)

d10	Bonus
1	+1 dot to one attribute
2	+3 dots to one ability
3	+2 dots to two abilities
4	+1 attribute dot, but only in one situation (for example, Strength while grappling)
5	+3 to your Mana Pool and +1 Max Mana Per Turn
6	Holds a rank 3 spell
7	+1 attribute dot
8	Armor Penetration or Magic Penetration 2 on this weapon
9	+1 Armor from magic
10	+1 attribute dot, plus roll again on the D table

B Rank Bonuses (d10)

d10	Bonus
1	+1 attribute dot and a minor magical effect (light, warmth, water breathing, or similar)
2	+1 attribute dot and +2 dots to one ability
3	+2 dots to three abilities
4	Holds a rank 4 spell
5	+1 attribute dot
6	+5 to your Mana Pool and +2 Max Mana Per Turn
7	Armor Penetration and Magic Penetration 3 on this weapon
8	+1 attribute dot and immunity to one condition
9	+2 Armor from magic
10	+1 attribute dot, plus roll again on the C table

A Rank Bonuses (d10)

d10	Bonus
1	+2 attribute dots (one attribute, or two attributes at +1)
2	Holds a rank 5 spell, or a two-school combination spell
3	+2 attribute dots
4	+1 attribute dot and +3 dots to one ability
5	+3 Max Mana Per Turn and +8 to your Mana Pool
6	This weapon's hits count as meeting the next-higher damage threshold once per scene
7	+2 attribute dots
8	Flight at double movement while worn (holds M/T equal to its Rating)
9	Holds a rank 6 spell
10	+2 attribute dots, plus roll again on the B table

S Rank Bonuses (d10)

d10	Bonus
1	+3 attribute dots, split as you like
2	+2 attribute dots and a unique power designed with the Storyteller
3	Holds a rank 7 spell or a three-school combination spell
4	+3 attribute dots
5	+2 attribute dots and full Armor Penetration on this weapon
6	A unique power designed with the Storyteller
7	+2 attribute dots and +4 Max Mana Per Turn
8	+3 attribute dots
9	Holds a four-school combination spell
10	A unique power designed with the Storyteller, plus roll again on the A table

Which Ability (d6, then d10)

Roll a d6 to pick the row, then a d10 to pick the ability in that row.

d6	Group	d10: 1 to 2	3 to 4	5 to 6	7 to 8	9 to 10
1	Warrior	Athletics	Endurance	Martial Arts	Melee	Ranged
2	Rogue	Acrobatics	Chicanery	Dodge	Sleight of Hand	Stealth
3	Troubadour	Expression	Performance	Presence	Persuasion	Subterfuge
4	Noble	Commerce	Diplomacy	Etiquette	Pilot	Ride
5	Mage	Alchemy	Attunement	Circle Magic	Implements	Magic
6	Sage	Artifacts	Awareness	Crafts	Insight	Survival

Which Attribute (d10)

d10	Attribute	d10	Attribute
1	Strength	6	Composure
2	Dexterity	7	Intelligence
3	Fortitude	8	Perception
4	Charisma	9	Wisdom
5	Manipulation	10	Storyteller's choice

Artifact Quirks (d10)

d10	Quirk
1	It hums or glows near Voidlings.
2	It feels warm in the hands of anyone at a High Virtue, and cold for a High Vice.
3	It whispers. No one else can hear it, and what it says is not always helpful.
4	It slowly changes color to match its owner's strongest magic school.
5	It refuses to be sold; it always finds its way back to you.
6	It drinks 1 extra mana from you whenever you roll a 1 on its first die.
7	Animals are drawn to it, or flee from it.
8	It remembers its last owner and sometimes shows you their memories in dreams.
9	It grows stronger in the dungeon where it formed: +1 Rating there.
10	Roll twice, or the Storyteller invents something stranger.

Chapter 15: Bestiary

Space Era Creatures 294

Terrana is full of things that want to eat you, test you, recruit you, or sell you something. This chapter gives every creature in the book, and many more, a stat block a Storyteller can run straight from the page. Most entries are short on purpose: a rank, a few numbers, and the two or three things the creature does best.

Many of the creatures here are people, not monsters. The Bestial Demonfolk, the monster peoples of Monsera, the Immortal Demon Kings, and the bosses of the Grand Dungeon all have homes, jobs, and opinions. A stat block only says how they fight, not whether they should be fought.

How Creatures Work

Every creature is built from its rank. Ranks run from F to SSS. At SS and SSS, power jumps: these are threats that only the greatest heroes, or whole armies, can face.

Creature Stats by Rank

LDT is BDT x2 and ADT is BDT x3, as for characters.

Rank	Attack and Defense	Damage	BDT	Health (B / L / A)	Mana	M/T
F	4	3	3	3 / 2 / 1	3	2
E	6	4	4	4 / 3 / 2	6	3
D	8	5	5	5 / 4 / 3	9	4
C	10	6	6	6 / 5 / 4	12	5
B	12	7	7	7 / 6 / 5	15	6
A	14	8	8	8 / 7 / 6	18	7
S	16	9	9	9 / 8 / 7	21	8
SS	20	12	12	12 / 11 / 10	30	12
SSS	25	15	15	15 / 14 / 13	45	15

Attack and Defense: The creature's dice pool for attacking and for defending. It uses the same pool for any defense, and for casting its techniques.

Damage: Its damage pool, rolled like a weapon's. Add the attack's excess successes and compare the total to the target's thresholds.

Health: How many Bashing, Lethal, and Aggravated boxes it has. It takes wound penalties and becomes Incapacitated exactly like a character.

Mana and M/T: Its mana pool and Max Mana Per Turn. Casting a spell costs its normal mana. Mana recovers at the rates in Chapter 11.

Size: Large creatures fill a 2x2 area and add 1 to BDT and 2 boxes to every health column. Huge creatures fill 3x3 and add 2 and 4. Gargantuan creatures fill 4x4 and add 3 and 6. Colossal creatures, such as a Giant Void Kaiju, fill 5x5 and add 4 and 8. These are already included in each entry.

Move: Zones per turn. Flying creatures move at double the number listed for walking; entries that fly list the doubled number.

Elements: A creature's elements decide its Elemental Advantages and which spells it can cast. Elemental Advantages apply to creatures exactly as they do to spells and conjurations (Chapter 13).

Techniques: When an entry says it casts a spell, it uses that spell's full rules from Chapter 13 with the creature's Attack pool.

SumMonz: Any beast or wild fiend of rank S or lower can be caught as a SumMonz (Chapter 13). SS and SSS creatures cannot.

Loot: Use the creature's rank as its Loot Rank (Chapter 14). SS and SSS creatures drop S rank loot and something unique.

Templates

Templates change a creature to fit the story. Stack as many as make sense.

Elite: +1 rank. Use the next rank's numbers.

Boss: Double every health column, two attacks a turn, and immunity to one condition of the Storyteller's choice. Dungeon bosses already include it.

Swarm: Many small bodies as one creature filling a 2x2 area. Area attacks deal +2 damage to it, and it cannot be Rooted or knocked Prone.

Pack Alpha: Every pack member in sight adds 1 die to attacks. If the alpha falls, the pack must roll Composure or flee.

Elemental: Add one element. The creature gains a rank 2 spell of that school and takes half damage from its own element.

Undead: Immune to Poisoned and Bleeding. Takes +2 damage from Bright Magic and Bright-imbued weapons.

Voidtouched: Everyone who sees it for the first time makes a Sanity roll, and each of its hits drains 1 or more mana.

Dungeon Employee: Respawns in its quarters when defeated. Fights hard, but fights fair, and will not hit a delver who has yielded.

Slimes

Slimes are everywhere: in sewers, dungeons, fields, and kitchens that were not cleaned well enough. Most are harmless alone and dangerous in a crowd.

Slime

Rank F | *Slime* | *Small* | *None*
Attack 4 | Defense 4 | Damage 3 | Move 1
BDT 3 / LDT 6 / ADT 9 | Health 3 / 2 / 1
Mana 3 | M/T 2
Engulf (melee): Kinetic damage. On a hit the target is Rooted until it beats the slime's attack successes with Strength + Athletics.
Trait: Splits in two when hit by a blade but not destroyed; each half is an F rank slime with half its boxes.
Found: Sewers, dungeon floors 1 to 10, damp fields. **Loot:** Slime jelly (alchemy ingredient).

Water Slime

Rank E | *Slime* | *Small* | *Water*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Water Bolt: Casts the Water Rank 1 spell.
Douse (melee): Kinetic damage and ends the Burning condition on anything it touches.
Trait: Takes half damage from Fire attacks, rounded down.
Found: Rivers, rain-soaked caves, the Flooded Caverns. **Loot:** Clear slime core (Small Mana Crystal).

Acid Slime

Rank E | *Slime* | *Small* | *Water*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Acid Touch (melee): Acid damage. On a hit, the target's armor loses 1 Armor until repaired.
Trait: Weapons that hit it lose 1 Rating for the scene unless cleaned.
Found: Garbage pits, alchemy lab drains, dungeon floors 6 to 20. **Loot:** Acid sac (alchemy, E rank).

Poison Slime

Rank D | *Slime* | *Small* | *Water*, *Nature*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Venom Splash: Ranged, line of sight. Poison damage and the Poisoned condition.
Engulf (melee): As a Slime.
Trait: Anything that bites or swallows it is Poisoned.
Found: Swamps, the Fungal Grotto. **Loot:** Venom core (antidote ingredient).

Magma Slime

Rank D | *Slime* | *Small* | *Fire*, *Earth*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Magma Glob: Ranged, line of sight. Burning damage and the Burning condition.
Molten Body: Anyone who hits it with an unarmed attack takes burning damage equal to its Damage pool.
Trait: Leaves a trail of burning ground (Burning Ground, Fire Rank 2) where it moves.
Found: Volcanic Fields, the Forge Depths. **Loot:** Ember core (D rank fire focus material).

Metal Slime

Rank C | *Slime* | *Small* | *Earth*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Steel Ram (melee): Kinetic damage.
Flee: As a Reaction when hit, move 2 zones.
Trait: Its BDT is doubled, and it tries to run from every fight. Defeating one is worth bragging about.
Found: Rare, anywhere in the Grand Dungeon. **Loot:** Metal slime alloy (B rank weapon material, worth 1 Large Gold).

Great Slime

Rank C | *Slime* | *Large (2x2)* | *Water*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Engulf (melee): Kinetic damage, and a target it hits is pulled inside: Rooted, and takes the slime's Damage pool again each Upkeep until it escapes with Strength + Athletics.
Split Off: Once per scene, spend 3 mana to release two Slimes.
Trait: Dozens of slimes merged into one. It is slow but almost impossible to push.
Found: Deep sewers, dungeon floors 10 to 30. **Loot:** Great slime core (Mana Crystal).

Slime Swarm
Rank E | *Slime, Swarm* | *Large (2x2)* | *Varies*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 6 / 5 / 4
Mana 6 | M/T 3
Smother (melee): Kinetic damage to everyone in adjacent zones; each defends separately.
Trait: A swarm of tiny slimes that counts as one creature filling a 2x2 area. Area attacks deal +2 damage to it.
Found: Anywhere slimes gather. **Loot:** Slime jelly by the bucket.

Beasts and Wild Fiends

Wild animals and fiends live wherever mana pools: the Demon Continent most of all, where the ambient mana is the highest in the world. Any of them can be caught as a SumMonz (Chapter 13) up to S rank.

Giant Rat
Rank F | *Beast* | *Small* | *None*
Attack 4 | Defense 4 | Damage 3 | Move 1
BDT 3 / LDT 6 / ADT 9 | Health 3 / 2 / 1
Mana 3 | M/T 2
Bite (melee): Piercing damage. On a hit roll 1d10; on a 1 the target catches a fever (-1 die on physical rolls until healed).
Trait: Usually found in packs of 3 to 6.
Found: Sewers, cellars, dungeon floors 1 to 4. **Loot:** Rat pelts (worth Small Copper).

Horned Rabbit
Rank F | *Beast* | *Small* | *None*
Attack 4 | Defense 4 | Damage 3 | Move 1
BDT 3 / LDT 6 / ADT 9 | Health 3 / 2 / 1
Mana 3 | M/T 2
Horn Charge: Move up to 2 zones in a straight line and attack. Piercing damage.
Trait: Harmless until startled, then very fast.
Found: Fields and forests across the Central Continent. **Loot:** Horn and meat (worth Large Copper).

Acid Wolf
Rank E | *Beast* | *Medium* | *Water*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Bite (melee): Piercing damage.
Acid Spit: Ranged, line of sight. Acid damage; the target's armor loses 1 Armor until repaired.
Trait: Hunts in packs of 4 to 8 that circle and spit before closing in.
Found: Demon Continent plains and wastes. **Loot:** Acid glands (alchemy).

Assault Dog
Rank E | *Beast* | *Medium* | *None*
Attack 6 | Defense 6 | Damage 4 | Move 2
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Pack Bite (melee): Piercing damage, +2 dice if another Assault Dog is adjacent to the target.
Trait: Packs of 5 to 10 that never stop chasing. Movement 2.
Found: Demon Continent, Begaritt fringes. **Loot:** Hides.

Pax Coyote
Rank D | *Beast* | *Medium* | *Air*
Attack 8 | Defense 8 | Damage 5 | Move 2
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Howl: Every enemy who hears it rolls Composure + Presence against its Attack; those who fail suffer -2 dice on their next turn.
Bite (melee): Piercing damage.
Trait: Packs follow a single alpha. Kill the alpha and the pack scatters.
Found: Demon Continent grasslands. **Loot:** Pelts, fangs.

Cave Crawler
Rank E | *Beast* | *Medium* | *Earth*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Mandibles (melee): Slashing damage.
Ceiling Drop: Attacks from above with +2 dice the first time it strikes in a fight.
Trait: Climbs on walls and ceilings as easily as floors.
Found: The Fungal Grotto, mines, caves. **Loot:** Chitin plates.

Dire Boar
Rank D | *Beast* | *Large (2x2)* | *None*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 7 / 6 / 5
Mana 9 | M/T 4
Gore: Move up to 2 zones in a straight line and attack. Piercing damage; the target is knocked Prone.
Trait: Keeps charging even when Incapacitated once: it gets one last Gore before it falls.
Found: Forests of the Central and Milis continents. **Loot:** Tusks, a lot of meat.

Giant Spider
Rank D | *Beast* | *Large (2x2)* | *Nature*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 7 / 6 / 5
Mana 9 | M/T 4
Bite (melee): Piercing damage and the Poisoned condition.
Web: Ranged, line of sight. The target is Rooted until it beats the spider's Attack successes with Strength + Athletics.
Trait: Ignores Difficult Terrain made of webs and can walk on walls.
Found: Dark forests, the Catacombs, abandoned mines. **Loot:** Spider silk (Crafts material).

Hellhound
Rank C | *Beast* | *Medium* | *Fire*
Attack 10 | Defense 10 | Damage 6 | Move 2
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Fire Breath: Casts the Fire Rank 3 spell.
Bite (melee): Piercing damage and the Burning condition.

Trait: Immune to Burning. Hunts in pairs.
Found: The Infernal Halls, volcanic regions of the Demon Continent. **Loot:** Ember fang (C rank fire focus material).

Forest Bear

Rank C | *Beast* | *Large (2x2)* | *None*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Maul (melee): Slashing damage. Two attacks against the same target each turn.
Roar: Enemies in adjacent zones resist with Composure + Presence or suffer -2 dice on their next attack.
Trait: Fiercely protective of cubs.
Found: Every major forest. **Loot:** Pelt, claws.

Rock Turtle

Rank C | *Beast* | *Large (2x2)* | *Earth*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Shell Slam (melee): Kinetic damage and the target is knocked Prone.
Stone Shell: As a Reaction, +3 BDT until its next turn.
Trait: Nearly unbreakable from the front; its underside has half the BDT. Prized for its meat.
Found: Demon Continent wastes and rivers. **Loot:** Shell plates (C rank armor material), meat for a whole village.

Thunderbird

Rank B | *Beast* | *Large (2x2)* | *Air*, *Fire*
Attack 12 | Defense 12 | Damage 7 | Move 4 (flying)
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Lightning Dive: Moves up to 4 zones and attacks. Electric damage.
Storm Call: Casts Thunderstorm (Fire + Water + Air + Nature) once per scene.
Trait: Flies at double movement. Lives inside storm clouds.
Found: Mountain peaks, the Canopy Wilds. **Loot:** Storm feathers (B rank Air focus material).

Griffon

Rank B | *Beast* | *Large (2x2)* | *Air*
Attack 12 | Defense 12 | Damage 7 | Move 4 (flying)
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Talons (melee): Slashing damage.
Snatch and Drop: On a hit against a Medium or smaller target, carry it up 2 zones and drop it for falling damage.
Trait: Flies at double movement. Can be tamed as a mount by a patient rider.
Found: Cliffs of the Central Continent, Asura mountains. **Loot:** Feathers, eggs (worth a Small Gold to a breeder).

Manticore

Rank B | *Beast* | *Large (2x2)* | *Nature*, *Shade*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Tail Volley: Ranged, line of sight. Roll once against up to 3 targets; piercing damage and the Poisoned condition.
Maul (melee): Slashing damage.
Trait: Speaks a little and enjoys taunting its prey.
Found: Begaritt desert, ruins. **Loot:** Tail spines (B rank arrowheads).

Basilisk

Rank B | *Beast* | *Large (2x2)* | *Earth*, *Shade*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Petrifying Gaze: Every enemy who can see it resists with Wisdom + Composure; one that fails is Rooted as its legs turn to stone, and if it fails again next turn it is turned to stone (Petrify, Earth + Nature + Bright + Shade).
Bite (melee): Piercing damage.
Trait: Looking away or using a mirror gives -2 dice to attack it but immunity to the gaze.
Found: Deep caves, the Crystal Mines. **Loot:** Basilisk eye (A rank artifact material).

Terminate Boa

Rank B | *Beast* | *Huge (3x3)* | *Nature*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 11 / 10 / 9
Mana 15 | M/T 6
Constrict (melee): Crushing damage; the target is Rooted and takes the Damage pool again each Upkeep until it breaks free with Strength + Athletics.
Swallow: A Rooted Medium target at 0 Bashing boxes left is swallowed whole.
Trait: Hides in tall grass and trees; first attack each fight gets +3 dice.
Found: Demon Continent jungles and rivers. **Loot:** Snakeskin (B rank armor material).

Chimera

Rank A | *Beast* | *Large (2x2)* | *Fire*, *Nature*, *Air*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 10 / 9 / 8
Mana 18 | M/T 7
Three Heads: Three attacks a turn: lion bite (piercing), goat horns (kinetic), serpent tail (piercing and Poisoned).
Fire Breath: Casts Fireball (Fire Rank 5) once per scene.
Trait: Each head can be targeted separately (one third of its boxes each); losing a head loses that attack.
Found: Fighting pits, the Ironwood Colosseum, Demon Continent wilds. **Loot:** Chimera heart (A rank alchemy).

Behemoth

Rank S | *Beast* | *Gargantuan (4x4)* | *Earth*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 12 / LDT 24 / ADT 36 | Health 15 / 14 / 13
Mana 21 | M/T 8
Trample: Moves up to 3 zones; everything in its path defends or takes kinetic damage and is knocked Prone.
Tremor Roar: Casts Earthquake (Earth Rank 5).
Horn Gore (melee): Kinetic damage, +3 dice against structures.
Trait: Fills a 4x4 area. Town Rapan is built inside the ribs of one.
Found: Deep in the Demon Continent; one every few generations.
Loot: Bones for a town, hide for an army.

Plants and Fungi

Most plants stay still. These do not.

Mandrake

Rank E | *Plant* | *Small* | *Nature*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Scream: Every creature in adjacent zones resists with Composure + Endurance; those who fail lose their next action.
Trait: Pulling it from the ground triggers the scream automatically.
Found: Old gardens, witches' plots. **Loot:** Mandrake root (alchemy, worth a Small Silver).

Myconid Scout

Rank E | *Fungus* | *Medium* | *Nature*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Spore Burst: Casts the Nature Rank 2 spell.
Club (melee): Kinetic damage.
Trait: Myconids talk with spores; anyone caught in a cloud hears their thoughts as a buzzing.
Found: The Fungal Grotto. **Loot:** Glowcap mushrooms.

Carnivorous Vine

Rank D | *Plant* | *Large (2x2)* | *Nature*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 7 / 6 / 5
Mana 9 | M/T 4
Vine Whip: Casts the Nature Rank 2 spell.
Digest: A Rooted target takes acid damage each Upkeep.
Trait: Looks like a normal hedge until it moves.
Found: Canopy Wilds, Milis forests. **Loot:** Sap (alchemy).

Treant

Rank C | *Plant* | *Large (2x2)* | *Nature, Earth*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Branch Slam (melee): Kinetic damage and the target is knocked back one zone.
Entangle: Casts the Nature Rank 1 spell on everyone in adjacent zones.
Trait: Takes double damage from Fire attacks. Many are old enough to talk, slowly.
Found: Old forests on every continent. **Loot:** Living wood (B rank staff material).

Spore Mother

Rank B | *Fungus* | *Huge (3x3)* | *Nature, Shade*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 11 / 10 / 9
Mana 15 | M/T 6
Spore Cloud: Casts Miasma Bloom (Air + Nature + Shade).
Spawn: Once per turn, a Myconid Scout grows from the floor in an adjacent zone.
Trait: Rooted in place. Burning it ends the spawning.
Found: Heart of the Fungal Grotto. **Loot:** Mother spore (A rank alchemy).

Bestial Demonfolk

The Bestials are people, the largest population on the Demon Continent and equal citizens there (Chapter 8). Orcs are pigfolk, kobolds are dogfolk, lizardmen are scaled, and the bugfolk build hives. These entries describe warriors, raiders, and guards, the ones a party is most likely to cross swords with.

Kobold Scout

Rank F | *Bestial Demonfolk* | *Small* | *None*
Attack 4 | Defense 4 | Damage 3 | Move 1
BDT 3 / LDT 6 / ADT 9 | Health 3 / 2 / 1
Mana 3 | M/T 2
Spear (melee): Piercing damage.
Scent Track: Adds 3 dice to Awareness rolls to track by smell.
Trait: Kobolds are canine and loyal to their pack; a scout that spots a party runs to fetch the rest.
Found: Demon Continent hills and mines, the Upper Halls. **Loot:** Coins, a small blade.

Kobold Packmaster

Rank D | *Bestial Demonfolk* | *Medium* | *None*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Rally Bark: Allies who hear it add 1 die to attacks this turn.
Glaive (melee, Reach): Slashing damage.
Trait: Leads 4 to 6 Kobold Scouts.
Found: Demon Continent. **Loot:** D rank weapon.

Orc Warrior

Rank E | *Bestial Demonfolk* | *Medium* | *None*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Great Cleaver (melee): Slashing damage.
Tusk Charge: Move 2 zones in a line and attack with +1 die.
Trait: Orcs are pigfolk: hearty, loud, and fond of a good meal and a good fight. Most serve Raja Iblis Baglahagla.
Found: Northwest Demon Continent, mercenary companies. **Loot:** E rank weapon, rations.

Orc Shaman

Rank D | *Bestial Demonfolk* | *Medium* | *Earth, Fire*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Stone Spike: Casts the Earth Rank 3 spell.
War Chant: Allies in sight add 1 die to damage this turn.
Trait: Usually travels with a band of Orc Warriors.
Found: Orc domains. **Loot:** Bone charms, a D rank focus.

Orc Warlord

Rank B | *Bestial Demonfolk* | *Large (2x2)* | *Earth*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Greataxe (melee): Slashing damage; two attacks a turn.
Iron Body: Casts the Battle Aura Rank 2 spell.
Trait: Commands a war band of 10 or more. Respects anyone who beats them in a fair duel.
Found: Orc domains. **Loot:** B rank weapon, war banner.

Lizardman Warrior

Rank D | *Bestial Demonfolk* | *Medium* | *Water*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Spear and Shield (melee): Piercing damage.
Tail Sweep: Every enemy in adjacent zones defends or is knocked Prone.
Trait: Swims as well as it walks. Slows in the cold (-1 die).
Found: Demon Continent marshes, rivers. **Loot:** Scale shield.

Lizardman Shaman

Rank C | *Bestial Demonfolk* | *Medium* | *Water, Nature*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Venom: Casts Venom (Water + Shade).
Quagmire: Casts Quagmire (Water + Earth).
Trait: Keeper of the tribe's old songs.
Found: Marsh villages. **Loot:** Shaman staff (C rank focus: Water).

Bugfolk Drone

Rank E | *Bestial Demonfolk* | *Medium* | *Earth*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Mandibles (melee): Slashing damage.
Hive Signal: Every drone within 3 zones knows where the drone's target is.
Trait: Ant-like workers and soldiers. They fight as one.
Found: Hive mounds in the Demon Continent. **Loot:** Chitin.

Mantis Blade

Rank C | *Bestial Demonfolk* | *Medium* | *Air*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Twin Scythes (melee): Slashing damage; two attacks a turn.
Leap: Moves 3 zones in a single jump.
Trait: Duelists of the bugfolk. Bow before attacking.
Found: Hives, mercenary companies. **Loot:** Mantis blades (C rank short blades).

Hive Queen

Rank A | *Bestial Demonfolk* | *Huge (3x3)* | *Earth, Nature*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 12 / 11 / 10
Mana 18 | M/T 7
Brood Call: Once per turn, 2 Bugfolk Drones arrive in adjacent zones.
Acid Spray: Ranged, line of sight. Roll once against up to 3 targets; acid damage.
Hive Mind: All bugfolk in sight add 1 die to every roll.
Trait: Never leaves the hive. The drones fight to the last for her.
Found: The heart of a hive. **Loot:** Royal jelly (A rank alchemy, worth a Large Gold).

Monster Peoples

The monster peoples of Monsera and the Shaded Isles (Chapter 8) are citizens, neighbors, and very often dungeon employees. These stat blocks cover the ones a party meets with weapons drawn.

Goblin

Rank F | *Gremlinesque* | *Small* | *None*
Attack 4 | Defense 4 | Damage 3 | Move 1
BDT 3 / LDT 6 / ADT 9 | Health 3 / 2 / 1
Mana 3 | M/T 2
Shiv (melee): Piercing damage.
Dirty Trick: Throws sand or a gadget: the target suffers -2 dice on its next roll.
Trait: Clever, quick, and fond of anything with moving parts.
Found: The Upper Halls, Monsera workshops. **Loot:** Gadget scraps, coins.

Goblin Tinkerer

Rank E | *Gremlinesque* | *Small* | *Fire*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Boom Jar: Thrown, up to double Strength in zones. Burning damage to everyone in the target zone.
Turret: Once per scene, places a clockwork crossbow that attacks each turn with its Attack pool.
Trait: Never fights fair and never apologizes.
Found: Workshops, the Gearworks. **Loot:** Clockwork parts, an implement.

Ogre

Rank C | *Ogre* | *Large (2x2)* | *None*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Club (melee): Kinetic damage and the target is knocked back one zone.

Grab and Throw: On a hit against a Medium or smaller target, throw it 2 zones.
Trait: Ogres left the Demon Continent long ago because they prefer peace. Calm and gentle until a friend is hurt.
Found: The Ogre Islands, Monsera. **Loot:** C rank club.

Troll

Rank C | *Brute* | *Large (2x2)* | *Earth*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Claws (melee): Slashing damage; two attacks a turn.
Regenerate: Neutralizes 2 Bashing each Upkeep unless it took burning or acid damage since its last turn.
Trait: Hard to kill and easy to anger.
Found: Bridges, mountains, the Upper Halls. **Loot:** Troll blood (regeneration potion ingredient).

Minotaur

Rank B | *Brute* | *Large (2x2)* | *Earth*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Greataxe (melee): Slashing damage.
Bull Rush: Move 3 zones in a line; everything in the way defends or is knocked Prone.
Trait: Never lost in a maze; always knows the way to its target.
Found: Labyrinths, Monsera's infrastructure division. **Loot:** B rank axe.

Constructs and Automatons

Built things: golems shaped from earth and mana, and automatons made by the Makers Guild and older, stranger hands. None of them feel fear, pain, or the Void's horror.

Automaton Servitor

Rank E | *Construct* | *Medium* | *None*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Tool Arm (melee): Kinetic damage.
Repair: Neutralizes 1 Bashing on another construct in an adjacent zone.
Trait: Household and factory automatons. Most are harmless unless their orders change.
Found: Monsera homes, factories, the Gearworks. **Loot:** Clockwork core (implement part).

Living Armor

Rank D | *Construct* | *Medium* | *Shade*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Sword (melee): Slashing damage.
Empty Shell: Hits that strike a gap (excess successes of 3 or more) only deal half damage.
Trait: A suit of armor animated by a lingering will.
Found: Castles, the Catacombs. **Loot:** D rank armor.

Mud Golem

Rank D | *Construct* | *Large (2x2)* | *Earth, Water*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 7 / 6 / 5
Mana 9 | M/T 4
Mud Slam (melee): Kinetic damage and the target is Rooted until the end of its next turn.
Trait: Reforms after being destroyed unless its core is removed.
Found: Swamps, the work sites of earth mages. **Loot:** Golem core (Small Mana Crystal).

Clockwork Sentinel

Rank C | *Construct* | *Medium* | *Earth*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Halberd (melee, Reach): Slashing damage.
Alarm: Every construct on the floor knows where intruders are.
Trait: Guards one door forever.
Found: Vaults, the Gearworks. **Loot:** Gears, a C rank halberd.

Automaton Duelist

Rank C | *Construct* | *Medium* | *Air*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Rapier (melee): Piercing damage; two attacks a turn.
Learned Style: Copies the Combat Style of the last enemy that hit it, adding 1 die to its attacks.
Trait: Built for sport. Some have fought thousands of bouts.
Found: Nite City arenas, noble estates. **Loot:** Duelist core (C rank).

Stone Golem

Rank C | *Construct* | *Large (2x2)* | *Earth*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Stone Fist (melee): Kinetic damage.
Stoneskin: Casts the Earth Rank 5 spell on itself once per fight.
Trait: Slow and relentless. Movement 1.
Found: Ruins, temples. **Loot:** Golem core (Mana Crystal).

Iron Golem

Rank B | *Construct* | *Large (2x2)* | *Earth, Fire*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Iron Fist (melee): Kinetic damage; two attacks a turn.
Furnace Vent: Every creature in adjacent zones takes burning damage equal to its Damage pool.
Trait: Immune to Poisoned and Chilled.
Found: Dwarven halls, the Forge Depths. **Loot:** Iron golem core (Large Mana Crystal).

War Automaton

Rank B | *Construct* | *Huge (3x3)* | *Fire, Earth*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 11 / 10 / 9
Mana 15 | M/T 6
Cannon Arm: Ranged, line of sight. Kinetic damage to the target zone and adjacent zones.
Stomp (melee): Kinetic damage and knocked Prone.
Trait: Built for the God Wars or the Kaiju lines. Some still wander with old orders.
Found: Battlefields, the Old Rail Tunnels. **Loot:** War core (A rank implement part).

Mana Construct

Rank A | *Construct* | *Large (2x2)* | *Varies*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 10 / 9 / 8
Mana 18 | M/T 7
Spell Absorption: When a spell hits it, roll its Defense; each success cancels 1 damage and gives it 1 mana.
Discharge: Spends stored mana to cast any single-school spell of rank 5 or lower that hit it this fight.
Trait: Built by the Mages Guild to test, and to punish, spellcasters.
Found: Mages Guild vaults, the Arcane Laboratories. **Loot:** Construct heart (A rank artifact material).

Undead

When a body's mana runs out and it was never cremated, it can rise as mindless undead (Chapter 13). Sentient undead are rarer and far more dangerous. All undead are hurt by Bright Magic and helped by Shade.

Skeleton

Rank F | *Undead* | *Medium* | *Shade*
Attack 4 | Defense 4 | Damage 3 | Move 1
BDT 3 / LDT 6 / ADT 9 | Health 3 / 2 / 1
Mana 3 | M/T 2
Rusty Blade (melee): Slashing damage.
Trait: Takes half damage from piercing attacks, rounded down.
Found: Catacombs, battlefields. **Loot:** Bones, rusty gear.

Zombie

Rank F | *Undead* | *Medium* | *Shade*
Attack 4 | Defense 4 | Damage 3 | Move 1
BDT 3 / LDT 6 / ADT 9 | Health 3 / 2 / 1
Mana 3 | M/T 2
Grab and Bite (melee): Piercing damage, and the target is Rooted until it beats the zombie's attack with Strength + Athletics.
Trait: Keeps coming. Stands back up once unless its head is destroyed.
Found: Graveyards, plague towns. **Loot:** None worth keeping.

Ghoul

Rank E | *Undead* | *Medium* | *Shade*
Attack 6 | Defense 6 | Damage 4 | Move 2
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Claws (melee): Slashing damage; the target resists with Fortitude + Endurance or loses its next action to paralysis.
Trait: Eats the dead. Fast and clever.
Found: Catacombs, old battlefields. **Loot:** Ghoul nails (alchemy).

Ghost

Rank D | *Undead* | *Medium* | *Shade*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Chilling Touch (melee): Cold damage; ignores Armor.
Haunt: Forces a Sanity roll on everyone who sees it for the first time.
Trait: Incorporeal: nothing physical touches it except magic, silver, and Bright-imbued weapons (Chapter 8).
Found: Haunted houses, Funayurei waters, the Catacombs. **Loot:** Ectoplasm (alchemy).

Wraith

Rank C | *Undead* | *Medium* | *Shade*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Mana Drain: Casts Mass Drain (Shade Rank 5) once per scene.
Soul Touch (melee): Cold damage; ignores Armor.
Trait: Incorporeal. Feeds on mana.
Found: Ruins, the Thinning Halls. **Loot:** Wraith essence (B rank Shade focus material).

Dullahan

Rank B | *Undead* | *Large (2x2)* | *Shade*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Headless Charge: Rides 3 zones and attacks. Slashing damage.
Wail: Everyone who hears it makes a Sanity roll.
Trait: A headless knight on a headless horse. It carries its head and sees through its eyes.
Found: The Shaded Isles, haunted roads. **Loot:** Black armor (B rank).

Death Knight

Rank A | *Undead* | *Medium* | *Shade*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 8 / 7 / 6
Mana 18 | M/T 7
Cursed Sword (melee): Slashing damage; two attacks a turn.
Shadowflame: Casts Shadowflame (Fire + Shade).
Command Dead: Undead in sight add 2 dice to attacks.
Trait: A fallen knight raised with its skill intact.
Found: Fallen castles, the Silent Necropolis. **Loot:** A rank sword, often cursed.

Vampire

Rank C | *Undead (Vampire)* | *Medium* | *Shade*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Bite (melee): Piercing damage; on a hit it drinks, gaining 1 mana and neutralizing 1 Bashing.
Blood Bolt: Casts the Blood Sorcery Rank 3 power (Chapter 8).
Blur: Casts the Celerity Rank 2 power.

Trait: Vampires are a heritage (Chapter 8), and most are citizens like anyone else. This entry is for the ones who hunt. Each has a Compulsion tied to one of its scales.
Found: Cities at night, old manors, the Shaded Isles. **Loot:** Whatever its victims carried.

Vampire Lord

Rank A | *Undead (Vampire)* | *Medium* | *Shade*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 8 / 7 / 6
Mana 18 | M/T 7
Hemorrhage: Casts the Blood Sorcery Rank 6 power.
Command: A Dominion power: one target in sight resists with Wisdom + Composure or obeys a simple order on its turn.
Second Strike: Casts the Celerity Rank 4 power; two attacks a turn.
Trait: An old vampire with a house of lesser vampires and human servants. Rarely fights its own battles until it has to.
Found: Noble manors, the Shaded Isles. **Loot:** An A rank heirloom, a house's secrets.

Vampire Queen

Rank S | *Undead (Vampire)* | *Medium* | *Shade, Water*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 9 / 8 / 7
Mana 21 | M/T 8
Crimson Tide: Casts the Blood Sorcery Rank 7 power.
Exsanguinate: Casts the Blood Sorcery Rank 7 power on one target.
Dominion of the Court: Every vampire in sight adds 2 dice to every roll, and every enemy resists with Wisdom + Composure or loses its next action.
Undying: Neutralizes 2 Bashing and 1 Lethal each Upkeep while she has mana.
Trait: The ruler of a vampire court, often centuries old. Her compulsion is the only weakness most of her enemies ever find.
Found: The deepest courts of the Shaded Isles. **Loot:** An S rank artifact and a court's worth of debts.

Lich

Rank S | *Undead* | *Medium* | *Shade, Water*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 9 / 8 / 7
Mana 21 | M/T 8
Black Pulse: Casts the Shade Rank 6 spell.
Animate Dead: Casts the Shade Rank 5 spell.
Black Blizzard: Casts Black Blizzard (Fire + Water + Air + Shade) once per scene.
Trait: Its soul is bound to a phylactery. Destroy the phylactery or it returns in a month.
Found: Hidden towers, the deepest catacombs. **Loot:** Phylactery, spellbooks, S rank focus.

Bone Dragon

Rank S | *Undead* | *Huge (3x3)* | *Shade*
Attack 16 | Defense 16 | Damage 9 | Move 3 (flying)
BDT 11 / LDT 22 / ADT 33 | Health 13 / 12 / 11
Mana 21 | M/T 8
Deathbreath: Ranged, a cone 3 zones long. Cold damage and everyone hit makes a Sanity roll.
Claws and Tail: Two melee attacks a turn; slashing damage.
Trait: A dragon raised by a lich. Flies at double movement, if its wings still hold.
Found: Dragon graveyards, a lich's lair. **Loot:** Dragon bone (S rank weapon material).

Dragons

Dragonkind ranges from beasts that think about little but food and territory to Ancient Dragons who are older than nations and every bit as clever as the people who fear them.

Fire Drake

Rank C | *Dragon* | *Large (2x2)* | *Fire*
Attack 10 | Defense 10 | Damage 6 | Move 2
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Fire Breath: Casts the Fire Rank 3 spell.
Bite (melee): Piercing damage.
Trait: Wingless and quick. Immune to Burning.
Found: Volcanic Fields, Red Wyrm foothills. **Loot:** Drake scales (C rank armor).

Frost Drake

Rank C | *Dragon* | *Large (2x2)* | *Water, Air*
Attack 10 | Defense 10 | Damage 6 | Move 2
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Frost Breath: Casts Frost Lance (Water Rank 3) as a cone 2 zones long; everyone hit is Chilled.
Bite (melee): Piercing damage.
Trait: Wingless and sure-footed on ice. Immune to Chilled.
Found: Snowfields, northern mountains, frozen caves. **Loot:** Drake scales (C rank armor).

Wyvern

Rank C | *Dragon* | *Large (2x2)* | *Air, Nature*
Attack 10 | Defense 10 | Damage 6 | Move 4 (flying)
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Tail Stinger: Piercing damage and the Poisoned condition.
Dive: Moves 4 zones and attacks with +2 dice.
Trait: Two legs, two wings, a bad temper. Flies at double movement.
Found: Cliffs and peaks everywhere. **Loot:** Wyvern venom, hide.

Earth Dragon

Rank B | *Dragon* | *Huge (3x3)* | *Earth*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 11 / 10 / 9
Mana 15 | M/T 6
Burrow: Moves through earth and stone as if it were air, 2 zones per turn, and bursts out under a target with +3 dice.
Crushing Bite (melee): Crushing damage.
Rock Barrage: Casts the Earth Rank 2 spell at everyone in adjacent zones.
Trait: Wingless, enormous, and found in deep valleys where they lie still for years. Gives off tremors before it attacks.
Found: Earth Dragon valleys of the Central Continent. **Loot:** Earth dragon scale (A rank armor material).

Red Wyrm

Rank A | *Dragon* | *Large (2x2)* | *Fire, Air*
Attack 14 | Defense 14 | Damage 8 | Move 4 (flying)
BDT 9 / LDT 18 / ADT 27 | Health 10 / 9 / 8
Mana 18 | M/T 7
Flame Breath: Casts Rain of Fire (Fire Rank 6).
Claws (melee): Slashing damage; two attacks a turn.
Flock: Red Wyrms hunt in groups; each adjacent wyrm adds 1 die to the others' attacks.
Trait: Flies at double movement. The Red Wyrm Mountains are home to hundreds, and the passes are only safe in large caravans.
Found: The Red Wyrm Mountains. **Loot:** Red wyrm scale (A rank), wyrm heart (S rank alchemy).

Blue Wyrm

Rank A | *Dragon* | *Large (2x2)* | *Water, Air*
Attack 14 | Defense 14 | Damage 8 | Move 4 (flying)
BDT 9 / LDT 18 / ADT 27 | Health 10 / 9 / 8
Mana 18 | M/T 7
Frost Breath: Casts Blizzard (Water Rank 6).
Tail Lash (melee): Kinetic damage, knocked back 2 zones.
Trait: Swims as well as it flies. Lives on cold coasts and sea cliffs.
Found: Northern coasts, the Ringus Sea. **Loot:** Blue scale (A rank), frost gland.

Storm Wyrm

Rank A | *Dragon* | *Large (2x2)* | *Air, Fire*
Attack 14 | Defense 14 | Damage 8 | Move 4 (flying)
BDT 9 / LDT 18 / ADT 27 | Health 10 / 9 / 8
Mana 18 | M/T 7
Lightning Breath: Casts Plasma (Fire + Air) as a line 4 zones long.
Wing Gale: Casts Shearing Gale (Air Rank 5).
Trait: Rides the edge of thunderstorms.
Found: High peaks, storm seas. **Loot:** Storm scale (A rank).

Dark Dragon

Rank S | *Dragon* | *Huge (3x3)* | *Shade, Fire*
Attack 16 | Defense 16 | Damage 9 | Move 4 (flying)
BDT 11 / LDT 22 / ADT 33 | Health 13 / 12 / 11
Mana 21 | M/T 8
Shadowflame Breath: Casts Convergent Flame (Fire + Bright + Shade) as darkfire, or Shadowflame (Fire + Shade) as a cone.
Claws (melee): Slashing damage; two attacks a turn.
Dread Aura: Enemies within 2 zones make a Sanity roll at the start of the fight.
Trait: A dark dragon is often seen flying over Gaslow, Atoferatofe's domain. Whether it serves her or simply likes the bog is a matter of debate.
Found: Gaslow, the eastern Demon Continent. **Loot:** Dark scale (S rank).

Elder Dragon

Rank S | *Dragon* | *Huge (3x3)* | *Any two*
Attack 16 | Defense 16 | Damage 9 | Move 4 (flying)
BDT 11 / LDT 22 / ADT 33 | Health 13 / 12 / 11
Mana 21 | M/T 8
Breath: Casts any rank 7 spell of either of its elements.
Claws, Wings, Tail: Three attacks a turn: slashing, kinetic, kinetic.
Scales: Takes half damage from spells, rounded down.
Trait: Old, clever, and greedy. Most can speak and some will bargain.
Found: Remote mountains and islands. **Loot:** A hoard. Scales worth a fortune.

Ancient Dragon

Rank SS | *Dragon (sentient)* | *Gargantuan (4x4)* | *Any three*
Attack 20 | Defense 20 | Damage 12 | Move 5 (flying)
BDT 15 / LDT 30 / ADT 45 | Health 18 / 17 / 16
Mana 30 | M/T 12
Sovereign Breath: Casts a five-school combination spell made of its elements, such as Primordial Storm.
Claws, Wings, Tail, Bite: Four attacks a turn.
Ancient Scales: Takes half damage from spells, rounded down.
Trait: Ancient Dragons are not beasts. They are people with their own goals, kingdoms, and grudges, as old as nations. Fighting one is a story arc, not an encounter. Vaelthrax, the Slime King's companion, is the most famous.
Found: Wherever they choose. **Loot:** Whatever they allow you to take.

Sea and Freshwater

Not everything in the water is the size of an island. Rivers and coasts hold smaller dangers, and the open sea holds the largest.

Grindylow

Rank E | *Aquatic* | *Small* | *Water*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Grasping Fingers (melee): Kinetic damage; the target is pulled one zone deeper into the water.
Trait: Pale lake goblins with long, strong fingers. They drag swimmers down in groups.
Found: Lakes, ponds, the Flooded Caverns. **Loot:** None.

Kappa

Rank D | *Aquatic* | *Medium* | *Water*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Sumo Grapple (melee): Kinetic damage and the target is knocked Prone.
Water Jet: Casts the Water Rank 2 spell.
Trait: Turtle-shelled river folk with a water-filled dish on their heads. Bowing politely makes them bow back, spilling the water: they lose all their dice until they refill it. They love cucumbers and keep their promises.
Found: Rivers and ponds of the eastern isles. **Loot:** Kappa medicine (heals as Basic healing, PHP 2).

Funayurei

Rank D | *Undead, Aquatic* | *Medium* | *Water, Shade*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Ladle: Fills a boat with water: each use, the boat takes kinetic damage to its Hull.
Drowning Grip (melee): Cold damage; ignores Armor.
Trait: Ghosts of drowned sailors. Giving them a ladle with no bottom keeps them busy until dawn.
Found: Foggy seas at night. **Loot:** Ectoplasm.

Deep Raider

Rank D | *Aquatic* | *Medium* | *Water*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Trident (melee): Piercing damage.
Ink Cloud: Casts Mist (Fire + Water) as an ink cloud underwater.
Trait: Fish-headed raiders from the dark water. Not to be confused with Fishfolk citizens (Chapter 8), who resent the comparison.
Found: Reefs, sunken ships. **Loot:** Pearls, coral knives.

Giant Crab

Rank D | *Aquatic* | *Large (2x2)* | *Water, Earth*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 7 / 6 / 5
Mana 9 | M/T 4
Pincers (melee): Crushing damage; the target is Rooted until it breaks free.
Trait: Its shell gives +2 BDT against attacks from the front.
Found: Beaches and tidepools. **Loot:** Crab meat, shell (D rank shield material).

Kelpie

Rank C | *Aquatic* | *Large (2x2)* | *Water*
Attack 10 | Defense 10 | Damage 6 | Move 3
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Enchanting Mane: Anyone who touches it is stuck fast and is dragged into deep water on its next turn.
Water Jet: Casts the Water Rank 2 spell.
Hooves (melee): Kinetic damage.
Trait: A water horse that looks like a lost pony. A bridle made with its true name tames it.
Found: Lochs, rivers, lakes. **Loot:** Kelpie hair (C rank focus material: Water).

Siren

Rank C | *Aquatic* | *Medium* | *Water, Air*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Song: Everyone who hears it resists with Composure + Insight or must move one zone toward her on their turn.
Claws (melee): Slashing damage.
Trait: Covering your ears gives -2 dice to Awareness but immunity to the song.
Found: Rocky coasts, the Tide Ruins. **Loot:** Siren scale.

Sea Serpent

Rank B | *Aquatic* | *Huge (3x3)* | *Water*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 11 / 10 / 9
Mana 15 | M/T 6
Coil (melee): Crushing damage to a ship's Hull or a creature.
Tidal Pull: Casts the Water Rank 5 spell.
Trait: Can wrap a corvette and drag it under.
Found: Open seas. **Loot:** Serpent scales (B rank).

Umibozu

Rank A | *Aquatic, Spirit* | *Huge (3x3)* | *Water, Shade*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 12 / 11 / 10
Mana 18 | M/T 7
Rising Dark: Appears beside a ship in calm water; the crew makes a Sanity roll.
Swamp the Deck: Casts Deluge (Water Rank 7) on a ship.
Demand: Asks for a barrel. Giving it a barrel with no bottom ends the encounter.
Trait: A vast black shape with pale eyes that rises out of a calm sea. Rarely fought, often survived by good manners.
Found: Calm seas at night. **Loot:** None.

Kraken

Rank A | *Aquatic* | *Gargantuan (4x4)* | *Water*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 11 / LDT 22 / ADT 33 | Health 14 / 13 / 12
Mana 18 | M/T 7
Tentacles: Four attacks a turn against creatures or a ship's Hull; crushing damage.
Ink: Casts Mist (Fire + Water); everyone in it is blinded.
Trait: Each tentacle has its own boxes (a quarter of the total); cut one off and it loses an attack.
Found: Deep ocean, the Coral Throne. **Loot:** Kraken ink (A rank alchemy).

Leviathan

Rank SS | *Sea Monster* | *Gargantuan (4x4)* | *Water*
Attack 20 | Defense 20 | Damage 12 | Move 1
BDT 15 / LDT 30 / ADT 45 | Health 18 / 17 / 16
Mana 30 | M/T 12
Drowned World: Casts Drowned World (Water + Air + Earth + Nature + Shade).
Swallow Ship: Swallows a ship up to frigate size.
Whirlpool: Every ship within 6 zones is pulled 2 zones toward it each turn.
Trait: A creature from the oldest stories. It has been seen twice in recorded history.
Found: The deepest ocean. **Loot:** Legend.

Fey of the Dreeming and the Seeming

Fey come from the two halves of the Void World where belief takes shape (Chapter 1). Dreeming fey lean toward play and protection; Seeming fey lean toward fear and harm.

Pixie

Rank E | *Fey (Dreeming)* | *Tiny* | *Air, Nature*
Attack 6 | Defense 6 | Damage 4 | Move 3 (flying)
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2

Mana 6 | M/T 3
Pixie Dust: Casts Decrease Weight (Air + Bright + Shade) on an ally, or a prank: the target suffers -2 dice on its next roll.
Glamour: Becomes invisible until it attacks.
Trait: Tiny, playful, and easily offended. Flies at double movement.
Found: Flower meadows, the Dreeming. **Loot:** Pixie dust (alchemy).

Will-o'-Wisp

Rank E | *Fey (Dreeming)* | *Tiny* | *Bright*
Attack 6 | Defense 6 | Damage 4 | Move 2 (flying)
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Lure: Anyone following it resists with Wisdom + Insight or follows it off the path.
Trait: Leads lost travelers somewhere, not always where they meant to go.
Found: Bogs, foggy roads. **Loot:** Wisp light (Glow implement part).

Dream Stag

Rank C | *Fey (Dreeming)* | *Large (2x2)* | *Nature*, *Bright*
Attack 10 | Defense 10 | Damage 6 | Move 3
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Antler Charge: Move 3 zones and attack; kinetic damage.
Mending Bloom: Casts Mending Bloom (Nature + Bright) on a creature it trusts.
Trait: A white stag that appears to people who need a reason to keep going.
Found: Old forests, the Dreeming. **Loot:** Never taken; it gives a blessing instead.

Kitsune Trickster

Rank C | *Fey (Dreeming)* | *Medium* | *Fire*, *Bright*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Foxfire: Casts Radiant Flame (Fire + Bright).
Illusion: Casts Mirror Mist (Water + Air + Bright + Shade) once per scene.
Trait: A fox spirit with more than one tail. Loves riddles, fried tofu, and embarrassing the proud.
Found: Shrines, the eastern isles, the Dreeming. **Loot:** A tail-hair charm (C rank Fire focus).

Nightmare Imp

Rank E | *Fey (Seeming)* | *Small* | *Shade*
Attack 6 | Defense 6 | Damage 4 | Move 2 (flying)
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Nightmare Bite (melee): Piercing damage; the target makes a Sanity roll.
Vanish: Becomes invisible in darkness.
Trait: Rides sleepers' chests and feeds on their fear.
Found: Bedrooms, the Seeming. **Loot:** Nightmare dust.

Redcap

Rank D | *Fey (Seeming)* | *Small* | *Shade*, *Earth*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Pike (melee, Reach): Piercing damage. Every hit reddens its cap and adds 1 die to its next attack.
Iron Boots: Cannot be knocked Prone or moved.
Trait: Murderous goblin-like fey. Reading scripture aloud, or a cross of iron, makes it flee.
Found: Ruined towers, the Seeming. **Loot:** Bloodied cap (cursed).

Bogeyman

Rank B | *Fey (Seeming)* | *Medium* | *Shade*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 7 / 6 / 5
Mana 15 | M/T 6
From the Dark: Steps from any shadow to any other shadow in sight.
Terror: Casts Fog of Dread (Shade Rank 3); everyone in it makes a Sanity roll.
Claws (melee): Slashing damage.
Trait: Made from every child's fear of the closet. Bright light hurts it: +2 dice to attacks against it in a lit zone.
Found: Under beds, closets, the Seeming. **Loot:** None.

Hag of the Seeming

Rank A | *Fey (Seeming)* | *Medium* | *Shade*, *Nature*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 8 / 7 / 6
Mana 18 | M/T 7
Curse: Casts Cursed Roots (Earth + Nature + Shade).
Bargain: Offers a deal; refusing costs nothing, accepting always costs more than it seems.
Plague Fog: Casts Plague Fog (Water + Air + Nature + Shade) once per scene.
Trait: Hags trade in names, years, and memories.
Found: Swamp cottages, crossroads, the Seeming. **Loot:** A bargained item, always cursed.

The Void

Voidlings feed on mana, and their existence is hostile to the ordered mind (Chapter 11). Every Void creature forces Sanity rolls; Sanity dots are the pool to resist them.

Voidling Mite

Rank E | *Void*, *Swarm* | *Large (2x2)* | *Shade*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 6 / 5 / 4
Mana 6 | M/T 3
Feed: Every creature in adjacent zones loses 1 mana; one with no mana takes cold damage instead.
Trait: A swarm of small, wrong shapes. Area attacks deal +2 damage to it.

Found: Near Void openings, Nyxhollow. **Loot:** Void dust (dangerous alchemy).

Voidling Stalker

Rank C | *Void* | *Medium* | *Shade*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Phase Strike: Teleports up to 3 zones and attacks; slashing damage that ignores Armor.
Mana Hunger: Adds 2 dice to attacks against whoever has the most mana.
Trait: Seeing one for the first time forces a Sanity roll.
Found: Void openings, the Thinning Halls. **Loot:** Void shard (A rank artifact material).

Void Maw

Rank B | *Void* | *Large (2x2)* | *Shade*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 9 / 8 / 7
Mana 15 | M/T 6
Devour (melee): Piercing damage; the target loses mana equal to the damage boxes it marks.
Pull: Every creature within 3 zones is pulled one zone toward it each Upkeep.
Trait: A mouth with nothing behind it.
Found: Void openings. **Loot:** Void core.

Voidling Horror

Rank A | *Void* | *Huge (3x3)* | *Shade*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 12 / 11 / 10
Mana 18 | M/T 7
Unmake: Casts Soul Drain (Shade Rank 7).
Tendrils: Three attacks a turn; cold damage.
Wrongness: Everyone in sight makes a Sanity roll each turn.
Trait: What comes through when a Void opening tears wide.
Found: Major Void breaches. **Loot:** Void heart (S rank, cursed).

Void Leviathan

Rank S | *Void, Kaiju* | *Gargantuan (4x4)* | *Shade, Water*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 12 / LDT 24 / ADT 36 | Health 15 / 14 / 13
Mana 21 | M/T 8
Black Tide: Casts Black Blizzard (Fire + Water + Air + Shade) as a wave.
Swallow Mana: Every creature in sight loses mana equal to the Leviathan's rank each turn.
Trait: A Void creature large enough to swim between worlds.
Found: The Outer Dark, deep Void breaches. **Loot:** Legend.

Void Kaiju

Rank S | *Void, Kaiju* | *Gargantuan (4x4)* | *Shade, Water, Earth*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 12 / LDT 24 / ADT 36 | Health 15 / 14 / 13
Mana 21 | M/T 8
Tidal Smash: Casts Monsoon (Water + Air + Earth + Nature).
Stomp and Crush: Two attacks a turn against everything in a 2x2 area; kinetic damage.
Armored Hide: Takes half damage from anything without Armor or Magic Penetration.
Wrongness: Everyone who sees it makes a Sanity roll.
Trait: The smallest of the Kaiju, and still an S rank threat. About once a year one breaks out of the Rift at the center of the Ringus Sea, and the HRC and the Titans meet it before it reaches a shore (Chapter 3).
Found: The Rift in the Ringus Sea, other Void breaches. **Loot:** A Kaiju core: worth a King's Gold to the right buyer.

Giant Void Kaiju

Rank SSS | *Void, Kaiju* | *Colossal (5x5)* | *Shade, any*
Attack 25 | Defense 25 | Damage 15 | Move 1
BDT 19 / LDT 38 / ADT 57 | Health 23 / 22 / 21
Mana 45 | M/T 15
Nightfall: Casts Nightfall (Fire + Water + Air + Earth + Nature + Shade).
Crush: Four attacks a turn against everything in a 5x5 area.
Wrongness: Everyone within sight makes a Sanity roll every turn, at -2 dice.
Endless: Takes half damage from everything that is not a combination spell or an S rank weapon.
Trait: The worst thing the Void has ever sent. Nations, the HRC, and the Titans together have stopped one only twice.
Found: Catastrophic Void breaches. **Loot:** A continent's worth of salvage, if anything survives.

People

Not every threat is a monster. These cover the people a party is likely to face: from street thugs to the strongest swordsmen alive. Add a heritage's Innate Attribute and Heritage Merit for flavor.

Bandit

Rank F | *Person* | *Medium* | *None*
Attack 4 | Defense 4 | Damage 3 | Move 1
BDT 3 / LDT 6 / ADT 9 | Health 3 / 2 / 1
Mana 3 | M/T 2
Short Sword (melee): Slashing damage.
Crossbow: Ranged, line of sight. Piercing damage, Reload (1).
Trait: Runs when half the gang is down.
Found: Roads, Breakwater alleys. **Loot:** A few coins.

Thug

Rank E | *Person* | *Medium* | *None*
Attack 6 | Defense 6 | Damage 4 | Move 1
BDT 4 / LDT 8 / ADT 12 | Health 4 / 3 / 2
Mana 6 | M/T 3
Club (melee): Kinetic damage.
Gang Up: +2 dice when another thug is adjacent to the target.
Trait: Usually works for someone worse.
Found: Nite City back streets. **Loot:** Coins, a debt ledger.

City Guard

Rank D | *Person* | *Medium* | *None*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Spear (melee, Reach): Piercing damage.
Whistle: Calls 1d10 more guards over the next 3 turns.
Trait: Would rather arrest you than kill you.
Found: Every city. **Loot:** D rank spear, a badge.

Mercenary

Rank D | *Person* | *Medium* | *None*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Weapon (melee or ranged): Damage by weapon type.
Professional: Retreats if the pay stops being worth it.
Trait: Members of the Mercenaries Guild in space, or freelancers on Terrana.
Found: Everywhere money is. **Loot:** D rank weapon, a contract.

Veteran Delver

Rank C | *Person* | *Medium* | *Any one*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Signature Weapon (melee): Damage by weapon type, two attacks a turn.
School Spell: Casts one rank 3 spell of its school.
Trait: Has been to the fortieth floor and has the scars.
Found: The Grand Dungeon, guild halls. **Loot:** C rank gear.

Knight

Rank C | *Person* | *Medium* | *None*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Longsword (melee): Slashing damage.
Shield Wall: Allies in adjacent zones add 1 to BDT.
Trait: Sworn to a house or a crown.
Found: Noble estates, Asura, Milishion. **Loot:** C rank armor and sword.

Battle Mage

Rank C | *Person* | *Medium* | *Any two*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Bolt: Casts a rank 2 spell of either school.
Combination: Casts a two-school combination spell of its schools once per scene.
Trait: Usually trained at Monsera University.
Found: Guilds, armies, universities. **Loot:** C rank focus.

Assassin

Rank B | *Person* | *Medium* | *Shade*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 7 / 6 / 5
Mana 15 | M/T 6
Poisoned Blade (melee): Piercing damage and the Poisoned condition; +3 dice against a target that has not acted yet this fight.
Shadow Step: Casts the Shade Rank 4 spell.
Trait: Works for the Shaded Isles, a noble house, or the highest bidder.
Found: Anywhere. **Loot:** B rank daggers, poisons.

Necromancer

Rank B | *Person* | *Medium* | *Shade*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 7 / 6 / 5
Mana 15 | M/T 6
Animate Dead: Casts the Shade Rank 5 spell.
Corruption Bolt: Casts the Shade Rank 2 spell.
Trait: Rarely alone: usually surrounded by 3 to 6 Skeletons or Zombies.
Found: Graveyards, hidden labs. **Loot:** B rank Shade focus.

Sword Saint

Rank A | *Person* | *Medium* | *None*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 8 / 7 / 6
Mana 18 | M/T 7
Saint's Cut (melee): Slashing damage; three attacks a turn.
Counter: When its defense beats an attack, it strikes back with the same roll (Chapter 12).
Trait: A Saint rank master of a Combat Style. The Sword God's schools produce a handful a generation.
Found: Sword dojos, the Asura capital. **Loot:** A rank sword.

The Immortal Demon Kings

The ten domains of the Demon Continent are each ruled by an Immortal Demon King, and all of them honor Empress Kishirika (Chapter 2). They are people, not monsters, and most are not looking for a fight. Most of them regenerate from almost anything: Undying Flesh is their inheritance (Chapter 8). Defeating one rarely means killing it.

Empress Kishirika Kishirisu

Rank C | *Immortal Demon King* | *Small* | *None*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 6 / 5 / 4
Mana 12 | M/T 5
Magic Eyes: Her eyes see anything she chooses: lies, futures, distant places. She knows what every enemy in sight is about to do (+5 dice to defense rolls).
Gift an Eye: Grants a Magic Eye (Chapter 9) to someone who helped her.
Trait: The Demon Empress is famously weak in a fight, famously hungry, and famously generous to whoever feeds her. She has died and reincarnated at least five times. Rank C is her fighting strength, not her importance.
Found: Wherever she wandered off to this time. **Loot:** A Magic Eye, if she likes you.

Badigadi, the Fighting God

Rank SS | *Immortal Demon King* | *Large (2x2)* | *Battle Aura*
Attack 20 | Defense 20 | Damage 12 | Move 1
BDT 13 / LDT 26 / ADT 39 | Health 14 / 13 / 12
Mana 30 | M/T 12
Six Arms: Six attacks a turn, kinetic damage. He laughs through all of them.
Undying Flesh: Neutralizes all Bashing and Lethal damage each Upkeep, and regrows anything lost by the next scene. Only sealing him stops him.
Fighting God: Wearing his legendary armor, his Attack pool rises by 5 and he casts Omega Burst (Battle Aura Rank 7) at will.
Trait: Six-armed, loud, and delighted by a good fight or a good party. He has little magical aptitude and needs none. He is the husband of Kishirika and one of the few beings the Slime King treats as a peer.
Found: Biegoya, in the far northeast, or wherever the wine is.
Loot: His respect.

Atoferatofe Ryback

Rank SS | *Immortal Demon King* | *Medium* | *Battle Aura*
Attack 20 | Defense 20 | Damage 12 | Move 1
BDT 12 / LDT 24 / ADT 36 | Health 12 / 11 / 10
Mana 30 | M/T 12
Demon Sword (melee): Slashing damage; four attacks a turn.
Undying Flesh: As Badigadi.
Conscription: Anyone she defeats becomes her disciple, whether they like it or not.
Trait: Badigadi's sister: enormously strong, very loud, and not interested in nuance. She kidnaps foreign royalty and challenges every strong warrior she hears of. Her black-armored Imperial Guard follow her everywhere.
Found: Gaslow, a dark bog in the east, under the shadow of a dark dragon. **Loot:** Disciple papers.

Atofe's Imperial Guard

Rank B | *Person (Immortal Mix)* | *Medium* | *Battle Aura*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 7 / 6 / 5
Mana 15 | M/T 6
Black Blade (melee): Slashing damage; two attacks a turn.
Formation: Each guard adjacent to another adds 1 to its BDT.
Trait: Black-armored disciples, nearly all of them former challengers who lost.
Found: Gaslow, or wherever Atofe goes. **Loot:** B rank black armor.

Necross Lacross

Rank SS | *Immortal Demon King* | *Large (2x2)* | *Fire*, *Water*, *Air*, *Earth*, *Nature*
Attack 20 | Defense 20 | Damage 12 | Move 1
BDT 13 / LDT 26 / ADT 39 | Health 14 / 13 / 12
Mana 30 | M/T 12
Five Elements: Casts Primordial Storm (Fire + Water + Air + Earth + Nature), or any spell of the five elemental schools.
Strongest Fortress: In his fortress, every ally adds 2 to BDT and he sees every corridor.
Undying Flesh: As Badigadi.
Trait: The Five Elements Demon King, a tactician of the God Wars, father of Badigadi and Atoferatofe, and the one who brought Kishirika to Terrana. He built the strongest fortress on the Demon Continent and rules from its heart.
Found: The heart of the Demon Continent. **Loot:** Strategy, if he deigns to share it.

The Earth God

Rank SS | *Immortal Demon King* | *Small* | *Earth*, *Nature*
Attack 20 | Defense 20 | Damage 12 | Move 1
BDT 12 / LDT 24 / ADT 36 | Health 12 / 11 / 10
Mana 30 | M/T 12
Redesign: Changes the terrain of up to 10 zones each turn: walls, pits, rivers, stairs.
Continental Shift: Casts the Earth Rank 7 spell.
Creative Director: Inside the Grand Dungeon, she can teleport anyone on any floor to any other floor.
Trait: A fairy-type Immortal Demon King who co-owns the Grand Dungeon with the Slime King and redesigns its floors on a whim. Fighting her in her dungeon is a very bad idea.
Found: The Grand Dungeon. **Loot:** A new floor named after you, if she is amused.

Beethove Tovetha

Rank S | *Immortal Demon King* | *Huge (3x3)* | *Water*, *Shade*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 11 / LDT 22 / ADT 33 | Health 13 / 12 / 11
Mana 21 | M/T 8
Ink Tentacles: Four attacks a turn; kinetic damage, and every hit records the target's memories in ink.
Library: Knows everything ever written. Adds 5 dice to any Intelligence roll.
Trait: A monstrous black slime-octopus who rules the Library Labyrinth and records every piece of written lore in the world.

Found: The Library Labyrinth, in the north. **Loot:** A book you were looking for.

Raja Iblis Baglahagla

Rank S | *Immortal Demon King* | *Large (2x2)* | *Earth*, *Fire*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 11 / 10 / 9
Mana 21 | M/T 8
King's Cleaver (melee): Slashing damage; three attacks a turn.
Royal Feast: Every orc in sight neutralizes 1 Bashing and adds 1 die to attacks this turn.
Trait: The pig-like King of the Orcs, ruler of the northwest. Judges a guest by their appetite.
Found: The northwestern domain. **Loot:** A seat at his table.

Vita, the Abyssal King

Rank A | *Immortal Demon King* | *Small* | *Water*, *Shade*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 8 / 7 / 6
Mana 18 | M/T 7
Possession: A creature that ingests Vita resists with Wisdom + Composure each turn; on a failure Vita controls its body and floods its mind with visions.
Split: Can exist in many drops at once.
Trait: A parasitic blue slime-demon. Its rank is low because it rarely fights with its own body; the body it is wearing decides how dangerous it is.
Found: The western domain, or inside anyone. **Loot:** Nothing you want to keep.

Lynebyne, the Stone King

Rank S | *Immortal Demon King* | *Huge (3x3)* | *Earth*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 11 / LDT 22 / ADT 33 | Health 13 / 12 / 11
Mana 21 | M/T 8
Stone Fortress: Casts the Earth Rank 6 spell.
Petrify: Casts Petrify (Earth + Nature + Bright + Shade).
Stone Body: Takes half damage from everything but Air and Nature attacks.
Trait: The ruler of the southwest, as patient as the mountains.
Found: The southwestern domain. **Loot:** Stone that never breaks.

Samedynomedy, Demon King of Light

Rank S | *Immortal Demon King* | *Medium* | *Bright*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 9 / 8 / 7
Mana 21 | M/T 8
Final Light: Casts the Bright Rank 7 spell.
Radiance: Undead and Void creatures within 3 zones take radiant damage each Upkeep.
Trait: Ruler of the south, whose domain is never truly dark.
Found: The southern domain. **Loot:** Light that keeps voidlings away.

Patorsetor, the Enchantress Demon King

Rank S | *Immortal Demon King* | *Medium* | *Water*, *Bright*, *Shade*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 9 / 8 / 7
Mana 21 | M/T 8
Enchant: Every enemy in sight resists with Wisdom + Composure or fights for her this turn.
Mirror Mist: Casts Mirror Mist (Water + Air + Bright + Shade).
Trait: Ruler of the southeastern coast, whose court is full of people who do not remember arriving.
Found: The southeastern coast. **Loot:** An invitation you should refuse.

Qeblaqabla, the Evil Demon King

Rank S | *Immortal Demon King* | *Medium* | *Shade*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 9 / 8 / 7
Mana 21 | M/T 8
Black Rain: Casts Black Pulse (Shade Rank 6) as a rain of black liquid across 3x3 zones.
Corrode: Anything it touches loses 1 Rating or 1 Armor.
Trait: A floating orb leaking black liquid, ruling the continent's southern end.
Found: The southern end of the Demon Continent. **Loot:** Corroded relics.

Grand Dungeon Bosses

Every boss below is a dungeon employee (Chapter 4): they fight hard and fight fair, and when they fall they respawn in their quarters. All use the Boss template: double health, two attacks a turn, and immunity to one condition.

Warchief Gruk Ironmaw

Rank D | *Gremlinesque (Goblin)* | *Medium* | *None* | *Boss*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 10 / 8 / 6
Mana 9 | M/T 4
Cleaver (melee): Slashing damage.
Warband: Arrives with 6 Goblins; each turn Gruk shouts, they add 1 die to attacks.
Trait: Thirty years on the job. Respects a fair fight.
Found: Floor 4. **Loot:** D rank cleaver, a handshake.

The Grand Beastmaster

Rank C | *Bestial Demonfolk (Orc)* | *Medium* | *Earth* | *Boss*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 6 / LDT 12 / ADT 18 | Health 12 / 10 / 8
Mana 12 | M/T 5
Whip (melee, Reach): Slashing damage.
Command Beast: Its Chimera (see Beasts) acts twice this turn.
Trait: Fights beside a multi-headed Chimera in the Ironwood Colosseum while the stands bet on the outcome.
Found: Floor 10. **Loot:** C rank whip, betting slips.

Asterion of the Maze

Rank C | *Brute (Minotaur)* | *Large (2x2)* | *Earth* | *Boss*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 16 / 14 / 12
Mana 12 | M/T 5
Labrys (melee): Slashing damage.
Hunter's Ear: Always knows where every enemy on the floor is.
Trait: Waits at the Labyrinth's final gate.
Found: Floor 14. **Loot:** C rank axe, a map that is always wrong.

The Chrono-Goliath

Rank B | *Construct* | *Huge (3x3)* | *Earth, Fire* | *Boss*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 22 / 20 / 18
Mana 15 | M/T 6
Gear Crush (melee): Kinetic damage.
Shift the Floor: Changes the speed of the floor's machinery: platforms move 1 zone and steam pipes burst (burning damage) each turn.
Trait: The Shattered Clockwork, built by the Makers Guild long ago.
Found: Floor 20. **Loot:** B rank clockwork core.

Skyrend, the Storm Alpha

Rank B | *Beast (Thunderbird)* | *Large (2x2)* | *Air, Fire* | *Boss*
Attack 12 | Defense 12 | Damage 7 | Move 4 (flying)
BDT 8 / LDT 16 / ADT 24 | Health 18 / 16 / 14
Mana 15 | M/T 6
Lightning Dive: Moves 4 zones and attacks; electric damage, and the target is knocked off any branch.
Thunderstorm: Casts Thunderstorm (Fire + Water + Air + Nature).
Trait: Rules the Canopy Wilds.
Found: Floor 24. **Loot:** Storm feathers.

The Kraken Vanguard

Rank B | *Fishfolk Champion* | *Large (2x2)* | *Water* | *Boss*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 18 / 16 / 14
Mana 15 | M/T 6
Sweeping Trident (melee, Reach): Piercing damage to everyone in adjacent zones.
Current: Every enemy is pushed 1 zone each Upkeep.
Trait: A Seafolk champion under contract with the Navigators Guild.
Found: Floor 30. **Loot:** B rank trident.

The Iron Juggernaut

Rank B | *Construct* | *Huge (3x3)* | *Earth, Fire* | *Boss*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 22 / 20 / 18
Mana 15 | M/T 6
Ram: Moves 2 zones in a line and attacks; kinetic damage.
Front Plate: Its BDT doubles against attacks from the front.
Trait: A walking furnace built to clear cave-ins.
Found: Floor 34. **Loot:** Furnace core.

The Doppler Matriarch

Rank A | *Devil* | *Medium* | *Water, Air, Bright, Shade* | *Boss*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 16 / 14 / 12
Mana 18 | M/T 7
Mirror Copies: Creates a solid copy of each party member with their stats and abilities.
Mirror Mist: Casts Mirror Mist (Water + Air + Bright + Shade).
Trait: A high-tier devil illusionist from Nite City.
Found: Floor 40. **Loot:** A rank mirror shard.

Mother Maelis, the Siren Matron

Rank A | *Aquatic (Siren)* | *Medium* | *Water, Air* | *Boss*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 16 / 14 / 12
Mana 18 | M/T 7
Matron's Song: Every enemy resists with Composure + Insight or moves 2 zones toward the rising water.
Tempest: Casts Tempest (Water + Air).
Trait: The eldest of the ruins' sirens.
Found: Floor 44. **Loot:** Siren pearl (A rank Water focus).

Cindermaw, the Magma Wyrm

Rank A | *Dragon* | *Huge (3x3)* | *Fire, Earth* | *Boss*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 24 / 22 / 20
Mana 18 | M/T 7
Magma Breath: Casts Lava (Fire + Earth + Nature).
Melt the Arena: Each turn, one zone of the platform melts away.
Trait: A wild fire drake fused with experimental company machinery.
Found: Floor 50. **Loot:** A rank scale.

The Rune Sentinel

Rank A | *Construct* | *Large (2x2)* | *Bright, Shade* | *Boss*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 20 / 18 / 16
Mana 18 | M/T 7
Rune Blast: Casts Disruption (Bright + Shade).
Riddles: Asks three questions before the fight; each answered well costs it a Boss template benefit.
Trait: An ancient guardian covered in shifting runes.
Found: Floor 54. **Loot:** Rune plate.

The Dullahan Overseer

Rank A | *Undead* | *Large (2x2)* | *Shade* | *Boss*
Attack 14 | Defense 14 | Damage 8 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 20 / 18 / 16
Mana 18 | M/T 7
Wall Walk: Steps through walls to cut off retreat.
Deadly Wail: Everyone makes a Sanity roll and resists with Fortitude + Endurance or loses their next action.
Trait: An ancient knight representing the noble houses of the Shaded Isles.
Found: Floor 60. **Loot:** A rank black armor.

Conductor Kessler

Rank S | *Undead* | *Medium* | *Shade, Fire* | *Boss*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 18 / 16 / 14
Mana 21 | M/T 8
Last Train: The ghost train charges through a line of zones; kinetic damage to everyone in it.
Ticket, Please: Anyone without a valid ticket suffers -2 dice on all rolls.
Trait: Insists every passenger present a valid ticket. Bring one.
Found: Floor 64. **Loot:** A golden ticket.

Warden Arcanum

Rank S | *Construct* | *Large (2x2)* | *Varies* | *Boss*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 22 / 20 / 18
Mana 21 | M/T 8
Absorb: Any single-school spell that hits it is absorbed and adds 2 dice to its next attack.
Circuit Lightning: Casts Thunderstorm (Fire + Water + Air + Nature).
Trait: An advanced defense construct from the Mages Guild. Physical attacks and combination spells are the way through.
Found: Floor 70. **Loot:** S rank construct heart.

The Crystal Basilisk

Rank S | *Beast (Basilisk)* | *Large (2x2)* | *Earth, Shade* | *Boss*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 22 / 20 / 18
Mana 21 | M/T 8
Crystal Gaze: As a Basilisk's gaze, but flesh turns to crystal.
Shard Burst: Casts Glass Shards (Fire + Air + Earth).
Trait: Its hide is a living crystal lattice.
Found: Floor 74. **Loot:** Living crystal (S rank).

The Rift Stalker

Rank S | *Void* | *Large (2x2)* | *Shade* | *Boss*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 22 / 20 / 18
Mana 21 | M/T 8
Phase Hunt: Teleports anywhere on the ledge and attacks; slashing damage that ignores Armor.
Void Wind: Every enemy is pulled one zone toward the edge each Upkeep.
Trait: A real multi-dimensional predator, held on this floor by magic barriers.
Found: Floor 80. **Loot:** Void shard (S rank).

The Monk of a Thousand Steps

Rank S | *Ogre* | *Large (2x2)* | *Battle Aura* | *Boss*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 22 / 20 / 18
Mana 21 | M/T 8
Thousand Fists (melee): Kinetic damage; four attacks a turn.
Aura Ascendant: Casts the Battle Aura Rank 7 spell.
Tireless: Never suffers wound penalties.
Trait: A silent ogre who fights unarmed and will not let a party pass until they prove themselves.
Found: Floor 84. **Loot:** His nod.

The Devil Prince Defiler

Rank S | *Devil* | *Medium* | *Fire, Shade* | *Boss*
Attack 16 | Defense 16 | Damage 9 | Move 1
BDT 9 / LDT 18 / ADT 27 | Health 18 / 16 / 14
Mana 21 | M/T 8
Hellfire Blade (melee): Slashing damage and the Burning condition.
Hellfire: Casts Shadowflame (Fire + Shade) or Black Lightning (Fire + Air + Nature + Shade).
Trait: An exile from the Hell Dungeon and a true spellsword, under contract to the Earth God.
Found: Floor 90. **Loot:** S rank blade.

Vaelthrax

Rank SS | *Ancient Dragon* | *Gargantuan (4x4)* | *Fire, Earth, Air* | *Boss*
Attack 20 | Defense 20 | Damage 12 | Move 5 (flying)
BDT 15 / LDT 30 / ADT 45 | Health 36 / 34 / 32
Mana 30 | M/T 12
Ancient Breath: Casts Sunfall (Fire + Water + Air + Earth + Bright).
Claws, Wings, Tail, Bite: Four attacks a turn.
Undefeated: Near-total immunity to magic: spells deal only a quarter of their damage, rounded down.
Trait: The Slime King's legendary companion and the final boss. No gimmicks: only immense strength, near-total immunity to magic, and devastating breath. No party has beaten it.
Found: Floor 100. **Loot:** The record books.

Space Era Creatures

For games set in the Space Era (Chapter 16). Space above Terrana is breathable, so many of these live in the open sky between worlds.

Sky Pirate

Rank D | *Person* | *Medium* | *Air*
Attack 8 | Defense 8 | Damage 5 | Move 1
BDT 5 / LDT 10 / ADT 15 | Health 5 / 4 / 3
Mana 9 | M/T 4
Cutlass (melee): Slashing damage.
Boarding Hook: Swings 3 zones from ship to ship and attacks.
Trait: Crews wooden warships driven by Air Magic circles.
Found: The Free Reaches. **Loot:** Plunder.

Sky Pirate Captain

Rank B | *Person* | *Medium* | *Air, Fire*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 7 / 6 / 5
Mana 15 | M/T 6
Blaster and Cutlass: One melee and one ranged attack a turn.
Broadside: Orders the ship's guns: every enemy ship in sight takes kinetic damage to its Hull.
Trait: Every captain has a price on their head and a legend to protect.
Found: The Free Reaches, Kordrane. **Loot:** A ship, if you can take it.

Asteroid Burrower

Rank C | *Beast* | *Large (2x2)* | *Earth*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Drill Bite (melee): Piercing damage, double against a ship's Hull.
Trait: Lives inside drifting rocks and mistakes hulls for food.
Found: Asteroid belts. **Loot:** Ore.

Nebula Wraith

Rank C | *Spirit* | *Large (2x2)* | *Air, Shade*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 7 / LDT 14 / ADT 21 | Health 8 / 7 / 6
Mana 12 | M/T 5
Static Touch: Electric damage; a ship it touches loses one crew station for a turn.
Trait: A ghost of gas and lightning.
Found: Nebulas. **Loot:** Charged dust (implement fuel).

Nyxhollow Swarm

Rank C | *Void, Swarm* | *Huge (3x3)* | *Shade*
Attack 10 | Defense 10 | Damage 6 | Move 1
BDT 8 / LDT 16 / ADT 24 | Health 10 / 9 / 8
Mana 12 | M/T 5
Feed: Every creature within 2 zones loses 2 mana.
Wrongness: Sanity roll at first sight.
Trait: Voidlings from Nyxhollow, where the swarms never thin.
Found: Nyxhollow. **Loot:** Void dust.

Star Whale

Rank B | *Beast* | *Gargantuan (4x4)* | *Air, Bright*
Attack 12 | Defense 12 | Damage 7 | Move 1
BDT 10 / LDT 20 / ADT 30 | Health 13 / 12 / 11
Mana 15 | M/T 6
Song: Every creature that hears it neutralizes 1 Bashing and loses all fear conditions.
Tail Slap: Kinetic damage to a ship's Hull, if provoked.
Trait: Peaceful giants that swim between worlds. Sailors consider them good luck.
Found: The open sky. **Loot:** Never hunted by anyone decent.

Playable Species 300

Every rule in this book works in any age. The rest of the book describes modern Terrana, about 150 years after the Slime King's arrival, but the same dice, the same Combat Styles, and the same magic can run a game in a dark age of swords and war, in the ruins of a fallen future, or among the stars.

This chapter describes three alternate eras. Each one lists what changes from the modern game: the technology, the gear and prices, which Backgrounds and guilds exist, and the factions that matter. Anything not mentioned works exactly as it does in the rest of the book.

Choosing an Era: The Storyteller picks the era before character creation, since it changes what players can buy and which Backgrounds make sense. Players should know the era before choosing a Trope or a Past Life Occupation.

Eras at a Glance

Era	When	Technology	Feel	Inspirations
The Distant Past	During or just after the Great Hyuman-Demon War	Swords, bows, and early magic; no implements to speak of	Classic dark-age fantasy	Berserk, Vinland Saga, Goblin Slayer
Modern Terrana	About 150 years after the Slime King (the rest of this book)	Crystal engines, the CCN, guns, everyday implements	Isekai adventure with modern comforts	Mushoku Tensei, DanMachi
A Fallen Future	Some time after modern Terrana; how long is up to the Storyteller	Today's technology as broken, half-understood relics	Post-apocalyptic survival	Fallout, Mad Max, Nausicaä
The Space Era	Hundreds to a thousand years after modern Terrana	Starships, energy weapons, replicators	Space opera among many worlds	Cowboy Bebop, Tenchi Muyo, Star Trek, Star Wars, Dune, Sailor Moon

The Distant Past

Long before Monsera, before the Slime King, before guilds ran governments and crystals ran kitchens, the world was at war. A game in the distant past is set during or just after the Great Hyuman-Demon War, when Hyumans and the peoples of the Demon Continent fought across the known world. It is a dark age: kingdoms rise and burn, roads are dangerous, magic is rare and feared, and a sword is worth more than a title.

What Changes

Technology: No crystal engines, no CCN, no guns, and almost no implements. Light comes from fire, travel is on foot, by horse, or by sail, and news moves as fast as a rider.

Combat Styles: Sundown and Iron Rain do not exist. Every other Style does, though under other names and taught by masters rather than schools.

Magic: The seven schools work as written, but formal study is rare. Most casters learn from a single master, and circle magic is closely guarded. Expect Storytellers to limit which combination spells anyone has discovered.

Backgrounds: Hacker and Subscribers do not exist. Guild Standing does not exist either; there are no cabinet guilds yet. Use Allies, Mentor, Nobility, Followers, and Street Cred instead.

Monsera and Its Institutions: Monsera, the Hero Rangers Corps, Monsera University, and the Grand Dungeon do not exist. The Grand Dungeon has not been built yet; the Earth God made it much later.

Gear and Prices: Use the weapons and armor in Chapter 14 except firearms, crystal-powered plate, and anything that runs on mana crystals. Coins vary from kingdom to kingdom, but the values in Chapter 14 still work as a guide. Healing potions are rare and cost at least twice as much.

Heritages: Every heritage exists, but Hyumans and demons are at war, so a character's heritage decides where they are welcome. Storytellers may rule some heritages unavailable or hidden.

Campaign Ideas

Behind the Lines: A small band is sent across the front to bring back a captured mage before the demon armies learn what she knows.

The Last Village: The war has moved on, but the village is starving and a monster has learned that no soldiers are coming.

Oathbreakers: Deserters from both sides form a company that sells its swords to whoever pays, until one job asks too much.

A Fallen Future

Something ended the modern world. The CCN went dark, the crystal engines stopped, and the cities emptied. Generations later, people live among the ruins of a civilization they barely understand, and today's ordinary technology has become a collection of ancient relics.

What caused the fall is left open. Each Storyteller decides, and the players may never learn the whole truth. Some possibilities:

A Great Breach: The Rift tore wide open and the Void poured through.

The Seeming Spills Over: The nightmare half of the Void World broke its balance and seeped into Terrana.

A New God War: Something awoke that the world was not ready to fight.

The Mana Fails: Ambient mana thinned, and everything built on it collapsed at once.

What Changes

Relics: Modern items (guns, CCN crystals, crystal engines, implements) are relics. A working relic counts as an artifact. A broken one needs a Crafts or Artifacts roll and parts to repair, and the Storyteller decides what still works.

Ammunition and Crystals: Bullets and charged mana crystals are scarce. Track ammunition carefully, and treat mana crystals as the most valuable currency there is.

Money: Coins are worth what someone will trade for them. Barter is common: food, water, ammunition, medicine, and crystals are the real currency. Resources above 3 is rare and usually means control of a settlement or a working relic.

Guilds and Factions: The cabinet guilds are gone. Replace Guild Standing with standing in a settlement or faction, using the same 1 to 7 scale.

The World: Ruined cities, Void-scarred wastes, mutated beasts, and fortified settlements. Old dungeons may be the safest places left, or the most dangerous.

Magic: Magic works as written and may be the only reliable power left. Whether mages are honored or hunted depends on what caused the fall.

Campaign Ideas

The Signal: An old CCN tower has started broadcasting again, and every faction in the wastes wants to reach it first.

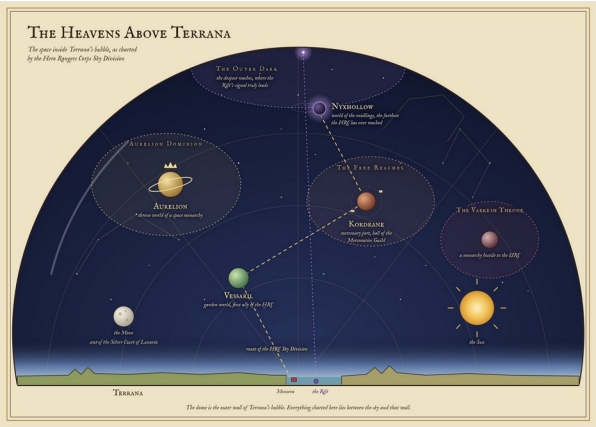
Water Rights: A settlement holds the only working water purifier for a hundred miles, and someone is trying to steal it.

Into the Old City: The ruins of Monsera hold relics no one has touched in a century, and the things that live there now.

The Space Era

A researcher at Monsera University discovers that the energy signal of the Rift matches energy coming from far out in the sky. The Hero Rangers Corps forms a Sky Division to follow it, travel to other worlds, and connect their peoples. Games in the space era take place hundreds to a thousand years after that discovery.

By then many planets and species have been met. Most are friendly to the HRC; some are not. Space travel has become a hot commodity for anyone seeking adventure, and ships, while still pricey, are common. Terrana itself remains fully playable: Monsera is the HRC's home world and the heart of an interstellar CCN.



The heavens above Terrana, as charted by the HRC Sky Division. Every world in this chapter lies inside Terrana's bubble, between the sky and its outer wall.

Space Above Terrana

Air: Space above Terrana is not a vacuum. It is thin, cold, and windy, but it can be breathed, and a person can stand on an open deck among the stars without a helmet.

Gravity: Gravity always pulls toward Terrana, as though it were the center of everything, but the pull weakens the farther you go. Out among the worlds you are drawn to whatever large thing is closest: your ship, a station, or the nearest planet.

Speed and Wind: Most ships are airtight, because at high speed the wind would tear the air and anything loose right out of them. At a normal pace an open deck is safe.

Sailing Ships: Old-style wooden warships still sail between the worlds, driven by great Air Magic circles fixed to their masts and hulls. Space pirates are very real.

The Powers of the Sky

The Hero Rangers Corps Sky Division: The HRC's exploration fleet, much like a starfleet of explorers and diplomats. Its starships chart new worlds, keep the peace, and fight the Kaiju and voidlings that still come out of the dark. HRC ranks run 1 to 7 as on Terrana, and Guild Standing in the HRC is your rank.

The Mercenaries Guild: What the Adventurers Guild is on Terrana, the Mercenaries Guild is in space. Its members are freelance crews who pilot their own ships and take whatever work pays: escort runs, salvage, bounties, and jobs nobody asks questions about. Its great hall is on Kordrane.

The Free Reaches: Independent worlds and stations that answer to no crown. Kordrane, a rust-red mercenary port ringed by orbital stations, is its busiest world.

Vessaril: A green garden world and the HRC's first ally. Vessaril is peaceful, beautiful, and fiercely protective of its forests.

The Silver Court of Lunaria: A kingdom on Terrana's own Moon, hidden from the surface for most of history. Its court is elegant and ceremonial, its royal line is guarded by sworn protectors with their own names and colors, and its people draw on the light of the Moon itself. The Silver Court sees itself as the Moon's ancient guardian and treats the HRC as a younger but welcome ally.

The Aurelion Dominion: A great space monarchy ruled from the ringed throne world of Aurelion. Like the other astral kingdoms, it spans several planets, each held by a noble house sworn to the throne: desert worlds rich in rare crystals, ocean worlds, and fortress moons. Its houses scheme against each other constantly, and the Dominion's favor is worth more than gold.

The Varkesh Throne: A rival crown openly hostile to the HRC, ruling a dim cluster of worlds near the Sun's far side. The Varkesh see Terrana's expansion into the sky as an invasion, and their fleets test the HRC's borders often.

Nyxhollow and the Outer Dark: Nyxhollow is a dark world full of the voidlings that sometimes break into

Terrana, and the farthest the HRC has ever reached. Its energy resembles the Rift's, but the signal leads further still, into the Outer Dark, where no ship has gone and come back.

Campaign Ideas

Bounty on Kordrane: A Mercenaries Guild crew takes a simple escort job and discovers their passenger is an heir the whole Aurelion Dominion is hunting.

First Contact: An HRC starship answers a distress call from a world no chart shows, and the people there have been waiting for them.

The Moon Princess: The Silver Court's heir vanishes during a state visit to Monsera, and the party is all that stands between the HRC and an interplanetary incident.

Ships

Ships use the vehicle rules from Chapter 14. A ship's Rating comes from its rank like any other item and adds to the rolls made to fly and fight with it. Each size class needs a minimum crew to fly at all; a ship short on crew can still move, but it cannot use the stations that have no one in them.

Crew Stations

Pilot: Flies the ship. Pilot rolls for maneuvers, chases, and dodging fire.

Gunner: Fires the ship's weapons, using Perception + Ranged + Iron Rain.

Engineer: Keeps the ship running and repairs damage. Crafts or Implements rolls.

Sensors: Scans, tracks, and spots threats. Awareness rolls.

Captain: Commands and coordinates. Once per turn the captain can give one crew member +2 dice with a Presence or Diplomacy roll.

Ship Damage: A ship takes hits exactly like a character. Its BDT is its Armor + its Size, so small arms rarely scratch a big ship. Its Hull Track has the same three columns as a character's health track: a hit that meets the ship's BDT marks a Bashing box (dents and scrapes), its LDT a Lethal box (hull breaches), and its ADT an Aggravated box (critical systems). A fighter's track matches a person's (7 Bashing, 5 Lethal, 3 Aggravated), and each size above 1 adds 2 boxes to every column. A ship that fills its Hull Track is disabled, not destroyed, unless the Storyteller says otherwise.

Ship Size Classes

Hull Track boxes are Bashing / Lethal / Aggravated. Max Capacity is everyone the ship can carry, crew and passengers.

Class	Size	Crew Needed	Max Capacity	Hull Track	Typical Price	Examples
Fighter	1	1	2	7 / 5 / 3	3 Large Gold	Interceptors, racing skiffs
Shuttle	1	1	4	7 / 5 / 3	2 Large Gold	Landers, couriers
Corvette	2	2	10	9 / 7 / 5	1 King's Gold	Mercenary ships, smugglers, pirate sloops
Frigate	3	6	25	11 / 9 / 7	5 King's Gold	HRC patrol ships, noble escorts, pirate galleons
Cruiser	4	20	100	13 / 11 / 9	Not sold to private crews	HRC starships, house warships
Capital Ship	5	100	1,000	15 / 13 / 11	Never for sale	Flagships of the astral kingdoms
Station	6	500	10,000 to 100,000	17 / 15 / 13	Never for sale	Orbital ports, Kordrane's rings

Space Era Gear

Everything in Chapter 14 still exists, though most of it is old-fashioned. Energy weapons use the same Styles as the weapons they replace, and their Rating comes from their rank like any other weapon.

Energy Weapons Are Attuned: Blasters and energy blades are implements, but unlike other implements they only work for someone attuned to them. Attuning holds part of your Max Mana Per Turn equal to the weapon's Rating for as long as you stay attuned. An unattuned blaster or energy blade cannot be used at all.

Space Era Gear

Item	Style or Use	Damage	Range	Properties
Energy blade	Silver Arc or Quickcut	Dexterity	Adjacent	Attuned, Versatile; ignores 1 Armor
Blaster pistol	Sundown	Perception	Line of sight	Attuned, Loud, Reload (20)
Blaster rifle	Iron Rain	Perception	Line of sight	Attuned, Two-Handed, Loud, Reload (30)
Heavy repeater	Iron Rain	Perception	Line of sight	Attuned, Two-Handed, Loud, Mounted, Reload (60)
Stun baton	Other (Melee)	Strength	Adjacent	Electric damage
Flight suit	Light armor	None	None	Keeps out the wind and cold of fast travel
Combat armor	Medium armor	None	None	Sealed against wind and cold; built-in sensors (+1 Awareness)
Power armor	Heavy armor	None	None	Sealed against wind and cold; +1 Strength while worn; needs a crystal cell
Replicator	Implement	None	None	Makes food and simple objects from mana crystals
Translator	Implement	None	None	Understand and be understood in most known languages
Comm crystal	Implement	None	None	Interstellar CCN access wherever there is a relay

Playable Species

Many species live among the stars. A player can design their own with the Storyteller, using the Spacefaring Species template, or choose one of the optional species below. Every species follows the same pattern as the heritages in Chapter 8: a lifespan, an Innate Attribute, an Innate Flaw, an Attribute Flaw, a few Heritage Merit options, and a Heritage magic.

Spacefaring Species (Template)

Lifespan: Choose one tier with the Storyteller: 100, 200, 400, or 1000 years.

Innate Attribute: Choose one attribute that fits the species with the Storyteller.

Innate Flaw: Choose one drawback with the Storyteller, about as strong as the flaws in Chapter 8.

Attribute Flaw: Choose one attribute group that can never be your Affinity column.

Heritage Merits: Pick broad options the way Demon does: a free specialty, a natural sense, a natural weapon, or a tolerance to one environment.

Heritage Magic: Design it with the Storyteller following the Tribal Magic guidelines in the Demon heritage (Chapter 8): seven ranks, two choices per rank, mana equal to rank.

Aurelians

Who They Are: The golden-skinned, tall, and long-lived people of the Aurelion Dominion, raised in a culture of noble houses and endless politics.

Lifespan: 400 years.

Innate Attribute: Composure.

Innate Flaw: Proud Blood: -1 die on rolls to deceive or flatter anyone they consider beneath their house.

Attribute Flaw: Physical.

Heritage Merit (choose 1): Courtly Bearing: Grants a free specialty in Etiquette called Courtly Bearing, providing a bonus die in noble courts, formal events, and any room where rank matters. Golden Presence: Grants a free specialty in Presence called Golden Presence, providing a bonus die to command attention or be obeyed by anyone who sees you as nobility.

Heritage Magic: Sovereign Light. Radiance and command: auras of authority, light, and influence over crowds.

Heritage Magic: Sovereign Light

Aurelian houses rule by bearing as much as by law. Sovereign Light is the radiance of a noble line: golden light that dazzles and burns, and a voice that others find very hard to refuse.

Primary: Composure + Presence + Sovereign Light

Secondary: Charisma + Diplomacy + Sovereign Light

Extra mana: Attack only. 1 die per mana, up to your Sovereign Light dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Gilded Bearing
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | Type: Enhancement, Attuned
Use: Combat and outside combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, add 1 die to Etiquette and Presence rolls with anyone who can see you.

B. Halo
Mana Cost: 1
Speed: Instant | Type: Utility
Use: Combat and outside combat | Range: Self
Dice Pool: None | Defense: None
Effect: A soft golden light surrounds you, lighting your zone and every adjacent zone until the end of the scene.

Rank 2 Terrestrial (choose one)

A. Command
Mana Cost: 2
Speed: Instant | Type: Debuff
Use: Combat and outside combat | Range: One target in sight who can hear you
Dice Pool: Composure + Presence + Sovereign Light | Defense: Composure + Insight
Effect: The target resists with Composure + Insight. If you beat them, they obey a one-word command, such as Halt, Drop, or Kneel, on their next turn, as long as it does not directly harm them.

B. Radiant Lance
Mana Cost: 2
Speed: Instant | Type: Attack
Use: Combat | Range: One target in sight
Dice Pool: Composure + Presence + Sovereign Light | Defense: Target's choice of defense
Effect: A spear of golden light. Damage is radiant. Add your Heritage dots to the damage roll.

Rank 3 Aerial (choose one)

A. Banner of the House
Mana Cost: 3, upkeep 2 each Upkeep Phase
Speed: Instant, Extended | Type: Enhancement, Persistent
Use: Combat | Range: Allies who can see you
Dice Pool: Charisma + Diplomacy + Sovereign Light | Defense: None
Effect: While maintained, allies who can see you add 1 die to attack rolls.

B. Blinding Flare
Mana Cost: 3
Speed: Instant | Type: Debuff
Use: Combat | Range: All adjacent zones
Dice Pool: Composure + Presence + Sovereign Light | Defense: Perception + Awareness
Effect: Every enemy in range resists with Perception + Awareness. Each one you beat suffers -2 dice on sight-based rolls and attacks on their next turn.

Rank 4 Lunar (choose one)

A. Aura of Majesty
Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | Type: Defense, Attuned
Use: Combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, the first enemy each turn who attacks you suffers -2 dice on that attack.

B. Decree
Mana Cost: 4, lasts half the mana spent in turns, rounded up; pay 3 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | Type: Debuff, Countdown
Use: Combat and outside combat | Range: One target in sight who can hear you
Dice Pool: Charisma + Diplomacy + Sovereign Light | Defense: Composure + Insight
Effect: Name one action: attacking you, casting a spell, or leaving their zone. If you beat the target, they cannot take that action until the countdown runs out or they beat your casting successes with Composure + Insight on their turn.

Rank 5 Stellar (choose one)

A. Solar Judgment
Mana Cost: 5
Speed: Instant | Type: Attack
Use: Combat | Range: One target in sight
Dice Pool: Composure + Presence + Sovereign Light | Defense: Target's choice of defense
Effect: A column of light falls on the target. Damage is radiant. Add your Heritage dots to the damage roll, and on a hit the target suffers -2 dice on its next attack.

B. Rally the Court
Mana Cost: 5
Speed: Instant | Type: Healing
Use: Combat and outside combat | Range: Allies in sight who can hear you
Dice Pool: Charisma + Diplomacy + Sovereign Light | Defense: None
Effect: Each ally in range gains a PHP equal to half your casting successes, rounded up. Healing tier: Basic.

Rank 6 Galactic (choose one)

A. Throne of Light
Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | Type: Defense, Persistent
Use: Combat | Range: Your zone and every adjacent zone
Dice Pool: None | Defense: None
Effect: While maintained, allies in range add your Heritage dots to their BDT. This counts as the magic part of their BDT.

B. Kneel
Mana Cost: 6
Speed: Instant | Type: Debuff
Use: Combat | Range: Every enemy in sight who can hear you
Dice Pool: Composure + Presence + Sovereign Light | Defense: Composure + Insight
Effect: Roll once; each enemy resists separately. Every enemy you beat is knocked Prone and cannot stand until the end of their next turn.

Rank 7 Cosmic (choose one)

A. Sovereign Sun
Mana Cost: 7
Speed: Instant | Type: Attack
Use: Combat | Range: Every enemy in sight
Dice Pool: Composure + Presence + Sovereign Light | Defense: Target's choice of defense
Effect: Roll once; each target defends separately. Damage is radiant. Undead and Void creatures add your Heritage dots to the damage they take.

B. Unbreakable Oath
Mana Cost: 7
Speed: Extended | Type: Utility
Use: Outside combat | Range: One willing target in sight
Dice Pool: Charisma + Diplomacy + Sovereign Light | Defense: None
Effect: Bind a willing person to an oath. While they keep it, once per scene they add your Heritage dots to one roll that serves it. If they break it, they mark X's on their Willpower equal to your Heritage dots.

Lunarians

Who They Are: The silver-haired people of the Moon and the Silver Court, graceful and ceremonial, who draw strength from moonlight.

Lifespan: 1000 years.

Innate Attribute: Charisma.

Innate Flaw: Moonbound: -1 die on all rolls on a world or in a place with no moonlight for more than a day.

Attribute Flaw: Physical.

Heritage Merit (choose 1): Moonsight: Grants a free specialty in Awareness called Moonsight, providing a bonus die on sight rolls by moonlight or starlight, and lets you see by them as well as by day. Silver Grace: Grants a free specialty in Performance called Silver Grace, providing a bonus die on dance, ceremony, and any performance meant to awe.

Heritage Magic: Moonweave. Moonlight: healing light, protective wards, illusions, and transformation.

Heritage Magic: Moonweave

The Silver Court learned long ago that moonlight is gentle and deceptive at once. Moonweave heals with cool silver light, guards with crescent wards, and fills the dark with shapes that are not really there.

Primary: Charisma + Expression + Moonweave

Secondary: Wisdom + Attunement + Moonweave

Extra mana: Attack or damage. 1 die per mana, up to your Moonweave dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Silver Glow
Mana Cost: 1
Speed: Instant | Type: Utility
Use: Combat and outside combat | Range: Self
Dice Pool: None | Defense: None
Effect: Soft moonlight fills your zone and every adjacent zone until the end of the scene. Illusions inside it shimmer: +1 die to see through them.

B. Glamour Veil
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | Type: Utility, Attuned
Use: Combat and outside combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, change small details of your appearance: hair, eyes, voice, or clothing.

Rank 2 Terrestrial (choose one)

A. Moonbeam
Mana Cost: 2
Speed: Instant | Type: Attack
Use: Combat | Range: One target in sight
Dice Pool: Charisma + Expression + Moonweave | Defense: Target's choice of defense
Effect: A beam of cold silver light. Damage is radiant. Add half your Heritage dots, rounded up, to the damage roll, or all of them at night.

B. Soothing Light
Mana Cost: 2
Speed: Instant | Type: Healing
Use: Combat and outside combat | Range: One target in an adjacent zone
Dice Pool: Wisdom + Attunement + Moonweave | Defense: None
Effect: The target gains a PHP equal to your casting successes. Healing tier: Basic.

Rank 3 Aerial (choose one)

A. Phantom Double
Mana Cost: 3, upkeep 2 each Upkeep Phase
Speed: Instant, Extended | Type: Defense, Persistent
Use: Combat | Range: Self
Dice Pool: None | Defense: None
Effect: While maintained, an illusory twin moves with you. The first attack against you each turn suffers -2 dice.

B. Crescent Ward
Mana Cost: 3, attuned (stays committed)
Speed: Instant, Extended | Type: Defense, Attuned
Use: Combat | Range: One ally in sight
Dice Pool: None | Defense: None
Effect: While attuned, a silver crescent shields the ally, adding 1 to their BDT. This counts as the magic part of their BDT.

Rank 4 Lunar (choose one)

A. Lunar Mend
Mana Cost: 4
Speed: Instant | Type: Healing
Use: Combat and outside combat | Range: One target in an adjacent zone
Dice Pool: Wisdom + Attunement + Moonweave | Defense: None
Effect: The target gains a PHP equal to your casting successes. Healing tier: Advanced.

B. Illusory Terrain
Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | Type: Debuff, Persistent
Use: Combat and outside combat | Range: Up to 2 connected zones in sight
Dice Pool: Charisma + Expression + Moonweave | Defense: Wisdom + Insight
Effect: The zones look like a wall, a chasm, or deep water. Each enemy resists with Wisdom + Insight the first time it tries to enter; one you beat treats the zones as blocked while the spell lasts.

Rank 5 Stellar (choose one)

A. Moonform
Mana Cost: 5, attuned (stays committed)
Speed: Instant, Extended | Type: Enhancement, Attuned
Use: Combat and outside combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, you take a radiant silver form: you fly at double your movement, add 1 die to Dodge rolls, and glow like the Moon.

B. Mirror Ward
Mana Cost: 5
Speed: Reaction | Type: Defense
Use: Combat | Range: Self or one ally in an adjacent zone
Dice Pool: Wisdom + Attunement + Moonweave | Defense: None
Effect: When a spell targets the warded person, roll. If your successes beat the casting roll, the spell turns back on its caster.

Rank 6 Galactic (choose one)

A. Full Moon Rite
Mana Cost: 6
Speed: Instant | Type: Healing
Use: Combat and outside combat | Range: Every ally in your zone and adjacent zones
Dice Pool: Wisdom + Attunement + Moonweave | Defense: None
Effect: Each ally in range gains a PHP equal to half your casting successes, rounded up. Healing tier: Advanced.

B. Eclipse
Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | Type: Debuff, Persistent
Use: Combat | Range: Your zone and every zone within 2
Dice Pool: None | Defense: None
Effect: While maintained, darkness fills the area that only you can see through. Enemies inside suffer -2 dice on attacks and Awareness rolls.

Rank 7 Cosmic (choose one)

A. Moon's Embrace
Mana Cost: 7
Speed: Instant | Type: Healing
Use: Combat and outside combat | Range: One target in sight
Dice Pool: Wisdom + Attunement + Moonweave | Defense: None
Effect: The target gains a PHP equal to your casting successes. Healing tier: Expert.

B. Lunar Sovereignty
Mana Cost: 7
Speed: Instant | Type: Attack
Use: Combat | Range: Every enemy in sight
Dice Pool: Charisma + Expression + Moonweave | Defense: Target's choice of defense
Effect: Roll once; each target defends separately. Damage is radiant. Every enemy you hit suffers -2 dice on all rolls on their next turn.

Vessari

Who They Are: Plant-like people of the garden world Vessaril, with bark-patterned skin and leaves for hair. Patient, gentle, and terrifying when their forests are threatened.

Lifespan: 400 years.

Innate Attribute: Wisdom.

Innate Flaw: Sun-Fed: without sunlight or strong light for a full day, they cannot recover Willpower checks or heal Bashing damage until they get it.

Attribute Flaw: Social.

Heritage Merit (choose 1): Rooted: Grants a free specialty in Endurance called Rooted, providing a bonus die to resist being moved, pushed, or knocked Prone while standing on soil or living wood. Green Voice: Grants a free specialty in Survival called Green Voice, providing a bonus die to read the health of plants, find food, and track through forests and gardens.

Heritage Magic: Rootsong. Growth and roots: speaking with plants, rooting in place, regrowing from wounds.

Heritage Magic: Rootsong

Every Vessari is part of a forest, even light-years from home. Rootsong speaks with growing things, roots the singer in place, and lets living wood close wounds and rise as walls and guardians.

Primary: Wisdom + Survival + Rootsong

Secondary: Composure + Endurance + Rootsong

Extra mana: Attack or damage. 1 die per mana, up to your Rootsong dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Green Whisper
Mana Cost: 1
Speed: Instant | Type: Utility
Use: Outside combat | Range: Plants in your zone and adjacent zones
Dice Pool: Wisdom + Survival + Rootsong | Defense: None
Effect: The plants answer one simple question per success about what has passed by them.

B. Barkskin
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | Type: Defense, Attuned
Use: Combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, your skin hardens into bark, adding 1 to your BDT. This counts as the magic part of your BDT.

Rank 2 Terrestrial (choose one)

A. Thorn Lash
Mana Cost: 2
Speed: Instant | Type: Attack
Use: Combat | Range: One target up to 2 zones away
Dice Pool: Wisdom + Survival + Rootsong | Defense: Target's choice of defense
Effect: A whip of thorned vine. Damage is piercing. Add your Heritage dots to the damage roll.

B. Take Root
Mana Cost: 2, attuned (stays committed)
Speed: Instant, Extended | Type: Defense, Attuned
Use: Combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, you cannot be moved, pushed, or knocked Prone, but you cannot move either.

Rank 3 Aerial (choose one)

A. Grasping Vines
Mana Cost: 3
Speed: Instant | Type: Debuff
Use: Combat | Range: One target in sight
Dice Pool: Wisdom + Survival + Rootsong | Defense: Strength + Athletics
Effect: The target resists with Strength + Athletics. If you beat them, they gain the Rooted condition until they beat your casting successes with Strength + Athletics on their turn.

B. Sap Mend
Mana Cost: 3
Speed: Instant | Type: Healing
Use: Combat and outside combat | Range: Self or one target in an adjacent zone
Dice Pool: Composure + Endurance + Rootsong | Defense: None
Effect: The target gains a PHP equal to your casting successes and the Bleeding condition ends. Healing tier: Basic.

Rank 4 Lunar (choose one)

A. Living Wall
Mana Cost: 4, upkeep 3 each Upkeep Phase
Speed: Instant, Extended | Type: Defense, Persistent
Use: Combat and outside combat | Range: Up to 2 connected empty zones in sight
Dice Pool: None | Defense: None
Effect: While maintained, a wall of living wood fills the zones. It blocks movement and gives full cover. An attack breaks one zone of it only if the attacker rolls more successes than you did when casting.

B. Regrowth
Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | Type: Healing, Attuned
Use: Combat and outside combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, during each Upkeep Phase you neutralize 1 Bashing damage.

Rank 5 Stellar (choose one)

A. Briar Field
Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | Type: Attack, Persistent
Use: Combat | Range: Up to 3 connected zones in sight
Dice Pool: Wisdom + Survival + Rootsong | Defense: Dexterity + Acrobatics
Effect: While maintained, thorns fill the zones and make them Difficult Terrain. During each Upkeep Phase, roll once against every enemy in them; each defends separately. Damage is piercing.

B. Forest's Patience
Mana Cost: 5
Speed: Instant | Type: Healing
Use: Combat and outside combat | Range: Every ally in your zone and adjacent zones
Dice Pool: Composure + Endurance + Rootsong | Defense: None
Effect: Each ally in range gains a PHP equal to half your casting successes, rounded up. Healing tier: Advanced.

Rank 6 Galactic (choose one)

A. Treant Call
Mana Cost: 6
Speed: Instant | Type: Conjuration
Use: Combat | Range: An empty adjacent zone
Dice Pool: Wisdom + Survival + Rootsong | Defense: None
Effect: An awakened tree rises. It cannot act on the turn it is summoned. On later turns you can command it to attack a target in an adjacent zone using your Primary dice pool (damage is kinetic) or to hold its zone. It has your BDT and falls when a hit meets its LDT.

B. Heartwood
Mana Cost: 6, attuned (stays committed)
Speed: Instant, Extended | Type: Defense, Attuned
Use: Combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, add your Heritage dots to your BDT against physical attacks. This counts as the magic part of your BDT.

Rank 7 Cosmic (choose one)

A. World Tree
Mana Cost: 7, upkeep 6 each Upkeep Phase
Speed: Instant, Extended | Type: Healing, Persistent
Use: Combat and outside combat | Range: Your zone and every zone within 2
Dice Pool: Composure + Endurance + Rootsong | Defense: None
Effect: A great tree grows where you stand. While maintained, during each Upkeep Phase every ally in range gains a PHP equal to your Heritage dots. Healing tier: Advanced.

B. Forest Wrath
Mana Cost: 7
Speed: Instant | Type: Attack
Use: Combat | Range: Every enemy within 3 zones
Dice Pool: Wisdom + Survival + Rootsong | Defense: Target's choice of defense
Effect: Roots and thorns erupt from every surface. Roll once; each target defends separately. Damage is piercing. Every enemy you hit gains the Rooted condition until the end of their next turn.

Gravkin

Who They Are: Short, dense, immensely strong people from heavy-gravity worlds in the Free Reaches. Many crew mercenary ships as loaders and enforcers.

Lifespan: 200 years.

Innate Attribute: Strength.

Innate Flaw: Heavy Frame: cannot swim, and -1 die on Acrobatics rolls.

Attribute Flaw: Mental.

Heritage Merit (choose 1): Dense Frame: Grants a free specialty in Endurance called Dense Frame, providing a bonus die to resist being knocked back, knocked Prone, or crushed. Gravity-Born: Grants a free specialty in Athletics called Gravity-Born, providing a bonus die to lift, carry, and throw, and to move in strong or shifting gravity.

Heritage Magic: Weight of Worlds. Gravity: growing heavier, anchoring, pulling, and crushing.

Heritage Magic: Weight of Worlds

Gravkin grow up where the ground pulls hard, and they carry that pull with them. Weight of Worlds makes the caster heavier or lighter at will, drags enemies down, and turns a dropped fist into a falling star.

Primary: Strength + Athletics + Weight of Worlds

Secondary: Fortitude + Endurance + Weight of Worlds

Extra mana: Damage only. 1 die per mana, up to your Weight of Worlds dots or Max Mana Per Turn, whichever comes first.

Rank 1 Core (choose one)

A. Anchor
Mana Cost: 1, attuned (stays committed)
Speed: Instant, Extended | Type: Defense, Attuned
Use: Combat and outside combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, nothing can push, pull, or knock you Prone unless it beats your Strength + Athletics.

B. Featherweight
Mana Cost: 1
Speed: Instant | Type: Utility
Use: Combat and outside combat | Range: Self or one object you touch
Dice Pool: None | Defense: None
Effect: Until the end of the scene, the target weighs a tenth as much and halves any falling damage it takes.

Rank 2 Terrestrial (choose one)

A. Heavy Blow
Mana Cost: 2
Speed: Instant | Type: Attack
Use: Combat | Range: Melee
Dice Pool: Strength + Athletics + Weight of Worlds | Defense: Target's choice of defense
Effect: Your fist lands with the weight of a boulder. Damage is kinetic. Add your Heritage dots to the damage roll, and on a hit push the target one zone.

B. Pull
Mana Cost: 2
Speed: Instant | Type: Utility
Use: Combat and outside combat | Range: One target or object in sight
Dice Pool: Strength + Athletics + Weight of Worlds | Defense: Strength + Athletics
Effect: Pull the target one zone toward you. A creature resists with Strength + Athletics.

Rank 3 Aerial (choose one)

A. Gravity Well
Mana Cost: 3, upkeep 2 each Upkeep Phase
Speed: Instant, Extended | Type: Debuff, Persistent
Use: Combat | Range: One zone in sight and every zone adjacent to it
Dice Pool: None | Defense: None
Effect: While maintained, the area is Difficult Terrain, and flying creatures in it must land.

B. Crushing Weight
Mana Cost: 3, lasts half the mana spent in turns, rounded up; pay 2 in an Upkeep Phase to freeze the countdown
Speed: Instant, Extended | Type: Debuff, Countdown
Use: Combat | Range: One target in sight
Dice Pool: Strength + Athletics + Weight of Worlds | Defense: Strength + Athletics
Effect: If you beat the target, their weight doubles: -2 dice on physical rolls and 1 less zone of movement, until the countdown runs out or they beat your casting successes with Strength + Athletics on their turn.

Rank 4 Lunar (choose one)

A. Ground Slam
Mana Cost: 4
Speed: Instant | Type: Attack
Use: Combat | Range: All adjacent zones
Dice Pool: Strength + Athletics + Weight of Worlds | Defense: Target's choice of defense
Effect: Roll once; each target defends separately. Damage is kinetic. Every enemy you hit is knocked Prone.

B. Weightless Leap
Mana Cost: 4, attuned (stays committed)
Speed: Instant, Extended | Type: Movement, Attuned
Use: Combat and outside combat | Range: Self
Dice Pool: None | Defense: None
Effect: While attuned, you can leap up to 3 zones as your movement and walk on walls and ceilings.

Rank 5 Stellar (choose one)

A. Meteor Drop
Mana Cost: 5
Speed: Instant | Type: Attack
Use: Combat | Range: One target in sight
Dice Pool: Strength + Athletics + Weight of Worlds | Defense: Target's choice of defense
Effect: Hurl yourself into the air and come down on the target, landing in an empty zone next to them. Damage is kinetic. Add your Heritage dots to the damage roll.

B. Orbit
Mana Cost: 5, upkeep 4 each Upkeep Phase
Speed: Instant, Extended | Type: Defense, Persistent
Use: Combat | Range: Self
Dice Pool: None | Defense: None
Effect: While maintained, loose debris circles you. Ranged attacks against you suffer -2 dice, as if you had half cover.

Rank 6 Galactic (choose one)

A. Singularity
Mana Cost: 6
Speed: Instant | Type: Attack
Use: Combat | Range: One zone in sight and every zone adjacent to it
Dice Pool: Strength + Athletics + Weight of Worlds | Defense: Target's choice of defense
Effect: Every enemy in the area is pulled one zone toward the center. Then roll once; each target defends separately. Damage is crushing.

B. Heavy World
Mana Cost: 6, upkeep 5 each Upkeep Phase
Speed: Instant, Extended | Type: Debuff, Persistent
Use: Combat | Range: Every enemy in sight
Dice Pool: Strength + Athletics + Weight of Worlds | Defense: Strength + Athletics
Effect: Roll once; each enemy resists separately. While maintained, every enemy you beat moves at half movement, rounded down, and cannot fly.

Rank 7 Cosmic (choose one)

A. Collapse
Mana Cost: 7
Speed: Instant | Type: Attack
Use: Combat | Range: One target in sight
Dice Pool: Strength + Athletics + Weight of Worlds | Defense: Target's choice of defense
Effect: Gravity folds in on the target. Damage is crushing. Add your Heritage dots to the damage roll. On a hit the target is knocked Prone and gains the Rooted condition until the end of their next turn.

B. Center of the World
Mana Cost: 7, attuned (stays committed)
Speed: Instant, Extended | Type: Utility, Attuned
Use: Combat and outside combat | Range: Self and up to your Heritage dots willing allies in sight
Dice Pool: None | Defense: None
Effect: While attuned, you choose which way gravity pulls for yourself and the chosen allies. You can all walk on any surface and fall in any direction you choose.

Index: Key Terms

In This Chapter

Key Terms **2**
Dice and Rolls 2
Character Creation 2
Character Stats 2
Rank Scale 3
Combat and Movement 3
Damage and Health 4
Conditions 4
Incapacitation and Death 5
Social Combat 5
Mana and Magic 5
Spell Keywords 6
Combination and Circle Magic 6
Weapons, Armor, and Items 6

Every term below is explained in full in the chapter named after it. This index is for quick lookup at the table: terms are grouped by topic and listed alphabetically within each group. Page numbers will be added once the whole book is compiled.

Dice and Rolls

Bonus Die: An extra die added to a roll by a specialty, a Boon, a scale position, AP, Willpower, mana, or an ability.

Called Shot *(Ch. 12)*: Aiming at a specific limb, weapon, or vital spot costs -2 dice. Its effect only happens if the attack hits.

Dice Pool: The number of d10s rolled for an action, usually an Attribute + an Ability, plus any Style or school dots and bonus dice.

Excess Successes: Successes the attacker rolls beyond the defender's roll. They carry forward and are added to the damage roll.

Penalty Die: A die removed from a roll by a Bane, a scale position, a wound penalty, or an enemy's technique. Penalties on enemies stay flat; they never scale with dots.

Success: Any die showing 6 or higher is 1 success. A 10 counts as 2 successes. There are no critical failures.

Character Creation

Affinity, Standard, Aversion *(Ch. 6)*: The three attribute columns. The number next to each is both its cap and its points to spend: 6, 5, and 4. They also set Combat Style or Magical Knowledge dots at creation: 7, 5, and 3.

Attribute Flaw *(Ch. 8)*: One attribute group a heritage can never take as its Affinity column. Hyumans and Vampires have none.

Driving Factor *(Ch. 7)*: What your character wants. Each one belongs to a scale and a side; you start with one for each of your two highs.

Freebie Points *(Ch. 6)*: 7 points to spend at the end of creation (a Newb), or 14 (Veteran) or 28 (Legend) if the Storyteller allows. Attribute 3, Ability 2, Combat Style, Magical Knowledge, or Heritage magic 4, Background 1, Mana 7 per dot. They cannot buy Merits, Flaws, Willpower, Fate, Sanity, or other Heritage traits.

Funds *(Ch. 14)*: The money your character has on hand, tracked next to Resources on the sheet.

Golden Rule *(Ch. 6)*: Nothing on the sheet can be filled above 5 dots at character creation, not even with Freebie Points.

Heritage *(Ch. 8)*: Your character's people. Sets lifespan, an Innate Attribute, an Innate Flaw, an Attribute Flaw, Heritage Merits, and Heritage magic.

Level *(Ch. 6)*: The total of your dots in Attributes (including Mana), Abilities, Combat Styles, and Magical Knowledges (including Heritage magic). Merits, Flaws, Backgrounds, Willpower, Fate, Sanity, and the scales do not count.

Past Life Occupation *(Ch. 6)*: What your character did before arriving in Terrana. Mark PL on 3 abilities tied to it (up to 5 with Storyteller approval). Each PL ability gets a free specialty, and raising it costs new dot x2 XP.

Primary (P) *(Ch. 6)*: Every Combat Style and Magical Knowledge taken in creation Steps 10 and 11, plus the free Heritage magic dot, is marked P and costs new dot x5 XP.

Role *(Ch. 6)*: Your battlefield position: a line (Frontline, Midline, Backline) plus one word for how you fight, such as Backline Mage.

Scale Positions *(Ch. 7)*: Each of the seven Virtue and Vice scales has five positions: High Virtue (2), Low Virtue (1), Central (0), Low Vice (1), and High Vice (2). The number is how many dice it adds or removes.

Secondary (S) *(Ch. 6)*: Every Combat Style and Magical Knowledge gained after creation Steps 10 and 11 is marked S and costs new dot x6 XP.

Specialty *(Ch. 6)*: A condition written next to an ability that adds a bonus die when it applies. Up to 3 per ability. At creation, one is free for any ability at 4 or more dots and one for each PL ability; the rest cost 5 XP.

Trope *(Ch. 7)*: Your character's personality archetype. Each gives a Boon (+1 die with one ability) and a Bane (-1 die with another).

Character Stats

Dots and Boxes *(Ch. 11)*: Willpower, Fate, and Sanity each have 10 dots and a row of 10 boxes. Checks fill from the left, X's from the right, and nothing resets on rest. A full row of checks gains a dot; a full row of X's loses one. None can go below 1 or above 10.

Fate *(Ch. 11)*: Your karmic weight in the world and your power to bend its story. Never spent; built and lost through influence and Fate contests.

Fate Contest *(Ch. 11)*: Both sides roll their Fate as a dice pool; most successes wins, the defender wins ties. Opposing Fate can be pooled.

Guild Standing *(Ch. 10)*: Your rank in one guild, 1 to 7. The Storyteller sets the limit at creation, usually 3. In the HRC, it is your Corps rank.

Mana (Attribute) *(Ch. 11)*: Rated 1 to 10, the only trait with ten dots. Every character starts with 1. Freebies cost 7 per dot; XP costs new dot x7.

Resources *(Ch. 10)*: Wealth, income, and lifestyle. Every character starts with 1 free dot: a modest life in a one-bedroom apartment or dorm room.

Sanity *(Ch. 11)*: Your hold on reality and your dice pool for resisting the Void. Lost dots bring traumas, from a phobia at 4 to severe trauma at 2. At 1 and at 10 the Storyteller takes control of the character.

Willpower *(Ch. 11)*: Mental and emotional resilience and the health track for social combat. Spend 1 per turn, as no action, to add 3 dice before a roll or reroll up to 3 failed dice after it. Each spend marks an X.

Rank Scale

Dots, ranks, and Ratings share one scale across the whole game.

Dots	Rank	Combat Styles	Magical Knowledges	Item and Weapon Rating
1	F	Elementary	Core	+1
2	E	Intermediate	Terrestrial	+2
3	D	Advanced	Aerial	+3
4	C	Saint	Lunar	+4
5	B	Royal	Stellar	+5
6	A	Imperial	Galactic	+6
7	S	Divine	Cosmic	+7

Combat and Movement

Action Points (AP) *(Ch. 6)*: Hold up to 3 AP; use up to 6 in one turn. Regain 1 during Upkeep, or 2 if you took damage. Spend 1, 3, or 6 AP for +1, +2, or +3 dice, or for 1, 2, or 3 extra zones of movement.

Shared AP *(Ch. 6)*: Allies can give AP freely at no action cost, from any mix of allies, but no one uses more than 6 AP in a turn.

Zone: One square on the battlefield. Only one creature or object can occupy a zone; nothing is ever "in your zone" except you.

Movement: Dexterity 1 to 4: 1 zone per turn. Dexterity 5 to 6: 2 zones. Dexterity 7: 3 zones. Standing from Prone counts as moving 1 zone. A diagonal step counts as 1 zone. Boulders, walls, trees, deep water, and other blocking terrain cannot be crossed.

Difficult Terrain: Mud, rubble, shallow water, ice, deep snow, webs, thorns, brush, and the like. Entering a zone of it costs 1 AP and ends your free movement for the turn. Starting your turn in it does the same. After that, every zone you move, in it or out of it, is bought with AP: 1, then 2 more, then 3 more (1, 3, and 6 AP in all, the same as buying extra zones). Brush and crates are also half cover.

Initiative *(Ch. 6)*: Dexterity + Perception.

Flight *(Ch. 8)*: Anything that flies moves at double its normal movement. Winged flyers use the Athletics specialty Flight.

Mechanical Flight *(Ch. 14)*: Flight from machines, vehicles, and devices. It must use all of its movement every turn or begin to fall.

Empowered Flight *(Ch. 13)*: Battle Aura Rank 6 flight: 6 mana (or 3 Willpower) to take off, 5 mana upkeep at altitude, 3 to hover. Taking damage that meets your BDT forces a Dexterity + Athletics roll or you begin to fall.

Counter *(Ch. 12)*: When your defense roll beats an attack, a Counter strikes back using that same roll as your attack.

Range *(Ch. 14)*: Melee hits adjacent zones (one farther with Reach). Thrown: up to double your Strength in

zones. Bows, guns, and ranged spells: anywhere in line of sight.

Creature Ranks *(Ch. 15)*: Creatures run from F to SSS; SS and SSS jump in power. Stats come from rank and size (Creature Stats by Rank).

Cover *(Ch. 14)*: Draw a line from your square to the target's. Through the front and back of the square it hides behind: full cover, no shot. Only a side and the back, or a corner: half cover, -2 dice.

Armor Penetration *(Ch. 12)*: Lowers the Armor part of a target's BDT for your hit only. Full Armor Penetration ignores all of it. Never lowers Fortitude (including Resilience).

Magic Penetration *(Ch. 12)*: Lowers the magic part of a target's BDT the same way.

Upkeep Phase: Start of your turn: recover mana and AP, pay upkeep for persistent effects, and resolve Burning, Bleeding, Poisoned, and similar triggers.

Planning Phase: Declare movement, item use, attacks, and spells. The Storyteller declares enemy actions.

Move or Use Item Phases: Before and after your action: move your zones, use a belt item, or both by spending AP.

Action Phase: Roll your attack against the target's defense. If you win, your excess successes carry into the damage roll.

Damage Phase: Roll your damage pool, add your excess successes, and compare the total to the target's thresholds.

Ending Phase: Resolve end-of-turn triggers and conditions.

Damage and Health

ADT (Aggravated Damage Threshold) *(Ch. 6)*: BDT x3. Meeting it deals 1 Aggravated.

Bashing, Lethal, Aggravated: The three tiers of damage, from bruises to deep wounds to severe trauma that can leave lasting marks.

BDT (Bashing Damage Threshold) *(Ch. 6)*: Fortitude + Armor, plus any magic. Fortitude includes Resilience if you have that Merit. Meeting it deals 1 Bashing.

Bright and Shade Damage *(Ch. 13)*: Bright damages undead but not the living; Shade damages the living but not undead. Both can help or hinder either.

Damage Pool *(Ch. 14)*: A weapon's damage Attribute + its Rating.

Damage Subtypes: Slashing, Piercing, Kinetic, Burning, Electric, Constricting, Crushing, and Falling describe how an attack hurts and may interact with armor or abilities as the Storyteller rules. An attack never names Bashing, Lethal, or Aggravated; comparing its damage to the target's thresholds decides that.

Falling Damage: 1d10 per 10 feet (one vertical zone). The face values are the damage, not successes; below BDT means no damage.

Healing Tiers *(Ch. 13)*: Healing spells give a PHP. Basic: neutralize 1 Bashing or slake 1 Lethal. Advanced: neutralize 2 Bashing, neutralize 1 Lethal, or slake 1 Aggravated. Expert: neutralize 4 Bashing, 2 Lethal, or 1 Aggravated. Master regrows lost limbs, outside combat only.

LDT (Lethal Damage Threshold) *(Ch. 6)*: BDT x2. Meeting it deals 1 Lethal.

PHP (Pool of Healing Points) *(Ch. 13)*: Healing points equal to the cast successes. The target spends them on their own turn at no action cost. Most pools end at the end of the target's next turn.

Slake and Neutralize *(Ch. 13)*: To slake a damage box is to lower it one tier; to neutralize it is to remove it.

Wound Penalties: The -1, -2, and -4 marked on the health track, applied to rolls as damage fills it. Penalties are cumulative across damage types.

Conditions

Bleeding: Each Upkeep, roll Fortitude + Endurance against the effect's rating: success takes 1 Bashing, failure 1 Lethal. Lasts until healed or Cleansed. Applying pressure (no other actions) stops the next tick.

Blinded: Cannot cast any spell or make an attack that targets a person or zone.

Burning: Each Upkeep, roll Fortitude + Endurance against the effect's rating: success takes 1 Bashing, failure 1 Lethal. Ends with Water Magic, or by spending a full turn putting it out.

Chilled: Penalty dice on Dexterity rolls. Ends with Fire Magic or Cleanse.

Exhausted: No free move or free action; all movement and attacks cost AP. Lasts until an Upkeep Phase outside the affected zone.

Grappled: No belt items or attacks. During Upkeep, roll Strength + Athletics to break free; on a failure, the Action Phase can be used to try again.

Impairment: A lost or useless limb. An arm halves all dice pools (rounded up); a leg removes free movement, so all movement costs AP.

Mana Bleed *(Ch. 13)*: Losing mana during an Upkeep Phase from an ongoing effect, mostly Shade.

Petrified: Works like Rooted and Grappled at once: no moving, attacking, casting, or items. During Upkeep, roll Strength + Athletics against the cast successes to break free.

Poisoned: Each Upkeep, take the poison's damage value against your thresholds. Roll Fortitude + Endurance each turn to lower it. Ends at 0 or with Cleanse.

Prone: Knocked down. Standing up counts as moving 1 zone.

Rooted: Cannot move zones.

Stunned *(Ch. 12)*: Not a separate condition: a stun is written as losing AP on your next turn.

Incapacitation and Death

Incapacitation: Reached when all Aggravated boxes are full, or a hit lands in a column that is already full. The player chooses Fall Unconscious, Risk It, or Blaze of Glory.

Fall Unconscious: The character drops until at least one Aggravated is removed or lowered to Lethal.

Risk It: Keep fighting with all penalties. One more Aggravated and the character dies.

Blaze of Glory: One final turn: every die in the pool counts as a 10 for both attack and damage, and the opponent defends normally. Then the character dies, and cannot be resurrected.

Mana Countdown *(Ch. 13)*: When a character dies without choosing to, the mana they held counts down 1 per day. At 0, an uncremated body rises as mindless undead.

Resurrection *(Ch. 13)*: The six-school combination spell (Fire, Water, Air, Nature, Bright, Shade at 6 dots) that can return someone who died without choosing to, before their mana countdown runs out.

Dungeon Respawn *(Ch. 4)*: In the Grand Dungeon a bracelet sends a fallen delver to their locker instead: all Lethal and Aggravated removed, every Bashing box marked.

Social Combat

Acting Against Your Scales *(Ch. 7)*: Low positions can only cost Willpower; minor violations at a High position cost Willpower, severe ones cost Sanity.

Critical Comeback *(Ch. 11)*: A defender who rolls 5 or more successes over the attacker ends the exchange in their own favor.

End of a Social Combat *(Ch. 11)*: It ends when either side fills their Willpower row with X's, or when 5 or more damage lands in one retort.

Social Combat *(Ch. 11)*: The attacker rolls a Social Attribute + an Ability; the defender rolls Willpower + Composure. Each excess success deals 1 Willpower damage.

Mana and Magic

Attuned *(Ch. 13)*: An effect or item that holds part of your M/T for as long as it is active. Ending it returns the mana during the next Upkeep Phase.

Battle Aura *(Ch. 13)*: The discipline of running mana through body and weapon. From Rank 4 its techniques can be paid with 1 to 4 Willpower, separate from the once-per-turn spend.

Committed Mana *(Ch. 13)*: Mana paid as upkeep for a persistent effect; it counts toward your M/T.

Countdown *(Ch. 13)*: A persistent effect lasts turns equal to half the mana spent, rounded up. Paying upkeep freezes the countdown for that turn.

Default Ability *(Ch. 12, 13)*: The free ability that comes with every dot of a Combat Style, casting school, or Battle Aura.

Elemental Advantage *(Ch. 13)*: Strong advantage +2 dice, moderate +1: Fire beats Nature and Earth, Nature beats

Earth and Air, Earth beats Air and Water, Air beats Water and Fire, Water beats Fire and Nature.

Imbuing *(Ch. 13)*: Carrying one casting school's energy on a physical attack, through Battle Aura from Rank 4 or through an Augmentation. Not combination magic.

Mana Burn *(Ch. 11)*: Spending past your M/T: 1 over deals 1 Bashing, 2 over 1 Lethal, 3 over 1 Aggravated, 4 over 2 Aggravated, then 1 more Aggravated per mana. Any Aggravated from it leaves a permanent mark.

Mana Pool (MP) *(Ch. 11)*: (Magic dots + Circle Magic dots + every Magical Knowledge dot) x Mana.

Mana Recovery *(Ch. 11)*: Each Upkeep: 1 mana at 1 to 3 Mana dots, 2 at 4 to 6, 3 at 7 to 8, 4 at 9, 5 at 10, plus 1 if you took damage. Outside combat, a few minutes of rest refills the pool.

Mana Sickness *(Ch. 11)*: Damage from mana density: Bashing in elevated areas, Lethal in extreme ones. Arrivals with no Mana take Bashing from the world itself.

Max Mana Per Turn (M/T) *(Ch. 11)*: Fortitude + Mana: the most mana you can safely spend in one turn. Upkeep costs count toward it.

Prepared Spells *(Ch. 13)*: You can have spells prepared equal to your Intelligence. Swap freely outside combat; the list is fixed during a fight.

Running Dry *(Ch. 11)*: Spending your pool down to 0 knocks you unconscious until you recover mana.

Unchosen Option *(Ch. 12, 13)*: The option or spell you did not pick at a rank, bought later for Rank x2 XP.

Upcast *(Ch. 13)*: Extra mana beyond a spell's cost, declared before rolling, either to add dice or to augment the effect, never both.

Upkeep *(Ch. 13)*: The cost to keep a persistent effect going each Upkeep Phase: always the spell's mana cost minus 1.

Spell Keywords

AoE Shapes: Cone (1, then 3, then 5 zones forward; can hit allies), Line (every zone in one direction), and squares of 2x2, 3x3, 4x4, or 5x5 zones.

Attack: Deals damage to a target.

Buff: Gives an ally a positive effect.

CC (Crowd Control): Restricts movement or takes away actions.

Cleanse: Removes conditions from the living, or applies them to undead.

Conjuration: Creates an entity that acts on its own turn after a command; it cannot act the turn it appears.

Corrupt: Removes conditions from undead, or applies them to the living.

Debuff: Puts penalty dice or reduced stats on an enemy.

Drain: Removes mana directly from a target's pool.

Healing: Gives a target a PHP.

Persistent: Has a duration and can be kept going with upkeep.

Reaction: A spell cast in response to something on another character's turn.

Utility: A non-damage effect that changes the situation.

Vitality Pool: Health for a conjured entity or effect. At 0, it is destroyed.

Combination and Circle Magic

Circle Magic *(Ch. 13)*: Ritual magic made outside combat: scrolls, divination, summoning, teleportation, contracts, bindings, wards, augmentation, spatial magic, and time magic. A finished circle can be used at any time. Each discipline is its own Magical Knowledge with its own dots.

Combination Cap *(Ch. 13)*: A combination works at the lowest dot rating among its schools.

Combination Spell *(Ch. 13)*: A spell woven from two to six schools. It needs dots in every school equal to its rank and costs schools x dots in mana (4, 9, 16, 25, or 36).

Creation Magic *(Ch. 13)*: The combination of all seven schools at 7 dots: the only magic that brings new autonomous life into the world. It can be the work of many casters, or of a town's belief, over time.

Learning Combinations *(Ch. 13)*: Take one free in place of a rank's standard spell when a new dot meets its prerequisites, or buy it for Rank x2 XP per school.

Familiar *(Ch. 9)*: A creature bonded by the Familiar Bond Merit. It works like a SumMonz, stays out in its basic form at no mana cost, and does not count toward your

SumMonz on the field. Your Familiar Bond dots add to its Attack and Defense pools.

Item Circles *(Ch. 13)*: Summoning circles drawn on items you own so you can call them later. The largest size you can call equals your Summoning Magic dots.

SumMonz *(Ch. 13)*: A summoned fiend or soul summoned being kept on a card etched with its soul mark. You can have 1 on the field at 1 to 2 dots of Summoning Magic, 2 at 3 to 4, 3 at 5 to 6, and 4 at 7. Second, third, and fourth forms unlock at 3, 5, and 7 dots.

Weapons, Armor, and Items

Arcane Enhancement *(Ch. 9)*: A Merit that boosts a trait with a built-in enhancement and permanently lowers Max Mana Per Turn.

Armor *(Ch. 14)*: Only body armor and helmets add Armor. Light armor comes in ranks F to D (1 to 3), Medium D to B (3 to 5), Heavy B to S (5 to 7). Your Physical column limits what you can wear.

Artifact *(Ch. 13, 14)*: An item that gained random magical abilities in a place of dense mana. Attuning holds M/T equal to its Rating.

Augmentation *(Ch. 13, 14)*: A magical or mechanical enhancement built into the body or a weapon with an augment slot. Body augmentations hold M/T equal to their Rating.

Belt Slots *(Ch. 14)*: 3 items set before combat. The first used in a turn is free, the second costs 1 AP, the third 2 more. Slots 4 to 7 open only when an item or ability grants them.

Implement *(Ch. 13, 14)*: A magic item made on purpose for one known effect. Costs mana each use; no attunement.

Item Rating *(Ch. 14)*: A rank from F to S (1 to 7). It adds to the rolls the item is made for.

Shield *(Ch. 14)*: Adds its own Armor bonus: +1 Light, +2 Medium, +3 Heavy.

Weapon Rating *(Ch. 14)*: Comes from rank alone: F +1 up to S +7. Added to the damage pool.

Set before combat. 1st item free, 2nd costs 1 AP, 3rd costs 2 AP. Slots 4-7 unlock via upgrades.

CONDITIONS

check any that currently apply

- ☐ **Bleeding** Upkeep: roll Fortitude + Endurance vs. the effect's rating. Success 1 Bashing, fail 1 Lethal. Lasts until healed or Cleansed. Applying pressure (no other actions) stops the next tick.
- ☐ **Burning** Upkeep: roll Fortitude + Endurance vs. the spell's rating. Success 1 Bashing, fail 1 Lethal. Ends with Water Magic, or by spending your full turn putting it out (no movement or other actions).
- ☐ **Grappled** No belt items or attacks. Upkeep: Strength + Athletics to break free. If that fails, you may use your action to try again.
- ☐ **Prone** Standing up counts as moving 1 zone.
- ☐ **Blinded** Cannot cast any spell or make an attack that targets a person or zone.
- ☐ **Chilled** Penalty dice on Dexterity rolls. Ends with Fire Magic or Cleanse.
- ☐ **Poisoned** Upkeep: take the poison's damage value vs. your thresholds. Roll Fortitude + Endurance each turn to lower it. Ends at 0 or with Cleanse.
- ☐ **Rooted** Cannot move zones.

Notes

Combat Quick Reference

Turn Structure

1. **Upkeep Phase:** Regain mana by your Mana dots (see Mana and Magic) and 1 AP, each +1 if you took damage last turn. Pay all persistent effect upkeep costs (they count toward Max Mana Per Turn). Roll for Burning or Bleeding.
2. **Planning Phase:** Discuss strategy with allies. Declare intended actions. ST declares enemy actions.
3. **Move or Use Item Phase 1:** Move up to available zones, or use a belt item, or do both by spending AP.
4. **Action Phase:** Roll your attack against the target's defense roll. If the target wins, the attack misses. If you win, your excess successes carry forward to the damage roll.
5. **Damage Phase:** Roll your damage pool (damage Attribute + weapon Rating) and add the excess successes from the attack. Below BDT = no damage. Meet or exceed BDT = 1 Bashing. Meet or exceed LDT = 1 Lethal. Meet or exceed ADT = 1 Aggravated.
6. **Move or Use Item Phase 2:** May move remaining zones if any remain, or use a belt item, or both by spending AP.
7. **Ending Phase:** Triggered abilities and end-of-turn effects activate.

Action Points

- **Max AP held: 3. Max AP used per turn: 6.** You regain 1 AP during Upkeep (2 if you took damage).
- **Giving AP:** Allies may give each other AP freely. It costs no action. You can use AP from any mix of allies, but never more than 6 in one turn.
- **Spend 1 / 3 / 6 AP:** Add 1 / 2 / 3 dice to any roll.
- **Spend 1 / 3 / 6 AP:** Move 1 / 2 / 3 extra zones beyond your base movement.
- **Spend 1 Willpower** (once per turn, no action, mark 1 X): add 3 dice before a roll, or reroll up to 3 failed dice after it.
- **Spend 1 AP:** Swap to an alt weapon or retrieve a stowed item instead of using your attack action.

Movement

- Each zone is one square on the battlefield. Your starting position is your starting zone.
- **Dex 1-4:** 1 zone per turn across both movement phases.
- **Dex 5-6:** 2 zones per turn.
- **Dex 7:** 3 zones per turn.
- **Flight:** Minimum 2 zones per turn. Doubles available movement zones. Taking damage while airborne requires a Dexterity save or you begin to fall.
- **Mechanical flight:** You must use all of your movement every turn or begin to fall.
- Standing from prone counts as moving 1 zone.

Items & Equipment

- **Max 3 weapons** total. Max 2 wielded at once.
- Swapping to an alt weapon costs 1 AP or your attack action for that turn.
- **Belt (3 slots, set before combat):** 1 item free per turn. 2nd item costs 1 AP. 3rd item costs 2 more AP. Total to use all 3 in one turn: 3 AP.
- Items may only be used during Move or Use Item phases. Moving and using an item in the same phase requires spending AP.
- Retrieving a stowed item (not on your belt) costs 1 AP or your attack action.
- **Item Rating** (1 to 7) adds to relevant rolls. Rating 6 = A Rank. Rating 7 = S Rank.

Rolls and Successes

- Roll a pool of d10s. Each die showing **6 or higher** is a success. A **10** counts as 2 successes.
- **Attack roll:** Attribute + Ability + Combat Style (or Attribute + Magic + school dots for elemental magic) vs. the defender's roll. The defender chooses their own defense.
- **Damage roll:** Damage Attribute + weapon Rating (+1 at F up to +7 at S), plus the attack's excess successes. Compare the total to the target's BDT, LDT, and ADT.
- No critical successes or failures. Bigger margins can give more dramatic results at the ST's discretion.

Mana and Magic

- **Mana Pool** = (Magic + Circle Magic + every Magical Knowledge dot) × Mana.
- **Max Mana Per Turn** = Fortitude + Mana attribute.
- **Activation cost** = rank of effect (1 mana at rank 1 through 7 mana at rank 7).
- **Bonus dice:** 1 mana = 1 die, up to your school dots or Max Mana Per Turn. Declare before rolling, for attack or damage. Fire, Earth, Shade: damage only. Air, Bright: attack only. Water, Nature, Battle Aura: either.
- **Instant effects** last this turn, no upkeep. **Persistent effects** cost upkeep each Upkeep Phase equal to their mana cost minus 1. Drop them on your turn at no cost.
- **Recovery per Upkeep:** Mana 1-3: 1. 4-6: 2. 7-8: 3. 9: 4. 10: 5. +1 if you took damage. Out of combat, a few minutes of rest refills the pool.
- **Running dry:** Spending your pool to 0 drops you unconscious (Incapacitated) until you recover mana.

Ability Specialties

- A specialty is a specific condition that adds 1 die when the roll fits. Example: Awareness (Scent). Up to 3 per ability.
- One free at creation for an ability at 4+ dots. Others cost 5 XP with ST approval.

Social Combat

- Willpower is the health bar. Attacker rolls a Social Attribute + Ability; defender rolls Willpower + Composure. Excess successes deal Willpower damage. Your scales may add bonus or penalty dice.
- **Ends** when either side fills their row with X's, or 5+ damage is dealt in one retort.
- **Critical Comeback:** A defender who rolls 5+ successes over the attacker ends it in their favor.

Health and Damage Thresholds

- **BDT** = Fortitude + Armor rating. **LDT** = BDT x 2. **ADT** = BDT x 3.
- Health penalties stack across all damage types. A full column is not Incapacitated; another level of damage in a full column is.
- Aggravated damage leaves lasting injuries determined by the ST.
- **Burning / Bleeding:** each Upkeep, roll Fortitude + Endurance vs. the effect's rating: success 1 Bashing, failure 1 Lethal.

Rank Scale

Dots	Rank	Combat Styles	Magical Knowledges
1 dot	F Rank	Elementary	Core
2 dots	E Rank	Intermediate	Terrestrial
3 dots	D Rank	Advanced	Aerial
4 dots	C Rank	Saint	Lunar
5 dots	B Rank	Royal	Stellar
6 dots	A Rank	Imperial	Galactic
7 dots	S Rank	Divine	Cosmic
